Notes

Forthcoming issues	Issue	Expected release date
	December 2001	15 February 2001

Purpose of the survey	The Survey of Trading Statistics of Hotels is a monthly survey covering a sample of private establishments in the formal accommodation industry in South Africa. The results of the survey are used to compile estimates of the Gross Domestic Product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used by the private sector in analyses of comparative business and industry performance. The results are published monthly in statistical release P6441 – Hotels: trading statistics.
New questionnaire	The Survey of Trading Statistics of Hotels was re-engineered in consultation with major stakeholders with the purpose of incorporating users' needs. This resulted in the change of some data items on the old questionnaire.
	The new questionnaire only collects the following data items -
	• room income;
	• income from catering;
	• income from bar-sales;
	• income from off sales;
	• other income (sundries);
	• total number of rooms available;
	• total number of room nights sold;
	• total number of beds available; and
	• total number of bed nights sold.
Changes regarding tourism regions	After consultation with major stakeholders in the hotel industry, the following changes regarding tourism regions were made and the first results were published in statistical release P6441 - Hotels: trading statistics,

	January 2000 on 16 March 2000:
	- Current tourism regions are grouped according to towns and cities, while the previous tourism regions were grouped according to magisterial districts (cf. table 7). - Hotels in Sandton which were previously included in the Rest of Gauteng tourism region, are now included in Johannesburg tourism region. - Jacaranda tourism region is called Pretoria tourism region. - The Lowveld and Escarpment tourism region and the Rest of Mpumalanga tourism region have been combined and is now called Mpumalanga tourism region. - The Rest of Gauteng tourism region and the Johannesburg tourism region were combined for comparison purposes in table B (cf. page 2). As a result of this, Stats SA now reports on 25 tourism regions in table B instead of 26 tourism regions. For more information, see table C, page 6.
New sample	According to international best practice and in order to train the relevant respondents in using the new questionnaire, validate the information received and avoid a break in the time series published in this statistical release, Stats SA decided to introduce the new questionnaire as the first step in the re-engineering process. Stats SA will in due course, as the second step, introduce a new sample.

Table C - Classification of towns and cities according to the new and old tourism regions

New tourism region	New towns and cities	Old tourism region	Magisterial districts

Additional information

Explanatory notes

Introduction 1	This publication contains results of the monthly Survey of Trading Statistics of Hotels conducted in November 2000. The survey is designed to obtain information regarding -
	▪ room income;
	▪ income from catering;
	▪ income from bar-sales;
	▪ income from off sales;
	▪ other income (sundries);
	▪ total number of rooms available;
	▪ total number of room nights sold;
	▪ total number of beds available; and
	▪ total number of bed nights sold.
Scope of the survey 2	The information is collected from a sample of hotels in South Africa and the results are published according to star grading, the nine provinces and 26 tourism regions as indicated in table 7. Stats SA updates the sample and the population of hotels in South Africa regularly as new hotels become operational or others close down. Hotels operating mainly on a time-share basis are excluded.

Classification 3	This publication provides information of trading statistics of hotels according to star grading, nine provinces and 26 tourism regions. The star grading system according to Satour's National Grading and Classification Scheme, classifies three-, four- and five-star hotels as having very good to outstanding standards, while one- and two-star hotels are classified as comfortable hotels. Ungraded hotels are not of a lesser standard, they just choose not to participate in the National Grading and Classification Scheme of Satour.
4	The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of all Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in this publication are presented at SIC group (4 digit) level.
Statistical unit 5	The statistical unit for the survey is the smallest economic unit (the hotel and its activities) that functions as a separate entity for which comprehensive financial statements are kept.
Survey methodology 6 **and design**	Information obtained from Satour provides the sampling frame for the selection of the sample of hotels for the monthly Survey of Trading Statistics of Hotels. Hotels in the sample are stratified according to star grading within each tourism region. The survey is collected by mail each month from a sample of approximately 430 hotels in 26 tourism regions. All three-, four-, and five-star hotels are completely enumerated. A systematic sample is drawn from ungraded hotels and one- and two-star hotels.
7	The information received from the sample of hotels is weighted according to the original sample design in order to represent the population of hotels. The number of rooms available per hotel is used as a measure of size for the calculation of weights. Weights are calculated for each star grading within each tourism region. Due to the small representation of some of the hotels according to their star grading within certain tourism regions, Stats SA is obliged to group some of the star gradings together to keep information of individual hotels confidential.
Reliability of 8 **estimates**	Data presented in this publication are based on information obtained from a sample of hotels and is, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all hotels in South Africa.
9	Inaccuracies may occur because of imperfections in reporting by enterprises

