25 June 2008

INFLATION OVERVIEW

The headline CPI annual inflation rate at April 2008 was 11,1%.

The annual change in CPIX, the monetary policy inflation target measure, was 10,4% at April 2008.

KEY FIGURES

| Main index | Index (2000=100) | | | Percentage change between | |
|---|------------------|----------|----------|---------------------------|-----------------------|
| | Apr 2007 | Mar 2008 | Apr 2008 | Mar 2008 and Apr 2008 | Apr 2007 and Apr 2008 |
| CPI (historical metropolitan areas) | 141,0 | 153,9 | 156,6 | +1,8 | +11,1 |
| CPI excluding interest rates on mortgage bonds (CPIX) (historical metropolitan and other urban areas) | 148,0 | 160,9 | 163,4 | +1,6 | +10,4 |
| CPI for rural areas | 144,7 | 158,9 | 161,7 | +1,8 | +11,7 |
| CPI for total country | 143,0 | 156,3 | 159,0 | +1,7 | +11,2 |
| CPI for food (historical metropolitan areas) | 157,7 | 179,6 | 182,4 | +1,6 | +15,7 |
| CPI excluding food (historical metropolitan areas) | 136,9 | 147,5 | 150,2 | +1,8 | +9,7 |
| Core index (historical metropolitan areas) | 145,9 | 158,0 | 160,8 | +1,8 | +10,2 |

The headline inflation rate (year-on-year) was 0,5 of a percentage point higher than the 10,6% recorded at March 2008. The year-on-year increase in the CPIX for April 2008 was 0,3 of a percentage point higher than the 10,1% y/y increase recorded at March 2008.

This higher headline rate at April 2008 can be explained by increases in the annual rates of change for:

- The CPI for food which increased to 15,7% at April 2008 from 15,3% at March 2008.
- The CPI for household operation which increased to 12,5% at April 2008 from 7,2% at March 2008.
- The CPI for housing which increased to 11,4% at April 2008 from 10,2% at March 2008.

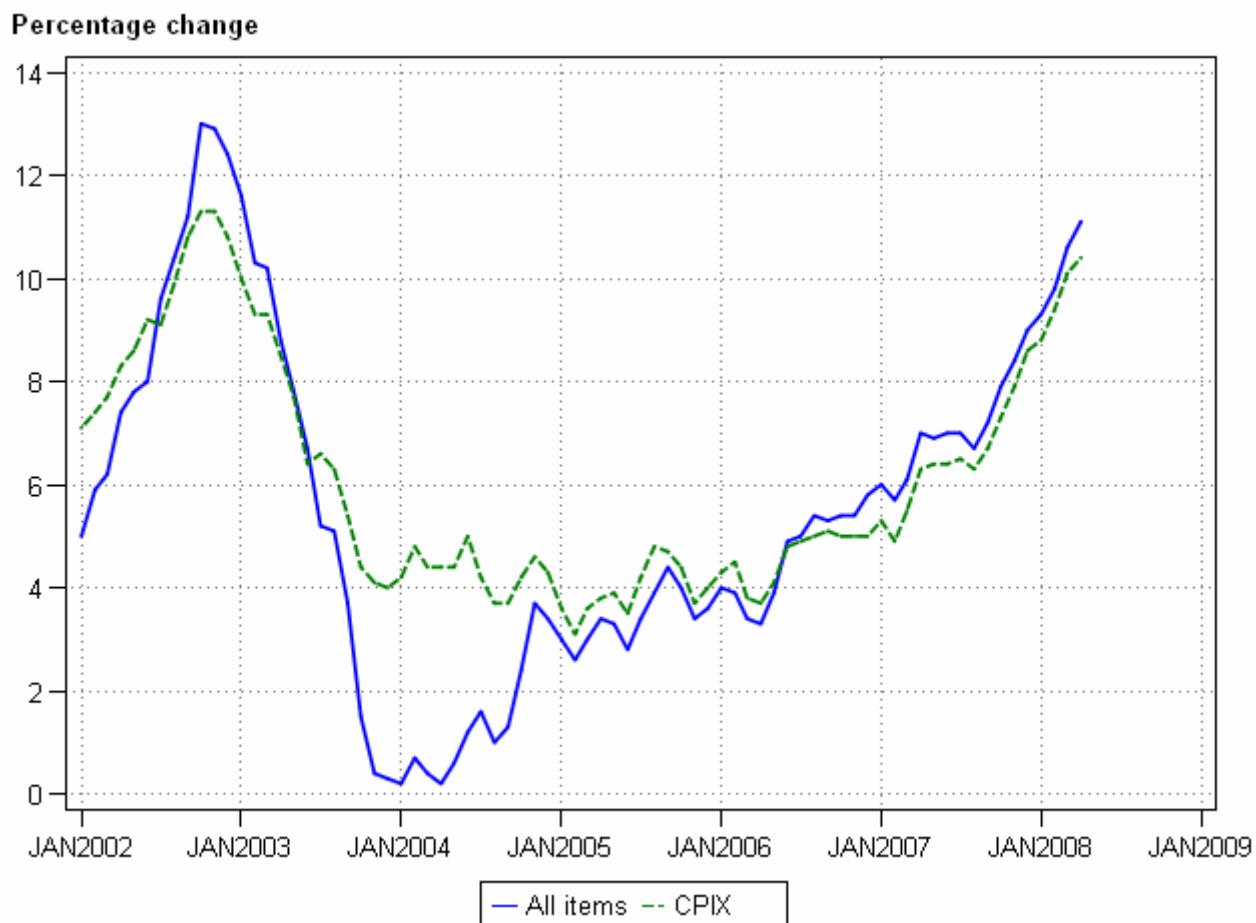

These increases were slightly counteracted by a decrease in the annual rate of change for:

- The CPI for transport which decreased to 15,6% at April 2008 from 16,1% at March 2008.

The main contributors to the annual increase of 11,1% in the CPI at April 2008 were food (+ 3,8 percentage points), housing (+ 2,3 percentage points), transport (+ 2,3 percentage points), household operation (+ 0,6 of a percentage point), medical care and health expenses (+ 0,5 of a percentage point), education (+ 0,4 of a percentage point) and fuel and power (+ 0,3 of a percentage point) (see table 3.1 on page 18).

The annual rate of increase in food prices for the historical metropolitan areas was 15,7% at April 2008. This rate was 0,4 of a percentage point higher than the corresponding annual rate of 15,3% at March 2008. The increase of 15,7% was due to increases in the prices of grain products, milk, cheese and eggs, meat, fats and oils, other food products, vegetables, fruit and nuts, coffee, tea and cocoa, fish and other seafood and sugar.

