In publishing Volume 42(3) of the *Bulletin of Statistics, Statistics South Africa* (Stats SA) continues to present one of the country's oldest journals that has been published since 1922.

As the producer of official statistics in South Africa, most of the information presented in the *Bulletin of Statistics* is based on the data that were released by Stats SA in the preceding three months prior to the date of publication. However, there was no updated information on Documented Migration and Transport at the time of this publication. All tables presented in this publication, except those indicated otherwise, relate to South Africa.

We thank you for all the feedback you provide to us to ensure that this publication continues to serve your needs as users.

Statistician-General: Statistics South Africa

A handwritten signature in black ink, appearing to read 'S. M. M. M.', is positioned below the text of the Statistician-General.

Extract from the *Report of the Census Subcommittee to the South African Statistics Council on Census 2001*

Preliminary investigations indicate that the 2001 census probably resulted in:

- An underestimate of the number of children below age five;¹
- an overestimate of the number of teenagers aged between 10 and 20;
- an underestimate of the number of men relative to the number of women;¹
- an underestimate of the number in the white population;
- higher than expected numbers aged 80 and older, in the African population;
- an underestimate of the number of foreign-born, since some identified themselves incorrectly as being South African-born;
- age misstatement in the range 60-74;
- an overestimate of the extent of unemployment;
- an underestimate of those who were employed for only a few hours per week;
- an underestimate of household income; and
- an overestimate the number of paternal orphans and the number of fathers missing from the household.

In addition:

- Scanning problems caused some births to be recorded in the wrong province. The number of cases is relatively small and should not lead to too much distortion for most purposes for which these data are used; however, it does produce obviously erroneous results in when one tries to estimate the extent of inter-provincial migration of those born since the previous census.
- The fertility data (numbers of children ever born, children surviving) are problematic.

For further details of these investigations see the full report of the *Census Subcommittee*.

Tables comparing Census data

For Census 2001 imputation was used to allocate values for unavailable, unknown, incorrect or inconsistent responses, to other categories. 'Undetermined' values were used for only a few variables in a few cases (such as industry and occupation). For Census '96, all such values were grouped as 'Other' or 'Unspecified'.

¹ This is a common feature of censuses, particularly in developing countries.

Abbreviations used

incl.	- including
F	- Female
FS	- Free State
M	- Male
T	- Total
VAT	- value-added tax
W	- Weights
SA	- South Africa(n)
Stats SA	- Statistics South Africa

Units of measurements

Ton	- Metric ton of 1 000 kilograms (except where otherwise indicated).
Year and month	- Calendar years and calendar months (except where otherwise indicated).

The code, where it appears under the column number, refers to the variable in Stats SA's data bank. This data bank contains data on time series and is available at a fee on diskettes and other media.

Symbols used

..	= Data not available
—	= Nil or not applicable
0 or 0,0	= Figure too small to publish
()	= Figures excluded from totals
_____	= A line drawn across a column of figures, indicates an interruption in the comparability of the series
*	= Revised since previous issue(s)
a	= As a result of the unaccountable low number of recorded births during January and February, the rates as well as the natural increase for 1987 were calculated on an adjusted number of births and are indicated with an 'a'.

A blank space in a column of figures means that the figure or figures are not yet available.

Rounding

Figures are rounded off independently of one another; details, therefore, may not add to totals because of rounding.

1.1	Census population figures (1996 and 2001) and mid-year estimates (2004 and 2008) by population group and gender	1.1
1.2	Provincial mid-year population estimates by age and gender, 2008	1.2

DEMOGRAPHY

1.1 Census population figures (1996 and 2001) and mid-year estimates (2004-2008) by population group and gender

The data for 1996 and 2001 are the official census figures for October of the census year. In the 1996 data 'Unspecified' and 'Other' population groups are included in the totals. In 2001, however, these categories were imputed. The figures for 2004 to 2008 are estimates of the population as at 30 June.

