

P0352

**Advance releases of tourism statistics,
February 2002**

Embargo: 09:30

Date: 21 May 2002

DURING FEBRUARY 2002, PRELIMINARY FIGURES SHOW THAT A TOTAL OF 434 551 FOREIGN TRAVELLERS VISITED SOUTH AFRICA. THIS FIGURE INCLUDES 143 186 (33,0%) PERSONS WHO CAME FROM OVERSEAS.

Special note to the reader:

Readers may recall that about two years ago, there was a problem with retrieving tourism data from mainframe computer maintained by the Department of Home Affairs. This problem caused delays in the release of the associated statistical release (P0351). As a short-term solution to the problem, the Advance release of tourism statistics (P0352) was launched in August 1999. This release made use of the border-post database which by-passed the mainframe computer. The problem with the mainframe computer has now been solved and there are no longer any delays in obtaining data for that source. As a result of this positive development, it is no longer considered necessary to continue with this P0352 statistical release. As such this will be the last release for this series. Any convenience is regretted.

Summary of totals

During February 2002, preliminary figures show that a total of 434 551 foreign travellers visited South Africa. This figure includes 143 186 persons (33,0%) who came from overseas and 290 418 (66,8%) from mainland Africa.

EXPLANATORY NOTES

Source of data and background

Legal movements across South African borders fall under the jurisdiction of the Department of Home Affairs (DHA). Each South African resident who leaves or re-enters South African borders by rail, road or air or sea gets his/her passport scanned to read the barcode. This simple action provides basic particulars about the person. For those passports that do not have a stripe or barcode, the Home Affairs official at the port of entry, captures onto the computer, the personal details reflected on the passport. This information is directly up-dated on the mainframe computer of the Department of Home Affairs. The idea behind the Advance Release of Tourism Statistics is to process the data before it gets offloaded onto the mainframe computer. This release covers departures and arrivals by air from the three main airports (Cape Town, Durban and Johannesburg) and other airports. The release also includes rail and road departures from the border posts that are equipped to capture arrivals and departures electronically as these occur. It is hoped that data from border posts which are not equipped to capture data as the events occur, will be included in the final Tourism and Migration statistical release (P0351). Information on reason for temporary departure of South African residents is obtained from departure forms. These are captured at Stats SA and normally included in the P0351 statistical release. For the moment, data obtained from those forms (i.e. purpose of departure and the country of destination) do not form part of the Advance Release of Tourism Statistics.

Comparability of data

The tourism data used for this release is not directly comparable with previous releases because of the differences in coverage explained above. To ensure continuity in our series, we will still continue with the full Tourism and Migration statistical release (P0351).

Clarification of terms used in the tables

Foreign travellers: For foreign travellers, the category “overseas total” excludes travellers from mainland Africa and from “unspecified” countries.

Border posts: As at early 2002, there are 70 ports of entry (border posts) in South Africa. Of these, about 52 are computerised and 18 are not. Those that are not computerised (comprising small airports and seaports) are not part of the BP database. The forms filled in at those ports are captured at the regional offices of DHA.

Glossary of some terms used in tourism statistics

Tourism comprises the activities of persons travelling to and staying in places outside their usual environment for not more than one consecutive year for leisure, business and other purposes. The usual environment of a person consists of a certain area around his/her place of residence plus all other places s/he frequently visits.

Tourist (overnight visitor) is a visitor who stays at least one night in a collective or private accommodation in the place visited. An international tourist is an **international visitor** who stays at least one night in a collective or private accommodation in the country visited. **Domestic tourist** refers to a domestic visitor who stays at least one night in a collective or private accommodation in the place visited.

Traveller refers to any person on a trip between two or more localities. **An international traveller** refers to any person on a trip between two or more localities in different countries. **A domestic traveller** refers to any person, on a trip between two or more localities in his/her country of residence.

Visitor refers to any person travelling to a place other than that of his/her usual environment for less than 12 consecutive months and whose main purpose of trip is other than the exercise of an activity remunerated from within the place visited.

An International visitor refers to any person, travelling to a country, other than the one in which he/she has his/her usual residence, but outside his/her usual environment, for less than 12 consecutive months and whose main purpose of trip is other than the exercise of an activity remunerated from within the place visited.

Domestic visitor refers to any person residing in a country, who travels to a place within a country other than the one in which s/he has his/her usual environment, for less than 12 consecutive months and whose main purpose of trip is other than the exercise of an activity remunerated from within the place visited.

Estimation of figures for missing days

With the breakdown of arrivals and departure statistics by date, mode of travel and port of entry/exit, it is possible to detect missing data. In the past, the missing data were footnoted and left as they were. Steps are now being taken to provide estimates for those missing data. For each missing datum, the data for a specific date/mode of travel/port of entry or exit are averaged for the previous months, since February 2000. The average figure is used as input for that missing datum. This estimation is only done for tables 3.1.1 and 4.1.1. The grand total in those tables would be higher than the reported (unadjusted) grand totals. Any further improvements in the estimation/imputation methods used will be reported upon.