The annual rate of increase in the price index for non-food items for metropolitan areas was 9,7% at April 2008. This rate was 0,7 of a percentage point higher than the corresponding annual rate of 9,0% at March 2008. Annual increases occurred in the price indices for transport (+ 15,6%), household operation (+ 12,5%), clothing and footwear (+ 11,4%), housing (+ 11,4%), cigarettes, cigars and tobacco (+ 9,3%), fuel and power (+ 9,1%), education (+ 8,8%), non-alcoholic beverages (+ 7,9%), alcoholic beverages (+ 6,0%), medical care and health expenses (+ 5,9%), personal care (+ 5,4%), reading matter (+ 4,4%), other products (+ 4,2%), communication (+ 2,0%) and recreation and entertainment (+ 0,5%). These increases were slightly counteracted by a decrease in the price index for furniture and equipment (- 0,5%).

NOTES

CPI for May 2008

No additional surveys will be conducted in May 2008.

Domestic workers' wages

For some time Stats SA has been evaluating the Unemployment Insurance Fund data on domestic workers. This dataset forms the source of changes to the domestic worker wages index in the April 2008 CPI release, and in subsequent releases. An explanatory note is available on the Stats SA website.

Clothing and footwear

The January 2008 CPI release contained changes to the methods used for collecting prices for and compiling the clothing and footwear index. Following the release of the January 2008 figures, Stats SA published an explanatory note on this matter. This note is available on the Stats SA website.

In order to assist users in understanding the impact of the change in method for clothing and footwear, Stats SA has committed to publishing the 'non-discounted' indices and rates of change for information purposes. We will also publish the impact of comparing the old 'discounted' index with the new 'non-discounted' index on the year on year rates of change of the various aggregate indices. This information follows below.

Non-discounted clothing and footwear index

| | Apr 2007 | Mar 2008 | Apr 2008 | Monthly % change | Annual % change |
|---|----------|----------|----------|------------------|-----------------|
| CPI Metropolitan areas | 86,7 | 87,2 | 87,3 | + 0,1 | 0,7 |
| CPIX Metropolitan and other urban areas | 87,1 | 87,3 | 87,3 | 0,0 | 0,2 |

Estimates of upward bias in the annual percentage changes of selected main indices resulting from the non-discounted clothing and footwear for April 2008

| Main index | Percentage points |
|--|-------------------|
| CPI All items - Metropolitan areas | 0,19 |
| CPIX All items - Metropolitan and other urban areas | 0,20 |
| Core - Metropolitan areas | 0,24 |
| Core - Metropolitan and other urban areas | 0,21 |
| CPIX All items excluding food – Metropolitan and other urban areas | 0,28 |

CPI new weights

Further details will be released on the website on the 1 July 2008

KEY FINDINGS

A. Consumer Price Index

1. Metropolitan areas

The headline inflation rate at April 2008 (i.e. the Consumer Price Index for the historical metropolitan areas at April 2008 compared with that at April 2007) was 11,1%

The official inflation rate (i.e. the percentage change in the CPI for the historical metropolitan areas at April 2008 compared with that at April 2007) was 11,1% at April 2008. This rate was 0,5 of a percentage point higher than the corresponding annual rate of 10,6% at March 2008 (see table 2.1.1, p.16).

This higher headline rate at April 2008 can be explained by increases in the annual rates of change for:

- **The CPI for food which increased to 15,7% at April 2008 from 15,3% at March 2008.**
- **The CPI for household operation which increased to 12,5% at April 2008 from 7,2% at March 2008.**
- **The CPI for housing which increased to 11,4% at April 2008 from 10,2% at March 2008.**

These increases were slightly counteracted by a decrease in the annual rate of change for:

- **The CPI for transport which decreased to 15,6% at April 2008 from 16,1% at March 2008.**

From March 2008 to April 2008 the Consumer Price Index for the historical metropolitan areas increased by 1,8%.

The main contributors to the annual increase of 11,1% in the CPI at April 2008 were food (+ 3,8 percentage points), housing (+ 2,3 percentage points), transport (+ 2,3 percentage points), household operation (+ 0,6 of a percentage point), medical care and health expenses (+ 0,5 of a percentage point), education (+ 0,4 of a percentage point) and fuel and power (+ 0,3 of a percentage point) (see table 3.1 on page 18).

From March 2008 to April 2008 the Consumer Price Index for the historical metropolitan areas increased by 1,8%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,6 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,5 of a percentage point), household operation (+ 0,4 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and housing (+ 0,3 of a percentage point, mainly due to the 0,5 of a percentage point increase in the interest rates on mortgage bonds) (see table 3.2, p.18).

2. Metropolitan and other urban areas

The inflation rate for the historical metropolitan and other urban areas was 11,0% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007)

The inflation rate for the historical metropolitan and other urban areas was 11,0% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007). This rate was 0,6 of a percentage point higher than the corresponding annual rate of 10,4% at March 2008.

This higher rate at April 2008 can be explained by increases in the annual rates of change for:

- **The CPI annual rate for food which increased to 15,8% at April 2008 from 15,6% at March 2008.**
- **The CPI annual rate for household operation which increased to 12,5% at April 2008 from 7,4% at March 2008.**
- **The CPI annual rate for housing which increased to 11,1% at April 2008 from 10,0% at March 2008.**

From March 2008 to April 2008 the Consumer Price Index for the historical metropolitan and other urban areas increased by 1,7%.

The annual increase of 11,0% in the Consumer Price Index for the historical metropolitan and other urban areas was mainly due to annual contributions in the price indices for food (+ 4,1 percentage points), housing (+ 2,1 percentage points), transport (+ 1,9 percentage points), household operation (+ 0,6 of a percentage point), medical care and health expenses (+ 0,5 of a percentage point), fuel and power (+ 0,4 of a percentage point), education (+ 0,4 of a percentage point), personal care (+ 0,3 of a percentage point), cigarettes, cigars and tobacco (+ 0,2 of a percentage point) and clothing and footwear (+ 0,2 of a percentage point) (see table 3.3, p.18).

From March 2008 to April 2008 the Consumer Price Index for the historical metropolitan and other urban areas increased by 1,7%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,6 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,5 of a percentage point), housing (+ 0,3 of a percentage point, mainly due to the 0,5 of a percentage point increase in the interest rates on mortgage bonds) and household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) (see table 3.4, p.18).

3. Rural areas

The inflation rate for the rural areas was 11,7% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007)

The inflation rate for the rural areas was 11,7% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007). This rate was 0,8 of a percentage point higher than corresponding annual rate of 10,9% at March 2008. This higher rate at April 2008 can be explained by increases in the annual rates of change for:

- The CPI for food which increased to 16,6% at April 2008 from 16,1% at March 2008.
- The CPI for fuel and power which increased to 14,5% at April 2008 from 11,7% at March 2008.
- The CPI for household operation which increased to 12,8% at April 2008 from 7,9% at March 2008.
- The CPI for personal care which increased to 9,3% at April 2008 from 8,3% at March 2008.