VITAL STATISTICS

2.1 1986 to 2006

In comparison with previous years the number of whites and coloureds born during January 1987 and February 1987 is relatively low (as well as the recorded births for Indians, coloureds and whites for 1988 (columns 1-4)). The number of recorded (registered) births during this period has been thoroughly investigated in collaboration with the Department of Home Affairs. No explanation could, however, be found for the relatively low number of recorded births during this period.

As a result of the unaccountably low number of recorded births during January and February, the rates as well as the natural increase for 1987, were calculated on an adjusted number of births and are indicated with an 'a'. The number of recorded births during January 1987 and February 1987 was adjusted on the basis of the number of recorded births during January and February each year from 1975 to 1985 in relation to the total number of recorded births per year.

The registration of vital events among Africans was introduced on a compulsory basis several years ago. However, notwithstanding serious efforts on the part of the registering authorities, the registration of vital events of Africans is still relatively low. Statistics South Africa (Stats SA) did collect and process statistics on recorded births among Africans for 1979, 1980 and 1990, but the figures were so low that they were not published. Statistics on deaths among Africans were, however, published and these have been included in the table below. However, because of the serious level of underreporting of deaths among Africans, it would be misleading to compute death rates based on the reported events. As such the rates have been omitted.

The data on marriages and divorces refer to those reported under civil law. In the past the marriages among the majority of Africans fell under the category of customary or religious marriages. As such, the number of marriages and divorces among Africans reported under civil law were negligible and therefore not published before.

Recorded births as from 1986-1990 were tabulated on a de jure basis, that is, according to place of residence of the mother.

1/ 'Recorded births' (columns 1-4) indicates the number of births recorded (registered) in a specific year irrespective of when the birth actually took place. 'Births' indicates the actual number of births that took place in a specific year and can be obtained from Statistical report No. 03-05-01 (1990).

2/ It should be noted that data on recorded deaths (columns 1-4) for 1989 and 1990 are relatively low in comparison with previous years. The decrease has been thoroughly investigated in collaboration with the Department of Home Affairs, but no explanation could, however, be found.

3/ The recorded birth rate, recorded death rate, natural increase rate (columns 5-6) are crude rates calculated per 1 000 of the estimated mid-year population. According to the fact that births and deaths are not fully registered, the number of births and deaths as well as the rates, which are derived therefrom, will necessarily differ to a greater or lesser extent from the reality.

4/ The recorded infant mortality rate (columns 5-6) is the number of recorded infant deaths (under one year of age) per 1 000 recorded live births.

5/ Recorded stillbirths (columns 1-4) were not included in the figures for either recorded births or recorded deaths.

6/ The divorce rate (columns 5-7) are crude rates calculated per 100 000 of the estimated mid-year population.

7/ Marriages are no longer reported by population group.

VITAL STATISTICS

2.2 1992 to 2006

As from 1991 statistical information regarding recorded births, recorded deaths and marriages is no longer available by population group. This table, therefore, contains information for the four population groups combined.

Recorded births, recorded deaths and marriages information indicate the number of births, deaths and marriages respectively that were recorded in a specific year, irrespective of when the event actually occurred.

Recorded births as from 1991 were tabulated on a *de facto* basis, that is, according to place of birth of the child.

Registrations	Year	Total	Male	Female	Unspecified
		9	10	11	12
2.2.1 Births 1/	1992	501 461
	1993	557 995

	2004	176 521	157 624	160 569	34 849
	2005	180 657	180 657	180 657	-
	2006	184 860	184 860	184 860	-

1/ As a result of the loss of data at Bureau Nucleus, the number of registered births for 1996 were adjusted, while those for 1997 were estimated. Further details can be found in Statistical release P0305, *Recorded births, 1990-1997*.

2/ As of the end of March 1998 the data held at Bureau Beta have been transferred to Bureau Nucleus. As a result vital statistics data, which were more than a year old, were destroyed, including late registration data for marriages for 1997.

