In publishing Volume 44(1) of the Bulletin of Statistics, Statistics South Africa (Stats SA) continues to present one of the country's oldest journals that has been published since 1922.

As the producer of official statistics in South Africa, most of the information presented in the Bulletin of Statistics is based on the data that were released by Stats SA in the preceding three months prior to the date of publication. However, there was no updated information on Documented Migration at the time of this publication. Also note that chapter on Public Finance is excluded from this edition as levies have been abolished. All tables presented in this publication, except those indicated otherwise, relate to South Africa.

We thank you for all the feedback you provide to us to ensure that this publication continues to serve your needs as users.

Statistician-General: Statistics South Africa

Extract from the Report of the Census Subcommittee to the South African Statistics Council on Census 2001

Preliminary investigations indicate that the 2001 census probably resulted in:

- An underestimate of the number of children below age five;¹
- an overestimate of the number of teenagers aged between 10 and 20;
- an underestimate of the number of men relative to the number of women;¹
- an underestimate of the number in the white population;
- higher than expected numbers aged 80 and older, in the African population;
- an underestimate of the number of foreign-born, since some identified themselves incorrectly as being South African-born;
- age misstatement in the range 60-74;
- an overestimate of the extent of unemployment;
- an underestimate of those who were employed for only a few hours per week;
- an underestimate of household income; and
- an overestimate of the number of paternal orphans and the number of fathers missing from the household.

In addition:

- Scanning problems caused some births to be recorded in the wrong province. The number of cases is relatively small and should not lead to too much distortion for most purposes for which these data are used; however, it does produce obviously erroneous results in when one tries to estimate the extent of inter-provincial migration of those born since the previous census.
- The fertility data (numbers of children ever born, children surviving) are problematic.

For further details of these investigations see the full report of the *Census Subcommittee*.

Tables comparing Census data

For Census 2001 imputation was used to allocate values for unavailable, unknown, incorrect or inconsistent responses, to other categories. 'Undetermined' values were used for only a few variables in a few cases (such as industry and occupation). For Census '96, all such values were grouped as 'Other' or 'Unspecified'.

¹ This is a common feature of censuses, particularly in developing countries.

Abbreviations used

incl.	- including
F	- Female
FS	- Free State
M	- Male
T	- Total
VAT	- value-added tax
W	- Weights
SA	- South Africa(n)
Stats SA	- Statistics South Africa

Units of measurements

Ton - Metric ton of 1 000 kilograms (except where otherwise indicated).

Year and month - Calendar years and calendar months (except where otherwise indicated).

The code, where it appears under the column number, refers to the variable in Stats SA's data bank. This data bank contains data on time series and is available at a fee on diskettes and other media.

Symbols used

..	= Data not available
_	= Nil or not applicable
0 or 0,0	= Figure too small to publish
()	= Figures excluded from totals
_____	= A line drawn across a column of figures, indicates an interruption in the comparability of the series
*	= Revised since previous issue(s)
a	= As a result of the unaccountable low number of recorded births during January and February, the rates as well as the natural increase for 1987 were calculated on an adjusted number of births and are indicated with an 'a'.

A blank space in a column of figures means that the figure or figures are not yet available.

Rounding

Figures are rounded off independently of one another; details, therefore, may not add to totals because of rounding.

DEMOGRAPHY

1.1 Census population figures (1996 and 2001) and mid-year estimates (2004-2009) by population group and gender

The data for 1996 and 2001 are the official census figures for October of the census year. In the 1996 data 'Unspecified' and 'Other' population groups are included in the totals. In 2001, however, these categories were imputed. The figures for 2004 to 2009 are estimates of the population as at 30 June.

VITAL STATISTICS

2.1 1986 to 2008

In comparison with previous years the number of whites and coloureds born during January 1987 and February 1987 is relatively low (as well as the recorded births for Indians, coloureds and whites for 1988 (columns 1-4)). The number of recorded (registered) births during this period has been thoroughly investigated in collaboration with the Department of Home Affairs. No explanation could, however, be found for the relatively low number of recorded births during this period.

As a result of the unaccountably low number of recorded births during January and February, the rates as well as the natural increase for 1987, were calculated on an adjusted number of births and are indicated with an 'a'. The number of recorded births during January 1987 and February 1987 was adjusted on the basis of the number of recorded births during January and February each year from 1975 to 1985 in relation to the total number of recorded births per year.