From March 2008 to April 2008 the Consumer Price Index for the rural areas increased by 1,8%.

The annual increase of 11,7% in the Consumer Price Index for the rural areas was mainly due to annual contributions in the price indices for food (+ 7,5 percentage points), fuel and power (+ 0,8 of a percentage point), household operation (+ 0,8 of a percentage point), transport (+ 0,8 of a percentage point), housing (+ 0,4 of a percentage point), personal care (+ 0,4 of a percentage point), non-alcoholic beverages (+ 0,2 of a percentage point), alcoholic beverages (+ 0,2 of a percentage point), clothing and footwear (+ 0,2 of a percentage point), medical care and health expenses (+ 0,2 of a percentage point) and education (+ 0,2 of a percentage point). These increase were slightly counteracted by a decrease in the price index for furniture and equipment (- 0,2 of a percentage point) (see table 3.5, p.19).

From March 2008 to April 2008 the Consumer Price Index for the rural areas increased by 1,8%. This monthly increase was due to monthly contributions in the price indices for food (+ 0,9 of a percentage point), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages), fuel and power (+ 0,2 of a percentage point), transport (+ 0,2 of a percentage point, mainly due to the 67c/l increase in the price of petrol), housing (+ 0,1 of a percentage point, mainly due to the 0,5 of a percentage point increase in the interest rates on mortgage bonds) and personal care (+ 0,1 of a percentage point) (see table 3.6, p.19).

4. Total country

The inflation rate for the total country was 11,2% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007)

The inflation rate for the total country was 11,2% at April 2008 (i.e. the CPI at April 2008 compared with that at April 2007). This rate was 0,7 of a percentage point higher than the corresponding annual rate of 10,5% at March 2008. This higher rate at April 2008 can be explained by increases in the annual rates of change for:

- The CPI for food which increased to 16,1% at April 2008 from 15,8% at March 2008.
- The CPI for household operation which increased to 12,5% at April 2008 from 7,4% at March 2008.
- The CPI for housing which increased to 11,0% at April 2008 from 9,9% at March 2008.
- The CPI for fuel and power which increased to 11,0% at April 2008 from 9,6% at March 2008.

From March 2008 to April 2008 the Consumer Price Index for the total country increased by 1,7%.

The annual increase of 11,2% in the Consumer Price Index for the total country was mainly due to annual contributions in the price indices for food (+ 4,5 percentage points), housing (+ 1,9 percentage points), transport (+ 1,8 percentage points), household operation (+ 0,7 of a percentage point), fuel and power (+ 0,5 of a percentage point), medical care and health expenses (+ 0,4 of a percentage point), education (+ 0,3 of a percentage point) and personal care (+ 0,3 of a percentage point) (see table 3.7, p.19).

From March 2008 to April 2008 the Consumer Price Index for the total country increased by 1,7%. This monthly increase was due to monthly contributions in the price indices for food (+ 0,5 of a percentage point), transport (+ 0,5 of a percentage point, mainly due to a 67c/l increase in the price of petrol), housing (+ 0,3 of a percentage point, mainly due to the 0,5 of a percentage point increase in the interest rates on mortgage bonds), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and fuel and power (+ 0,1 of a percentage point) (see table 3.8, p.19).

B. Consumer Price Index excluding interest rates on mortgage bonds (CPIX)

1. Metropolitan areas

The annual percentage change in the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the historical metropolitan areas was 10,4% at April 2008 (i.e. the percentage change in the CPIX at April 2008 compared with that at April 2007)

The annual percentage change in the CPIX for the historical metropolitan areas was 10,4% at April 2008 (i.e. the percentage change in the CPIX at April 2008 compared with that at April 2007). This rate was 0,3 of a percentage point higher than the corresponding annual rate of 10,1% at March 2008.

From March 2008 to April 2008 the CPIX for the historical metropolitan areas increased by 1,6%.

The annual increase of 10,4% in the CPIX for the historical metropolitan areas was mainly due to annual contributions in the price indices for food (+ 3,9 percentage points), transport (+ 2,6 percentage points), housing excluding interest rates on mortgage bonds (+ 0,9 of a percentage point), household operation (+ 0,6 of a percentage point), medical care and health expenses (+ 0,6 of a percentage point), fuel and power (+ 0,4 of a percentage point) and education (+ 0,4 of a percentage point) (see table 3.9, p.20).

From March 2008 to April 2008 the CPIX for the historical metropolitan areas increased by 1,6%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,7 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,5 of a percentage point), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and housing (+ 0,1 of a percentage point) (see table 3.10, p.20).

2. Metropolitan and other urban areas

The annual percentage change in the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the historical metropolitan and other urban areas was 10,4% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007)

The annual percentage change in the CPIX, which is the Consumer Price Index excluding interest rates on mortgage bonds, for the historical metropolitan and other urban areas was 10,4% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007). This rate was 0,3 of a percentage point higher than the corresponding annual rate of 10,1% at March 2008.

From March 2008 to April 2008 the CPIX for the historical metropolitan and other urban areas increased by 1,6%.

The annual increase of 10,4% in the CPIX for the historical metropolitan and other urban areas was mainly due to annual contributions in the price indices for food (+ 4,5 percentage points), transport (+ 2,1 percentage points), housing excluding interest rates on mortgage bonds (+ 0,9 of a percentage point), household operation (+ 0,6 of a percentage point), medical care and health expenses (+ 0,5 of a percentage point), fuel and power (+ 0,4 of a percentage point), education (+ 0,4 of a percentage point), personal care (+ 0,3 of a percentage point), cigarettes, cigars and tobacco (+ 0,2 of a percentage point) and clothing and footwear (+ 0,2 of a percentage point). These increase were slightly counteracted by a decrease in the price index for furniture and equipment (- 0,1 of a percentage point) (see table 3.11, p.20).

From March 2008 to April 2008 the CPIX for the historical metropolitan and other urban areas increased by 1,6%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,6 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,5 of a percentage point), household operation (+ 0,4 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and housing (+ 0,1 of a percentage point) (see table 3.12, p.20).

3. Rural areas

The annual percentage change in the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the rural areas was 11,7% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007)

The annual percentage change in the CPIX, which is the Consumer Price Index excluding the interest rates on mortgage bonds, for the rural areas was 11,7% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007). This rate was 0,8 of a percentage point higher than the corresponding annual rate of 10,9% at March 2008.

From March 2008 to April 2008 the CPIX for the rural areas increased by 1,7%.

