

STATISTICS SOUTH AFRICA

BULLETIN
OF
STATISTICS

JUNE 2001
Vol. 35 No. 2

PREFACE

The Bulletin of Statistics is one of the country's oldest journals and has been published since 1922. Originally published monthly, it has appeared quarterly (March, June, September and December) since 1967.

The Bulletin of Statistics is a reference source which provides statistics in the form of time-series of short-term statistics on a month by month, a quarter by quarter and a year by year basis.

Most of the statistics used in the Bulletin are based on Statistics South Africa's (Stats SA) own databases. Information sourced from outside Stats SA is duly recognised at the end of each table. All tables, except those indicated, relate to South Africa.

Should your copy of this publication have any unacceptable printing or binding errors, it will be exchanged free of charge on receipt of the unacceptable copy. Please return it to Stats SA's head office at Private Bag X44, Pretoria, 0001 or Steyn's Building, Steyn's Arcade, 274 Schoeman Street, Pretoria.

A handwritten signature in black ink, appearing to read 'A. K. M.', is positioned to the left of a vertical line.

Statistician-General: Statistics South Africa

ABBREVIATIONS AND SYMBOLS USED

Abbreviations used

incl. - including
F - Female
FS - Free State
M - Male
T - Total
W - Weights
SA - South Africa(n)

Units of measurements

Ton - Metric ton of 1 000 kilograms (except where otherwise indicated).

Year and month - Calendar years and calendar months (except where otherwise indicated).

The code, where it appears under the column number, refers to the variable in Stats SA's data bank. This data bank contains data on time-series and is available at a fee on diskettes and other media.

Symbols used

.. = Data not available
_ = Nil or not applicable
0 or 0,0 = Figure too small to publish
() = Figures excluded from totals
_____ = A line drawn across a column of figures, indicates an interruption in the comparability of the series
* = Revised since previous issue(s)
a = As a result of the unaccountable low number of recorded births during January and February, the rates as well as the natural increase for 1987 were calculated on an adjusted number of births and are indicated with an 'a'.

A blank space in a column of figures means that the figure or figures are not yet available.

Rounding

Figures are rounded off independently of one another; details, therefore, may not add to totals because of rounding.

1. DEMOGRAPHY

1.1 Population mid-year estimates 1/

1.1.1 All population groups

It should be noted that the mid-year estimates will differ from the census data because the data refer to different dates. The mid-year estimates are estimates as at 30 June of the year concerned, while the census data reflect the situation as at census day of each census.

The mid-year estimates were obtained through the combination of cohort-component method and the use of the exponential growth rate method. Further elaboration can be found in Statistical release P0302 (Mid-year estimates).

1/ The mid-year estimates of the population are for South Africa. The estimates in respect of 1991 to 1996 were obtained by applying expected annual growth rates to the different populations.

1. DEMOGRAPHY
 1.2 Vital statistics
 1.2.1 1986 to 1990

In comparison with previous years the number of whites and coloureds born during January 1987 and February 1987 is relatively low (as well as the recorded births for Indians, coloureds and whites for 1988 (columns 20-22)). The number of recorded (registered) births during this period has been thoroughly investigated in collaboration with the Department of Home Affairs. No explanation could, however, be found for the relatively low number of recorded births during this period.

As a result of the unaccountably low number of recorded births during January and February, the rates as well as the natural increase for 1987, were calculated on an adjusted number of births and are indicated with an 'a'. The number of recorded births during January 1987 and February 1987 was adjusted on the basis of the number of recorded births during January and February each year from 1975 to 1985 in relation to the total number of recorded births per year.

The registration of vital events among Africans was introduced on a compulsory basis several years ago. However, notwithstanding serious efforts on the part of the registering authorities, the registration of vital events of Africans is still relatively low. Statistics South Africa (Stats SA) did collect and process statistics on recorded births among Africans for 1979, 1980 and 1990, but the figures were so low that they were not published. Statistics on deaths among Africans were, however, published and these have been included in the table below. However, because of the serious level of underreporting of deaths among Africans, it would be misleading to compute death rates based on the reported events. As such the rates have been omitted.

The data on marriages and divorces refer to those reported under civil law. In the past the marriages among the majority of Africans fell under the category of customary or religious marriages. As such, the number of marriages and divorces among Africans reported under civil law were negligible and therefore not published before.

Recorded births as from 1986-1990 were tabulated on a de jure basis, that is according to place of residence of the mother.

Series	Year	Number				Rate

	1988	..	4 907	1 251	18 432	1,56	1,32	3,71
	1989	..	4 729	1 282	18 637	1,48	1,33	3,72
	1990	..	5 217	1 421	20 031	1,60	1,46	3,97

- 1/ 'Recorded births' (columns 19-22) indicates the number of births recorded (registered) in a specific year irrespective of when the birth actually took place. 'Births' indicates the actual number of births that took place in a specific year and can be obtained from Statistical report No. 03-05-01 (1990).
- 2/ It should be noted that data on recorded deaths (columns 19-22) for 1989 and 1990 are relatively low in comparison with previous years. The decrease has been thoroughly investigated in collaboration with the Department of Home Affairs, but no explanation could, however, be found.
- 3/ The recorded birth rate, recorded death rate, natural increase rate, marriage rate and divorce rate (columns 23-25) are crude rates calculated per 1 000 of the estimated mid-year population. According to the fact that births and deaths are not fully registered, the number of births and deaths as well as the rates, which are derived therefrom, will necessarily differ to a greater or lesser extent from the reality.
- 4/ The recorded infant mortality rate (columns 23-25) is the number of recorded infant deaths (under one year of age) per 1 000 recorded live births.
- 5/ Recorded stillbirths (columns 19-22) were not included in the figures for either recorded births or recorded deaths.

1. DEMOGRAPHY
 1.2 Vital statistics
 1.2.2 1991 to 1998

As from 1991 statistical information regarding recorded births, recorded deaths and marriages is no longer available by population group. This table, therefore, contains information for the four population groups combined.

Recorded births, recorded deaths and marriage information indicate the number of births, deaths and marriages respectively that were recorded in a specific year, irrespective of when the event actually occurred.

Recorded births as from 1991 were tabulated on a de facto basis, that is, according to place of birth of the child.

Registrations	Year	Total	Male	Female	Unspecified
		26	27	28	29
1.2.2.1 Births 1/	1991	537 999	269 632	268 367	..
	1992	501 461
	1993	557 995
	1994	677 107
	1995	809 439
	1996	998 798
	1997	1 046 095
1.2.2.2 Deaths 2/	1991	176 475	103 690	72 785	-
	1992	177 841	102 804	75 037	-
	1993	201 273	117 603	83 670	-
	1994	213 279	123 495	89 784	-
	1995	268 025	155 347	112 678	-
	1996	327 253	186 538	140 530	185
1.2.2.3 Infant deaths	1991	18 185	9 697	8 488	-
	1992	17 576	9 600	7 976	-
	1993	17 851	9 584	8 267	-
	1994	17 332	9 306	8 026	-
	1995	22 865	12 244	10 621	-
	1996	24 606	12 979	11 581	46
1.2.2.4 Marriages 3/	1991	108 929	-	-	-
	1992	111 557	-	-	-
	1993	120 159	-	-	-
	1994	133 309	-	-	-
	1995	148 148	-	-	-
	1996	146 732	-	-	-
	1997	146 729	-	-	-
	1998	146 741	-	-	-

- 1/ As a result of the loss of data at Bureau Nucleus, the number of registered births for 1996 were adjusted, while those for 1997 were estimated. Further details can be found in Statistical release P0305 (Recorded births, 1990-1997).
- 2/ Data on recorded deaths for 1991 are lower than they ought to be, as the former KaNgwane and KwaNdebele experienced problems during 1991 with participating fully in the survey. Data on recorded deaths for 1992 are also lower than they ought to be, as the former KwaZulu, Gazankulu, QwaQwa and KwaNdebele experienced problems during 1992 with participating fully in the survey.
- 3/ As of the end of March 1998 the data held at Bureau Beta have been transferred to Bureau Nucleus. As a result vital statistics data which were more than a year old were destroyed, including late registration data for marriages for 1997.

