Production Price Index September 1997

Statistical release P0142.1

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

The CSS publishes approximately five hundred different releases per year. In the light of expenditure restraints in government, it is no longer economically viable to produce them in more than one of the eleven official languages in South Africa. Since the releases are also extensively used by the international economic and social-scientific communities, from 1996 CSS releases will be published in English.

PRODUCER INFLATION HIGHER AT 6,1%

The production price index (PPI) for all commodities for South African consumption shows an annual rate of increase of 6,1% at September 1997, i.e. for the period September 1996 to September 1997. This rate is 0,2 of a percentage point higher than the annual rate of increase of 5,9% at August 1997. The monthly increase in this index is 0,5%, compared with an increase of 0,1% for August 1997.

The monthly increase of 0,5% is due to increases in the price indices for agricultural products (contributing +0,3 of a percentage point), textiles and made-up goods (+0,1 of a percentage point) and products of petroleum and coal (+0,1 of a percentage point).

ANNUAL INCREASE IN THE PPI FOR LOCALLY PRODUCED COMMODITIES UNCHANGED

The annual rate of increase in the PPI for locally produced commodities is 6,5% at September 1997, which is the same as the corresponding annual rate at August 1997. From August 1997 to September 1997 this index increased by 0,3%, while the seasonally adjusted index increased by 0,7%.

ANNUAL RATE OF CHANGE IN THE PPI FOR IMPORTED COMMODITIES INCREASES SHARPLY

The PPI for imported commodities reflects an annual increase of 3,8% at September 1997. This rate is 1,0 percentage point higher than the corresponding annual rate of 2,8% at August 1997. From August 1997 to September 1997 this index increased by 1,1%, mainly due to an increase of 7,4% in the average price of imported crude petroleum. The seasonally adjusted index increased by 1,0% during the same period.

MONTHLY CHANGES IN THE PPI FOR ALL COMMODITIES FOR SOUTH AFRICAN CONSUMPTION

Monthly increases occurred in the price indices for agricultural products (+3,2%, mainly due to an increase of 3,4% in the prices of agricultural food products), mining and quarrying products (+0,7%), textiles and made-up goods (+2,0%), wearing apparel (+2,3%), products of petroleum and coal (+1,3%) and metal products (0,6%).

MONTHLY CHANGES IN THE PPI FOR IMPORTED COMMODITIES

Monthly increases occurred in the prices of agricultural food products (+0,9%), mining and quarrying products (+6,2%, due to the large increase in the average price of imported crude petroleum), food at manufacturing (+2,5%), beverages (+0,4%), textiles and made-up goods (+0,9%), leather and leather products (+0,7%), wood and wood products (+0,1%), paper, paper products and printing (+0,1%) and metal products (+3,7%). In contrast, there were monthly decreases in the price indices for agricultural non-food products (-0,2%) and chemicals and chemical products (-0,1%).

EXPLANATORY NOTES1. **WEIGHTING BASIS**

<u>TABLE 2:</u>	Commodities for South African consumption	- Value of South African production, minus exports plus imports
<u>TABLE 3:</u>	Output of South African industry groups	- Value of South African production
	- Total output	- Value of South African production minus exports
	- For South African consumption	
<u>TABLE 4:</u>	Materials used in certain industries	- Value of materials used

2. **PRICING BASIS**

All indices are based on producer prices at the point of production in the case of commodities produced in South Africa, and wholesale prices "ex-warehouse", in the case of imported commodities. Prices "delivered" or "free on rail" are accepted if this is the normal basis of quotation. Price information refers to the first seven days of the relevant month, except in the case of mining and most of the agriculture products, where it refers to the average price for the month. General sales tax is excluded but can be accounted for by multiplying a particular index by 1,04 prior to March 1982; 1,05 from March 1982; 1,06 from September 1982; 1,07 from February 1984; 1,10 from July 1984; 1,12 from April 1985; and 1,13 from April 1989. Value added tax can be added by multiplying the relevant index by 1,10 from October 1991; and by 1,14 from April 1993.

Average price of imported crude petroleum

The average price of imported crude petroleum, used in the compilation of the import component of the PPI, is calculated as the value (in rands) divided by the quantity of imported crude for the relevant month.

THE PRICES OF ALL ITEMS EXCLUDE VAT.

Further details are provided in the Bulletin of Statistics.