The annual increase of 11,7% in the Consumer Price Index excluding the interest rates on mortgage bonds (CPIX) for the rural areas was mainly due to annual contributions in the price indices for food (+ 7,5 percentage points), transport (+ 0,9 of a percentage point), fuel and power (+ 0,8 of a percentage point), household operation (+ 0,8 of a percentage point), personal care (+ 0,4 of a percentage point), education (+ 0,3 of a percentage point), alcoholic beverages (+ 0,2 of a percentage point), clothing and footwear (+ 0,2 of a percentage point), housing excluding interest rates on mortgage bonds (+ 0,2 of a percentage point) and other products (+ 0,2 of a percentage point). These increases were slightly counteracted by a decrease in the price index for furniture and equipment (- 0,1 of a percentage point) (see table 3.13, p.21).

From March 2008 to April 2008 the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the rural areas increased by 1,7%. This monthly increase was due to monthly contributions in the price indices for food (+ 0,8 of a percentage point), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages), transport (+ 0,3 of a percentage point, mainly due to a 67c/l increase in the price of petrol), fuel and power (+ 0,2 of a percentage point) and personal care (+ 0,1 of a percentage point) (see table 3.14, p.21).

4. Total country

The annual percentage change in the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the total country was 10,7% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007)

The annual percentage change in the CPIX, which is the Consumer Price Index excluding the interest rates on mortgage bonds, for the total country was 10,7% at April 2008 (i.e. the CPIX at April 2008 compared with that at April 2007). This rate was 0,4 of a percentage point higher than the corresponding annual rate of 10,3% at March 2008.

From March 2008 to April 2008 the CPIX for the total country increased by 1,6%.

The annual increase of 10,7% in the Consumer Price Index excluding the interest rates on mortgage bonds (CPIX) for the total country was mainly due to annual contributions in the price indices for food (+ 4,8 percentage points), transport (+ 1,9 percentage points), housing excluding interest rates on mortgage bonds (+ 0,8 of a percentage point), household operation (+ 0,7 of a percentage point), fuel and power (+ 0,5 of a percentage point), medical care and health expenses (+ 0,5 of a percentage point), education (+ 0,4 of a percentage point), personal care (+ 0,3 of a percentage point), non-alcoholic beverages (+ 0,2 of a percentage point), cigarettes, cigars and tobacco (+ 0,2 of a percentage point) and clothing and footwear (+ 0,2 of a percentage point) (see table 3.15, p.21).

From March 2008 to April 2008 the Consumer Price Index excluding interest rates on mortgage bonds (CPIX) for the total country increased by 1,6%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,6 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,5 of a percentage point), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages), housing (+ 0,1 of a percentage point) and fuel and power (+ 0,1 of a percentage point) (see table 3.16, p.21).

C. Core Inflation Rate

1. Metropolitan areas

The core inflation rate for the historical metropolitan areas was 10,2% at April 2008 (i.e. the core index at April 2008 compared with that at April 2007). This rate was 0,4 of a percentage point higher than the corresponding annual rate of 9,8% at March 2008.

From March 2008 to April 2008 the core index for the historical metropolitan areas increased by 1,8%.

The annual increase of 10,2% in the core index for the historical metropolitan areas was mainly due to annual contributions in the price indices for transport (+ 3,0 percentage points), food (+ 2,9 percentage points), housing (+ 0,9 of a percentage point), household operation (+ 0,7 of a percentage point), medical care and health expenses (+ 0,6 of a percentage point), education (+ 0,5 of a percentage point), fuel and power (+ 0,4 of a percentage point), personal care (+ 0,4 of a percentage point), clothing and footwear (+ 0,3 of a percentage point) and cigarettes, cigars and tobacco (+ 0,2 of a percentage point) (see table 3.17, p.22).

From March 2008 to April 2008 the core index for the historical metropolitan areas increased by 1,8%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,9 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,4 of a percentage point), household operation (+ 0,4 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and housing (+ 0,1 of a percentage point)(see table 3.18, p.22).

2. Metropolitan and other urban areas

The core inflation rate for the historical metropolitan and other urban areas was 10,2% at April 2008 (i.e. the core index at April 2008 compared with that at April 2007). This rate was 0,5 of a percentage point higher than the corresponding annual rate of 9,7% at March 2008.

From March 2008 to April 2008 the core index for the historical metropolitan and other urban areas index increased by 1,7%.

The annual increase of 10,2% in the core index for the historical metropolitan and other urban areas was mainly due to annual contributions in the price indices for food (+ 3,1 percentage points), transport (+ 2,5 percentage points), housing (+ 1,0 percentage point), household operation (+ 0,8 of a percentage point), medical care and health expenses (+ 0,6 of a percentage point), fuel and power (+ 0,5 of a percentage point), education (+ 0,4 of a percentage point), non-alcoholic beverages (+ 0,3 of a percentage point) and personal care (+ 0,3 of a percentage point) (see table 3.19, p.22).

From March 2008 to April 2008 the core index for the historical metropolitan and other urban areas increased by 1,7%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,7 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,4 of a percentage point), household operation (+ 0,3 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages), fuel and power (+ 0,2 of a percentage point) and housing (+ 0,1 of a percentage point) (see table 3.20, p.21).

3. Rural areas

The core inflation rate for the rural areas was 11,5% at April 2008 (i.e. the core index at April 2008 compared with that at April 2007). This rate was 1,1 percentage points higher than the corresponding annual rate of 10,4% at March 2008.

From March 2008 to April 2008 the core index for the rural areas increased by 1,9%.

The annual increase of 11,5% in the core index for the rural areas was mainly due to annual contributions in the price indices for food (+ 5,1 percentage points), transport (+ 1,4 percentage points), household operation (+ 1,2 percentage points), fuel and power (+ 1,1 percentage points), personal care (+ 0,7 of a percentage point), housing (+ 0,4 of a percentage point), clothing and footwear (+ 0,3 of a percentage point), medical care and health expenses (+ 0,3 of a percentage point) and education (+ 0,3 of a percentage point) (see table 3.21, p.23).

From March 2008 to April 2008 the core index for the rural areas increased by 1,9%. This monthly increase was due to monthly contributions in the price indices for food (+ 0,6 of a percentage point), household operation (+ 0,6 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages), transport (+ 0,4 of a percentage point, mainly due to a 67c/l increase in the price of petrol), fuel and power (+ 0,1 of a percentage point), personal care (+ 0,1 of a percentage point) and other products (+ 0,1 of a percentage point) (see table 3.22, p.23).

4. Total country

The core inflation rate for the total country was 10,4% at April 2008 (i.e. the core index at April 2008 compared with that at April 2007). This rate was 0,5 of a percentage point higher than the corresponding annual rate of 9,9% at March 2008.