The registration of vital events among Africans was introduced on a compulsory basis several years ago. However, notwithstanding serious efforts on the part of the registering authorities, the registration of vital events of Africans is still relatively low. Statistics South Africa (Stats SA) did collect and process statistics on recorded births among Africans for 1979, 1980 and 1990, but the figures were so low that they were not published. Statistics on deaths among Africans were, however, published and these have been included in the table below. However, because of the serious level of underreporting of deaths among Africans, it would be misleading to compute death rates based on the reported events. As such the rates have been omitted.

The data on marriages and divorces refer to those reported under civil law. In the past the marriages among the majority of Africans fell under the category of customary or religious marriages. As such, the number of marriages and divorces among Africans reported under civil law were negligible and therefore not published before.

Recorded births as from 1986-1990 were tabulated on a de jure basis, that is, according to place of residence of the mother.

- 1/ 'Recorded births' (columns 1-4) indicates the number of births recorded (registered) in a specific year irrespective of when the birth actually took place. 'Births' indicates the actual number of births that took place in a specific year and can be obtained from Statistical report No. 03-05-01 (1990).
- 2/ It should be noted that data on recorded deaths (columns 1-4) for 1989 and 1990 are relatively low in comparison with previous years. The decrease has been thoroughly investigated in collaboration with the Department of Home Affairs, but no explanation could, however, be found.
- 3/ The recorded birth rate, recorded death rate, natural increase rate (columns 5-6) are crude rates calculated per 1 000 of the estimated mid-year population. According to the fact that births and deaths are not fully registered, the number of births and deaths as well as the rates, which are derived therefrom, will necessarily differ to a greater or lesser extent from the reality.
- 4/ The recorded infant mortality rate (columns 5-6) is the number of recorded infant deaths (under one year of age) per 1 000 recorded live births.
- 5/ Recorded stillbirths (columns 1-4) were not included in the figures for either recorded births or recorded deaths.
- 6/ The divorce rate (columns 5-7) are crude rates calculated per 100 000 of the estimated mid-year population.
- 7/ Marriages are no longer reported by population group.

VITAL STATISTICS

2.2 1992 to 2008

As from 1991 statistical information regarding recorded births, recorded deaths and marriages is no longer available by population group. This table, therefore, contains information for the four population groups combined.

Recorded births, recorded deaths and marriages information indicate the number of births, deaths and marriages respectively that were recorded in a specific year, irrespective of when the event actually occurred.

Recorded births as from 1991 were tabulated on a *de facto* basis, that is, according to place of birth of the child.

Registrations	Year	Total	Male	Female	Unspecified
		9	10	11	12
2.2.1 Births 1/	1992	501 461
	1993	557 995

	2006	14 039	14 039	14 039	-
	2007	20 259	20 259	20 259	-
	2008	16 003	16 003	16 003	-
2.2.6 Civil Unions 4/	2007	80	80	80	-
	2008	732	732	732	-

1/ As a result of the loss of data at Bureau Nucleus, the number of registered births for 1996 were adjusted, while those for 1997 were estimated. Further details can be found in Statistical release P0305, *Recorded births, 1990-1997*.

2/ As of the end of March 1998 the data held at Bureau Beta have been transferred to Bureau Nucleus. As a result vital statistics data, which were more than a year old, were destroyed, including late registration data for marriages for 1997.

3/ As of 2008 data on customary marriages was reported on.

4/ Data on civil unions was first published in 2008.

VITAL STATISTICS

2.3 Vital statistics - 2000 to 2008 - Divorces

Considering that the number of divorces from 2001 to 2002 indicated a relative decrease, the number of finalised divorces received from the registrars of the various divisions of the Supreme Court during 2003 was compared with the court rolls of finalised divorces of the courts concerned. It was found that Stats SA did not receive all the divorce information of the concerned courts. An adjustment was, therefore, made to the 2003 divorce information received, to provide a more accurate divorce figure.

In comparison with the data of the 2005 divorces, and the number of divorces for 2006 shows that there is an increase. Following an enquiry, the various divisions of the High Court confirmed that all relevant information on divorces for 2006 was supplied to Stats SA.

If information regarding all marriages and divorces is not supplied, incompleteness can occur. The occurrence of survey errors is, therefore, inevitable and the extent to which it could affect marriages and divorces cannot be estimated.

