# The revamped Producer Price Index

Patrick Kelly

5 March 2013

#### **New format of PPI**

No aggregate PPI

5 PPIs for domestic output – stages of production concept

- Agriculture, forestry and fishing
- Mining and quarrying
- Electricity and water
- Intermediate manufactured goods
- Final (finished) manufactured goods <u>new headline</u>

Import and Export – as before

Amalgamation of CPAP/JBCC and PPI construction tables

New Methods and sources document

### **PPI** weights

- Industry level based on 2011 value-added in the national accounts
- Industry weights to be updated each year from the annual national accounts
- Product weights to be updated annually on available information from large sample surveys
- Additional updates contained in these weights:
  - Mining updated with DMR data to 2011
  - Agriculture updated to 2011 (with income data from Dept of Agriculture)
- Chain linking of indices between years ensures correct rate of change

### PPI - Final manufactured goods

To assist in comparing this month's year on year rate, Stats SA has calculated a timeseries using the historic PPI data but putting it in the new format with the new weighting structure.

The following graphs compare this time series (Recalc) with a relevant published index from the old PPI (PPI).

### PPI - Final manufactured goods