1. DEMOGRAPHY
 1.2 Vital statistics
 1.2.3 Vital statistics - 1991-1998 - Divorces

Considering that the number of divorces from 1990-1991 indicated a relative decrease, the number of finalised divorces received from the registrars of the various divisions of the Supreme Court during 1992, was compared with the court rolls of finalised divorces of the courts concerned. It was found that Stats SA did not receive all the divorce information of the concerned courts. An adjustment was, therefore, made to the 1992 divorce information received, to provide a more accurate divorce figure.

In comparison with the data of the 1992 divorces, the number of divorces for 1993 is again relatively low. Following an enquiry, the various divisions of the Supreme Court confirmed that all relevant information on divorces for 1993 was supplied to Stats SA.

If information regarding all marriages and divorces is not supplied, incompleteness can occur. The occurrence of survey errors is, therefore, not inevitable and the extent to which it could effect marriages and divorces cannot be estimated.

Series	Year	Number					
		African	Coloured	Indian/ Asian	White	Mixed	Unspecified
		30	31	32	33	34	35
1.2.3.1. Divorces	1991	..	5 057	1 410	17 398
	1992	..	5 408a	1 850a	21 006a
	1993	..	5 920	1 676	19 020
	1994	4 754	5 190	1 684	18 250
	1995	8 174	5 029	1 601	16 788
	1996	7 243	4 190	1 489	15 831	191	3 831
	1997	7 174	4 634	1 685	15 295	184	5 259
	1998	6 673	3 760	1 753	14 443	250	8 883

Series	Year	Crude rate 1/					
		African	Coloured	Indian/ Asian	White	Mixed	Unspecified
		36	37	38	39	40	41
1.2.3.2 Divorces	1991	..	1,55	1,47	4,11
	1992	..	1,63	1,90	4,91
	1993	..	1,75	1,69	4,41
	1994	0,16	1,51	1,67	4,20
	1995	0,27	1,43	1,56	3,83
	1996	0,23	1,17	1,42	3,57

1/ The crude divorce rate is calculated for each population group, using the mid-year estimates as the denominator.

Series	Year	Modified crude rate 2/					
		African	Coloured	Indian/ Asian	White	Mixed	Unspecified
		42	43	44	45	46	47
1.2.3.3 Divorces	1997	201	948	764	1 509
	1998	184	764	786	1 416

2/ The modified crude divorce rate is used to denote the divorce rate based on the number of married couples, and is expressed as per 100 000 married couples. (See Statistical release P0307 for calculations.)

1. DEMOGRAPHY

1.3 Tourism

1.3.1 Arrivals: Foreign travellers by purpose of visit

With effect from 4 January 1993 a new computerised system for the recording of travellers to and from South Africa was implemented by the Department of Home Affairs. With the new system South African residents are not required to complete departure or arrival forms when they leave or enter the country. Their particulars are obtained directly from their passports. Consequently, only the number and mode of travel of South African residents leaving or entering the country as tourists at computerised ports are available. (It is also not possible to distinguish between emigrants and other people travelling abroad.)

Foreign travellers visiting South Africa still complete arrival forms, but do not complete forms on departure. The particulars of foreign travellers leaving the country are obtained by means of the computer system on basis of the information furnished on arrival.

Year or month	Purpose of visit								
	Total	Business	Holiday	Study	Work	Transit	Contract worker	Border traffic	Unspecified

1. DEMOGRAPHY

1.4 Documented migration

1.4.3 Self-declared emigrants by country of destination 1/

Stats SA published complete self-declared emigration data up to and including December 1992. Since basic information on self-declared emigration was not available thereafter, it was not possible to publish data on self-declared emigration on a monthly basis for the period January 1993 to October 1993. However, as from 26 October 1993 the Department of Home Affairs implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports, complete departure forms. This system was implemented at these three airports only, as approximately 97% of the self-declared emigrants left the country through these three ports. This system made it possible to again obtain and process information on South African tourists and self-declared emigrants leaving the country through these three airports as from November 1993. In order to estimate the number of self-declared emigrants for the period January 1993 to October 1993, an interpolation was carried out with the aid of a regression model.

1/ As from 1 January 1987 occupations are classified according to the Standard Classification of Occupations, First Edition, 1986.

2.1	Economically active population aged 15 to 65 years	2.1
2.1.1	Mid-year estimates - Population group and gender	2.1
2.1.2	Industry divisions	2.1
2.1.3	Major occupational groups	2.2
2.2	Number of employees and gross salaries and wages according to industry	2.4
2.2.1	Mining and quarrying	2.4
2.2.1.1	Gold	2.4
2.2.1.2	Non-gold	2.4
2.2.1.3	Total	2.5
2.2.2	Manufacturing	2.5
2.2.2.1	Food products, beverages and tobacco products	2.5
2.2.2.2	Textiles, clothing and leather products	2.6
2.2.2.3	Wood and products of wood and cork, except furniture. Articles of straw and plaiting materials. Paper and paper products. Publishing and reproduction of recorded media	2.6
2.2.2.4	Coke, refined petroleum products and nuclear fuel. Chemicals and chemical products. Rubber and plastic products	2.7
2.2.2.5	Other non-metallic mineral products	2.7
2.2.2.6	Basic metals, fabricated metal products, machinery and equipment and office, accounting and computing machinery	2.8
2.2.2.7	Electrical machinery and apparatus n.e.c.	2.8
2.2.2.8	Radio, television and communication equipment and apparatus and medical, precision and optical instruments, watches and clocks	2.9
2.2.2.9	Transport equipment	2.9
2.2.2.10	Furniture, manufacturing n.e.c. and recycling	2.10
2.2.2.11	Total	2.10
2.2.3	Electricity, gas and water supply	2.11
2.2.4	Construction	2.11
2.2.5	Wholesale, retail and motor trade and hotels	2.12
2.2.6	Transport, storage and communication	2.12
2.2.6.1	Governmental institutions	2.12
2.2.6.2	Non-governmental institutions	2.13
2.2.6.3	Total	2.13
2.2.7	Financial institutions	2.14
2.2.8	Community, social and personal services	2.15
2.2.8.1	Government sector	2.15
2.2.8.1.1	National departments	2.15
2.2.8.1.2	Provincial administrations	2.16
2.2.8.1.3	Local governments	2.16
2.2.8.1.4	Other government institutions	2.17
2.2.8.1.5	Total	2.17
2.2.8.2	Laundries and dry-cleaning services	2.18
2.2.8.3	Total	2.18
2.2.9	Total (all industries)	2.19
2.3	Average monthly salaries and wages per employee, at current prices, according to industry	2.20
2.3.1	Mining and quarrying	2.20
2.3.2	Manufacturing	2.20
2.3.2.1	Food products, beverages and tobacco products	2.20
2.3.2.2	Textiles, clothing and leather products	2.21
2.3.2.3	Wood and products of wood and cork, except furniture. Articles of straw and plaiting materials. Paper and paper products. Publishing and reproduction of recorded media	2.21