From March 2008 to April 2008 the core index for the total country increased by 1,7%.

The annual increase of 10,4% in the core index for the total country was mainly due to annual contributions in the price indices for food (+ 3,1 percentage points), transport (+ 2,6 percentage points), household operation (+ 0,9 of a percentage point), medical care and health expenses (+ 0,7 of a percentage point), housing (+ 0,6 of a percentage point), education (+ 0,5 of a percentage point), personal care (+ 0,5 of a percentage point), fuel and power (+ 0,4 of a percentage point), clothing and footwear (+ 0,3 of a percentage point), non-alcoholic beverages (+ 0,2 of a percentage point), alcoholic beverages (+ 0,2 of a percentage point) and cigarettes, cigars and tobacco (+ 0,2 of a percentage point) (see table 3.23, p.23).

From March 2008 to April 2008 the core index for the total country increased by 1,7%. This monthly increase was due to monthly contributions in the price indices for transport (+ 0,8 of a percentage point, mainly due to a 67c/l increase in the price of petrol), food (+ 0,4 of a percentage point), household operation (+ 0,4 of a percentage point, mainly due to a 6,3% increase in the domestic workers wages) and personal care (+ 0,1 of a percentage point) (see table 3.24, p.23).

D. Other indices

1. Area indices

The rural areas of KwaZulu-Natal recorded the highest annual inflation rate at 14,2%, while the lowest annual inflation rate of 9,3% was recorded for the Bloemfontein and Free State Goldfields areas (see table 7.1, p.36).

Regarding food prices, the highest annual inflation rate of 19,0% was recorded for the Durban/Pinetown area and the North West Province, while the lowest annual inflation rate of 12,5% was recorded for the Free State Goldfields area (see table 7.2, p.37).

2. Pensioners

The rural areas of Free State recorded the highest annual rate of increase of 15,6%, while the lowest annual rate of change of 9,4% was recorded for the Pretoria/Centurion/Akasia area (see table 7.5, p.40).

3. Administered prices

The CPI for administered prices at April 2008 (i.e. the CPI for administered prices for the historical metropolitan areas at April 2008 compared with that at April 2007) was 16,0%. This rate was 0,6 of a percentage point lower than the corresponding annual rate of 16,6% at March 2008. The annual increase of 16,0% at April 2008 was mainly due to annual contributions in the price indices for petrol (+ 11,7 percentage points), electricity (+ 1,2 percentage points), school fees (+ 1,2 percentage points), assessment rates (+ 1,1 percentage points), water tariffs (+ 0,8 of a percentage point) and tertiary fees (+ 0,5 of a percentage point).

The CPIX for administered prices at April 2008 (i.e. the CPIX for administered prices for the historical metropolitan and other urban areas at April 2008 compared with that at April 2007) was 14,5%. This rate was 0,3 percentage point lower than the corresponding annual rate of 14,8% at March 2008. The annual increase of 14,5% at April 2008 was mainly due to annual contributions in the price indices for petrol (+ 9,5 percentage points), electricity (+ 1,2 percentage points), school fees (+ 1,1 percentage point), water tariffs (+ 0,9 of a percentage point), assessment rates (+ 0,9 of a percentage point), paraffin (+ 0,8 of a percentage point) and tertiary fees (+ 0,5 of a percentage point).

4. An alternative expression of the change in the Consumer Price Index

An alternative expression of the change in the Consumer Price Index for the historical metropolitan areas is to annualise the percentage change between the average index of the three months up to April 2008 and the average index of the previous three months. This approach, when using unadjusted data, shows an increase of 12,8% (which is 1,8 percentage points higher than the corresponding rate of 11,0% for March 2008).

An alternative expression of the change in the Consumer Price Index for the historical metropolitan and other urban areas is to annualise the percentage change between the average index of the three months up to April 2008 and the average index of the previous three months. This approach, when using the unadjusted data, shows an increase of 12,6% (which is 1,5 percentage points higher than the corresponding rate of 11,1% for March 2008).

TABLES**Table 1.1 – Expenditure group and area indices of the Consumer Price Index and percentage change for the historical metropolitan areas**

| Product/expenditure group | Index (2000=100) | | | Percentage change between | |
|--|------------------|----------|----------|---------------------------|-----------------------|
| | Apr 2007 | Mar 2008 | Apr 2008 | Mar 2008 and Apr 2008 | Apr 2007 and Apr 2008 |
| Expenditure group | Very low | 151,0 | 168,1 | 170,6 | +1,5 |
| | Low | 149,9 | 166,4 | 168,6 | +1,3 |
| | Middle | 145,9 | 161,2 | 163,2 | +1,2 |
| | High | 146,5 | 160,7 | 163,0 | +1,4 |
| | Very high | 138,7 | 151,0 | 153,8 | +1,9 |
| All expenditure groups | | 141,0 | 153,9 | 156,6 | +1,8 |
| CPI excluding interest rates on mortgage bonds (CPIX) | | 148,4 | 161,2 | 163,8 | +1,6 |
| Core index | | 145,9 | 158,0 | 160,8 | +1,8 |
| Food index | | 157,7 | 179,6 | 182,4 | +1,6 |
| CPI excluding food | | 136,9 | 147,5 | 150,2 | +1,8 |
| CPI for administered prices | | 159,7 | 179,9 | 185,3 | +3,0 |
| CPI for regulated prices | | 152,1 | 174,5 | 182,1 | +4,4 |
| CPI for administered prices that are not regulated | | 177,6 | 192,3 | 192,3 | 0,0 |
| CPIX for administered prices | | 159,5 | 179,7 | 185,1 | +3,0 |
| CPIX for regulated prices | | 152,0 | 174,4 | 182,0 | +4,4 |
| CPIX for administered prices that are not regulated | | 177,5 | 192,2 | 192,2 | 0,0 |
| CPI excluding VAT [1] | | 141,0 | 153,9 | 156,6 | +1,8 |
| | | | | | +11,1 |

[1] On theoretical grounds and due to rounding off, these rates of change can differ.

