Key findings as at January 2025

Final manufactured goods – headline PPI

Annual producer price inflation (final manufacturing) was 1,1% in January 2025, up from 0,7% in December 2024. The producer price index (PPI) increased by 0,5% month-on-month in January 2025.

The main contributor to the headline PPI annual inflation rate was food products, beverages and tobacco products (4,4% and contributing 1,3 percentage points) – see Figure 1.1.

The main positive contributors to the monthly rate were:

- furniture and other manufacturing (1,9% and contributing 0,1 of a percentage point);
- textiles, clothing and footwear (1,7% and contributing 0,1 of a percentage point);
- metals, machinery, equipment and computing equipment (0,9% and contributing 0,1 of a percentage point);
- transport equipment (0,9% and contributing 0,1 of a percentage point); and
- coke, petroleum, chemical, rubber and plastic products (0,5% and contributing 0,1 of a percentage point) – see Figure 1.2.

Figure 1 – PPI headline index numbers and year-on-year rate of change

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 7,3% in January 2025, compared with 5,8% in December 2024. The index increased by 2,2% month-on-month.

The main contributors to the annual rate were basic and fabricated metals (8,3% and contributing 4,2 percentage points) and chemicals, rubber and plastic products (8,3% and contributing 2,3 percentage points) – see Figure 2.1.

The main contributor to the monthly rate was basic and fabricated metals (3,3% and contributing 1,7 percentage points) – see Figure 2.2.

Electricity and water

The annual percentage change in the PPI for electricity and water was 10,0% in January 2025, compared with 10,3% in December 2024. The index increased by 0,5% month-on-month.

The contributors to the annual rate were electricity (10,9% and contributing 9,3 percentage points) and water (5,6% and contributing 0,8 of a percentage point) – see Figure 3.1.

The contributor to the monthly rate was electricity (0,5% and contributing 0,5 of a percentage point) – see Figure 3.2.

Mining

The annual percentage change in the PPI for mining was 0,7% in January 2025, compared with -1,5% in December 2024. The index increased by 2,8% month-on-month.

The main contributor to the annual rate was gold and other metal ores (7,9% and contributing 2,2 percentage points) – see Figure 4.1.

The main contributors to the monthly rate were gold and other metal ores (4,5% and contributing 1,3 percentage points) and coal and gas (4,7% and contributing 0,8 of a percentage point) – see Figure 4.2.

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 7,5% in January 2025, compared with 4,7% in December 2024. The index decreased by 1,1% month-on-month.

The main contributor to the annual rate was agriculture (8,2% and contributing 7,1 percentage points) – see Figure 5.1.

The negative contributor to the monthly rate was agriculture (-1,3% and contributing -1,2 percentage points) – see Figure 5.2.

Notice of changes to the PPI weights

The annual update of weights for all the PPI tables has been implemented in this release. Further information can be found in the 2025:

- PPI weights release (https://www.statssa.gov.za/?page_id=1854&PPN=P0142.8); and
- PPI sources and methods report: (https://www.statssa.gov.za/?page_id=1854&PPN=Report-01-42-01).

Explanatory notes

Purpose and results of the survey	<p>The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.</p> <p>Further information on the weighting structure, sources of information and methods of compilation of PPI can be found in the PPI sources and methods document, available on the Stats SA website.</p>
Response rate	The response rate for January 2025 was 97,3%.

Glossary

Annual inflation rate	The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.
Annual percentage change	The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.
Average annual inflation rate	The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.
Average annual percentage change	The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.
Contribution	The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).
Monthly percentage change	The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.
Producer Price Index	PPI is defined as "A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process" (OECD, 2006)."

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