2.3.2.4	Coke, refined petroleum products and nuclear fuel. Chemicals and chemical products. Rubber and plastic products	2.22
2.3.2.5	Other non-metallic mineral products	2.22
2.3.2.6	Basic metals, fabricated metal products, machinery and equipment and office, accounting and computing machinery	2.23
2.3.2.7	Electrical machinery and apparatus n.e.c.	2.23
2.3.2.8	Radio, television and communication equipment and apparatus and medical, precision and optical instruments, watches and clocks	2.24
2.3.2.9	Transport equipment	2.24
2.3.2.10	Furniture, manufacturing n.e.c. and recycling	2.25
2.3.2.11	Total	2.25
2.3.3	Electricity, gas and water supply	2.26
2.3.4	Construction	2.26
2.3.5	Wholesale, retail and motor trade and hotels	2.27
2.3.6	Transport, storage and communication	2.27
2.3.6.1	Governmental institutions	2.27
2.3.6.2	Non-governmental institutions	2.28
2.3.6.3	Total	2.28
2.3.7	Financial institutions	2.29
2.3.8	Community, social and personal services	2.29
2.3.8.1	Government sector	2.29
2.3.8.1.1	National departments	2.29
2.3.8.1.2	Provincial administrations	2.30
2.3.8.1.3	Local governments	2.30
2.3.8.1.4	Other government institutions	2.31
2.3.8.1.5	Total	2.31
2.3.8.2	Laundries and dry-cleaning services	2.32
2.3.8.3	Total	2.32
2.3.9	Total (all industries)	2.33
2.4	Average monthly salaries and wages per employee, at constant 1995 prices, according to industry	2.34
2.4.1	Mining and quarrying	2.34
2.4.2	Manufacturing	2.34
2.4.2.1	Food products, beverages and tobacco products	2.34
2.4.2.2	Textiles, clothing and leather products	2.35
2.4.2.3	Wood and products of wood and cork, except furniture. Articles of straw and plaiting materials. Paper and paper products. Publishing and reproduction of recorded media	2.35
2.4.2.4	Coke, refined petroleum products and nuclear fuel. Chemicals and chemical products. Rubber and plastic products	2.36
2.4.2.5	Other non-metallic mineral products	2.36
2.4.2.6	Basic metals, fabricated metal products, machinery and equipment and office, accounting and computing machinery	2.37
2.4.2.7	Electrical machinery and apparatus n.e.c.	2.37
2.4.2.8	Radio, television and communication equipment and apparatus and medical, precision and optical instruments, watches and clocks	2.38
2.4.2.9	Transport equipment	2.38
2.4.2.10	Furniture, manufacturing n.e.c. and recycling	2.39
2.4.2.11	Total	2.39
2.4.3	Electricity, gas and water supply	2.40
2.4.4	Construction	2.40
2.4.5	Wholesale, retail and motor trade and hotels	2.41
2.4.6	Transport, storage and communication	2.41
2.4.6.1	Governmental institutions	2.41
2.4.6.2	Non-governmental institutions	2.42
2.4.6.3	Total	2.42

2.4.7	Financial institutions	2.43
2.4.8	Community, social and personal services	2.43
2.4.8.1	Government sector	2.43
2.4.8.1.1	National departments	2.43
2.4.8.1.2	Provincial administrations	2.44
2.4.8.1.3	Local governments	2.44
2.4.8.1.4	Other government institutions	2.45
2.4.8.1.5	Total	2.45
2.4.8.2	Laundries and dry-cleaning services	2.46
2.4.8.3	Total	2.46
2.4.9	Total (all industries)	2.47
2.5	Average monthly hours paid for per employee according to industry	2.48
2.5.1	Mining and quarrying	2.48
2.5.2	Manufacturing	2.48
2.5.2.1	Food products, beverages and tobacco products	2.48
2.5.2.2	Textiles, clothing and leather products	2.49
2.5.2.3	Wood and products of wood and cork, except furniture. Articles of straw and plaiting materials. Paper and paper products. Publishing and reproduction of recorded media	2.49
2.5.2.4	Coke, refined petroleum products and nuclear fuel. Chemicals and chemical products. Rubber and plastic products	2.50
2.5.2.5	Other non-metallic mineral products	2.50
2.5.2.6	Basic metals, fabricated metal products, machinery and equipment and office, accounting and computing machinery	2.51
2.5.2.7	Electrical machinery and apparatus n.e.c.	2.51
2.5.2.8	Radio, television and communication equipment and apparatus and medical, precision and optical instruments, watches and clocks	2.52
2.5.2.9	Transport equipment	2.52
2.5.2.10	Furniture, manufacturing n.e.c. and recycling	2.53
2.5.2.11	Total	2.53
2.5.3	Electricity, gas and water supply	2.54
2.5.4	Construction	2.54
2.5.5	Wholesale, retail and motor trade and hotels	2.55
2.5.6	Transport, storage and communication	2.55
2.5.6.1	Governmental institutions	2.55
2.5.6.2	Non-governmental institutions	2.56
2.5.6.3	Total	2.56
2.5.7	Financial institutions	2.57
2.5.8	Community, social and personal services	2.57
2.5.8.1	Government sector	2.57
2.5.8.1.1	National departments	2.57
2.5.8.1.2	Provincial administrations	2.58
2.5.8.1.3	Local governments	2.58
2.5.8.1.4	Other government institutions	2.59
2.5.8.1.5	Total	2.59
2.5.8.2	Laundries and dry-cleaning services	2.60
2.5.8.3	Total	2.60
2.5.9	Total (all industries)	2.61
2.6	Total number of vacancies as on the last day of the month according to industry	2.62

2.7	Unemployed - October household survey, 1999	2.64
2.7.1	Unemployed in urban and non-urban areas by age, population group and gender	2.64
2.7.1.1	Using the official definition	2.64
2.7.1.2	Using the expanded definition	2.66

2. LABOUR

2.1 Economically active population aged 15 to 65 years

2.1.1 Mid-year estimates - Population group and gender

2. LABOUR
2.2 Employment, salaries and wages

Employment, salaries and wages - Unless otherwise stated in the notes that follow, the following is applicable:

Employment refers to the number of paid employees, including casual and seasonal employees. Annual data are shown as at 30 June of the relevant year, whereas quarterly data are shown as at the last pay-day of the relevant quarter.

Since January 1993 the industrial classification of employment figures is based on the Standard Industrial Classification of all Economic Activities (SIC), Fifth Edition, January 1993. The major and subgroup classification of the latter industrial classification differs in some cases from the classification that was used until December 1992. The above-mentioned classification is obtainable from Stats SA, free of charge.

Salaries and wages shown are gross salaries and wages, that is, salaries and wages before any deductions are made. Annual figures are shown for the relevant calendar year. Salaries and wages include overtime earnings, all allowances and bonuses, as well as employers' contributions to holiday, pension, provident and medical funds and contributions to the Unemployment Insurance and Compensation Funds.

Prior to 1998 Stats SA conducted 17 discrete monthly or quarterly business/organisation surveys. In order to improve coverage and reliability, lessen the respondent burden and fulfil the International Monetary Fund's (IMF) Special Data Dissemination Standards (SDDS) regarding timeliness and data quality, to which South Africa subscribes, Stats SA has overhauled and redesigned its suite of 17 labour surveys, with the assistance of the Australian Bureau of Statistics (ABS). These surveys have been replaced with two new complementary country wide surveys.

The Survey of employment and earnings (SEE) in selected industries is a quarterly sample survey. Information is collected in March, June, September and December of each year. The survey collects and provides information on current indicators of employment and the contribution of salaries and wages to the gross domestic product (GDP) needed for compiling the national accounts for South Africa and is required to meet the international reporting obligations, particularly regarding the IMF's SDDS. The STEE was piloted in the third quarter of 1997 and is in operation as from the first quarter of 1998. This survey collects data items which includes -

- number of employees who received pay for any part of the last pay period ending on or before the end of the reference quarter (total, full-time and part-time employees);
- number of employees who commenced working for the business/organisation during the reference quarter;
- number of employees who left the business/organisation during the reference quarter;
- total gross salaries and wages paid for all payrolls for the reference quarter; and
- total severance, termination and redundancy payments paid during the reference quarter.

The Survey of average monthly earnings (AME) in selected industries is a quarterly sample survey and will collect information in February, May, August and November of each year. This survey serves as a vehicle for monitoring current indicators of the South African economy. The output from this collection is important for economists as well as policy-makers. The AME, piloted in 1998 and in operation from February 1999, will collect the following information -

- total number of employees who received pay for any part of the last pay period ending on or before the last day of the reference month;
- total full-time and part-time employees who received pay for any part of the last pay period ending on or before the last day of the reference month;
- ordinary-time hours paid for during the reference month;
- ordinary-time hours paid for by full-time and part-time employees during the reference month;
- overtime hours paid for by full-time and part-time employees during the reference month;
- basic salaries and wages paid for the reference month;
- basic salaries and wages paid to full-time and part-time employees for the reference month;
- performance and other bonuses paid to full-time and part-time employees for the reference month;
- overtime paid to full-time and part-time employees for the reference month; and
- number of vacancies as at the end of the reference month.

