## Key findings for the quarter ended March 2008

The total turnover of all industries ${ }^{1}$ for the first quarter of 2008 was estimated at R1 168891 million (R1,17 trillion), a decrease of 0,6\% compared with the revised fourth quarter of 2007 (R1 176207 million or R1,18 trillion).

Between the fourth quarter of 2007 and the first quarter of 2008, turnover decreased in six of the eight industries covered in the survey. The largest decrease was recorded for transport, storage and communication ( $-3,5 \%$ ), followed by electricity, gas and water supply ( $-2,1 \%$ ), manufacturing ( $-2,0 \%$ ), trade ( $-0,8 \%$ ), community, social and personal services (excluding government institutions) ( $-0,3 \%$ ) and real estate and other business services (excluding financial intermediation and insurance) ( $-0,1 \%$ ). Increases were reported in mining and quarrying (+7,1\%) and construction (+3,1\%).

Total inventories at the end of the first quarter of 2008 were estimated at R384 933 million, compared with R366 437 million for the revised fourth quarter of 2007, an increase of $5,0 \%$. The highest increase in inventories was recorded for community, social and personal services (excluding government institutions) $(+17,0 \%)$, followed by manufacturing ( $+8,3 \%$ ), mining and quarrying ( $+8,2 \%$ ), electricity, gas and water supply ( $+4,6 \%$ ), transport, storage and communication ( $+4,0 \%$ ), real estate and other business services (excluding financial intermediation and insurance) ( $+2,4 \%$ ), trade ( $+1,6 \%$ ) and construction ( $+0,7 \%$ ).

Purchases at the end of the first quarter of 2008 were estimated at R 682274 million, compared with R687 058 million for the revised fourth quarter of 2007, a decrease of $0,7 \%$. The highest decrease in purchases was recorded for community, social and personal services (excluding government institutions) $(-6,1 \%)$, followed by transport, storage and communication ( $-4,1 \%$ ), trade ( $-3,7 \%$ ), electricity, gas and water supply ( $-2,0 \%$ ) and mining and quarrying ( $-1,8 \%$ ). Increases were reported in construction ( $+5,4 \%$ ), real estate and other business services (excluding financial intermediation and insurance) (+4,1\%) and manufacturing (+3,2\%).

Total capital expenditure on new buildings, improvement, construction works, machinery, furniture, fittings, vehicles and other equipment was estimated at R67 556 million for all industries for the first quarter of 2008, an increase of 4,0\% compared with the revised fourth quarter of 2007 (R64 981 million). The highest increase was reported in transport, storage and communication (+63,9\%), followed by electricity, gas and water supply ( $+22,0 \%$ ) and construction (+9,5\%). Decreases were reported in trade ( $-33,9 \%$ ), community, social and personal services (excluding government institutions) (-24,8\%), manufacturing (-19,0\%), real estate and other business services (excluding financial intermediation and insurance) ( $-13,7 \%$ ) and mining and quarrying (-11,1\%).

Turnover for all industries increased by 15,4\% between the first quarters of 2007 and 2008. The largest increase was reported by construction ( $+40,1 \%$ ), followed by mining and quarrying ( $+29,1 \%$ ), trade ( $+18,0 \%$ ), manufacturing ( $+15,1 \%$ ), transport, storage and communication ( $+10,3 \%$ ) and real estate and other business services (excluding financial intermediation and insurance) (+6,5\%). Decreases were reported in community, social and personal services (excluding government institutions) (-19,0\%) and electricity, gas and water supply ( $-6,7 \%$ ).

${ }_{7}^{6}$ Net profit before providing for company tax / book value of fixed assets at the end of quarter
${ }^{7}$ Total capital expenditure on new assets / book value of fixed assets at the end of quarter.

## Technical notes

## Confidence intervals

The 95\% confidence intervals of a population parameter (turnover) are obtained as follows:

Lower limit
= lower 95\% confidence limit of a population parameter
= estimate - 1,96* Standard error (estimate);
and
Upper limit
$=$ upper 95\% confidence limit of a population parameter
$=$ estimate $+1,96^{*}$ Standard error (estimate)

## Standard error (SE)

Relative standard error (RSE)

## Neyman Optimal Allocation

Before drawing samples in each of the surveys the population of enterprises on the Business Sampling Frame (BSF) was stratified. Strata were formed using a combination of the standard industrial classification variable and the measure of size variable for enterprises. The Neyman optimal allocation formula used to allocate samples to each stratum is given by a formula below.
$\mathrm{n}_{\mathrm{h}}=$

$$
\frac{\mathrm{N}_{\mathrm{h}} \mathrm{~S}_{\mathrm{h}}}{\sum \mathrm{~N}_{\mathrm{h}} \mathrm{~S}_{\mathrm{h}}}
$$

where $N_{h}$ and $S_{h}$ are the stratum population size and the stratum variance, respectively.