VITAL STATISTICS

2.3 Vital statistics - 2000 to 2006 - Divorces

Considering that the number of divorces from 2001 to 2002 indicated a relative decrease, the number of finalised divorces received from the registrars of the various divisions of the Supreme Court during 2003 was compared with the court rolls of finalised divorces of the courts concerned. It was found that Stats SA did not receive all the divorce information of the concerned courts. An adjustment was, therefore, made to the 2003 divorce information received, to provide a more accurate divorce figure.

In comparison with the data of the 2005 divorces, and the number of divorces for 2006 shows that there is an increase. Following an enquiry, the various divisions of the High Court confirmed that all relevant information on divorces for 2006 was supplied to Stats SA.

If information regarding all marriages and divorces is not supplied, incompleteness can occur. The occurrence of survey errors is, therefore, inevitable and the extent to which it could affect marriages and divorces cannot be estimated.

Series	Year	Number					
		Black African	Coloured	Indian or Asian	White	Mixed	Unspecified
		13	14	15	16	17	18
2.3.1 Divorces	2000	7 623	3 365	1 746	15 211	401	5 756
	2001	7 860	3 872	1 672	14 718	470	5 453
	2002	7 050	3 581	1 535	14 171	365	4 678
	2003	7 657	3 911	1 508	12 639	532	5 319
	2004	8 965	3 300	1 648	12 437	594	4 824
	2005	8 672	3 568	1 635	11 582	538	6 489
	2006	9 113	3 451	1 676	11 079	613	5 338

Series	Year	Crude rate 1/			
		Black African	Coloured	Indian or Asian	White
		19	20	21	22
2.3.2 Divorces	2000	22,5	88,6	159,7	336,4
	2001	22,7	108,5	150,8	324,7
	2002	19,9	91,4	136,0	311,1
	2003	20,7	94,7	132,3	280,2
	2004	23,3	79,5	144,9	276,4
	2005	23,3	86,0	141,7	264,4
	2006	24,1	82,2	143,9	253,8

1/ The crude divorce rate is calculated for each population group, using the mid-year estimates as the denominator.

TOURISM

3.1 Arrivals: Foreign travellers by purpose of visit

With effect from 4 January 1993 a new computerised system for the recording of travellers to and from South Africa was implemented by the Department of Home Affairs. With the new system South African residents are not required to complete departure or arrival forms when they leave or enter the country. Their particulars are obtained directly from their passports. Consequently, only the number and mode of travel of South African residents leaving or entering the country as tourists at computerised ports are available. (It is also not possible to distinguish between emigrants and other people travelling abroad.)

Foreign travellers visiting South Africa still complete arrival forms, but do not complete forms on departure. The particulars of foreign travellers leaving the country are obtained by means of the computer system on basis of the information furnished on arrival.

1/ As from June 2003 until December 2005 SA residents were not recorded.

TOURISM

3.7 Departures: South African residents by purpose of visit

3.7.1 Johannesburg, Cape Town and Durban International Airports 1/

Stats SA published complete SA residents departure data up to and including December 1992. Since basic information on SA residents departure was not available thereafter, it was not possible to publish data on SA residents departure on a monthly basis for the period January 1993 to October 1993. However, as from 26 October 1993 the Department of Home Affairs (DHA) implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports, complete departure forms. This system was implemented at these three airports only, as approximately 97% of the SA residents left the country through these three ports. This system made it possible to again obtain and process information on South African tourists and SA residents leaving the country through these three airports as from November 1993. South African departures are no longer required to complete departure forms. Therefore statistics on their departure are no longer available. This is due to the implementation of the Immigration Act, 2002 (Act No. 13 of 2002), by DHA as from April 2003.

DOCUMENTED MIGRATION

4.3 Self-declared emigrants by country of destination 1/,2/

Stats SA published complete self-declared emigration data up to and including December 1992. Since basic information on self-declared emigration was not available thereafter, it was not possible to publish data on this topic on a monthly basis for the period January 1993 to October 1993. However, as from 26 October 1993 the Department of Home Affairs (DHA) implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports complete departure forms. This system was implemented at these three airports only, as approximately 97% of the self-declared emigrants left the country through these three ports. This system made it possible to again obtain and process information on South African tourists and self-declared emigrants leaving the country through these three airports as from November 1993. In order to estimate the number of self-declared emigrants for the period January 1993 to October 1993, an interpolation was carried out with the aid of a regression model. South African departures are no longer required to complete the departure forms. Therefore statistics on their departure are no longer available. This is due to the implementation of the Immigration Act, 2002 (Act No. 13 of 2002), by DHA as from April 2003.

