**URBAN AND NON-URBAN INEQUALITIES IN SOUTH AFRICA**

A programme of household surveys should make it possible to measure change in people's life circumstances at a given point in time.

In South Africa, the first comprehensive CSS household survey in the country was conducted in October 1993.

It was repeated, with modifications to the questionnaire, in 1994 and 1995. The former "TBVC states" (Transkei, Bophuthatswana, Venda and Ciskei) were originally excluded, but in 1994 and 1995, the entire country was included.

These tables summarise the findings of the 1995 October Household Survey (OHS). Since different methodologies were used for drawing the samples in 1994 and 1995, these OHS data sets are not directly comparable in all respects. They are essentially separate snapshots during two consecutive years.

The 1995 OHS has shown that vast inequalities exist in the country, not only racial differences, but also discrepancies in urban and neurban life circumstances. Of the estimated 31,7 million Africans, 19,8 million live in neurban areas. Proportionately more young African children, women and older people than men are found in neurban areas. The education level of inhabitants tends to be lower in neurban areas, and income generating or employment opportunities are fewer.

African households in neurban areas are unlikely to have access to electricity, tap-water, flush toilets or telephones. Fetching wood and carrying water are important neurban life-sustaining activities.

Unemployment in the country remains high (29%, using the expanded definition), but slightly lower than 1994 (33%, using the same definition). However, this definition of unemployment does not necessarily take into account how people sustain themselves and their households. Work is not necessarily waged work, and householders may be involved in such activities as subsistence agriculture, exchange of goods and services or fuel gathering, which are essentially unpaid activities.

## Demography P0317

These tables should be used together with the separate summary report "Living in South Africa", which gives a written and graphic description of the main findings. This report is available from the CSS.

Table	Table of contents	Page
	EXPLANATORY NOTES	v
1	SUMMARY	
1.1.1	Population in urban and non-urban areas by province, population group and gender	1
1.1.2	Population in urban and non-urban areas by age group, population group and gender	3
1.2	Economically and not economically active population (15 years and older) in urban and non-urban areas by province and gender	
1.2.1	Total	5
1.2.2	Africans/Blacks	7
1.2.3	Coloureds	9
1.2.4	Indians/Asians	11
1.2.5	Whites	13
2	WORKERS (EMPLOYERS AND EMPLOYEES)	
2.1	By industry, population group and gender	15
2.2	By occupation, population group and gender	16
2.3	Employees by gross monthly earnings from main occupational group and gender	
2.3.1	Total	17
2.3.2	Africans/Blacks	19
2.3.3	Coloureds	21
2.3.4	Indians/Asians	23
2.3.5	Whites	25

## Demography P0317

2.4	Employers and workers for own account (self-employed) by gross monthly income, main occupational group and gender	
2.4.1	Total	27
2.4.2	Africans/Blacks	29
2.4.3	Coloureds	31
2.4.4	Indians/Asians	33
2.4.5	Whites	35
3	INFORMAL SECTOR	
3.1	Total number of workers	
3.1.1	Total number of workers involved in the informal sector by population group	37
3.2	Workers for own account (self-employed)	
3.2.1	By monthly contribution to the gross domestic product (GDP), industry and population group	38
3.2.2	By industry, population group and gender	39
3.2.3	By occupation, population group and gender	40
3.2.4	By province, population group and gender	43
4	UNEMPLOYED	
4.1	By strict and expanded definition, population group and gender	45
4.2	By age, population group and gender	46
4.3	By level of education, population group and gender	47
4.4	By previous occupation, population group and gender	48
5	MIGRATION	
5.1	Population group by province presently residing and place of birth	49
6	DWELLINGS AND SERVICES AVAILABLE FOR DWELLING	
6.1	Type of dwelling in urban and non-urban areas by average estimated value of dwelling and number of rooms in dwelling	
6.1.1	Total	51
6.1.2	Africans/Blacks	52

## Demography P0317

6.1.3	Coloureds	53
6.1.4	Indians/Asians	54
6.1.5	Whites	55
6.2	Type of dwelling by main materials used for roof and walls	56
6.3	Main source of domestic water for drinking purposes in urban and non-areas by population group: Percentage distribution and total number of dwellings	57
6.4	Availability of domestic water in urban and non-urban areas by population group: Percentage distribution and total number of dwellings	59
6.5	Main source of energy in urban and non-urban areas by population group: Percentage distribution and total number of dwellings	61
6.6	Main source of wood in urban and non-urban areas, if wood is main energy source for either cooking or heating: Percentage distribution and total number of dwellings	64
6.7	Sanitation facilities in urban and non-urban areas by population group: Percentage distribution and total number of dwellings	67
6.8	Refuse disposal in urban and non-urban areas by population group: Percentage distribution and total number of dwellings	71
6.9	Telecommunication in urban and non-urban areas by population group: Percentage distribution and total number of dwellings	72
7	HOUSEHOLDS IN URBAN AND NON-URBAN AREAS	
7.1	By number of households, average household size, type of dwelling and population group	74
8	EDUCATION	
8.1	Level of education of population 20 years and older by population group and gender	75
8.2	Persons (5 - 24 years) in urban and non-urban areas attending school/college/university/ technikon, etc, by population group, age and gender	
8.2.1	Number	76