Average monthly salaries and wages will be reflected in the Bulletin of Statistics as from December 2000 in Table 2.3.

Ordinary time and overtime hours paid for and vacancies will be reflected in the Bulletin of Statistics as from March 2001.

Prior to 1998 the monthly manufacturing, construction and electricity surveys collected and provided current indicators on employment, and the contribution of wages and salaries for compiling the national accounts of South Africa. Information on hours worked and labour turnover was also collected. Each of these surveys had 132 data items. A stratified systematic sample design was used to collect the necessary information. All large businesses/organisations were completely enumerated and systematic samples were drawn from medium and small businesses/organisations. The basis for the selection of the sample was the number of employees. Data items collected through the questionnaire included -

- number of employees on the last pay day of the month (weekly and monthly paid employees by population group);
- number of discharges during the month;
- number of resignations during the month;
- number of employees appointed during the month (weekly and monthly paid employees by population group);
- total gross salaries and wages for the month;
- overtime wages;
- bonuses paid for the month;
- total actual hours worked; and
- staff shortages.

Therefore, some of the detail information collected and published previously, is not available as from 1998.

2. Labour
 2.2 Number of employees and gross salaries and wages according to industry
 2.2.1 Mining and quarrying
 2.2.1.1 Gold

Mining and quarrying - Employment is the average daily number of persons employed during the relevant quarter. Salt works, power supply companies and iron and steel works are excluded.

Data of the mining and quarrying industry include data in respect of the former TBVC states as from January 1994. The total employment in these states for January 1994 amounted to approximately 9,0% of the total employment of the mining and quarrying industry (columns 37-42).

2.2.2 Manufacturing
 2.2.2.1 Food products, beverages and tobacco products

The data are derived from a quarterly sample survey and also include public corporations and government undertakings. Data have been revised to correspond with the latest census results. On request of users, the information on manufacturing was expanded from a major group basis to a subgroup basis. To accommodate this expansion, the sample was enlarged and was implemented as from November 1992. Information on a subgroup basis is published from January 1993 and is not available for the period prior to January 1993.

As from January 1996 data on the manufacturing industry also include particulars of the former TBVC states. According to the information at the disposal of Stats SA, the contribution regarding the former TBVC states for March 1996 amounted to 5,8% of the total employment of the manufacturing industry.

2. Labour

2.2 Number of employees and gross salaries and wages according to industry

2.2.3 Electricity, gas and water supply

The data are based on a sample survey and refer to private establishments and public corporations which have as their main activity the generation and/or distribution of electricity gas and water.

As from January 1996 data on the electricity industry also include particulars of the former TBVC states. According to the information at the disposal of Stats SA, the contribution regarding the former TBVC states for March 1996 amounted to 1,9% of the total employment of the electricity industry.

As from 1998 there has been a reclassification of water boards from local governments into the electricity industry. This change was brought about by a new Act, the Water Services Act No. 108 of 1997, which caused a change in the definition of the main industrial activity of the water boards. Water boards are now classified under the Standard Industrial Classification of all Economic Activities (SIC) as the 'collection, purification and distribution of water', which falls under the electricity industry.

2.2.4 Construction

The data represent the employment in private construction and are based on a quarterly sample survey. Data have been revised to correspond with the latest census results. As from January 1996 data on the construction industry also include particulars of the former TBVC states. According to the information at the disposal of Stats SA, the contribution regarding the former TBVC states amounted to 0,1% of the total employment of the construction industry.

1/ Building construction includes construction work done by general contractors, as well as by special trade contractors.

2. Labour

2.2 Number of employees and gross salaries and wages according to industry

2.2.5 Wholesale, retail and motor trade and hotels

The data related to wholesale trade, retail trade, motor trade and hotels are based on quarterly sample surveys. Data on the former TBVC states were included in the wholesale, retail and motor trade industry as from the first quarter of 1996. Information available to Stats SA indicates that the total employment of the commercial sector in these areas for March 1996 amounted to approximately 0,1% of the total employment for the wholesale trade, 1,0% of the total employment for the retail trade, and 0,7% of the total employment for the motor trade. For the hotels industry, data on the former TBVC states were included as from the first quarter of 1995. The total employment in these states for March 1995 amounted to approximately 16,0% of the total employment of the hotels industry.

2.2.6 Transport, storage and communication

2.2.6.1 Governmental institutions

Transport, storage and communication consist of governmental institutions and non-governmental institutions.

Governmental institutions - The data refer to all activities of Transnet Ltd, The South African Broadcasting Corporation (SABC), SA Post Office Ltd and Telkom SA Ltd.

Non-governmental institutions - The data are derived from a sample survey of private businesses transporting goods or passengers by road for reward.

2. Labour

2.2 Number of employees and gross salaries and wages according to industry

2.2.7 Financial institutions

Banking institutions include the SA Reserve Bank and the Land and Agricultural Bank of SA.

For the banking institutions, building societies and insurance companies, data on the former TBVC states were included as from the first quarter of 1995. The total employment in these states for March 1995 amounted to approximately 1,0% of the total employment of the financial institutions industry.

2. Labour
 2.2 Number of employees and gross salaries and wages according to industry
 2.2.8 Community, social and personal services
 2.2.8.1 Government sector
 2.2.8.1.1 National departments

As from March 1992 the gross salaries and wages of community, social and personal services, excluding laundries and dry-cleaning services, include employers' contributions to funds and are, therefore, not comparable with information that were previously published. Contributions to pension, provident, medical aid, sick pay and other funds, e.g. Unemployment Insurance Fund and Compensation Fund, are included.

As from the second quarter of 1994 the information on the governments and the local authorities of the former TBVC states were included in the public industry which is part of this major industrial industry. The total employment in these states for June 1994 amounted to approximately 12,0% of the total employment of the public industry. As from the first quarter of 1996 the information on all the universities of the former TBVC states is included in the public industry. The total employment for universities in these states for March 1996 amounted to approximately 11,0% of the total employment of the universities.

As from 1998 there has been a reclassification of water boards from local governments into the electricity industry. This change was brought about by a new Act, the Water Services Act No. 108 of 1997, which caused a change in the definition of the main industrial activity of the water boards. Water boards are now classified under the Standard Industrial Classification of all Economic Activities (SIC) as the 'collection, purification and distribution of water', which falls under the electricity industry.

2. LABOUR

2.7 Unemployed - October household survey, 1999

2.7.1 Unemployed in urban and non-urban areas by age, population group and gender

The October household survey (OHS) (columns 594-623) is an annual sample survey that was undertaken for the first time in 1993 by Statistics South Africa (Stats SA). The original purpose of the OHS was to fill the gap that resulted from the suspension of the current population survey (CPS) amongst Africans in 1990 and amongst coloureds and Indians in 1991, as well as the suspension of the related survey on the informal sector.

Since 1994 the main purpose of the OHS has been to collect information for monitoring the RDP. Information is collected on households and individuals according to the nine provinces. Labour market information such as the economically active population, the unemployed and informal sector participation, as well as demographic information on births and deaths is also collected.

As from 1994 the OHS included the former TBVC states and covers the nine provinces of South Africa as they currently exist.

Stats SA uses the following definition of unemployment as its official definition: The unemployed are those people within the economically active population, who: (a) did not work during the seven days prior to the interview, (b) want to work and are available to start work within a week of the interview, and (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview. The expanded unemployment rate does not require criterion (c).

Among those who are included in the expanded but not the official definition of unemployment, will be discouraged job-seekers (those who said they were unemployed but had not taken active steps to find work in the four weeks prior to the interview).