Series	Year	Number						
		Black African	Coloured	Indian or Asian	White	Mixed	Unspecified	
		13	14	15	16	17	18	
2.3.1	Divorces	2000	7 623	3 365	1 746	15 211	401	5 756

TOURISM

3.1 Tourists by mode of travel

Statistics South Africa (Stats SA) has completed its Duration of Stay exercise as part of improving its information on foreign travellers and measurement of foreign tourists. As a result of this exercise, it is now possible to remove SAME DAY visitors and OVERNIGHT visitors (tourists) from the foreign arrivals data it receives from the Department of Home Affairs. Stats SA started publishing information on TOURISTS as defined by United Nations World Tourism Organisation with the January 2009 data.

DOCUMENTED MIGRATION

4.3 Self-declared emigrants by country of destination 1/2/

Stats SA published complete self-declared emigration data up to and including December 1992. Since basic information on self-declared emigration was not available thereafter, it was not possible to publish data on this topic on a monthly basis for the period January 1993 to October 1993. However, as from 26 October 1993 the Department of Home Affairs (DHA) implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports complete departure forms. This system was implemented at these three airports only, as approximately 97% of the self-declared emigrants left the country through these three ports. This system made it possible to again obtain and process information on South African tourists and self-declared emigrants leaving the country through these three airports as from November 1993. In order to estimate the number of self-declared emigrants for the period January 1993 to October 1993, an interpolation was carried out with the aid of a regression model. South African departures are no longer required to complete the departure forms. Therefore statistics on their departure are no longer available. This is due to the implementation of the Immigration Act, 2002 (Act No. 13 of 2002), by DHA as from April 2003.

LABOUR

5.1 Number of employees and gross earnings according to industry

As from December 2004, Stats SA introduced a new employment statistics survey that covers employing enterprises in the formal non-agricultural business sector of the South African economy that are registered for Income Tax (IT), resulting in the extensive coverage of all small businesses. Previously the coverage was restricted to both employing and non-employed VAT registered enterprises with an annual turnover of R300 000 or more. By restricting the coverage to employing businesses, the new survey is able to provide estimates for employment and earnings as well as estimates for average monthly earnings and it is in accordance with the International Labour Organisation (ILO) definitions and concepts.

Introduction of the new sample from the June quarter 2006 enables Stats SA to provide users with survey results for the June and September 2006 quarters from the new sample.

Stats SA has been working for some years to improve the quality of its economic statistics. The latest series to benefit from these improvements are those for employment and average monthly earnings derived from the Quarterly Employment Statistics (QES) survey, a survey of formal non-agricultural businesses and other entities which are employers.

Considerable work has been undertaken over the last two years to improve the completeness of the list of employers in the economy, held on Stats SA's Business Register, from which the samples for the survey are drawn. Greater use has been made of additional administrative sources of employer entities, particularly the lists maintained by the South African Revenue Service (SARS) of employers making contributions on behalf of their employees for Pay As You Earn (PAYE), and the Department of Labour's Unemployment Insurance Fund (UIF).

It is important to distinguish between the lift in the level of the series from improvements in the coverage of employers and the growth in employment shown by the series due to new employer entities entering the economy and continuing employers taking on additional staff. This break in series relates mainly to the level of employment, rather than the growth rate of employment. However, an outcome of not publishing data from a sample revised in 2005 has been that any new employer entity commencing operations from early 2004 onwards would not have had a chance of being selected until the reselection of the sample in March 2006. The effect is that the published series based on the 2004 sample show somewhat smaller growth than would have been shown from a sample revised in 2005.

Further factors affecting the growth of the series between 2004 and 2006 were the expansion of the formal sector as a result of legislative changes, growth resulting from small businesses moving from the informal to the formal sector and greater overall compliance by businesses leading to their registration for PAYE and/or UIF.

Employment and gross earnings - Unless otherwise indicated in a subscription, the following is applicable:

Employment refers to the number of people employed by the business, who received payment (in salaries; wages; commission, in addition to a retainer, salary or wage; piece rates; or payments in kind) for any part of the reference period. This excludes independent contractors and consultants; working proprietors; sole and joint owners; employees paid on a commission basis where a retainer, salary or wage was not paid; and employees based in South Africa but paid from abroad, e.g. embassy employees.

Annual employment data are shown as at 30 June of the relevant year, whereas quarterly data are shown as at the last pay-day of the relevant quarter.