LABOUR

5.1 Number of employees and gross earnings according to industry

As from December 2004, Stats SA introduced a new employment statistics survey that covers employing enterprises in the formal non-agricultural business sector of the South African economy that are registered for Income Tax (IT), resulting in the extensive coverage of all small businesses. Previously the coverage was restricted to both employing and non-employing VAT registered enterprises with an annual turnover of R300 000 or more. By restricting the coverage to employing businesses, the new survey is able to provide estimates for employment and earnings as well as estimates for average monthly earnings and it is in accordance with the International Labour Organisation (ILO) definitions and concepts.

Introduction of the new sample from the June quarter 2006 enables Stats SA to provide users with survey results for the June and September 2006 quarters from the new sample.

Stats SA has been working for some years to improve the quality of its economic statistics. The latest series to benefit from these improvements are those for employment and average monthly earnings derived from the Quarterly Employment Statistics (QES) survey, a survey of formal non-agricultural businesses and other entities which are employers.

Considerable work has been undertaken over the last two years to improve the completeness of the list of employers in the economy, held on Stats SA's Business Register, from which the samples for the survey are drawn. Greater use has been made of additional administrative sources of employer entities, particularly the lists maintained by the South African Revenue Service (SARS) of employers making contributions on behalf of their employees for Pay As You Earn (PAYE), and the Department of Labour's Unemployment Insurance Fund (UIF).

It is important to distinguish between the lift in the level of the series from improvements in the coverage of employers and the growth in employment shown by the series due to new employer entities entering the economy and continuing employers taking on additional staff. This break in series relates mainly to the level of employment, rather than the growth rate of employment. However, an outcome of not publishing data from a sample revised in 2005 has been that any new employer entity commencing operations from early 2004 onwards would not have had a chance of being selected until the reselection of the sample in March 2006. The effect is that the published series based on the 2004 sample show somewhat smaller growth than would have been shown from a sample revised in 2005.

Further factors affecting the growth of the series between 2004 and 2006 were the expansion of the formal sector as a result of legislative changes, growth resulting from small businesses moving from the informal to the formal sector and greater overall compliance by businesses leading to their registration for PAYE and/or UIF.

Employment and gross earnings - Unless otherwise indicated in a subscription, the following is applicable:

Employment refers to the number of people employed by the business, who received payment (in salaries; wages; commission, in addition to a retainer, salary or wage; piece rates; or payments in kind) for any part of the reference period. This excludes independent contractors and consultants; working proprietors; sole and joint owners; employees paid on a commission basis where a retainer, salary or wage was not paid; and employees based in South Africa but paid from abroad, e.g. embassy employees.

Annual employment data are shown as at 30 June of the relevant year, whereas quarterly data are shown as at the last pay-day of the relevant quarter.

Gross earnings are payments for ordinary, standard or agreed hours during the reference period for all permanent, temporary, casual, executive and managerial employees, before taxation and other deductions. Gross earnings include salaries and/or fees paid to all directors, executives and managers; employers' contributions to holiday, pension, provident and medical funds and contributions to the Unemployment Insurance and Compensation Funds; payments paid from South Africa to employees based abroad, e.g. embassy employees; payments for all types of leave, except those paid on termination; fringe benefits paid in cash such as housing, mortgage and rent subsidies, transport allowances, and cell phone allowances; allowances and penalty payments relating to ordinary-time hours. Annual gross earnings data reflect the total for the relevant year, whereas quarterly data are the sum of the gross earnings for the three months of the relevant quarter.

Average monthly earnings at current prices are calculated by dividing the total gross earnings, excluding severance, termination and redundancy payments, for the reference month by the number of employees as at the end of the reference month.

