Liquidations: results for July 2017

Table A – Number of liquidations

Number of liquidations July 2017	% change between July 2016 and July 2017	% change between May to July 2016 and May to July 2017	% change between January to July 2016 and January to July 2017
128	-30,8	-16,1	-11,9

The total number of liquidations reflected a year-on-year decrease of 30,8% in July 2017. Voluntary liquidations decreased by 42 cases and compulsory liquidations decreased by 15 cases.

Table 1 shows liquidations by industry. Measured year-on-year, trade, catering and accommodation decreased from 45 to 34 (11 fewer liquidations), financing, insurance, real estate and business services decreased from 58 to 40 (18 fewer liquidations), and unclassified decreased from 46 to 25 (21 fewer liquidations).

There was a decrease of 16,1% in the three months ended July 2017 compared with the three months ended July 2016. The total number of liquidations recorded for the first seven months of 2017 decreased by 11,9% compared with the first seven months of 2016.

Insolvencies: results for June 2017

Table B – Number of insolvencies

Number of insolvencies June 2017	% change between June 2016 and June 2017	% change between April to June 2016 and April to June 2017	% change between January to June 2016 and January to June 2017
270	18,4	-6,0	-11,9

A year-on-year increase of 18,4% was estimated in June 2017. A decrease of 6,0% was estimated in the second quarter of 2017 compared with the second quarter of 2016. The estimated number of insolvencies for the first six months of 2017 showed a decrease of 11,9% compared with the same period in 2016.

Seasonally adjusted insolvencies increased by 15,8% in June 2017 compared with May 2017. This followed month-on-month changes of -1,5% in May 2017 and 19,9% in April 2017 – see Table 6.

Explanatory notes

- Introduction**
- 1 Statistics South Africa (Stats SA) collects administrative information on liquidations from Companies and Intellectual Property Commission, Department of Trade and Industry, while information on insolvencies is gathered from Notices of the Master of the Supreme Court that appear in the Government Gazette.
 - 2 This statistical release reflects voluntary and compulsory liquidations of companies and close corporations and insolvencies of individuals and partnerships.
- Purpose of the survey**
- 3 The aggregated data in this release are used by the private and public sectors to measure economic performance and are also an important indicator of the scope of unpaid debt in South Africa.
 - 4 Due to insolvencies figures being available late, the data on insolvencies are published a month later than liquidations.
- Scope of the survey**
- 5 This survey covers the total number of:
 - companies and close corporations which were liquidated; and
 - individuals and partnerships placed under final sequestration.
- Symbols and abbreviations**
- 6 Stats SA – Statistics South Africa
- Seasonal adjustment**
- 7 Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the US Bureau of the Census, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.
 - 8 Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for liquidations and insolvencies is described in more detail on the Stats SA website:
[click to download seasonal adjustment P0043 March 2017](#)
- Trend cycle**
- 9 The trend is the long-term pattern or movement of a time series. The X-12- ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimate the underlying trend cycle.

Glossary

- Compulsory liquidation** A compulsory liquidation takes place when the affairs of a company or close corporation are wound up by order of the court.
- Insolvency** Insolvency refers to an individual or partnership which is unable to pay its debt and is placed under final sequestration. The number of insolvencies does not refer to the number of persons involved, as a partnership which is unable to pay its debt is regarded as one insolvency, irrespective of the number of partners.
- Liquidation** Liquidation refers to the winding-up of the affairs of a company or close corporation when liabilities exceed assets and it can be resolved by voluntary action or by an order of the court.
- Voluntary liquidation** A voluntary liquidation takes place when a company or close corporation, by own choice, resolves to wind-up its affairs.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