Stats SA will continue to report on the situation of the unemployed using both the official and the expanded definition, since in the present economic climate, there is a large group of discouraged work seekers whose life circumstances need to be taken into account.

3. PRICES
3.1 Production price indices

The production price index (PPI) measures price trends of commodities produced throughout the major sectors of the economy, i.e. agriculture, forestry, fishing, mining, manufacturing, electricity, gas and water and wholesale and retail trade (in the case of imported goods).

All commodities included in the PPI, are classified according to the Standard Industrial Classification of all Economic Activities (SIC). The SIC is based on a standard industrial classification compiled by the United Nations (UN) for international use. Commodities in the manufacturing sector are divided into 23 major industrial groups according to the SIC.

Price information is collected for products known as 'indicator products'. Indicator products are identified as those products whose sale value represents the largest part of the total value of sales (turnover) in an industrial group. Prices are collected at the first sales point after production, which is producers in the case of locally produced commodities, and wholesalers or retailers in the case of imported commodities. Prices 'ex-factory' are requested but 'delivered' or 'free on rail/free on board' are accepted if it is the normal basis of quotation. Where prices are dependent on the quantity purchased or the class of purchaser, the price for the predominant quantity or class of purchaser is collected. Value-added tax (VAT) is excluded and normal discounts generally available to purchasers are deducted from quoted prices.

Where possible price information is collected at successive time intervals for the same grade or quality of commodities. In the case of specialised commodities, such as machinery and transport equipment, price information is collected for equivalent items. Where quality or other changes occur in commodities, or where substitute commodities are introduced, the price indices are adjusted to compensate for any change in the price solely due to quality or similar changes.

Price information refers to the first seven days of the relevant month, except in the mining and agricultural sectors where average prices for the relevant month are collected. Most prices for commodities manufactured locally are collected at three-monthly intervals, while prices of imported commodities are collected monthly. If Statistics South Africa (Stats SA) were notified of price changes for products not surveyed on a monthly basis, products would be surveyed whenever price changes occur.

3.1.1 Commodities for South African consumption

Indices in this table reflect price changes for all commodities for South African consumption, i.e. locally produced and sold, as well as imported commodities.

3. PRICES

3.1 Production price indices

3.1.3 Materials used in certain industries

A third series of indices is also calculated, namely production price indices for materials used in the following industries:

Building and construction
 Building industries
 Civil engineering
 Mechanical engineering
 Electrical engineering

The price information collected for the indices shown in Tables 3.1.1 and 3.1.2 is utilised for the calculation of these indices.

The weights are based on the values of materials used in the relevant industries.

Base: 2000=100

Year or month	Industry

3. PRICES

3.2 Farming price indices

3.2.1 Producers prices of farm products

Indices of producers' prices of farm products are calculated monthly by the Directorate: Agricultural Statistics and Management Information of the National Department of Agriculture. The base period for the index is the average for the year 1995. The price indices of each product and for each group of products have been weighted according to the gross value of sales for the year 1995. Subsidies, additional payments and premiums to producers have been included in the prices used for the calculation of the index numbers, while levies paid by producers are deducted.

Base: 1995=100

1/ Wool and mohair.

2/ Butterfat and milk-is-milk.

3/ Cattle, sheep and pigs.

4/ Eggs and broilers.

3. PRICES
 3.2 Farming price indices
 3.2.2 Farming requisites

Indices of certain farming requisites are calculated quarterly by the Directorate: Agricultural Statistics and Management Information of the National Department of Agriculture. The following farming requisites are included: cultivation, harvesting and other implements, spare parts, trucks, tractors, fertilisers, fuel, feeds, fencing material, dips and sprays, building material, bags and twine. The indices are calculated from retail prices ('free on rail', 'at the coast' or 'at the factory') received quarterly from a number of representative importers, factories and dealers, except in the case of building material, which is based on wholesale prices collected by Stats SA. The base period on which the indices have been calculated is 1995=100. Value-added tax (as from October 1991) is excluded. Annual figures cover the period 1 July to 30 June of the relevant years.

3. PRICES

3.2 Farming price indices

3.2.3 Food basket of farm products - Producers' share of consumer prices (percentages)

The producers' share of the consumer price is the farmer's gross income for the product, expressed as a percentage of the retail price. The remaining portion of the consumer price represents transport, manufacturing and other costs, gross profit of dealers, etc.

The consumer price of each food item is based on an average retail price calculated by Stats SA. The 'food basket' comprises items of which the major content is South African farm produce. Although the weights of these items are based on a Stats SA survey on income and expenditure of households, it does not correspond with the coverage of products used for the calculation of the consumer price index. As from November 1995 the weighting system is based on statistics from the Survey of household expenditure, 1990, while previous weights were based on a similar survey conducted in 1975.

3. PRICES
 3.3 Consumer prices
 3.3.1 Indices for metropolitan areas

The consumer price index is calculated for each of 13 urban areas in South Africa separately and combined. The average for 2000 is currently used as base (100).

Each of the urban areas for which an index is calculated has its own weight. The weights and indices for the areas are combined by means of the following weights to obtain the weighted average:

	Weight
Cape Peninsula	12,75
Port Elizabeth/Uitenhage	3,44
East London	0,81
Kimberley	0,40
Pietermaritzburg	2,23
Durban/Pinetown	10,73
Pretoria/Centurion/Akasia	12,75
Witwatersrand	50,81
Klerksdorp/Stilfontein/Orkney	1,42
Free State Goldfields	1,62
Bloemfontein	1,01
Nelspruit/Witbank	1,21
Pietersburg	0,82
	<hr/> 100,00

The consumer price indices for the different urban areas do not permit inter-urban comparisons of price levels or costs of living. The indices show the price changes which have taken place from time to time in each of the urban areas, independently of any other urban area.

3. PRICES

3.3 Consumer prices

3.3.2 Indices of groups - Metropolitan areas

The weighting system of the index is based on the survey of expenditure patterns of households conducted during 1995. Certain expenditures are not taken into account for the purposes of the consumer price index, for example income tax, contributions to pension and provident funds, premiums of life and endowment policies and expenditure of a capital nature (for example payment on home loans, excluding interest). Prices are collected by means of a postal enquiry directly from a representative sample of retail and service establishments in the different areas, or from other organisations, associations or public bodies. Rent and domestic workers' wages are obtained from annual surveys. For most other food items, as well as for clothing, fuel and washing and cleaning materials, prices are collected every month, while for most other items, for example furniture and equipment, personal care requisites, stationery, etc. prices are collected three-monthly. Certain price information is obtained annually or as often as price changes occur. Price information for all items refers to the first seven days of the relevant months.

3. PRICES
 3.3 Consumer prices
 3.3.3 Seasonally adjusted indices

The consumer price index (and its components) is a time series which measures changes in consumer prices over time. A time series (especially an economic time series) normally reflects the combined effects of the underlying seasonal trend, cyclical and irregular factors which may influence it. These factors which form the values of a time series are usually referred to as the components of the time series. Seasonal fluctuations in a time series are those fluctuations which usually tend to occur at about the same time and with about the same magnitude each year. It may be the result of climatic influences or other social and commercial habits (e.g. the price of bread which was revised in October each year).

Businessmen, economists and researchers are often interested to determine whether the values of the latest (say) month or the latest few months of a time series possibly indicate a change in the trend, or if perhaps a 'turning point' in the business cycle has been reached. A short-term change in the course of an index may merely be the result of seasonal influences, while some might want to attribute this to other factors. It may occur that, while differences between successive (say) monthly values of a time series could merely be attributed to seasonal influences, some may want to attach another meaning to this. The primary objective of a seasonal adjustment is to eliminate the influence of a seasonal component which recurs at the same time(s) each year so that the underlying tendency (i.e. the trend and cyclical movement) can be observed more clearly. A seasonally adjusted time series will thus show relatively fewer fluctuations or variations.