Gross earnings are payments for ordinary, standard or agreed hours during the reference period for all permanent, temporary, casual, executive and managerial employees, before taxation and other deductions. Gross earnings include salaries and/or fees paid to all directors, executives and managers; employers' contributions to holiday, pension, provident and medical funds and contributions to the Unemployment Insurance and Compensation Funds; payments paid from South Africa to employees based abroad, e.g. embassy employees; payments for all types of leave, except those paid on termination; fringe benefits paid in cash such as housing, mortgage and rent subsidies, transport allowances, and cell phone allowances; allowances and penalty payments relating to ordinary-time hours. Annual gross earnings data reflect the total for the relevant year, whereas quarterly data are the sum of the gross earnings for the three months of the relevant quarter.

Average monthly earnings at current prices are calculated by dividing the total gross earnings, excluding severance, termination and redundancy payments, for the reference month by the number of employees as at the end of the reference month.

Average monthly earnings at constant 2000 prices measure average monthly earnings after the direct effects of inflation have been eliminated. The deflator used to deflate the current average earnings is the consumer price index (2000=100). This index has been linked to the new CPI that has been rebased to 2008 = 100 from January 2009.

LABOUR

5.3 Quarterly labour force survey (QLFS)

The Quarterly Labour Force Survey (QLFS) is a household-based sample survey, specifically designed to measure the dynamics of employment and unemployment in the country. It measures a variety of issues related to the labour market, including unemployment rates (official), according to standard definitions of the International Labour Organisation (ILO).

OFFICIAL AND EXPANDED UNEMPLOYMENT RATES

Statistics South Africa (Stats SA) uses the following definition of unemployment as its **official** definition: The *unemployed* are those people within the *economically active population* who, (a) did not work in the calendar week preceding the interview, (b) have taken active steps to look for work or to start a business in the four weeks prior to the interview, and (c) want to work and were available to start work in the reference week.

Stats SA reports on the situation of the unemployed using the official definitions only. However, in the present economic climate, there is a proportion of discouraged job seekers who face constraints, for example high travel costs and lack of transport, when seeking work, and these are reported on separately.

5.3.1 Estimated population of working age (15-64 years) by population group, gender and labour market status, according to the official definition of unemployment, December 2009

PRICES

6.1 Producer price indices

The Producer price index (PPI) measures price trends of commodities produced throughout the major sectors of the economy, i.e. agriculture, forestry, fishing, mining, manufacturing, electricity, gas and water, and wholesale and retail trade (in the case of imported goods).

All commodities included in the PPI, are classified according to the *Standard Industrial Classification of all Economic Activities (SIC)*. The SIC is based on a standard industrial classification compiled by the United Nations (UN) for international use. Commodities in the manufacturing sector are divided into 23 major industrial groups according to the SIC.

Price information is collected for products known as 'indicator products'. Indicator products are identified as those products whose sale value represents the largest part of the total value of sales (turnover) in an industrial group. Prices are collected at the first sales point after production, which is producers in the case of locally produced commodities, and wholesalers or retailers in the case of imported commodities. Prices 'ex-factory' are requested but 'delivered' or 'free on rail/free on board' are accepted if it is the normal basis of quotation. Where prices are dependent on the quantity purchased or the class of purchaser, the price for the predominant quantity or class of purchaser is collected. Value-added tax (VAT) is excluded and normal discounts generally available to purchasers are excluded from quoted prices.

Where possible, price information is collected at successive time intervals for the same grade or quality of commodities. In the case of specialised commodities, such as machinery and transport equipment, price information is collected for equivalent items. Where quality or other changes occur in commodities, or where substitute commodities are introduced, the price indices are adjusted to compensate for any change in the price solely due to quality or similar changes.

Price information refers to the first seven days of the relevant month, except in the mining and agricultural sectors where average prices for the relevant month are collected. Most prices for commodities manufactured locally are collected at three-monthly intervals, while prices of imported commodities are collected monthly. If Statistics South Africa (Stats SA) were notified of price changes for products not surveyed on a monthly basis, products would be surveyed whenever price changes occur.

6.1.1 Producer price indices of South African industry groups

This table reflects the price indices of all locally produced commodities, whether intended for local consumption or export (columns 1-12).

