EXPLANATORY NOTES

Source of data and background

Legal movements across South African borders fall under the jurisdiction of the Department of Home Affairs (DHA). Each South African resident who leaves or re-enters South African borders by rail, road or air or sea gets his/her passport scanned to read the barcode. This simple action provides basic particulars about the person. For those passports that do not have a stripe or barcode, the Home Affairs official at the port of entry, captures onto the computer, the personal details reflected on the passport. This information is directly up-dated on the mainframe computer of the Department of Home Affairs. The idea behind the Advance Release of Tourism Statistics is to process the data before it gets offloaded onto the mainframe computer. This release covers departures and arrivals by air from the three main airports (Cape Town, Durban and Johannesburg) and other airports. The release also includes rail and road departures from the border posts that are equipped to capture arrivals and departures electronically as these occur. It is hoped that data from border posts which are not equipped to capture data as the events occur, will be included in the final Tourism and Migration statistical release (P0351). Information on reason for temporary departure of South African residents is obtained from departure forms. These are captured at Stats SA and normally included in the P0351 statistical release. For the moment, data obtained from those forms (i.e. purpose of departure and the country of destination) do not form part of the Advance Release of Tourism Statistics.

Comparability of data

The tourism data used for this release is not directly comparable with previous releases because of the differences in coverage explained above. To ensure continuity in our series, we will still continue with the full Tourism and Migration statistical release (P0351).

Clarification of terms used in the tables