In the analysis of a time series (this is a process whereby it is endeavoured to isolate the above-mentioned possible components of a time series separately) Stats SA makes use of the X-11 technique, which was developed by the American Bureau of Census (of the United States of America). Value-added tax has, for the purpose of calculation of the seasonal factors, not been taken into account, as a change in the rate of value-added tax can be regarded as an irregularity of which the influence on an applicable time series is known. In other words, the seasonal factors are based on indices which are compiled from prices before value-added tax has been added. The seasonal factors are applied, or the seasonal adjustments are done on indices which include value-added tax where applicable. Due to the limited time in which the statistical release is always prepared, it has been decided not to calculate seasonal factors concurrently, but for one month in advance. The seasonally adjusted indices for the latest month will, therefore, be calculated with projected seasonal factors which are based on a time series analysis, which has taken into account data up to and including the previous month. Seasonally adjusted indices, however, will be revised annually in January of each year.

The use of seasonally adjusted price indices.

If the (say) monthly changes in a time series (such as a price index) which include a statistically significant seasonal component are of interest, the appropriate seasonally adjusted time series ought to be used. Therefore, the monthly changes in the respective indices in Table 3.3.2 will in future be calculated using seasonally adjusted indices. It should be noted that if the annual changes in a price index are of interest, as in the case with the annual inflation rate, the seasonal effect has no influence and the non-seasonally adjusted indices can be applied.

The use of the consumer price index otherwise varies according to the type of user, e.g. an economist who wishes to analyse economic trends will, for instance, apply the consumer price index in a different manner than an attorney who wishes to calculate the escalation of maintenance granted in a divorce case. The former would rather use the seasonally adjusted indices, while the latter (where the actual increases are of importance) would use the non-adjusted indices.

Where the historical course of the indices is to be used to make projections, the seasonally adjusted indices would be the obvious indices to use, while for the adjustment of, for instance, contracts where the actual change in consumer prices is to be taken into account, the non-adjusted indices would be the more appropriate.

5. MINING

5.1 Indices of the physical volume of mining production

The indices of the physical volume of mining production are based on information furnished by the Minerals Bureau, Department of Minerals and Energy. The weighting factors used for the computation of the indices, are based on the gross values of production of the individual minerals in 1995. Two indices are shown for total mining production, namely an index including gold production and an index which excludes gold production.

Monthly statistics are preliminary and subject to amendments.

1/ Iron ore includes haematite and magnetite.

2/ Other metals (columns 10 and 24) and other non-metals (columns 14 and 28) include all other metallic minerals and other non-metallic minerals which are not shown separately.

3/ Diamonds include mine and alluvial diamonds.

4/ Building materials include the following minerals: gypsum, lime and limestone, vermiculite, fire clay, flint clay, granite or norite, marble, quartzite, schist, shales for cement, siltstone, slate, quarries and brickmaking.

1/ Iron ore includes haematite and magnetite.

2/ Other metals (columns 10 and 24) and other non-metals (columns 14 and 28) include all other metallic minerals and other non-metallic minerals which are not shown separately.

3/ Diamonds include mine and alluvial diamonds.

4/ Building materials include the following minerals: gypsum, lime and limestone, vermiculite, fire clay, flint clay, granite or norite, marble, quartzite, schist, shales for cement, siltstone, slate, quarries and brickmaking.

5. MINING

5.2 Production and sales

Amended monthly figures are not published in all cases, but are taken into account when annual figures are compiled. The published monthly figures, therefore, do not necessarily add up to the annual figures.

Gold and silver production is shown in kilograms (kg), i.e. 1 kg = 32 (1507 troy ounces). Diamond production is published in 1 000 carats (columns 46 and 47), while the production of all other minerals is published in 1 000 metric tons. (1t = 1 000 kg).

5. MINING

5.3 Financial statistics

The information is based on data obtained from the most important mining enterprises in South Africa. The ratios and other derived statistics were calculated from the aggregated survey results, taking into account the relative importance of the individual mines. The data furnished relate to the enterprise as a whole, including all branches (mining and other), but excluding holding and subsidiary companies.

5.3.1 Percentage change in selected items

Per cent

Year or quarter	Percentage change since previous quarter			
	Net profit	Interest paid	Capital expenditure on new assets	Stocks
	69	70	71	72
1999 - 1	-19,6	-5,6	+4,2	+22,7
2	+5,1	+25,7	+3,2	+0,1
3	+3,2	-5,6	-6,0	+2,1
4	+19,3	-14,7	+13,7	-0,3
2000 - 1	+21,5	+11,6	+3,5*	-1,6
2	+7,0	+16,0	-17,4	-18,2
3	-18,0	+62,7	-15,2	+14,4
4	+58,1	-13,2	+47,1	-6,1

MANUFACTURING

6.1	Index of the physical volume of manufacturing production	6.1
6.1.1	Total manufacturing, manufacturing divisions and manufacturing major groups	6.1
6.2	Value of sales	6.6
6.2.1	Total manufacturing, manufacturing divisions and manufacturing major groups	6.6
6.2.2	Manufacturing major groups and manufacturing subgroups	6.12
6.3	Value of unfilled orders	6.24
6.3.1	Selected manufacturing groups and manufacturing subgroups	6.24
6.4	Financial statistics	6.28
6.4.1	Quarterly percentage change in selected items	6.28
6.4.2	Selected operating ratios	6.28
6.4.3	Selected financial quantities expressed as a percentage of turnover	6.29
6.4.4	Capital expenditure on new and used assets expressed as a percentage of turnover	6.30
6.4.5	Value of selected assets expressed as a percentage of turnover	6.30

6. MANUFACTURING

6.1 Index of the physical volume of manufacturing production

The calculation of the manufacturing production indices (columns 1 to 108) is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). The value of the manufactured products is obtained from a monthly sample survey of manufacturing establishments.

The 1988 manufacturing census provided the frame for the selection of a revised sample implemented as from January 1995. A stratified systematic sample design based on gross output was used. Establishments which commenced operations after the census, have also been taken into account. The indices in this publication differ slightly from previously published indices due to the fact that the weighting factors for combining of the manufacturing major groups to total manufacturing with effect from 1996 were calculated on the basis of the value added data obtained from the 1996 manufacturing census. According to international practice, the indices were arithmetically converted to base 1995=100 since November 1997.

The industrial classification used in this publication is based on the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993.

6. MANUFACTURING
6.2 Value of sales

Data relating to sales (columns 109 to 426) are collected together with the monthly production data. The sample data are weighted according to the original sample design in order to represent the population of establishments in the manufacturing industry. The sales in this publication differ slightly from previously published data due to the fact that the results of the 1996 census were used to adjust data relating to sales.

The values shown represent net sales (i.e. gross sales less returns, discounts and other deductions) of own manufactured goods, and net charges for work done.

6.2.1 Total manufacturing, manufacturing divisions and manufacturing major groups

6. MANUFACTURING

6.3 Value of unfilled orders

6.3.1 Selected manufacturing groups and manufacturing subgroups

Data relating to unfilled orders (columns 427 to 482) are collected with the monthly production data in respect of certain selected manufacturing subgroups and raised to obtain estimated total figures for those manufacturing subgroups. The data in this publication differ slightly from previously published information due to the fact that the results of the 1996 manufacturing census were used to adjust data relating to unfilled orders.

Manufacturing establishments were requested to determine the sales value of unfilled orders without taking into consideration cancellations and any work performed in connection with the orders, or of stocks from which they can be filled. The values of unfilled orders are shown as at the end of the month. Unfilled orders carried over from previous months are included.

(a) Actual values

6. MANUFACTURING
6.4 Financial statistics

The information is based on financial data obtained from the most important manufacturing enterprises in South Africa. The ratios and other derived statistics were calculated from the aggregated survey results, after taking into account the relative importance of the individual enterprises. The data furnished relate to enterprises as a whole, including all branches (manufacturing and other), but excluding holding and subsidiary companies.