PRICES

6.1 Producer price indices

6.1.2 Materials used in certain industries

A third series of indices is also calculated, namely producer price indices for materials used in the following industries:

Building and construction
 Building industries
 Civil engineering
 Mechanical engineering
 Electrical engineering

The price information collected for the indices shown in Tables 6.1.1 and 6.1.2 is utilised for the calculation of these indices.

The weights are based on the values of materials used in the relevant industries.

Base: 2000=100

PRICES

The consumer price index is calculated for each of 13 urban areas in South Africa separately and combined. The average for 2008 is currently used as base (100). Each of the urban areas for which an index is calculated has its own weight. The weights and indices for the areas are combined by means of the following weights to obtain the weighted average:

City of Cape Town	22,70
Port Elizabeth	4,30
East London	3,14
Kimberley	0,58
Bloemfontein/Free State Goldfields	4,72
Durban/Pinetown	10,37
Pietermaritzburg	1,95
Rustenburg/Klerksdorp	3,45
City of Tshwane	10,91
City of Johannesburg	24,28
Ekuhuleni	10,74
Witbank/Nelspruit	2,10
Polokwane	0,77
.....	100,00

6.2 Consumer prices

6.2.1 Indices for the primary urban areas

6.2.1 (a) All items

chapter eight

MINING**8.1 Indices of the physical volume of mining production**

The indices of the physical volume of mining production are based on information furnished by the Minerals Bureau, Department of Minerals and Energy. The weighting factors used for the computation of the indices, are based on the gross values of production of the individual minerals in 2005. Two indices are shown for total mining production, namely an index including gold production and an index which excludes gold production.

Monthly statistics are preliminary and subject to amendments.

(a) Actual indices**2005=100**

1/ Iron ore includes haematite and magnetite.

2/ Other metals (columns 10 and 24) and other non-metals (columns 14 and 28) include all other metallic minerals and other non-metallic minerals which are not shown separately.

3/ Diamonds include mine and alluvial diamonds.

4/ Building materials include the following minerals: gypsum, lime and limestone, vermiculite, fire clay, flint clay, granite or norite, marble, quartzite, schist, shales for cement, siltstone, slate, quarries and brickmaking clay.

5/ PGMs - Platinum Group Metals include platinum, iridium, osmiridium, palladium, rhodium, ruthenium and osmium.

MINING

8.2 Production and sales

Amended monthly figures are not published in all cases, but are taken into account when annual figures are compiled. The published monthly figures, therefore, do not necessarily add up to the annual figures.

Gold and silver production is shown in kilograms (kg), i.e. 1 kg = 32,15075 troy ounces. Diamond production is published in 1 000 carats (columns 50 and 51), while the production of all other minerals is published in 1 000 metric tons, (1t = 1 000 kg).

chapter nine

MANUFACTURING

9.1 Index of the physical volume of manufacturing production

The calculation of the manufacturing production indices (columns 1 to 110) is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). For 38 of the 44 SIC major groups in manufacturing, the value of production is calculated from the value of sales and stocks of manufactured products obtained from the monthly survey of manufacturing enterprises.

The sample of manufacturing production and sales is based on an updated version of Stats SA's business register, based on the database of units registered for value-added tax (VAT) and income tax, obtained from the South African Revenue Service (SARS). The latest sample was drawn in April 2009. The weighting factors for combining of manufacturing major groups to total manufacturing were calculated on the basis of the value added data from the large sample survey of manufacturing, 2005 as from January 2005. According to international practice, indices are re-based every five years. The indices are presented here at reference year 2005=100. The industrial classification used in this publication is based on the Standard Industrial Classification of all Economic Activities (SIC), January 1993.

MANUFACTURING

9.2 Value of sales

Data relating to sales (columns 111 to 220) are collected together with the monthly production data. The sample data are weighted according to the original sample design in order to represent the population of enterprises in the manufacturing industry. The latest sample was drawn in April 2008.

The values shown represent net sales (i.e. gross sales less returns, discounts and other deductions) of own manufactured goods, and net charges for work done.

9.2.1 Total manufacturing, manufacturing divisions and manufacturing major groups

CONSTRUCTION

10.1 Building statistics of the private sector

Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. The figures obtained from these municipalities do not include the bulk of subsidised low-cost dwelling-houses. Data regarding subsidised low-cost dwelling-houses completed or under construction, supplied by the provincial governments and co-ordinated by the National Department of Housing, are shown in Table 10.5 (pages 10.17 and 10.18).