Table 1.2 – Expenditure group and area indices of the Consumer Price Index and percentage change for the historical metropolitan and other urban areas

| Product/expenditure group | Index (2000=100) | | | Percentage change between | |
|--|------------------|----------|----------|---------------------------|-----------------------|
| | Apr 2007 | Mar 2008 | Apr 2008 | Mar 2008 and Apr 2008 | Apr 2007 and Apr 2008 |
| Expenditure group | Very low | 151,3 | 169,4 | 172,1 | +1,6 |
| | Low | 148,9 | 166,0 | 168,4 | +1,4 |
| | Middle | 147,5 | 163,3 | 165,4 | +1,3 |
| | High | 145,6 | 159,6 | 161,7 | +1,3 |
| | Very high | 139,3 | 151,5 | 154,3 | +1,8 |
| All expenditure groups | | 141,5 | 154,5 | 157,1 | +1,7 |
| CPI excluding interest rates on mortgage bonds (CPIX) | | 148,0 | 160,9 | 163,4 | +1,6 |
| Core index | | 145,0 | 157,1 | 159,8 | +1,7 |
| Food index | | 157,9 | 180,2 | 182,9 | +1,5 |
| CPI excluding food | | 137,1 | 147,4 | 149,9 | +1,7 |
| CPI for administered prices | | 156,3 | 174,4 | 179,0 | +2,6 |
| CPI for regulated prices | | 148,8 | 168,8 | 175,2 | +3,8 |
| CPI for administered prices that are not regulated | | 174,3 | 187,8 | 187,8 | 0,0 |
| CPIX for administered prices | | 156,1 | 174,2 | 178,8 | +2,6 |
| CPIX for regulated prices | | 148,7 | 168,6 | 175,1 | +3,9 |
| CPIX for administered prices that are not regulated | | 173,9 | 187,4 | 187,4 | 0,0 |
| CPI excluding VAT [1] | | 141,5 | 154,5 | 157,1 | +1,7 |
| | | | | | +11,0 |

[1] On theoretical grounds and due to rounding off, these rates of change can differ.

Table 1.3 – Expenditure group and area indices of the Consumer Price Index and percentage change for the rural areas

| Product/expenditure group | Index (2000=100) | | | Percentage change between | | |
|--|------------------|----------|----------|---------------------------|-----------------------|-------|
| | Apr 2007 | Mar 2008 | Apr 2008 | Mar 2008 and Apr 2008 | Apr 2007 and Apr 2008 | |
| Expenditure group | Very low | 153,3 | 173,0 | 176,3 | +1,9 | +15,0 |
| | Low | 151,4 | 170,2 | 173,4 | +1,9 | +14,5 |
| | Middle | 148,3 | 165,1 | 167,9 | +1,7 | +13,2 |
| | High | 146,5 | 160,4 | 162,6 | +1,4 | +11,0 |
| | Very high | 138,8 | 149,7 | 152,5 | +1,9 | +9,9 |
| All expenditure groups | | 144,7 | 158,9 | 161,7 | +1,8 | +11,7 |
| CPI excluding interest rates on mortgage bonds (CPIX) | | 147,9 | 162,4 | 165,2 | +1,7 | +11,7 |
| Core index | | 143,9 | 157,4 | 160,4 | +1,9 | +11,5 |
| Food index | | 160,2 | 183,4 | 186,8 | +1,9 | +16,6 |
| CPI excluding food | | 133,8 | 141,5 | 144,0 | +1,8 | +7,6 |
| CPI for administered prices | | 144,7 | 158,9 | 162,6 | +2,3 | +12,4 |
| CPI for regulated prices | | 138,8 | 155,5 | 160,9 | +3,5 | +15,9 |

EXPLANATORY NOTES

- Survey of Consumer (Retail) prices**
- 1 This publication contains results of the monthly Survey of Consumer (Retail) Prices. The results of the survey are used to compile the Consumer Price Index (CPI), an economic indicator.
- CPI**
- 2 The CPI is a general measure of price change of consumer goods and services bought by typical households in SA. The CPI is a measure of pure price change; hence it excludes the effect of changes in quality or quantity of goods and services. The objective is to measure price change of an identical basket of goods and services each month. The CPI measures changes in transaction prices, i.e. prices actually paid when purchasing goods or services.
- Uses and users of the CPI**
- 3 The South African Reserve Bank (SARB) and the Department of Finance use the CPI when formulating monetary and fiscal policy. The National Accounts component of Statistics South Africa (Stats SA) uses the CPI when calculating the Gross Domestic Product (GDP). Furthermore, the CPI is used as a general measure of inflation; to make adjustments to pensions paid and for the adjustment of taxes, fines or fees levied by government; to adjust prices, wages and salaries in contracts; to reevaluate fixed assets and stocks for accounting purposes; to remove price changes on measures of the economy such as the GDP and estimates of consumption expenditure and to remove the effect of price changes in retail sales to compile a volume measure of retail sales.
- Survey of Income and Expenditure of Households (IES)**
- 4 Stats SA conducts a Survey of Income and Expenditure of Households (IES) every five years. This survey is conducted by enumerators visiting a number of households throughout South Africa to obtain information on income and expenditure of households. The information obtained through this survey is weighted according to the Population Census figures in order to represent all households in South Africa.
- The results of the IES conducted in 2000 are used in the current CPI. The 2000 IES covered a sample of 30 000 households. The information obtained through this survey was weighted according to the 1996 Population Census figures in order to represent all households in South Africa.
- CPI basket**
- 5 Every five years the results of the IES are used to identify the goods and services bought by a typical consumer. These results are used to construct the CPI basket. To be selected, a product should constitute a large quantity, at least 0,01% of total expenditure. Furthermore, it must be possible to obtain price quotations for the relevant product throughout the whole year. The price changes of the goods and services included in the basket are monitored.
- The 2000 IES collected information regarding approximately 1 000 different goods and services groups. Stats SA made a further breakdown of these groups using supplementary sources. The current CPI basket obtains approximately 1 200 goods and services.

ITC Classification

- 6** The CPI basket is classified according to the International Trade Classification (ITC) (refer to tables 1.1 to 5.4, and 7.1 to 7.4). The ITC Classification consists of the following 17 main groups:
- Food.
 - Non-alcoholic beverages.
 - Alcoholic beverages.
 - Cigarettes, cigars and tobacco.
 - Clothing and Footwear.
 - Housing.
 - Fuel and power.
 - Furniture and equipment.
 - Household operation.
 - Medical care and health expenses.
 - Transport.
 - Communication.
 - Recreation and entertainment.
 - Reading matter.
 - Education.
 - Personal care.
 - Other.

COICOP Classification

- 7** The CPI basket is also classified according to the Classification of Individual Consumption by Purpose (COICOP) (refer to tables 6.1 to 6.4). The COICOP Classification consists of the following 9 main groups:
- Food, beverages and tobacco.
 - Clothing and footwear.
 - Housing, water electricity, gas and other fuels.
 - Furnishings, household equipment and routine maintenance of the house.
 - Health.
 - Transport.
 - Leisure, entertainment and culture.
 - Education.
 - Miscellaneous goods and services.

CPI weights

- 8** Every five years the results of the IES are used to determine the weights of the products/product groups in the basket. The weights of a specific product/product group is calculated by dividing the total amount spent by all households in South Africa on the specific product/product group by the total amount spent on all goods and services by all households.

