## Key findings for the quarter ended June 2010

## The total turnover of all industries ${ }^{1}$ for the second quarter of 2010 was estimated at R1 251175 million (R1,25 trillion), an increase of 4,9\% compared with the revised first quarter of 2010 (R1 192604 million or R1,19 trillion).

Between the first and second quarters of 2010, turnover increased in seven of the eight industries covered in the survey. The largest increase in turnover was recorded for electricity, gas and water supply ( $+25,0 \%$ ), followed by mining and quarrying ( $+15,9 \%$ ), manufacturing ( $+5,0 \%$ ), trade $(+4,8 \%)$, community, social and personal services (excluding government institutions) (+2,8\%), construction (+2,7\%) and transport, storage and communication (+1,1\%). A decrease was recorded for real estate and other business services (excluding financial intermediation and insurance) (-0,7\%).

Total inventories at the end of the second quarter of 2010 were estimated at R474 046 million, compared with R458 406 million for the revised first quarter of 2010 , an increase of $3,4 \%$. The largest increase in inventories was recorded for transport, storage and communication (+20,2\%), followed by mining and quarrying ( $+8,2 \%$ ), real estate and other business services (excluding financial intermediation and insurance) ( $+8,1 \%$ ), electricity, gas and water supply ( $+7,0 \%$ ), manufacturing $(+5,7 \%)$, community, social and personal services (excluding government institutions) ( $+4,6 \%$ ) and construction (+0,4\%). A decrease was recorded for trade ( $-1,6 \%$ ).

Purchases for the second quarter of 2010 were estimated at R724 483 million, compared with R684 091 million for the revised first quarter of 2010, an increase of $5,9 \%$. The largest increase in purchases was recorded for community, social and personal services (excluding government institutions) ( $+8,6 \%$ ), followed by real estate and other business services (excluding financial intermediation and insurance) ( $+8,3 \%$ ), manufacturing ( $+7,1 \%$ ), mining and quarrying ( $+7,0 \%$ ), electricity, gas and water supply ( $+6,3 \%$ ), trade ( $+5,5 \%$ ), transport, storage and communication ( $+2,7 \%$ ) and construction ( $+0,8 \%$ ).

Total capital expenditure on property, plant and equipment for the second quarter of 2010 was estimated at R58 377 million, compared with R45 898 million for the revised first quarter of 2010, an increase of $27,2 \%$. The largest increase was reported for electricity, gas and water supply $(+365,7 \%)$, followed by manufacturing ( $+41,3 \%$ ), mining and quarrying ( $+16,1 \%$ ), real estate and other business services (excluding financial intermediation and insurance) ( $+9,2 \%$ ), community and social and personal services (excluding government institutions) (+5,2\%), trade (+3,1\%) and construction (+1,7\%). A decrease was recorded for transport, storage and communication (-17,9\%).

Turnover of all industries increased by 8,6\% between the second quarters of 2009 and 2010. The largest increase was recorded for electricity, gas and water supply ( $+40,5 \%$ ), followed by mining and quarrying ( $+23,5 \%$ ), community, social and personal services (excluding government institutions) ( $+12,0 \%$ ), manufacturing ( $+11,2 \%$ ), transport, storage and communication ( $+8,1 \%$ ), trade ( $+6,4 \%$ ) and construction ( $+1,2 \%$ ). A decrease was recorded for real estate and other business services (excluding financial intermediation and insurance) (-2,2\%).

## Technical notes

## Confidence intervals

The 95\% confidence intervals of a population parameter (turnover) are obtained as follows:

Lower limit
= lower 95\% confidence limit of a population parameter
= estimate $-1,96^{*}$ Standard error (estimate);
and
Upper limit
= upper 95\% confidence limit of a population parameter
$=$ estimate $+1,96^{*}$ Standard error (estimate)

## Standard error (SE)

## Relative standard error (RSE)

$=\underline{\text { Upper Limit (R million) }- \text { Lower Limit ( } \mathrm{R} \text { million) }) ~}$
2 * 1,96
$=\underline{\text { SE (estimate)* } 100}$ estimate

Table A - Estimates of turnover by industry within 95\% confidence limits: March 2010

| Industry | Lower limit | Estimate | Upper limit | Relative standard error |

${ }^{1}$ Enterprises with a turnover of less than R 2000000 are excluded from this survey.

## Explanatory notes

Introduction

## Purpose of the survey

1 Stats SA conducts a quarterly sample survey to collect a range of financial statistics in respect of enterprises in the formal business sector of the South African economy, excluding agriculture, hunting, forestry and fishing and financial intermediation and insurance and government institutions. This statistical release presents a selection of key findings and tables from Stats SA's Quarterly Financial Statistics (QFS) survey, conducted in the June, September, December 2009, and March and June 2010 quarters, which examines key variables mentioned below:

- turnover;
- interest received and paid;
- dividends received and dividends payable;
- royalties, franchise fees, copyright, trade names and trade and patent rights received and paid;
- income and expenditure in respect of rental/leasing of land, buildings and other structures, including payments for water and electricity services;
- income and expenditure in respect of hiring/leasing of plant, machinery, vehicles and other equipment;
- employment costs;
- profit and losses on assets/investments sold or revalued;
- depreciation provided for;
- purchases;
- other income and other expenditure;
- total income and total expenditure;
- net profit or loss before providing for company tax and dividends;
- tax and company tax brought into account;
- carrying value of property, plant and equipment at the end of the quarter;
- inventories as at the beginning and end of the quarter; and
- capital expenditure on new property, plant and equipment at the end of the quarter.