## Explanatory notes

## Introduction

Purpose of the survey

## Scope of the survey

1 Statistics South Africa (Stats SA) conducts a quarterly sample survey to collect a range of financial statistics in respect of enterprises in the formal non-agricultural business sector of the South African economy, excluding financial intermediation and insurance and government institutions. The statistical release contains information regarding:

- turnover;
- interest received and paid;
- dividends received and dividends payable;
- royalties, franchise fees, copyright, trade names and trade and patent rights received and paid;
- income and expenditure in respect of rental/leasing of land, buildings and other structures, including payments for water and electricity services;
- income and expenditure in respect of hiring/leasing of plant, machinery, vehicles and other equipment;
- profit and losses on assets/investments sold or revalued;
- depreciation provided for;
- purchases;
- other income and other expenditure;
- total income and total expenditure;
- net profit or loss before providing for company tax and dividends;
- tax and company tax brought into account;
- book value of land, buildings, machinery, furniture, fittings, vehicles and other equipment at the end of the quarter;
- inventories as at the beginning and end of the quarter; and
- capital expenditure on new buildings, improvement, construction works, machinery, furniture, fittings, vehicles and other equipment.

2 In order to improve timeliness of the publication, some information for the current quarter may have been estimated due to late or non-submission by respondents. These estimates are revised as soon as the actual information is available.

3 This statistical release presents a selection of key findings and tables from Stats SA's QFS survey, conducted in March, June, September and December 2007 and March 2008, which examines book value of land, buildings, machinery, furniture, vehicles and other equipment, inventories and selected income and expenditure items in the formal non-agricultural business sector in South Africa, excluding financial intermediation and insurance and government institutions.

4 The quarterly financial statistics (QFS) survey covers a sample of enterprises operating in the formal non-agricultural business sector of the South African economy, excluding financial intermediation, insurance and government institutions. Results of the survey are used in compiling estimates of the Gross Domestic Product (GDP) and its components, which in turn are used to develop and monitor government policy. These statistics are also used by the private sector in analyses of comparative business and industry performance. The results are published quarterly in statistical release P0044: Quarterly financial statistics.

5 This survey covers financial statistics of the following industries according to the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993:

- mining and quarrying industry;
- manufacturing industry;
- electricity, gas and water supply industry;
- construction industry;
- trade industry;
- transport, storage and communication industry;
- real estate and business services industry, excluding financial intermediation and insurance; and
- community, social and personal services industry, excluding government institutions.

## Statistical unit

## Survey methodology and design

## Reliability of estimates

## Response rates

6 The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of all Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in this publication are only presented at SIC major division (one digit) level. Each enterprise is classified to an industry which reflects the predominant activity of the enterprise.

7 The statistical unit for the collection of information is an enterprise. An enterprise is a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.

8 The survey is conducted on a quarterly basis. Questionnaires are sent to a sample of about 5000 enterprises. Questionnaires have to be returned to Stats SA within four weeks after the end of the quarter concerned. Fax and telephone reminders are used to follow up on non-respondents.

9 Samples are normally drawn each year and the resulting level changes in estimates are indicated when the new sample is implemented. A new sample was drawn in 2007 and implemented from the June 2007 quarter.

10 The sample was drawn from a population of enterprises that contributed approximately $95 \%$ to the total turnover per industry. Adjustments to the estimates to account for enterprises contributing less than $5 \%$ of the total turnover are made within each industry. All enterprises are stratified by type of enterprise according to size groups based on the National Small Business Amendment Bill, 2003, size group allocations for industries as defined in the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993. All large enterprises, which comprise $50 \%$ of the number of enterprises in the sample, are completely enumerated, while simple random sampling is applied for medium sized, small and very small enterprises. The data reported by the enterprises in the sample are weighted to represent all enterprises in the population.

11 Data presented in this publication are based on information obtained from a sample of enterprises and are, therefore, subject to sampling variability, that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the different industries in South Africa. See Tables A and B (page 24) to determine the extent that estimates may vary by.

12 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made with the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise nonsampling errors by designing the questionnaire carefully, conducting pilot studies, editing of data and the implementation of efficient operating procedures. Preliminary figures are indicated in the relevant tables.