Stats SA implemented the weights from the 2000 IES as from the January 2002 CPI publication.

Fixed weighting basis

- 9** The CPI is a fixed weights index, which implies that the weight of each product/product group remains constant for the five year period until the results of the next IES become available.

Expenditure groups

- 10** Five expenditure group categories or quintiles are defined according to total annual expenditure per household, based on the IES results. The five expenditure group categories from the 2000 IES are as follows:
- Very low expenditure group – up to R8 070.
 - Low expenditure group – R8 071 up to R12 263.
 - Middle expenditure group – R12 264 up to R24 365.
 - High expenditure group – R24 366 up to R55 159.
 - Very high expenditure group – R55 160 and more.

Coverage

11 Prices on the goods and services included in the CPI basket are collected from the sample of retail trade and service outlets. The 12 historical metropolitan areas and 28 “Other urban areas” are covered. The 12 metropolitan areas were selected, based on the population figures as well as the size of the economical activity in these areas. Metropolitan areas are as follows:

- Cape Peninsula.
- Port Elizabeth/Uitenhage.
- East London.
- Kimberley.
- Bloemfontein.
- Free State Goldfields.
- Durban/Pinetown.
- Pietermaritzburg.
- Pretoria/Centurion/Akasia .
- Witwatersrand.
- Nelspruit/Witbank.
- Polokwane (Pietersburg).

Collection methodology

12 Prices of goods are collected by enumerators visiting retail outlets and observing the goods and recording the prices. This collection methodology is in-line with international best practice. Administered prices are collected from suitable sources, mainly by means of telephonic surveys and mailing questionnaires to respondents.

Collection frequency

13 Prices of goods and services are collected during the first three weeks of the month. The majority of these prices are collected monthly. The prices of some items are collected quarterly, six monthly or annually. The collection of prices depends on the frequency at which these prices tend to change. However, if it comes to the attention of Stats SA that prices could change, these prices will be collected, even if it is not according to the normal collection schedule.

Prices collected monthly**14** Prices of goods and services collected monthly:

- Bread.
- Meat.
- Milk.
- Vegetables and fruit.
- Other groceries.
- Alcoholic beverages.
- Sweets, non-alcoholic beverages, ice-cream and tobacco products.
- Clothing and footwear.
- Repairs of clothing, footwear and furniture.
- Interest rates on mortgage bonds.
- Coal and wood.
- New vehicles, repairs and services.
- Motor spare parts and accessories.
- Petrol.
- Newspapers and magazines.
- Entrance fees – drive inns and bioscopes.
- Air transport fees.
- Cellular phone tariffs.
- Furniture and equipment.
- Medicine.
- Garden tools.
- Washing ironing and dry-cleaning.
- Sport equipment.
- Reading matter and stationery.
- Tariffs of hairdressing services.
- Ironware and crockery.
- New and retread tyres.
- Household textiles.
- Electrical appliances and equipment.
- Medical, toilet and photographic requisites and services.
- Musical instruments.
- Prices of pets.

Prices collected quarterly**15** Prices of goods and services collected quarterly:

| Good/service | Survey month |
|-------------------------------------|--------------------------------------|
| Rent of dwellings. Hospital fees | January, April, July and October. |
| Motor vehicle insurance. | March, June, September and December. |
| Public transport tariffs. | March, June, September and December. |

Prices collected annually**16** Prices of goods and services collected annually:

| Good/service | Survey month |
|---|---------------------|
| Doctor's and dentist's fees. Motor vehicle license and registration fees. Telephone (land lines). | January. |
| Toll-fees at toll-gates. School funds. University boarding and class fees. | March. |
| Parking fees. Postal tariffs. | April. |
| Property taxes. Refuse removal. Sanitary fees. | July. |

Prices collected at other times of the year

- 17** Prices of goods/services collected at other times of the year:

| Good/service | Survey month |
|------------------------------|---------------------------|
| Contribution to medical aid. | January. |
| Property insurance. | January and July. |
| Water. Electricity. | January, July and August. |
| Domestic workers. | February and September. |
| Television licenses. | April and October. |

Survey methodology and design

- 18** Three sampling phases occur. Firstly, a sample of goods and services, based on the information collected through the IES is designed and selected. An indicator product is selected purposively within each product group. To be selected, a product should constitute a large quantity, at least 0, 01% of total expenditure. Furthermore, it must be possible to obtain price quotations for the relevant product throughout the whole year.

Secondly, a geographical sample for price collection is designed and selected. Currently 12 major metropolitan areas, covering all nine provinces, are included in the geographical sample for price collection. The "other urban areas" are covered by nine provincial samples of two to three other urban areas each, depending on the population size of the area. Therefore a total of 28 other urban areas" are sampled.

Thirdly, for each of the 40 sample areas, a retail trade and service outlet sampling frame is constructed, based on available data sources. The main sources are the Business Register of Stats SA, telephone directories and lists obtained from the head offices of chain stores. The sample is purposively distributed geographically within areas. Specific retail trade and service outlets are selected randomly within each area. Prices are collected from department stores, as well as specialist shops.

Currently, an average of 105 000 price quotations are collected each month from approximately 2 100 outlets.

Pricing basis

- 19** The prices of all items include VAT.

Processing of price information

- 20** The prices obtained are quality assured to ensure comparability with the information received in the previous month. The current price levels of prices changes between consecutive months that fall outside specified boundaries are confirmed.

Calculating product price indices

- 21** Price relatives are calculated for each product per respondent by dividing the current price by the price obtained in the previous period. The geometric mean of the price relatives for each respondent is calculated. This price relative for each product is then multiplied with the product index for the previous month in order to obtain a product index for the relevant month.

Calculating group price indices

- 22** Group price indices are calculated by weighting product indices with the relevant product weight, according to each weighting structure, using a modified Laspeyres formula. This formula is arithmetically equivalent to the standard Laspeyres formula but is considered more versatile, since the chaining process used allows for the introduction of replacement varieties as the need arises.

Contributions of specific items to the total CPI

- 23** The monthly (annual) contribution of a product or product group to the total CPI is calculated by multiplying the weight of the product or product group with the monthly (annual) change in the index for the product or product group and dividing by the index for 'All items'.