Average monthly earnings at constant 2000 prices measure change in average monthly earnings after the direct effects of inflation have been eliminated. The deflator used to devalue the current average earnings is the consumer price index (2000=100).

LABOUR

5.3 Labour force survey (LFS)

The LFS is a biannual rotating panel household survey, specifically designed to measure the dynamics of employment and unemployment in the country. It measures a variety of issues related to the labour market, including unemployment rates (official), according to standard definitions of the International Labour Organisation (ILO).

OFFICIAL AND EXPANDED UNEMPLOYMENT RATES

Statistics South Africa (Stats SA) uses the following definition of unemployment as its **official** definition: The *unemployed* are those people within the *economically active population* who, (a) did not work during the seven days prior to the interview, (b) want to work and are available to start work within a week of the interview, and (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview.

Stats SA reports on the situation of the unemployed using the official definitions only. However, in the present economic climate, there is a proportion of discouraged job seekers who face constraints, for example high travel costs and lack of transport, when seeking work, and these are reported on separately.

5.3.1 Estimated population of working age (15-65 years) by population group, gender and labour market status, according to the official definition of unemployment, September 2007

PRICES

6.1 Production price indices

The production price index (PPI) measures price trends of commodities produced throughout the major sectors of the economy, i.e. agriculture, forestry, fishing, mining, manufacturing, electricity, gas and water, and wholesale and retail trade (in the case of imported goods).

All commodities included in the PPI, are classified according to the *Standard Industrial Classification of all Economic Activities (SIC)*. The SIC is based on a standard industrial classification compiled by the United Nations (UN) for international use. Commodities in the manufacturing sector are divided into 23 major industrial groups according to the SIC.

Price information is collected for products known as 'indicator products'. Indicator products are identified as those products whose sale value represents the largest part of the total value of sales (turnover) in an industrial group. Prices are collected at the first sales point after production, which is producers in the case of locally produced commodities, and wholesalers or retailers in the case of imported commodities. Prices 'ex-factory' are requested but 'delivered' or 'free on rail/free on board' are accepted if it is the normal basis of quotation. Where prices are dependent on the quantity purchased or the class of purchaser, the price for the predominant quantity or class of purchaser is collected. Value-added tax (VAT) is excluded and normal discounts generally available to purchasers are deducted from quoted prices.

Where possible, price information is collected at successive time intervals for the same grade or quality of commodities. In the case of specialised commodities, such as machinery and transport equipment, price information is collected for equivalent items. Where quality or other changes occur in commodities, or where substitute commodities are introduced, the price indices are adjusted to compensate for any change in the price solely due to quality or similar changes.

Price information refers to the first seven days of the relevant month, except in the mining and agricultural sectors where average prices for the relevant month are collected. Most prices for commodities manufactured locally are collected at three-monthly intervals, while prices of imported commodities are collected monthly. If Statistics South Africa (Stats SA) were notified of price changes for products not surveyed on a monthly basis, products would be surveyed whenever price changes occur.

6.1.1 Commodities for South African consumption

Indices in this table reflect price changes for all commodities for South African consumption, i.e. locally produced and sold, as well as imported commodities.

PRICES

6.1 Production price indices

6.1.3 Materials used in certain industries

A third series of indices is also calculated, namely production price indices for materials used in the following industries:

Building and construction
 Building industries
 Civil engineering
 Mechanical engineering
 Electrical engineering

The price information collected for the indices shown in Tables 6.1.1 and 6.1.2 is utilised for the calculation of these indices.

The weights are based on the values of materials used in the relevant industries.

Base: 2000=100

Year or month	Industry				
	Building and construction	Building industries	Civil engineering	Mechanical engineering	Electrical engineering

PRICES

6.2 Consumer prices

6.2.1 Indices for metropolitan areas

The consumer price index is calculated for each of 12 urban areas in South Africa separately and combined. The average for 2000 is currently used as base (100).