2 The statistical release also contains ratios derived from estimates of selected key variables.

3 In order to improve timeliness of the publication, some information for the current quarter may have been estimated due to late or non-submission by respondents. These estimates are revised as soon as the actual information is available.

4 Additional information regarding estimates of small, medium and large enterprises by industry per variable for the quarters ended March and June 2010 is made available on the Stats SA website.

5 The QFS survey covers a sample of enterprises operating in the formal nonagricultural business sector of the South African economy, excluding financial intermediation, insurance and government institutions. Results of the survey are used in compiling estimates of the Gross Domestic Product (GDP) and its components, which in turn are used to develop and monitor government policy. These statistics are also used by the private sector in analyses of comparative business and industry performance. The results are published quarterly in statistical release P0044: Quarterly financial statistics.

## Scope of the survey

6 This survey covers financial statistics of the following industries according to the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993:

- mining and quarrying industry;
- manufacturing industry;
- electricity, gas and water supply industry;
- construction industry;
- trade industry;
- transport, storage and communication industry;
- real estate and business services industry, excluding financial intermediation and insurance; and
- community, social and personal services industry, excluding government institutions.

## Classification

## Statistical unit

## Survey methodology and design

7 The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of all Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in this publication are only presented at SIC major division (one digit) level. Each enterprise is classified to an industry which reflects the predominant activity of the enterprise.

8 For the purpose of this publication, the statistical unit in the quarterly financial statistics survey is the enterprise. An enterprise is defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

9 The survey is conducted on a quarterly basis. Questionnaires are sent to a sample of about 5000 enterprises. Questionnaires have to be returned to Stats SA within three weeks after the end of the quarter concerned. Fax, telephone and electronic reminders are used to follow up on non-respondents.

10 Samples are normally drawn each year and the resulting level changes in estimates are indicated when the new sample is implemented. A new sample was drawn early in 2009 and implemented from the June 2009 quarter.

11 The sample was drawn from a population of enterprises that contributed approximately $95 \%$ to the total turnover per industry. Adjustments are made to the estimates to account for enterprises contributing less than 5\% of the total turnover within each industry. All enterprises are stratified by type of enterprise according to size groups based on the National Small Business Amendment Bill, 2003, size group allocations for industries as defined in the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993. All large enterprises, which comprise $50 \%$ of the number of enterprises in the sample, are completely enumerated, while simple random sampling is applied for medium sized, small and very small enterprises. Enterprises with a turnover of less than R 2000000 are excluded from this survey. The data reported by the enterprises in the sample are weighted to represent all enterprises in the population.

## Reliability of estimates

12 Data presented in this publication are based on information obtained from a sample of enterprises and are, therefore, subject to sampling variability, that is, the data may differ from the figures that would have been produced if the data had been obtained from all enterprises in the different industries in South Africa. See Tables A and B (page 29) to determine the extent that estimates may vary.

13 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made with the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise nonsampling errors by designing the questionnaire carefully, conducting pilot studies, editing of data and the implementation of efficient operating procedures. Preliminary figures are indicated in the relevant tables.

Reasons for fluctuations are indicated on page 34 (paragraph 15).
Response rates

| Reasons for |
| :--- |
| fluctuations in |
| data |

## Reference period <br> Related publications

## Rounding-off of figures <br> Comparison of results with Quarterly Employment Statistics (QES) survey

14 June quarter 2009: 81\%
September quarter 2009: 81\%
December quarter 2009: 83\%
March quarter 2010: 83\%
June 2010: 80\%
15 The fluctuations in the data can be attributed to:

- revisions to previous quarters made in the event of new or revised information being furnished by the respondents;
- restructuring of large businesses;
- exchange rate fluctuations;
- restating of previous estimates due to International Financial Reporting Standards (IFRS);
- once-off items reflected in one or more quarters, but not reflected in other quarters;
- year end adjustments performed during the last quarter of the financial year;
- seasonal factors;
- items declared annually and not quarterly; and
- samples drawn annually. (See 10 above)

16 The estimates in this publication are based on a sample drawn from units in the surveyed population. As a result of the entire population not being surveyed, the published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic. (See page 29, Tables A and B)

17 The revised figures are due to respondents reporting revisions or corrections in their figures and late submissions of their data to Stats SA. Data are edited at individual enterprise level.