## Demography P0317

8.2.2	Percentage distribution	77
9	QUALITY OF LIFE	
9.1	By population group: Percentage distribution	78
10	HEALTH STATISTICS	
10.1	Type of medical service in urban and non-urban areas usually consulted by distance, time of journey and population group	79
10.2	Disabled persons in urban and non-urban areas by population group and gender	81

### EXPLANATORY NOTES

#### **1. Definitions**

##### **1.1 Household**

A household consists of a person or a group of persons who:

- (i) eat together and share resources; and
- (ii) normally reside at least four nights a week at the specific visiting point.
- (iii) for the purposes of this survey, a live-in domestic worker is regarded as a separate household.

##### **1.2 Enumerator area**

For each population census, census districts are delimited beforehand into manageable geographical units known as enumerator areas (EAs). The size of these enumerator areas (EAs) is determined by the topography of the area, as well as by the number of visiting points within the area.

##### **1.3 Visiting point**

A visiting point is a physical address or a dwelling where a household or a group of households can be found. There may be more than one household at a visiting point. A visiting point can be a house, hotel, shop, house under construction, hut, tent, or a block of flats or apartments.

#### **1.4 Not economically active population**

The not economically active population consists of all persons, irrespective of age, who were out of the labour market and who were neither employed nor unemployed as defined below at the time of survey.

#### **1.5 Economically active population**

The economically active population comprises all people aged 15 years or older who are working or are available for work within the next week.

#### **1.6 Workers**

Workers are persons aged 15 years and older who worked for a wage or salary or for profit or family gain, which was received in cash or in kind during the reference week (the seven days preceding the interview). Persons who had started work in their present job and who were temporarily absent from work during the reference week but still had a formal job attachment, are included.

##### **1.6.1 Notes**

A formal job attachment refers to all cases where an agreement exists regarding the continued receipt of a wage or salary, or regarding a return to work following the end of the contingency (for example illness, maternity leave) or a return on a specific date.

##### **1.6.2 Persons engaged in the production of goods and services for own household**

consumption are considered to be self-employed if such production makes an important contribution to the total consumption of the household.

## **1.7 Unemployment**

Unemployed persons are persons 15 years and older who

1.7.1 were not in paid employment or self-employed as defined above;

1.7.2 were available for paid employment or self-employment during the reference week (the seven days preceding the interview); **and**

1.7.3 took specific steps during the four weeks preceding the interview to find paid employment or self-employment; **or**

1.7.4 had the desire to work and to take up employment or self-employment and were available to start within the week of the interview.

### **1.7.5 Notes**

Persons who comply with the definitions above **and** who

1.7.5.1 had made arrangements to take up paid employment or undertake self-employment at a date subsequent to the interview date; **or**

1.7.5.2 are temporarily absent from their jobs with no formal job attachment are regarded as unemployed, because there is no guarantee that they will continue to be employed.

## **1.8 The strict and expanded definitions of unemployment**

At least two definitions of unemployment are used in South Africa - the strict and expanded

definition. Both definitions include people who are aged 15 years or older, and who are not employed, but who are available for work. But they differ from each other in the following way. A

requirement of the first or strict definition is that a given individual has taken specific steps to seek employment in the four weeks prior to a given point in time. The second or expanded definition focuses on the desire to work, irrespective of whether or not the person has taken active steps to find work.

### **1.9 Underemployment and part-time workers**

Persons underemployed comprise the workers, as defined above, (par. 1.6) who (whether at work or not) involuntarily worked less than 35 hours during the reference week and who were seeking or had the desire for full-time or additional work during the reference week.

### **1.10 Invisible underemployment**

This category is not measured by the survey but consists of workers who are "overqualified" for their occupations and those making use of "inefficient" work procedures.

### **1.11 The official unemployment rate**

The official unemployment rate represents the actual number of unemployed persons as determined in accordance with the expanded definition of unemployment, expressed as a percentage of the relevant economically active population.

### **1.12 The informal sector**

The informal sector consists of all people or businesses which are not registered and/or who defined themselves as being in the informal sector at the time of the survey.

**2. Availability of data set**

In order to ensure optimal utilisation of this valuable source of information, the CSS would encourage users to purchase the data set at a minimal cost and to do their own analyses of the data.

This data set will be available on tape or stiffy as from 11 December 1996. Any further queries may be directed to the User's Enquiries Component (tel. (012) 310-8095).

**3. Availability of narrative report**

A separate narrative report (text and graphs) on selected findings has been written and is available from the CSS.

**4. Provincial tables**

Tables for all provinces are being prepared.

**5 Abbreviations and symbols used**

- T = Total
- M = Male
- F = Female
- = nil or not applicable
- 0 or 0,0 = more than nothing, but less than half the final figure shown
