Key findings for September 2015

Final manufactured goods – headline PPI

The annual percentage change in the PPI for final manufactured goods was 3,6% in September 2015 (compared with 3,4% in August 2015). From August 2015 to September 2015 the PPI for final manufactured goods increased by 0,3%.

The main contributors to the annual rate of 3,6% were food products, beverages and tobacco products (6,0% year-on-year and contributing 2,0 percentage points), wood and paper products (7,5% year-on-year and contributing 0,8 of a percentage point) and metals, machinery, equipment and computing equipment (4,9% year-on-year and contributing 0,7 of a percentage point) (see Figure 1.2).

The contributor to the monthly increase of 0,3% was food products, beverages and tobacco products (0,5% month-on-month and contributing 0,2 of a percentage point) (see Figure 1.1).

Intermediate manufactured goods

The annual percentage change in the PPI for intermediate manufactured goods was 0,8% in September 2015 (compared with -0,4% in August 2015). From August 2015 to September 2015 the PPI for intermediate manufactured goods increased by 1,3%.

The main contributors to the annual rate of 0,8% were sawmilling and wood (7,0% year-on-year and contributing 1,4 percentage points) and textile and leather goods (6,2% year-on-year and contributing 0,6 of a percentage point) (see Figure 2.2).

The main contributor to the monthly increase of 1,3% was basic and fabricated metals (2,0% month-on-month and contributing 0,6 of a percentage point) (see Figure 2.1).

Electricity and water

The annual percentage change in the PPI for electricity and water was 11,3% in September 2015 (compared with 11,4% in August 2015). From August 2015 to September 2015 the PPI for electricity and water decreased by 24,2%.

The contributors to the annual rate of 11,3% were electricity (12,9% year-on-year and contributing 10,9 percentage points) and water (2,8% year-on-year and contributing 0,4 of a percentage point) (see Figure 3.2).

The contributor to the monthly decrease of 24,2% was electricity (-27,2% month-on-month and contributing -24,3 percentage points) (see Figure 3.1).

Mining

The annual percentage change in the PPI for mining was -5,2% in September 2015 (compared with -10,8% in August 2015). From August 2015 to September 2015 the PPI for mining increased by 4,9%.

The main contributor to the annual rate of -5,2% was non-ferrous metal ores (-15,1% year-on-year and contributing -5,4 percentage points) (see Figure 4.2).

The main contributors to the monthly increase of 4,9% were gold and other metal ores (8,0% month-on-month and contributing 2,4 percentage points) and stone quarrying, clay and diamonds (19,5% month-on-month and contributing 1,5 percentage points) (see Figure 4.1).

Agriculture, forestry and fishing

The annual percentage change in the PPI for agriculture, forestry and fishing was 5,2% in September 2015 (compared with 7,5% in August 2015). From August 2015 to September 2015 the PPI for agriculture, forestry and fishing increased by 0,7%.

The main contributor to the annual rate of 5,2% was agriculture (5,8% year-on-year and contributing 4,9 percentage points) (see Figure 5.2).

The contributors to the monthly increase of 0,7% were agriculture (0,5% month-on-month and contributing 0,5 of a percentage point) and fishing (3,0% month-on-month and contributing 0,2 of a percentage point) (see Figure 5.1).

Key figures and analytical series

Table A - Key figures

Product	Weight	Index (2012=100)			Percentage change	
		Sep 2014	Aug 2015	Sep 2015	Sep 2015 vs. Aug 2015	Sep 2015 vs. Sep 2014
Final manufactured goods	100,00	115,0	118,8	119,1	0,3	3,6
Intermediate manufactured goods	100,00	117,9	117,3	118,8	1,3	0,8

Explanatory notes

<p>Purpose and results of the survey</p>	<p>The Producer Price Index (PPI) measures changes in the prices of locally produced commodities. A sample of producers is surveyed each month and the results of this survey are used to compile the producer price indices for final manufactured goods, intermediate manufactured goods, electricity and water, mining, and agriculture, forestry and fishing. The PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.</p> <p>Further information on the weighting structure, sources of information and methods of compilation of the PPI can be found in the PPI sources and methods document, available on the Stats SA website.</p>
---	---

Glossary

<p>Producer Price Index</p>	<p>The PPI is defined as “<i>A measure of the change in the prices of goods either as they leave their place of production or as they enter the production process (OECD).</i>”</p>
<p>Contributions</p>	<p>The monthly (annual) contribution of a specific product or group of products to the specific PPI is calculated by multiplying the weight of this product or group of products with the difference of the current index and the previous month (year) index for this product or group of products, divided by the index for the specific index, for the previous month (year).</p>
<p>Annual inflation rate</p>	<p>The annual inflation rate per specific PPI is the change in the specific PPI for all items of the relevant month of the current year compared with the specific PPI for all items of the same month in the previous year expressed as a percentage.</p>
<p>Annual percentage change</p>	<p>The annual percentage change is the change in the index of the relevant month of the current year compared with the index of the same month in the previous year expressed as a percentage.</p>
<p>Average annual inflation rate</p>	<p>The average annual inflation rate is the change in the average specific PPI for all items of one year compared with the average specific PPI for all items of the previous year expressed as a percentage.</p>
<p>Average annual percentage change</p>	<p>The average annual percentage change is the change in the average index of one year compared with the average index of the previous year expressed as a percentage.</p>
<p>Monthly percentage change</p>	<p>The monthly percentage change is the change in the specific PPI of the relevant month compared with the specific PPI of the previous month expressed as a percentage.</p>
<p>Chain linking</p>	<p>The construction of a continuous price series by multiplying together price indices that have been using different weights reference periods. The resulting index is referred to as a chained index (Practical Guide to producing Consumer Price Indices; 2009). Linking is intended to ensure that the individual indices on all levels show the correct development through time, but leads to non-additivity (IMF,2005).</p>

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

- National Library of South Africa, Pretoria Division
- National Library of South Africa, Cape Town Division
- Natal Society Library, Pietermaritzburg
- Library of Parliament, Cape Town
- Bloemfontein Public Library
- Johannesburg Public Library
- Eastern Cape Library Services, King William's Town
- Central Regional Library, Polokwane
- Central Reference Library, Mbombela
- Central Reference Collection, Kimberley
- Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/4892/8496/8095.

Forthcoming issue	Issue	Expected release date
	October 2015	26 November 2015
	November 2015	17 December 2015
	December 2015	28 January 2016
