SENTRALE STATISTIEKDIENS
CENTRAL STATISTICAL SERVICE

Bruto binnelandse produk teen konstante pryse

Tweede kwartaal 1993

Gross domestic product at constant prices

Second quarter 1993

Statistiese vrystelling
Statistical release P0441.1

Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die owerheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydige beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

NOTA:

Alle groeikoerse in hierdie Statistiese vrystelling is kwartaallikse persentuele veranderings wat uitgedruk word teen jaarkoerse.

LANDBOUPRODUKSIE HERSTEL STEEDS

Voorlopige ramings toon dat die totale seisoensaangesuiwerde reële BBP teen markpryse in die tweede kwartaal van 1993 met 5,1% toegeneem het; na 'n toename van 1,4% in die eerste kwartaal. Soos in die geval van die eerste kwartaal kan die toename in die tweede kwartaal weer eens toegeskryf word aan sterk groei in reële landbouproduksie; hierdie keer met 231,5% teenoor 53,9% in die eerste kwartaal. Die verdere skerp styging in landbouproduksie in die tweede kwartaal moet steeds gesien word teen die agtergrond van die buitengewone lae vlak wat dit in 1992 bereik het as gevolg van die langdurige droogte waaronder Suid-Afrika gebuk gegaan het (kyk tabel 2.1).

In teenstelling met die sterk groei in die landbousektor het die ander sektore wisselend vertoon in die tweede kwartaal. So byvoorbeeld het die reële produksie van die mynbousektor en van die sektor elektrisiteit, gas en water met 2,5% en 4,8% onderskeidelik toegeneem in die tweede kwartaal, vergeleke met die eerste kwartaal. Daarteenoor egter, het die reële bydrae van konstruksie, handel en vervoer met onderskeidelik 5,5%, 3,6% en 1,9% in die tweede kwartaal afgeneem. In geheel gesien het die totale seisoensaangesuiwerde reële BBP van die nie-landbousektor vir die afgelope kwartaal naastenby op dieselfde vlak gebly.

Die kwartaallikse veranderings in die BBP teen konstante 1985-pryse teen seisoensaangesuiwerde jaarkoerse is soos volg:

NOTE:

All growth rates in this Statistical release are quarterly percentage changes which are indicated at annual rates.

AGRICULTURAL PRODUCTION STILL RECOVERING

Preliminary estimates show that the total seasonally adjusted real GDP at market prices increased by 5,1% in the second quarter of 1993; after an increase of 1,4% in the first quarter. As in the case of the first quarter, the increase in the second quarter can once again be attributed to strong growth in real agricultural production, this time by 231,5% as against 53,9% in the first quarter. The further sharp increase in agricultural production in the second quarter should still be seen against the background of the unusually low level it reached in 1992 as a result of the protracted drought which South Africa suffered at the time (see table 2.1).

In contrast to the strong growth in the agricultural sector, the other sectors performed variably in the second quarter. Thus, for example, the real production of the mining sector and of the sector electricity, gas and water increased by 2,5% and 4,8% respectively in the second quarter, compared with the first quarter. On the other hand, the real contribution of construction, trade and transport decreased by 5,5%, 3,6% and 1,9% respectively in the second quarter. Overall, the total seasonally adjusted real GDP of the non-agricultural sector for the past quarter has remained more or less on the same level.

The quarterly changes in the GDP at constant 1985 prices at seasonally adjusted annual rates are as follows:

	1992				1993