Each of the urban areas for which an index is calculated has its own weight. The weights and indices for the areas are combined by means of the following weights to obtain the weighted average:

	Weight
Cape Peninsula	18,58
Port Elizabeth/Uitenhage	3,56
East London	1,72
Kimberley	0,64
Pietermaritzburg	2,09
Durban/Pinetown	11,23
Pretoria/Centurion/Akasia	17,39
Witwatersrand	38,32
Klerksdorp/Stilfontein/Orkney	0,00
Free State Goldfields	1,91
Bloemfontein	2,48
Nelspruit/Witbank	1,75
Polokwane (Pietersburg)	0,33
	100,00

The consumer price indices for the different urban areas do not permit inter-urban comparisons of price levels or costs of living. The indices show the price changes which have taken place from time to time in each of the urban areas, independently of any other urban area.

Base: 2000=100

PRICES

6.2 Consumer prices

6.2.2 Indices for groups - Metropolitan areas

The weighting system of the index is based on the survey of expenditure patterns of households conducted during 2000. Certain expenditures are not taken into account for the purposes of the consumer price index, for example income tax, contributions to pension and provident funds, premiums of life and endowment policies and expenditure of a capital nature (for example, payment on home loans, excluding interest). Prices are collected by enumerators visiting retail outlets and observing the goods and recording the prices from a representative sample of retail and service establishments in the different areas, or from other organisations, associations or public bodies. Rent is obtained from a quarterly survey and domestic workers' wages are obtained from a six monthly survey. For most other food items, as well as for clothing, fuel and power, furniture and equipment, personal care requisites, stationery, etc. prices are collected every month. Certain price information is obtained annually or as often as price changes occur. Price information for all items refers to the first three weeks of the month.

MINING

8.1 Indices of the physical volume of mining production

The indices of the physical volume of mining production are based on information furnished by the Minerals Bureau, Department of Minerals and Energy. The weighting factors used for the computation of the indices, are based on the gross values of production of the individual minerals in 2000. Two indices are shown for total mining production, namely an index including gold production and an index which excludes gold production.

Monthly statistics are preliminary and subject to amendments.

(a) Actual indices

1/ Iron ore includes haematite and magnetite.

2/ Other metals (columns 10 and 24) and other non-metals (columns 14 and 28) include all other metallic minerals and other non-metallic minerals which are not shown separately.

3/ Diamonds include mine and alluvial diamonds.

4/ Building materials include the following minerals: gypsum, lime and limestone, vermiculite, fire clay, flint clay, granite or norite, marble, quartzite, schist, shales for cement, siltstone, slate, quarries and brickmaking clay.

5/ PGMS - Platinum Group Metals include platinum, iridium, osmiridium, palladium, rhodium, ruthenium and osmium.

MINING

8.2 Production and sales

Amended monthly figures are not published in all cases, but are taken into account when annual figures are compiled. The published monthly figures, therefore, do not necessarily add up to the annual figures.

Gold and silver production is shown in kilograms (kg), i.e. 1 kg = 32,15075 troy ounces. Diamond production is published in 1 000 carats (columns 50 and 51), while the production of all other minerals is published in 1 000 metric tons, (1t = 1 000 kg).

9.1	Index of the physical volume of manufacturing production	9.1
9.1.1	Total manufacturing, manufacturing divisions and manufacturing major groups	9.1
9.2	Value of sales	9.7
9.2.1	Total manufacturing, manufacturing divisions and manufacturing major groups	9.7

MANUFACTURING

9.1 Index of the physical volume of manufacturing production

The calculation of the manufacturing production indices (columns 1 to 110) is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI) for 38 of the 44 SIC major groups in manufacturing. The volume indices for the groups tobacco products, coke and refined petroleum products, basic iron and steel products, basic precious and non-ferrous metal products, motor vehicles and parts and accessories for motor vehicles, are calculated on the basis of physical quantities produced.

The weighting factors for combining of manufacturing major groups to total manufacturing were calculated on the basis of the value added data from the large sample survey of manufacturing, 2001. According to international practice, indices are re-based every five years. The industrial classification used in this publication is based on the *Standard Industrial Classification of all Economic Activities (SIC), January 1993*.