Fluctuations may occur in consecutive quarters as a result of seasonal and economic factors.

| December quarter 2006: | $86 \%$ |
| :--- | :--- |
| March quarter 2007: | $86 \%$ |
| June quarter 2007: | $85 \%$ |
| September quarter 2007: | $85 \%$ |
| December quarter 2007: | $82 \%$ |
| March quarter 2008: | $81 \%$ |

| Reasons for fluctuations in data | 14 | The fluctuations in the data can be attributed to: <br> - revisions to previous quarters made in the event of new or revised information being furnished by the respondents; <br> - restructuring of large businesses; <br> - exchange rate changes; <br> - restating of previous estimates due to International Financial Reporting Standards (IFRS); <br> - once-off items reflected in one or more quarters, but not reflected in other quarters; <br> - year end adjustments performed during the last quarter of the financial year; <br> - seasonal factors; <br> - items declared annually and not quarterly; and <br> - changes in sampling. (See 9 above) |
| :---: | :---: | :---: |
| Standard error | 15 | The estimates in this publication are based on a sample drawn from units in the surveyed population. As a result of the entire population not being surveyed, the published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic. (See page 24, Tables A and B) |
| Revised figures | 16 | The revised figures are due to respondents reporting revisions or corrections in their figures and late submissions of their data to Stats SA. Data are edited at individual enterprise level. |
| Reference period | 17 | The reference period for this publication is the quarter ended 31 March 2008. |

## Glossary

## Book value of fixed assets

## Capital expenditure on new buildings, improvement, construction works, machinery, furniture, fittings, vehicles and other equipment

## Enterprise

Industry

## Inventories

Book value of fixed assets at the end of the quarter includes:

- land;
- residential buildings and non-residential buildings;
- construction works, roads and parking areas;
- computers and other IT equipment;
- motor vehicles and other transport equipment; and
- plant, machinery, furniture, fittings and other office equipment.

Capital expenditure on new buildings, improvements, construction works, machinery, furniture, fittings, vehicles and other equipment includes:

- the erection of new buildings and works, additions to and alterations of existing buildings and works, whether payments were made to outside contractors or concerns, or work done by the enterprise itself;
- work in progress capitalised;
- new plant and machinery, vehicles and equipment; and
- used plant and machinery, which were imported by or on behalf of the enterprise.

An enterprise is a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.

An industry consists of a group of enterprises engaged in the same or similar kinds of economic activity, and is classified according to the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, January 1993.

Inventories consist of:

- outputs that are held by the enterprise that produced them prior to their being further processed, sold, delivered to other units or used in other ways; and
- products acquired from other enterprises that are intended to be used for intermediate consumption or for resale without further processing (factored goods).

Work in progress consists of goods in the process of manufacturing or work that has been partially done, but which has not yet been completed at the beginning and end of the quarter.

Other inventories consist of raw materials, components for processing, packing materials, fuel, consumable and maintenance stores, finished goods (own manufactures) and finished goods not produced by the enterprise but purchased for resale, not sold at the beginning and end of the quarter.

## International Financial Reporting Standards (IFRS)

## Net profit or loss

## Purchases

## Statistical unit

Tax and company tax brought into account

## Turnover

International Financial Reporting Standards (IFRS) are international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the Accounting Standard Board.

Net profit or loss is the difference between total income and total expenditure before drawings by proprietors or partners, company tax paid or provided for and dividends paid or provided for are taken into account. In the tables where net profit or loss is shown, it is the amount arrived at after total losses of individual enterprises were deducted from total profits of individual enterprises.

Purchases include:

- raw materials, components used, etc in production;
- fuels for off-road vehicles;
- spare parts and building materials; and
- purchases and transfers-in of factored goods, intermediate products and partially completed goods from related enterprises.

A statistical unit is a unit about which statistics are tabulated, compiled or published. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

For the purpose of this publication, the statistical unit in the quarterly financial statistics survey is the enterprise. An enterprise is defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.

Tax and company tax brought into account consist of taxes on incomes, profits and capital gains, excluding value-added tax (VAT). They are assessed on the actual or presumed incomes of enterprises and exclude employees' taxes and compulsory loan levies.

Turnover refers to the following items for all industries, excluding real estate and other business services (excluding financial intermediation and insurance):

- the value of sales;
- amounts received for work done; and
- amounts received for services rendered.

Turnover refers to the following items for the real estate and other business services industry (excluding financial intermediation and insurance):

- the value of sales;
- amounts received for work done;
- amounts received for services rendered;
- interest received;
- rent and or lease payments received for land and buildings; and
- rent, leasing and hiring received for machinery, vehicles and other equipment.

Turnover excludes:

- value-added tax (VAT);
- net profit or loss on sales or revaluation of fixed assets (including profit or loss on foreign exchange);
- export freight charges; and
- excise duty.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data, and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
