CONSUMER PRICE INDEX -
OCTOBER 1992

VERBRUIKERSPRYSINDEKS -
OKTOBER 1992

DATE: 20 NOVEMBER 1992
DATUM: 20 NOVEMBER 1992
EMBARGO/SPERTYD: 13:00

SUMMARY

The changes in the prices of consumer goods and services as reflected by the Consumer Price Index, showed an increase of 11,7% from October 1991 to October 1992. This rate is 1,8 percentage points lower than the inflation rate of 13,5% for September 1992 and is the lowest rate in more than 8 years (it was also 11,7% for August 1984).

The non-seasonally adjusted monthly increase of 0,4% is mainly ascribed to food (0,1 of a percentage point), transport (0,1 of a percentage point) and all the other items which represented the remaining 0,2 of a percentage point.

The inflation rate of 21,2% for food for October 1992 is 6,4 percentage points lower than the corresponding rate of 27,6% for September 1992. This is the lowest rate of food inflation since September 1991 (19,7%).

The inflation rate in which VAT has not been taken into account is 11,4%. The price index for all items excluding food shows a single digit rate of 9,3% for October 1992.

The average inflation rate for pensioners and for the higher, middle and lower income groups are 12,7%, 10,8%, 12,4% and 13,2% respectively.

In Table 7 certain food inflation particulars of chain stores and other retailers respectively are shown. According to these particulars, food prices increased at chain stores with 7,5% and at other retailers with 8,6% over the past five months.

OPSOMMING

Die prysveranderings van verbruikersgoedere en -dienste soos deur die Verbruikersprysindeks weerspieël, toon vanaf Oktober 1991 tot Oktober 1992 'n stijging van 11,7%. Hierdie koers is 1,8 persentasiepunte laer as die inflasiekoers van 13,5% vir September 1992 en is die laagste koers in meer as 8 jaar (dit was ook 11,7% vir Augustus 1984).

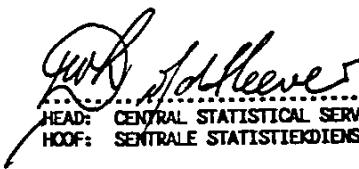

Die nie-seisoensaangepaste maandstijging van 0,4% word hoofsaaklik toegeskryf aan voedsel (0,1 van 'n persentasiepunt), vervoer (0,1 van 'n persentasiepunt) en al die ander items wat die oorblywende 0,2 van 'n persentasiepunt verteenwoordig.

Die inflasiekoers van 21,2% vir voedsel vir Oktober 1992 is 6,4 persentasiepunte laer as die voorstaande koers van 27,6% vir September 1992. Hierdie is die laagste voedselinflasiekoers sedert September 1991 (19,7%).

Die inflasiekoers waarby BTW nie in berekening gebring is nie is 11,4%. Die prysindeks vir alle items uitgesonderd voedsel toon 'n enkelsyferkoers van 9,3% vir Oktober 1992.

Die gemiddelde inflasiekoers vir pensionaris se en vir die hoë-, middel-, en laerinkomstegroep is onderskeidelik 12,7%, 10,8%, 12,4% en 13,2%.

In Tabel 7 word sekere voedselinflasiebesonderhede van onderskeidelik kettingwinkels en ander kleinhandelaars getoon. Daarvolgens het voedselprysse by kettingwinkels met 7,5% en by die ander kleinhandelaars met 8,6% oor die afgelope vyf maande toegeneem.

EXPLANATORY NOTES

1 GENERAL

- 1.1 Price information refers to the first seven days of the relevant month.
- 1.2 The Consumer Price Indices relating to different urban areas as shown in Table 4 do not permit interurban comparison of price levels or living costs. The indices do not indicate whether it is more expensive to live in one city than in another. The indices indicate for each urban area, independently of any of the other urban areas, the price changes which have taken place from time to time.
- 1.3 Value Added Tax (VAT) is included in general in the prices of all items on which VAT is applicable.
- 1.4 A more comprehensive description of the weighting system, seasonal adjustment, price collection methodology, etc., appears in the brochure "Inflation" as well as in the notes of Chapter 3 of the Bulletin of Statistics.