MANUFACTURING

9.2 Value of sales

Data relating to sales (columns 111 to 220) are collected together with the monthly production data. The sample data are weighted according to the original sample design in order to represent the population of enterprises in the manufacturing industry. The current sample was drawn in April 2007. The values shown represent net sales (i.e. gross sales less returns, discounts and other deductions) of own manufactured goods, and net charges for work done.

9.2.1 Total manufacturing, manufacturing divisions and manufacturing major groups

CONSTRUCTION

10.1 Building statistics of the private sector

Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. The figures obtained from these municipalities do not include the bulk of subsidised low-cost dwelling-houses. Data regarding subsidised low-cost dwelling-houses completed or under construction, supplied by the provincial governments and co-ordinated by the National Department of Housing, are shown in Table 10.5 (page 10.17).

10.2 Building statistics at constant 2000 prices

The value of building plans passed and buildings completed at constant prices measures building activities in terms of ruling prices in a specific base year, which is currently 2000. The value of building plans passed at constant prices for each month is obtained by deflating the values at current prices with a price index known as the 'lump sum domestic buildings' as published in statistical release P0151: *JBCC Contract Price Adjustment Provisions Work Group Indices*. In order to be applicable, these indices (base February 1991=100) are converted to the base year 2000=100.

The value of buildings completed at constant prices is obtained by deflating the values at current prices with the price index which is used to calculate building plans passed at constant prices (see paragraph above). Since the completion of buildings may extend over a few months to a few years, the current value of buildings completed is deflated by price indices which prevailed at the time the plans were passed. Therefore, the duration of the completion of different types of buildings are taken into account in ascertaining the deflators, e.g. the value of dwelling-houses completed at constant prices at January 2007 is obtained by deflating the current value of dwelling-houses completed for January 2007 with the price index of the month six months prior to January 2007. Furthermore, the value of other residential buildings, non-residential buildings and additions and alterations at constant prices is obtained by deflating the current values with price indices of 12 months, 18 months and 12 months prior to the relevant month respectively.

10.3 Revised figures

Revised figures are due to late submission of data to Stats SA, or to respondents reporting revisions or corrections to their figures. Figures for the latest month are therefore preliminary. Data are edited at municipal level.

1/ Includes all top structures completed and sites serviced in respect of the reporting period.

2/ Estimates by the National Department of Housing.

Note:

Low-cost housing information recorded in Table 10.5.1 refers to the number of top structures completed during the financial year 1 April 2005 to 31 March 2006. It is therefore not comparable with the data listed in Table 10.5.2, which refer to all top structures completed and sites serviced during the reporting period.

11.1 **Units produced and consumed - Actual and seasonally adjusted**

11.1

electricity

chapter eleven

ELECTRICITY

11.1 Units produced and consumed

The data are collected on a sample basis and raised to obtain estimated figures. The level of the data was adjusted according to the results of the 1995 census of electricity, gas and steam.

The figures shown relate to public supply undertakings and self-producers. Public supply undertakings comprise Eskom and local authorities, while self-producers are undertakings which, in addition to their main activities, themselves produce electric energy intended in greater part or in its entirety to meet their own needs - mines, manufacturing establishments and selected local authorities are *inter alia* included.

INTERNAL TRADE

Stats SA introduced new wholesale trade sales, retail trade sales and motor trade sales surveys utilising an upgraded business register commencing with the month of July 2007. The previous surveys and the current ones were run side by side from April to June 2007, which provided a set of factors that could be applied to the old series to revise previous estimates back to January 1998. The figures up to February 2006 are thus backcasted data based on the movements of the old series and the levels of the new series.

Seasonally adjusted series for retail trade sales is still under review and will be published as soon as the review is completed.

The figures in columns 1-10 represent estimated total sales of merchandise in the trade sector.

The value of wholesale trade sales at constant (2000) prices are calculated using a combination of the production price indices for consumption in South Africa, and total output of South African industry groups from the production price index (PPI) to deflate sales at current prices.