10.2 Building statistics at constant 2005 prices

The value of building plans passed and buildings completed at constant prices measures building activities in terms of ruling prices in a specific base year, which is currently 2005. The value of building plans passed at constant prices for each month is obtained by deflating the values at current prices with a price index known as the 'lump sum domestic buildings' as published in statistical release P0151: *JBCC Contract Price Adjustment Provisions Work Group Indices*. In order to be applicable, these indices (base February 1991=100) are converted to the base year 2005=100.

The value of buildings completed at constant prices is obtained by deflating the values at current prices with the price index which is used to calculate building plans passed at constant prices (see paragraph above). Since the completion of buildings may extend over a few months to a few years, the current value of buildings completed is deflated by price indices which prevailed at the time the plans were passed. Therefore, the duration of the completion of different types of buildings are taken into account in ascertaining the deflators, e.g. the value of dwelling-houses completed at constant prices at January 2009 is obtained by deflating the current value of dwelling-houses completed for January 2009 with the price index of the month six months prior to January 2009. Furthermore, the value of other residential buildings, non-residential buildings and additions and alterations at constant prices is obtained by deflating the current values with price indices of 12 months, 18 months and 12 months prior to the relevant month respectively.

10.3 Revised figures

Revised figures are due to late submission of data to Stats SA, or to respondents reporting revisions or corrections to their figures. Figures for the latest month are therefore preliminary. Data are edited at municipal level.

1/ Includes all top structures completed and sites serviced in respect of the reporting period.

2/ Estimates by the National Department of Housing.

Note:

Low-cost housing information recorded in Table 10.5.1 refers to the number of top structures completed during the financial year 1 April 2005 to 31 March 2006. It is therefore not comparable with the data listed in Table 10.5.2, which refer to all top structures completed and sites serviced during the reporting period.

11.1 Units produced and consumed - Actual and seasonally adjusted

11.1

electricity

chapter eleven

ELECTRICITY

11.1 Units produced and consumed

The data are collected on a sample basis and raised to obtain estimated figures. The level of the data was adjusted according to the results of the 1995 census of electricity, gas and steam.

The figures shown relate to public supply undertakings and self producers. Public supply undertakings comprise Eskom and local authorities, while self-producers are undertakings which, in addition to their main activities, themselves produce electric energy intended in greater part or in its entirety to meet their own needs - mines, manufacturing establishments and selected local authorities are inter alia included.

1/ The quantity shown in column 1, minus the quantity shown in column 3, is equal to the total net production of electricity.

2/ Annual totals and monthly totals in column 9 may differ due to rounding off.

* Revised since previous issue(s) – Eskom revised their figures from January 2008 in March 2009.

12.1	Actual values - Wholesale trade sales, retail trade sales and motor trade	12.1

12.9.1	Total number of liquidations by industry	12.19
12.9.2	Number of companies liquidated by industry	12.19
12.9.3	Number of close corporations liquidated by industry	12.20

INTERNAL TRADE

Stats SA introduced new wholesale trade sales, retail trade sales and motor trade sales surveys utilising an upgraded business register commencing with the month of July 2009. The previous surveys and the current ones were run side by side from April to June 2009, which provided a set of factors that could be applied to the old series to revise previous estimates back to January 1998 for wholesale trade sales and motor trade sales and back to 2002 for retail trade sales. The figures up to March 2009 are thus backcasted data based on the movements of the old series and the levels of the new series. Stats SA has reviewed the methodology for deflating retail trade sales. This methodology was dependent on the new COICOP classification introduced by CPI from January 2002. As such, the time series now only starts from January 2002.

Seasonally adjusted series for retail trade sales is still under review and will be published as soon as the review is completed.

The figures in columns 1-10 represent estimated total sales of merchandise in the trade sector.

Wholesale trade sales at constant (2000) prices are calculated using a combination of the Production Price Indices (PPI) for consumption in South Africa, and total output of South African industry groups from the production price index (PPI) to deflate sales at current prices. However, with the discontinuation of the PPI for consumption in South Africa in January 2008, total sales at constant prices are calculated using the total output of South African industry groups from the PPI to deflate the sales at current prices.