2 CONSUMER PRICE INDEX
ALL ITEMS (HISTORIC)
GST EXCLUDED

The course of the Consumer Price Index excluding GST since 1990, was not recalculated as the rate and scope of GST remained unchanged during the period to September 1991. Such a recalculation would, on theoretical grounds, possibly have resulted in small and insignificant differences in the indices, but was not carried out for practical reasons. From October 1991 the CPI excluding VAT is, however, calculated directly. The month to month changes in the Consumer Price Indices including and excluding VAT will agree to a large extent except when the rate or scope of the tax are changed, as has happened in October 1991 with the introduction of VAT.

VERDUIDELIKENDE OPMERKINGS

1 ALGEMEEN

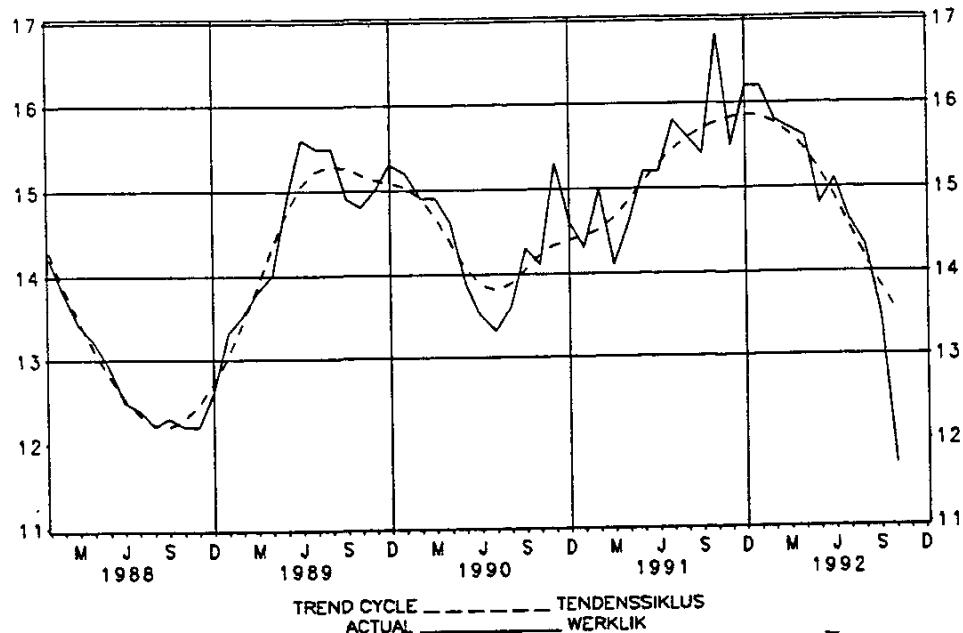

- 1.1 Alle prysinligting het betrekking op die eerste sewe dae van die betrokke maand.
- 1.2 Die Verbruikersprysindeks ten opsigte van verskillende stedelike gebiede soos weergegee in Tabel 4 laat nie tussenstadelike vergelyking van pryspeile of lewenskoste toe nie. Die indeks toon nie of dit duurder is om in een stad as in 'n ander te woon nie. Die indeks toon vir elke stedelike gebied, onafhanklik van die ander stedelike gebiede, die prysveranderings wat van tyd tot tyd plaasgevind het.
- 1.3 Belasting op Toegevoegde Waarde (BTW) is deurgaans ingesluit by die prysse van alle items waarop BTW van toepassing is.
- 1.4 'n Meer omvattende beskrywing van die bewaringsstelsel, seisoenaanpassing, prysinsamplingsmetodiek, ens., verskyn in die brosjiere "Inflasie" asook in die opmerkings van Hoofstuk 3 van die Bulletin van Statistiek.

2 VERBRUIKERSPRYSINDEKS
ALLE ITEMS (HISTORIES)
AVB UITGESLUIT

Die verloop van die Verbruikersprysindeks sonder AVB sedert 1990 is nie herbereken nie aangesien die koers en bestek van AVB gedurende die tydperk tot September 1991 nie verander het nie. Sodanige herberekening sou op grond van teoretiese oorwegings moontlik klein en onbeduidende verskille in bestaande indeks tot gevolg gehad het, maar dit is vir praktiese redes nie uitgevoer nie. Vanaf Oktober 1991 word die VPI sonder BTW egter direk bereken. Die maand tot maand veranderings in die Verbruikersprysindeks met en sonder BTW sal grootliks cooreenstem behalwe wanneer die koers of bestek van die belasting verander, soos in Oktober 1991 met die instelling van BTW gebeur het.