	and errors made in collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling error. Every effort is made to reduce non-sampling error to a minimum by careful designing of the questionnaire, pilot studies, editing of data and efficient operating procedures.
Related publications 10	Users may also wish to refer to the following publications which are available from Stats SA: • Bulletin of Statistics. • SA Statistics.
Unpublished 11 **statistics**	In some cases Stats SA can also make available information which is not published. This information can be made available in one or more of the following ways: computer printout, CD or diskette. Generally a charge is made for providing unpublished information.
Rounding-off 12 **of figures**	The figures in the tables have, where necessary, been rounded off to the nearest final digit shown. There may therefore be slight discrepancies between the sums of the constituent items of the totals shown.

Response rate

Glossary

Average hotel income	Average hotel income per bed night sold is room income divided by the

per bed night sold	number of bed nights sold.
Average hotel income per **room night sold**	Average hotel income per room night sold is room income divided by the number of room nights sold.
Bed occupancy rate	Bed occupancy rate represents the number of bed nights sold during the survey month expressed as a percentage of the total bed capacity available during the survey month.
Beds available per month	Beds available refer to the total number of beds available per month. A three-quarter bed is counted as one bed available and a double bed as two beds available. Cots are excluded.
Bed nights sold	Bed nights sold refer to the total number of beds occupied by visitors during the survey month.
Hotel income	Hotel income includes - - room income; - income from catering; - income from bar sales; and - other income.
Income from bar sales	Income from bar sales refers to income from the sale of liquor and beverages at the bar. Income from bar sales also includes the sale of cigarettes and other tobacco products.
Income from catering	Income from catering refers to income from meals and banqueting.
Other income	Other income (sundries) includes - - rentals and fees received for offices, shops, garages, billiard rooms and dance floors; - washing, ironing and laundry services; and - telephone and fax services.
Percentage change	Percentage change is the change in values of the relevant month compared to values of the same month in the previous year.

Reference month	Reference month for the survey refers to one calendar month.
Rooms available per month	Rooms available per month refer to the total number of rooms available per month.
Rooms available per month per hotel	Rooms available per month per hotel is calculated as the total number of rooms available for paying guests per month divided by total number of hotels.
Room nights sold	Room nights sold refer to the total number of rooms occupied by visitors during the survey month.
Room income	Room income is the income received from the sale of room nights. Where payments are received in advance of, or after the provision of accommodation to visitors, the monthly figure for room income may not necessarily be directly related to the number of room nights sold during the month. Income from meals is excluded from room income.
Room occupancy rate	Room occupancy rate represents the number of room nights sold during the survey month expressed as a percentage of the total number of rooms available during the survey month.

Hotel income (R million)	513.6	496.8	-3.3	-0.1	-1.0

Key findings for the month ended November 2000

The average room occupancy rate and the average bed occupancy rate of hotels in South Africa for November 2000 decreased by 3,3% and 1,8% respectively, compared with November 1999. Decreases in

the room occupancy rate were recorded in 6 of the 9 provinces. Free State recorded the largest decrease in the room occupancy rate (-14,2%), followed by KwaZulu-Natal (-9,5%) and North West (-6,4%). Decreases in the bed occupancy rate were recorded in 6 of the 9 provinces. Free State recorded the largest decrease in the bed occupancy rate (-14,0%), followed by Mpumalanga (-7,8%) and Northern Cape (-6,5%).

Decreases in the room occupancy rate were recorded in 16 of the 25 tourism regions for November 2000 compared with November 1999 (cf. table B, column 2). Rest of Free State tourism region recorded the largest decrease in the room occupancy rate (-22,4%), followed by Durban, Umhlanga tourism region (-14,5%) and Little and Central Karoo tourism region (-13,3%).

Decreases in the bed occupancy rate were recorded in 16 of the 25 tourism regions during the above-mentioned period (cf. table B, column 3). Rest of Free State tourism region recorded the largest decrease in the bed occupancy rate (-16,2%), followed by Bleomfontein and Transgariep tourism region (-12,4%) and Little and Central Karoo tourism region (-10,1%).

Decreases in hotel income were recorded in 16 of the 25 tourism regions during the above-mentioned period (cf. table B, column 4). Durban, Umhlanga tourism region recorded the largest decrease in hotel income (-29,8%), followed by East Rand tourism region (-17,9%) and Bloemfontein and Transgariep tourism region (-17,3%).