CPI excluding interest rates on mortgage bonds (CPIX)

- 24** The CPIX is the CPI excluding interest rates on mortgage bonds. The SARB uses this index for inflation targeting purposes. These figures have been published since February 2000.

| Administered prices | 25 An administered price can be defined as the price of a product or service, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly, or through one or other government agencies without reference to market forces. The following administered prices are included in the CPI basket: |
| | <ul style="list-style-type: none"> • Housing (sanitary fees, refuse removal, assessment rates, water and university boarding fees). • Fuel and power (electricity and paraffin). • Medical care (public hospital). • Communication (telephone calls, telephone rent and installation, postage, cell phones connection fees and cell phones calls). • Education (school fees and university/technicons/colleges). • Transport (petrol, public transport – municipal buses and trains, motor licenses and registration). • Recreation and entertainment (television licence). |
| CPI for regulated prices | 26 Regulated prices are those administered prices that are monitored or controlled by government policy. Price regulation does not necessarily imply the presence of an economic regulator, but the restriction on the extent to which prices may vary, depending on government's policy objective. The basket of administered prices that are regulated are: |
| | <ul style="list-style-type: none"> • Housing (water). • Fuel and power (electricity and paraffin). • Medical care (public hospital). • Communication (telephone calls, telephone rent and installation, postage, cell phones connection fees and cell phones calls). • Transport (petrol). |
| Rebasing the CPI from 1995=100 to 2000=100 | 27 Following international practice, the base year of the Consumer Price Index (CPI) has been changed from 1995=100 to 2000=100 with effect from February 2002. |
| Special Data Dissemination Standard (SDDS) of the International Monetary Fund (IMF) | 28 South Africa's data dissemination practices are assessed against the IMF's Special Data Dissemination Standard (SDDS). A detailed description of the SDDS can be found on the IMF's Dissemination Standards Bulletin Board on the internet at http://dsbb.imf.org . This is an international best practice standard. It covers the real, fiscal, financial and external sectors of the economy. It covers the following dimensions of data dissemination: data, access, integrity and quality. For each of these dimensions, the SDDS prescribes two to four monitorable elements or good practices that can be observed, or monitored, by users of statistics. |

Reports on Observance of Standards and Codes (ROSC) of the International Monetary Fund (IMF)

29 The IMF has been working actively on producing Reports on Observance of Standards and Codes (ROSC) as a step to strengthen the architecture of the international financial system. The objectives of the ROSC include the promotion of increased transparency and encouragement of implementation of internationally accepted standards and codes. One of the ROSC components is the data dissemination module, which falls under the responsibility of the IMF's Statistics Department (STA). In this module, a country is assessed according to the SDDS.

The data dissemination module of the ROSC provides a summary of South Africa's practices on the coverage, periodicity and timeliness of the data categories specified in the IMF's SDDS, and on the practices on the provision of advance release calendars for these categories. It is complemented by an assessment of the quality of the CPI, using the Data Quality Assessment Framework (DQAF) developed by the IMF's Statistics Department. The DQAF undertakes to assess data quality under the following dimensions:

- Prerequisites of quality.
- Integrity.
- Methodological soundness.
- Accuracy and reliability.
- Serviceability.
- Accessibility.

Reliability of estimates

30 Inaccuracies may occur because of imperfections in reporting by enumerators and respondents. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to reduce non-sampling errors to a minimum by careful designing the questionnaires, quality assurance procedures and efficient operating procedures.

GLOSSARY

| | |
|--|---|
| Annual inflation rate | The annual inflation rate is the change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage. |
| Annual percentage change | The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage. |
| Average annual inflation rate | The average annual inflation rate is the change in the average CPI for all items of one year compared with the average CPI for all items of the previous year expressed as a percentage. |
| Average annual percentage change | The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. |
| CPI excluding interest rates on mortgage bonds (CPIX) | The CPI excluding interest rates on mortgage bonds (CPIX) is derived by excluding the interest rates on mortgage bonds from the basket of goods and services. |
| CPI for administered prices | An administered price is defined as the price of a product, which is set consciously by an individual producer or group of producers and/or any price, which can be determined or influenced by government, either directly, or through one or other government agencies/institutions without reference to market forces. |
| CPI for regulated prices | Regulated prices are those administered prices that are said to be monitored and controlled by government policy. To this end, price regulation does not necessarily imply the presence of an economic regulator, but the restriction on the extent to which prices may vary, depending on government's policy objective. |
| Core index | The core index is derived by exclusions from the CPI on the basis that changes in their prices are policy. Exclusions from the CPI to obtain the core index, and the reasons for exclusion are as follows: <ul style="list-style-type: none"> • Fresh and frozen meat and fish: Prices may be highly volatile, particularly during and following periods of drought. • Fresh and frozen vegetables and fresh fruit and nuts: Prices may be highly volatile from month to month due to their sensitivity to climatic conditions. • Interest rates on mortgage bonds and overdrafts/personal loans: These are excluded due to their "perverse" effect on the CPI. A tightening in monetary policy to counter inflation pressures would cause interest rates to rise and be reflected in the interest cost component of measured inflation. This, in turn, could provoke a further tightening of monetary policy resulting in excessive movements in the inflation rate. • Changes in VAT (Value Added Tax): VAT is predominantly determined by government (fiscal policy). • Assessment rates: These taxes are predominantly determined by local government. |
| Core inflation | The core inflation is derived by the change in the Core index of the relevant month of the current year compared with the Core index of the same month in the previous year expressed as a percentage. |
| Indicator products | Indicator products are those products or services that were selected in the basket, which is used to compile the Consumer Price Index. |
| Inflation rate | Inflation rate is the annual percentage change in the CPI for all items of the relevant month of the current year compared with the CPI for all items of the same month in the previous year expressed as a percentage. |

Monthly percentage change The monthly percentage change is the change in the CPI of the relevant month compared to the CPI of the previous month expressed as a percentage.

Weights The weights are the relevant importance of the indicator product. The weight of a product is calculated by dividing the total expenditure by households on that product by the total expenditure on all goods and services by households.

FOR MORE INFORMATION

Stats SA publishes approximately 300 different releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of data.

Advance release calendar

An advance release calendar is disseminated on <http://www.statssa.gov.za>

Forthcoming issues

| Issue | Expected date for publication |
|----------------|-------------------------------|
| May 2008 | 25 June 2008 |
| June 2008 | 30 July 2008 |
| July 2008 | 27 August 2008 |
| August 2008 | 23 September 2008 |
| September 2008 | 29 October 2008 |
| October 2008 | 26 November 2008 |

Stats SA products

A complete set of Stats SA publications is available in the Stats SA Library and the following libraries -

National Library of South Africa, Pretoria Division
 National Library of South Africa, Cape Town Division
 Natal Society Library, Pietermaritzburg
 Library of Parliament, Cape Town
 Bloemfontein Public Library
 Johannesburg Public Library
 Eastern Cape Library Services, King William's Town
 Central Regional Library, Polokwane
 Central Reference Library, Nelspruit
 Central Reference Collection, Kimberley
 Central Reference Library, Mmabatho.

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600 / 8390 / 8351 / 4892 / 8496 / 8095.

You can visit us on the Internet at: <http://www.statssa.gov.za>