6.4.1 Quarterly percentage change in selected items

Per cent

Year or quarter	Percentage change since previous quarter			
	Net profit	Interest paid	Capital expenditure on new assets	Stocks

1/ Rent includes the amounts received or paid in respect of land, buildings, machinery, transport and other equipment, leased or hired.

2/ Calculation of net profit (column 504) occurs according to the standard accounting method.

6. MANUFACTURING

6.4 Financial statistics (concluded)

6.4.4 Capital expenditure on new and used assets expressed as a percentage of turnover

Per cent

Year or quarter	Capital expenditure on new assets 1/				Capital expenditure on used assets 2/
	Buildings, improvements and construction works	Plant, machinery, furniture and equipment	Vehicles	Total	
	507 PINFIN34	508 PINFIN35	509 PINFIN36	510 PINFIN30	
1999	0,61	3,57	0,19	4,37	0,10
2000	0,61	2,56	0,20	3,36	0,07
1999 - 1	0,83	3,83	0,22	4,88	0,16
2	0,37	3,33	0,23	3,93	0,05
3	0,38	3,71	0,13	4,22	0,06
4	0,87	3,40	0,16	4,43	0,13
2000 - 1*	0,48	2,13	0,34	2,95	0,08
2*	0,72	2,58	0,14	3,44	0,09
3*	0,59	2,82	0,17	3,58	0,08
4	0,64	2,69	0,15	3,48	0,03

1/ Includes erection of new buildings and works, as well as additions to, and alterations of existing buildings and works; new machinery, vehicles and equipment purchased and used machinery directly imported (trade-in allowances have not been deducted); and expenses incidental to the acquisition of assets which have been capitalised, i.e. transfer fees and architects' fees.

2/ Includes the purchase of land, existing buildings and works and used machinery, vehicles and equipment not directly imported by or on behalf of the enterprise.

6.4.5 Value of selected assets expressed as a percentage of turnover

Year or quarter	Book value of land, buildings, etc.	Stocks 1/
	512 PINFIN41	513 PINFIN42
	1999	33,41
2000	27,89	13,99
1999 - 1	133,54	65,46
2	125,93	56,31
3	121,65	55,53
4	124,67	53,65
2000 - 1*	126,22	58,57
2*	113,62	55,03
3*	108,72	55,59
4	101,72	51,02

1/ Stocks include raw materials, work in progress and 'other' stocks (e.g. merchandise, own manufactured articles and factored goods, spares, fuel and oil).

7. CONSTRUCTION

7.1 Building statistics - Building plans passed and buildings completed - Private sector

The Building statistics survey is a countrywide survey covering a sample of local government institutions which are involved in the approving of building plans and in the final inspection of buildings completed for the private sector in South Africa. The sample consists of the largest local government institutions, i.e. those that account for approximately 85% of the total rand value of buildings completed.

No direct comparison can be made between building plans passed and buildings completed as an unknown number of building plans are passed and afterwards not executed. Furthermore, the time-lag between the date of passing of a building plan and the date of completion of the building varies considerably.

The value of buildings completed, including additions and alterations, is the estimated value at the time the plans were passed.

The number of dwelling-houses as shown in the tables, refers to the number of houses in respect of which plans were approved.

7.1.1 Building statistics at constant 1995 prices

1. The value of building plans passed and buildings completed at constant prices measure the building activities in terms of ruling prices in a specific base year. The base year regarding building plans passed and buildings completed is 1995.
2. The value of building plans passed at constant prices for each month is obtained by deflating the values at current prices with a price index known as the 'lump sum domestic buildings' as published in Statistical release P0151 (JBCC contract price adjustment provisions work group indices). In order to be applicable, these indices (base February 1991=100) are converted to the base year 1995=100.
3. The value of buildings completed at constant prices is obtained by deflating the values at current prices with the same price index which is used to calculate building plans passed at constant prices. The value of buildings completed is reported as at the time the plans were passed. Since the completion of buildings may extend over a few months to a few years, the current value of buildings completed is deflated by price indices as at the time the plans were passed in order to calculate the value of buildings completed at the time the plans were passed. Therefore, the duration of the completion of different types of buildings are taken into account in ascertaining the deflators, e.g. the value of dwelling-houses completed at constant prices at January 2000 is obtained by deflating the current value of dwelling-houses completed for January 2000 with the price index of a month six months prior to January 2000. Furthermore, the value of other residential buildings, non-residential buildings and additions and alterations at constant prices, is obtained by deflating the current values with price indices of 12 months, 18 months and 12 months prior to the relevant month, respectively.

7. CONSTRUCTION

7.3 Buildings completed - Private sector

The figures in respect of buildings completed should not be compared with those of building plans passed, because the extent of cancellations subsequent to the passing of the building plans, as well as that of the resubmission of plans for passing, is unknown. Furthermore, there is a time-lag between the date on which a plan is passed and the date on which the building is completed.

ELECTRICITY

8.1	Units produced and consumed - Actual and seasonally adjusted	8.1
-----	--	-----

8. ELECTRICITY

8.1 Units produced and consumed

The data are collected on a sample basis and raised to obtain estimated figures. The level of the data was adjusted according to the results of the 1995 census of electricity, gas and steam.

The figures shown, relate to public supply undertakings and self-producers. Public supply undertakings comprise Eskom and local authorities, while self-producers are undertakings which, in addition to their main activities, themselves produce electric energy intended in greater part or in its entirety to meet their own needs - mines, manufacturing establishments and Transnet Ltd are, *inter alia*, included.

(a) Actual

Gigawatt hours

9. INTERNAL TRADE
9.1 Wholesale trade

In order to be classified as a wholesaler (columns 1-75) a firm must derive 50 per cent or more of its income from sales of merchandise to other businesses and institutions.

9.1.1 Value of sales by type of business

The value of sales at constant June 1995 prices in respect of each type of business is obtained by deflating the sales value at current prices by means of sub-indices of the production price index on base June 1995=100. The amounts show resrepresent net cash and credit sales and instalment sale transactions (VAT is excluded). The data are collected on a firm basis.

The figures in columns 1-44 represent estimated total sales of merchandise in the wholesale trade.

9. INTERNAL TRADE
 9.1 Wholesale trade
 9.1.2 Financial statistics

The information is based on financial data obtained from the most important wholesale enterprises in South Africa. The ratios and other derived statistics were calculated from the aggregated survey results without taking into account the relative importance of the individual enterprises. The data furnished in columns 45-75 relate to enterprises as a whole, including all branches (wholesale trade and other), but excluding holding and subsidiary companies.

9.1.2.1 Quarterly percentage change in selected items

2	22,79	35,22
3*	20,50	36,01
4	19,21	36,19

9. INTERNAL TRADE
9.2 Retail trade

In order to be classified as a retailer (columns 76-247), a firm must derive more than 50 per cent of its income from sales of merchandise to the general public for private or domestic consumption. The data by motor service stations and dealers in motor vehicles, spares and accessories for motor vehicles and tyres, are classified as motor trade and appear in columns 248-341. The data are collected on a firm basis.

9.2.1 Value of sales by type of business
9.2.1.1 Actual values

The figures in columns 76-213 represent estimated total sales of merchandise by retailers and include VAT and finance charges. The value of sales at constant 1995 prices is obtained by deflating the sales value at current prices by means of sub-indices of the consumer price index on base 1995=100.

9. INTERNAL TRADE
 9.2 Retail trade
 9.2.5 Financial statistics

The information is based on financial data obtained from the most important retail trade enterprises in South Africa. The financial ratios and other derived statistics were calculated from the aggregated survey results without taking into account the relative importance of the individual enterprises. The data furnished relate to enterprises as a whole, including all branches (retail trade and other), but excluding holding and subsidiary companies.

9.2.5.1 Quarterly percentage change in selected items

9. INTERNAL TRADE
 9.3 Motor trade
 9.3.1 Motor trade - Retail trade in motor vehicles and accessories
 9.3.1.1 Trading income - Sales and workshop income

The data are collected on an enterprise (firm) basis. The figures represent estimated totals for the retail trade in motor vehicles and accessories and do not represent the total sales of vehicles and accessories in South Africa because the wholesale trade of vehicles and accessories are excluded.