The value of retail trade sales at constant (2000) prices are calculated using the price index for commodities for the metropolitan areas from the consumer price index (CPI) to deflate sales at current prices.

In order to be classified as a wholesaler, an enterprise must derive 50 per cent or more of its income from sales of merchandise to other enterprises and/or institutions.

In order to be classified as a retailer, an enterprise must derive more than 50 per cent of its income from sales of merchandise to the general public for private or domestic consumption. The data provided by motor service stations and dealers in motor vehicles, spares and accessories are classified as motor trade and appear in columns 5 and 10.

Stats SA collects information regarding wholesale trade and motor trade excluding VAT, but retail trade including VAT.

12.6 Tourist accommodation statistics by type of accommodation

The results presented in this table are derived from the monthly survey of the tourist accommodation industry. This survey is based on a sample of private and public enterprises operating in the tourist accommodation industry.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax and/or value-added tax (VAT). Thus, enterprises that are not registered for tax, are excluded from this survey.

All figures are preliminary.

Source: Stats SA, *Tourist accommodation* (Statistical release P6410)

Note:

'Stay unit' refers to the unit of accommodation available to be charged out to guests, for example, a powered site in a caravan park or a room in a hotel. 'Other income' includes rentals and fees received for transport services, offices, shops, garages, dance floors, laundry services, telephone and fax services. Other accommodation includes lodges, bed and breakfast, self-catering enterprises.

A month marked with an asterisk (*) denotes that figures have been revised for this month.

INTERNAL TRADE

12.7 Civil cases

A revised monthly sample survey was introduced with effect from January 1994. The data are based on information collected from a sample of 151 magistrates' offices in South Africa, excluding the former Transkei, Bophuthatswana, Venda and Ciskei (TBVC States). The monthly sample particulars are raised to obtain estimated totals. The raising factors are based on information relating to all civil cases recorded during the year ended 30 June 1992. The total number of civil cases recorded by the magistrates' offices in the sample represent 95 per cent of the civil cases recorded by all magistrates' and commissioners' offices during the year ended 30 June 1992. Civil cases recorded in selected magistrates' offices are shown in this table.

Civil cases recorded relate to all cases, in other words debt cases as well as claims for damages, ejection orders and other non-debt cases are included.

Civil summonses (columns 75 to 84, 85 to 93 and 95 to 103) - relate to debt cases only and thus exclude claims for damages, ejection orders and other non-debt cases.

INTERNAL TRADE

12.8 Insolvencies

The figures are based on information extracted from the Master's Notices published currently in the Government Gazette and refer to insolvencies under the Insolvency Act, 1936 (Act No. 24 of 1936). Insolvencies only relate to private persons, individuals and partnerships. These statistics show the number of final sequestrations. This does not represent the number of persons involved, as a partnership is counted as one insolvency, irrespective of the number of partners.

TRANSPORT

Work performance statistics are reflected from a sample of private sector enterprises (firms) primarily engaged in the conveyance of goods for remuneration, and Transnet Ltd. The sample was drawn from the 1986 census of transport and allied services, and estimates were obtained by raising data collected on basis of a stratified systematic sample.

This survey has been suspended and is undergoing a re-engineering process to improve coverage of the transport and related activities.

FINANCIAL STATISTICS: PRIVATE ENTERPRISES OPERATING IN THE FORMAL NON-AGRICULTURAL BUSINESS SECTOR

14.1 Selected income and expenditure items

The Quarterly financial statistics survey

The Quarterly financial statistics survey covers a sample of private enterprises operating in the formal non-agricultural business sector of the South African economy, excluding financial intermediation, insurance and government institutions. Estimates for the electricity, gas and water supply industry are included from the quarter ended September 2005 onwards. The data are collected on a sample basis and raised to obtain estimates.

For background to the changes that have occurred, readers are referred to Stats SA's latest quarterly publication: *Quarterly financial statistics, March 2008* (Statistical release P0044).