Retail trade sales at constant (2008) prices for January 2002 to December 2007 are calculated using the price index for goods excluding petrol and purchases of vehicles, for all urban areas from the consumer price index (CPI) to deflate sales at current prices. From January 2008 onwards total retail trade sales at constant prices are obtained by adding up the deflated sales by type of retailer. Retail trade sales at constant prices by type of retailer are obtained by deflating estimated sales at current prices by the relevant weighted price index. To obtain total retail trade sales at constant prices, estimates of the deflated sales for each type of retailer are aggregated.

In order to be classified as a wholesaler, an enterprise must derive 50 per cent or more of its income from sales of merchandise to other enterprises and/or institutions.

In order to be classified as a retailer, an enterprise must derive more than 50 per cent of its income from sales of merchandise to the general public for private or domestic consumption. The data provided by motor service stations and dealers in motor vehicles, spares and accessories are classified as motor trade and appear in columns 5 and 10.

Stats SA collects information regarding wholesale trade and motor trade excluding VAT, but retail trade including.

INTERNAL TRADE**12.6 Tourist accommodation statistics by type of accommodation**

The results presented in this table are derived from the monthly survey of the tourist accommodation industry. This survey is based on a sample of private and public enterprises operating in the tourist accommodation industry.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax and/or value-added tax (VAT). Thus, enterprises that are not registered for tax, are excluded from this survey.

All figures are preliminary.

Source: Stats SA, *Tourist accommodation* (Statistical release P6410)**Note:**

'Stay unit' refers to the unit of accommodation available to be charged out to guests, for example, a powered site in a caravan park or a room in a hotel. 'Other income' includes rentals and fees received for transport services, offices, shops, garages, dance floors, laundry services, telephone and fax services.

Other accommodation includes lodges, bed and breakfast, self-catering enterprises.

A month marked with an asterisk (*) denotes that figures have been revised for this month.

INTERNAL TRADE

12.7 Food and beverages

The Food and beverages survey is a monthly survey covering a sample of public and private enterprises involved in the production of meals and drinks for immediate consumption, in South Africa. For example, restaurants, take-aways, coffee-shops, caterers and bars are included in this category. The purpose of the new survey is to increase the scope and coverage of South African tourism enterprises and establishments surveyed. The results of the survey will be used to compile estimates of the Tourism Satellite Accounts (TSA) and the Gross Domestic Product (GDP) and its components, which are used to develop and monitor government policy. These statistics can also be used in the analysis of comparative business and industry performance.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax and/or value-added tax (VAT). Thus, enterprises that are not registered for tax, are excluded from this survey

12.8 Civil cases

A revised monthly sample survey was introduced with effect from January 1994. The data are based on information collected from a sample of 151 magistrates' offices. The monthly sample particulars are raised to obtain estimated totals. The raising factors are based on information relating to all civil cases recorded during the year ended 30 June 1992. The total number of civil cases recorded by the magistrates' offices in the sample represent 95 per cent of the civil cases recorded by all magistrates' and commissioners' offices during the year ended 30 June 1992. Civil cases recorded in selected magistrates' offices are shown in this table.

Civil cases recorded (columns 82, 92 and 102) - relate to all cases, in other words debt cases as well as claims for damages, ejectment orders and other non-debt cases are included.

Civil summonses (columns 83 to 91, 93 to 101 and 103 to 111) - relate to debt cases only and thus exclude claims for damages, ejectment orders and other non-debt cases.

12.8.1 Cases recorded and summonses issued for debt - Number

(a) Total - Business enterprises and private persons

TRANSPORT

The Land Transport Survey is a quarterly survey which covers passenger and freight transportation by rail and road in South Africa. This survey is based on a sample drawn from the 2009 Business Sampling Frame (BSF) that contains businesses registered for value-added tax.

This survey has replaced the Land Freight Survey which was discontinued in 2003.

13.1 Total freight and passenger transport

FINANCIAL STATISTICS: PRIVATE ENTERPRISES OPERATING IN THE FORMAL NON-AGRICULTURAL BUSINESS SECTOR

14.1 Selected income and expenditure items

The Quarterly financial statistics survey

The Quarterly financial statistics survey covers a sample of private enterprises operating in the formal non-agricultural business sector of the South African economy, excluding financial intermediation, insurance and government institutions. Estimates for the electricity, gas and water supply industry are included from the quarter ended September 2005 onwards. The data are collected on a sample basis and raised to obtain estimates.

For background to the changes that have occurred, readers are referred to Stats SA's latest quarterly publication: *Quarterly Financial Statistics, September 2009* (Statistical release P0044).