Prior to January 2000, Stats SA collected and published information on retail trade in motor vehicles and accessories including Value Added Tax (VAT). Due to users' needs, specifically compilers of National Accounts, Stats SA has overhauled and re-designed the questionnaire. As from January 2000, Stats SA collects information regarding the retail trade in motor vehicles and accessories excluding VAT. In order to provide users with a continuous time series, Stats SA has calculated the retail trade in motor vehicles and accessories excluding VAT for the period which is published in this publication.

The amounts in columns 249, 272 and 273 represent the total trading income (column 248). Column 249 corresponds with column 277. 'Other' (columns 257, 258, 266 and 267) includes caravans, tractors and trailers.

9. INTERNAL TRADE
 9.3 Motor trade
 9.3.1 Motor trade - Retail trade in motor vehicles and accessories (concluded)
 9.3.1.1 Trading income - Sales and workshop income

As from January 2000, Stats SA use the new re-designed questionnaire. This questionnaire collects information regarding workshop income (column 268) which now includes the income from the sales of batteries and tyres, transferred and fitted in the workshop. Therefore, the sales of batteries and tyres transferred and fitted in the workshop are no longer reflected under the category spares and accessories (column 270), but are included in the category workshop income (column 268).

Column 268 includes labour charges and the sales of spares and accessories transferred to the workshop. Column 270 represent direct sales of spares and accessories, including batteries and tyres not transferred to the workshop. 'Other' (column 271) includes the income from the sales of petrol, diesel oil, lubricants, tools, garage equipment, towing services, commission, etc.

Year or month	Workshop income	Other trading income			Cash, credit and instalment sale transactions

9. INTERNAL TRADE
 9.3 Motor trade (wholesale and retail)
 9.3.2 Financial statistics

The information is based on financial data obtained from the most important motor trade enterprises in South Africa. The ratios and other derived statistics were calculated from the aggregated survey results without taking into account the relative importance of the individual enterprises. The data furnished relate to enterprises as a whole, including all branches (motor trade and other), but excluding holding and subsidiary companies.

9.3.2.1 Quarterly percentage change in selected items

Per cent

Year or quarter	Percentage change since previous quarter

9. INTERNAL TRADE
 9.4 Hotels
 9.4.1 Trading statistics

Section 9.4 shows the results of the monthly sample survey of hotels. The sample consists of 414 respondents. All three-, four- and five-star hotels are included in the sample, while a systematic sample is drawn for ungraded hotels and one- and two-star hotels. The results of the sample are raised by weights to represent the total hotels in South Africa. The number of rooms available forms the basis of the weight calculation. Weights are calculated for each star grading within each tourism region which are used to estimate the universum of hotels in South Africa.

9.4 Hotels

9.4.2 Financial statistics

The data refer to enterprises mainly engaged in the hotel industry and are based on the results of a quarterly sample survey. The information is based on financial data obtained from the most important hotels in South Africa. The ratios and other derived statistics were calculated from the aggregated survey results without taking into account the relative importance of the individual hotels. Information relating to foreign branches and holding or subsidiary companies are excluded.

9.5 Civil cases

A revised monthly sample survey was introduced with effect from January 1994. The data are based on information collected from a sample of 152 magistrates' offices. The monthly sample particulars are raised to obtain estimated totals. The raising factors are based on information relating to all civil cases recorded during the year ended 30 June 1992. The total number of civil cases recorded by the magistrates' offices in the sample represent 95 per cent of the civil cases recorded by all magistrates' and commissioners' offices during the year ended 30 June 1992. Civil cases recorded in selected magistrates' offices are shown in this table.

Civil cases recorded (columns 450, 460 and 470) - relate to all cases, in other words debt cases as well as claims for damages, ejectment orders and other non-debt cases are included.

Civil summonses (columns 451-459, 461-469 and 471-479) - relate to debt cases only and thus exclude claims for damages, ejectment orders and other non-debt cases.

9.5.1 Cases recorded and summonses issued for debt - Number

(a) Total - Business enterprises and private persons

1/ Includes Cape Town, Bellville, Wynberg, Goodwood, Simon's Town, Kuils River and Mitchell's Plain.

2/ Includes Alberton, Benoni, Boksburg, Brakpan, Germiston, Nigel and Springs.

3/ Includes Krugersdorp, Randfontein, Roodepoort and Westonaria.

9. INTERNAL TRADE
9.6 Insolvencies

The figures are based on information extracted from the Master's Notices published currently in the Government Gazette and refer to insolvencies under the Insolvency Act No.24 of 1936. Insolvencies only relate to private persons, individuals and partnerships. The statistics show the number of final sequestrations. This does not represent the number of persons involved, as a partnership is counted as one insolvency, irrespective of the number of partners.

9.6.1 Private individuals and partnerships by province and the agricultural sector - Number

11. PRIVATE FINANCE

11.1 Banking sector - Liabilities and assets

Banking sector - A consolidation of the balance sheet of institutions within the monetary sector, i.e. the SA Reserve Bank, commercial banks, the former National Finance Corporation, Corporation for Public Deposits, the so-called 'pooled funds' of the former Public Debt Commissioners, the Land Bank, Post Office Savings Bank, private deposit-taking institutions (formerly banks, discount houses and equity building societies) and mutual building societies. Coins in circulation are included in this consolidation (columns 1-10).

Source: SA Reserve Bank

- 1/ Coins and banknotes in circulation outside the banking sector, demand deposits and other short-term and medium-term deposits of the non-banking private sector with the banking sector.
- 2/ Foreign deposits and government deposits are not included.
- 3/ 'Government' consists of the South African Central Government (including the former Public Debt Commissioners and the Public Investment Commissioners, but excluding Transnet Ltd and the SA Post Office Ltd and Telkom SA Ltd), provincial governments and the governments of former homelands which became independent. All transfers to the stabilisation account are included, as are deposits of the International Monetary Fund.
- 4/ Including other liabilities or assets.
- 5/ Gold and foreign exchange, including both the reserves and super reserve trache position in the International Monetary Fund. From December 1979 the SA Reserve Bank's gold holdings have been valued at a market related price.
- 6/ Coins held by the banking sector plus coins in circulation.

12. TRANSPORT

Work performance statistics are reflected from a sample of private sector enterprises (firms) primarily engaged in the conveyance of goods for remuneration, and Transnet Ltd. The sample was drawn from the 1986 census of transport and allied services, and estimates were obtained by raising data collected on basis of a stratified systematic sample.

13. NATIONAL ACCOUNTS

13.1 Gross domestic product (GDP)

13.1.1 Quarterly GDP by industry at constant 1995 prices

The national accounts figures cover South Africa. The estimates in respect of agriculture in the case of the gross domestic product (GDP) (both at current and constant prices) are done by the Directorate: Statistical Information of the National Department of Agriculture.

The value added at basic prices is equal to output minus intermediate consumption.

R million

Year or quarter	GDP at market prices	Taxes less subsidies on products	Total value added at basic prices	Agriculture, forestry and fishery	Mining and quarrying	Manufacturing	Electricity and water

PROSECUTIONS AND CONVICTIONS

WITH REGARD TO CERTAIN OFFENCES

14.1	Prosecutions according to class and subclass	14.1
14.2	Convictions according to class and subclass	14.2

14. PROSECUTIONS AND CONVICTIONS WITH REGARD TO CERTAIN OFFENCES

Statistics with regard to prosecutions and convictions include the more important economic sociological offences, which comprise the common law offences and the more important statutory offences. Offences of the law which, from a socio-economic point of view, are of lesser importance, such as essentially petty offences and misdemeanors, are excluded.

Particulars of prosecutions and convictions were furnished to Statistics South Africa after conclusion of the court case by the South African Police Service. Cases dealt with by the Appellate Division, however, are not reflected in the statistics. Annual figures are shown for the period July to June.