18 The reference period for this publication is from 1 April 2010 to 30 June 2010.

19 Users may also wish to refer to the following publications which are available from Stats SA:

- South African Statistics - issued annually.
- Annual Financial Statistics - issued annually.
- Gross Domestic Product - issued quarterly and annually.
- Bulletin of Statistics - issued quarterly.
- Mining: Production and sales - issued monthly.
- Manufacturing: Production and sales - issued monthly.
- Wholesale trade sales - issued monthly.
- Retail trade sales - issued monthly.
- Motor trade sales - issued monthly.

20 The figures in the tables have, where necessary, been rounded off to the nearest digit shown.

21 Employment cost estimates produced in this publication are based on information as defined by the International Accounting Standards 19 (IAS19) from an accounting perspective. The Quarterly Employment Statistics (QES) survey produces estimates for employment and earnings from the payroll perspective.

The differences between the QFS employment cost and QES earnings can be attributed but not limited to:

- Accounting and payroll timing differences in the recognition of employment related transactions;

## Glossary

## Carrying value of property, plant and equipment

## Capital expenditure on new property, plant and equipment

## Enterprise

## Establishment

Carrying value of property, plant and equipment at the end of the quarter includes:

- land;
- residential buildings and non-residential buildings;
- construction works, roads and parking areas;
- computers and other IT equipment;
- motor vehicles and other transport equipment; and
- plant, machinery, furniture, fittings and other office equipment.

Capital expenditure on new property, plant and equipment includes:

- the erection of new buildings and works, additions to and alterations of existing buildings and works, whether payments were made to outside contractors or concerns, or work done by the enterprise itself;
- work in progress capitalised;
- new plant and machinery, vehicles and equipment; and
- used plant and machinery, which were imported by or on behalf of the enterprise.

Company tax brought into account consists of taxes on incomes, profits and capital gains, excluding value-added tax (VAT). They are assessed on the actual or presumed incomes of enterprises and exclude employees' taxes and compulsory loan levies.

Employment/staff costs according to IAS 19 are costs incurred in exchange for services rendered by employees. These costs are divided into four categories: short-term employee benefits, post employment benefits, other long-term employee benefits and termination benefits.

## Employment costs include (among other types of employment benefits):

- wages and salaries;
- compensated absences (paid vacation and sick leave);
- commissions paid;
- profit sharing plans;
- bonuses;
- medical and life insurance benefits during employment;
- housing benefits;
- free or subsidised goods or services given to employees;
- pension benefits;
- post-employment medical and life insurance benefits;
- long-service or sabbatical leave;
- 'jubilee' benefits;
- deferred compensation programmes;
- severance, termination and redundancy payments to staff ; and
- other employee related costs not mentioned above.

An enterprise is a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.

An establishment is defined as an enterprise or part of an enterprise that is situated at a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.

## Industry <br> International Financial Reporting Standards (IFRS)

## Inventories

An industry consists of a group of enterprises engaged in the same or similar kinds of economic activity, and is classified according to the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993.

International Financial Reporting Standards (IFRS) are international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the Accounting Standard Board. The purpose of IFRS is to improve transparency and comparability within financial reporting and introduce consistency in accounting.

Inventories consist of:

- outputs that are held by the enterprise that produced them prior to their being further processed, sold, delivered to other units or used in other ways; and
- products acquired from other enterprises that are intended to be used for intermediate consumption or for resale without further processing (factored goods).

Raw materials consist of components for processing, packing materials, fuel, consumable and maintenance stores.

Work in progress consists of goods in the process of manufacturing or work that has been partially done, but which has not yet been completed at the beginning and end of the quarter.

Finished goods include manufactured goods by own manufacturers and goods not produced by the enterprise but purchased for resale, not sold at the beginning and end of the quarter.

Net profit or loss before drawings by proprietors or partners, company tax paid or provided for and dividends paid or provided for are taken into account is calculated as total income minus opening inventories plus closing inventories less total expenditure. In the tables where net profit or loss is shown, it is the amount arrived at after total losses of individual enterprises were deducted from total profits of individual enterprises.

Purchases includes:

- raw materials, components used, etc in production;
- fuels;
- spare parts and building materials; and
- purchases and transfers-in of factored goods, intermediate products and partially completed goods from related enterprises.

## Purchases excludes:

- subcontract and commission expenses;
- motor vehicle running expenditure, including parts and fuel;
- purchases of materials capitalised for "capital work done" by own employees; and
- containers and packaging materials.

Turnover refers to the following items for all industries, excluding real estate and other business services (excluding financial intermediation and insurance):

- the value of sales;
- amounts received for work done; and
- amounts received for services rendered.

Turnover refers to the following items for the real estate and other business services industry (excluding financial intermediation and insurance):

- the value of sales;
- amounts received for work done;
- amounts received for services rendered;
- interest received;
- rent and or lease payments received for land and buildings; and
- rent, leasing and hiring received for machinery, vehicles and other equipment.

Turnover excludes:

- value-added tax (VAT);
- net profit or loss on sales or revaluation of fixed assets (including profit or loss on foreign exchange); and
- excise duty.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data, and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za
