**Statistiese vrystelling  
Statistical release P0441.1**

Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die overheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydige beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

## EKONOMIE TOON VOLGEHOUE GROEI IN DERDE KWARTAAL

NOTA:

Alle groei- en krimpkoerse in hierdie statistiese vrystelling is kwartaal- en jaarkoerse. Veranderinge wat uitgedruk word teen jaarkoerse.

Hierdie statistiese vrystelling bevat hersiene ramings vir die landbousektor vanaf 1993 en ander hersienings vanaf die eerste kwartaal van 1994. Alhoewel die kwartaal- en jaarkoerse van 1993 en 1994 effens gewysig is het die breë verloop onveranderd gebly. Die tendens vir 1995 het egter gewysig as gevolg van 'n opwaartse aanpassing in die groei- en krimpkoerse van 3,0% (teen markpryse teen 'n jaarkoerse). Hierdie sterk positiewe groei is behaal ten spyte van 'n voortgesette dalende seisoensaangesuiwerde landbouproduksie in die eerste drie kwartale van 1995.

Volgens voorlopige aanwysers is die stygende tendens wat in die eerste twee kwartale van 1995 behaal is, met groei- en krimpkoerse van onderskeidelik 1,6% en 2,2% in die totale seisoensaangesuiwerde reële BBP teen markpryse, in die derde kwartaal voortgesit met 'n groei- en krimpkoerse van 3,0% (teen markpryse teen 'n jaarkoerse). Hierdie sterk positiewe groei is behaal ten spyte van 'n voortgesette dalende seisoensaangesuiwerde landbouproduksie in die eerste drie kwartale van 1995.

Indien die landbousektor buite rekening gelaat word het die seisoensaangesuiwerde reële BBP van die nie-landbousektor teen jaarkoerse van onderskeidelik 2,1%, 4,6% en 5,9% (teen faktorinkome) in die eerste drie kwartale van 1995 toegeneem. Die sterker groei in die derde kwartaal kan hoofsaaklik aan die volgehoue sterk groei in veral die fabriekswesesektor toegeskryf word asook aan 'n positiewe groei in mynbouproduksie, veral 'n herstel in goudproduksie, na afnames in die vorige twee kwartale.

Die kwartaal- en jaarkoerse in die BBP teen konstante 1990-pryse teen seisoensaangesuiwerde jaarkoerse is soos volg:

	1994			1995			GDP at constant 1990 prices At market prices At factor incomes: Total Agriculture Non-agricultural sector Mining Secondary industries Manufacturing Tertiary industries

## ECONOMY SHOWS SUSTAINED GROWTH IN THIRD QUARTER

NOTE:

All growth rates in this statistical release are quarterly percentage changes which are indicated at annual rates.

This statistical news release contains revised estimates for the agricultural sector from 1993 and other revisions from the first quarter of 1994. Although the quarterly growth rates of 1993 and 1994 changed slightly, the broad trend remained the same.

The trend for 1995 has however changed as a result of the upward adjustment in the growth rate of the second quarter due to indicators which became available since the preliminary estimates were published.

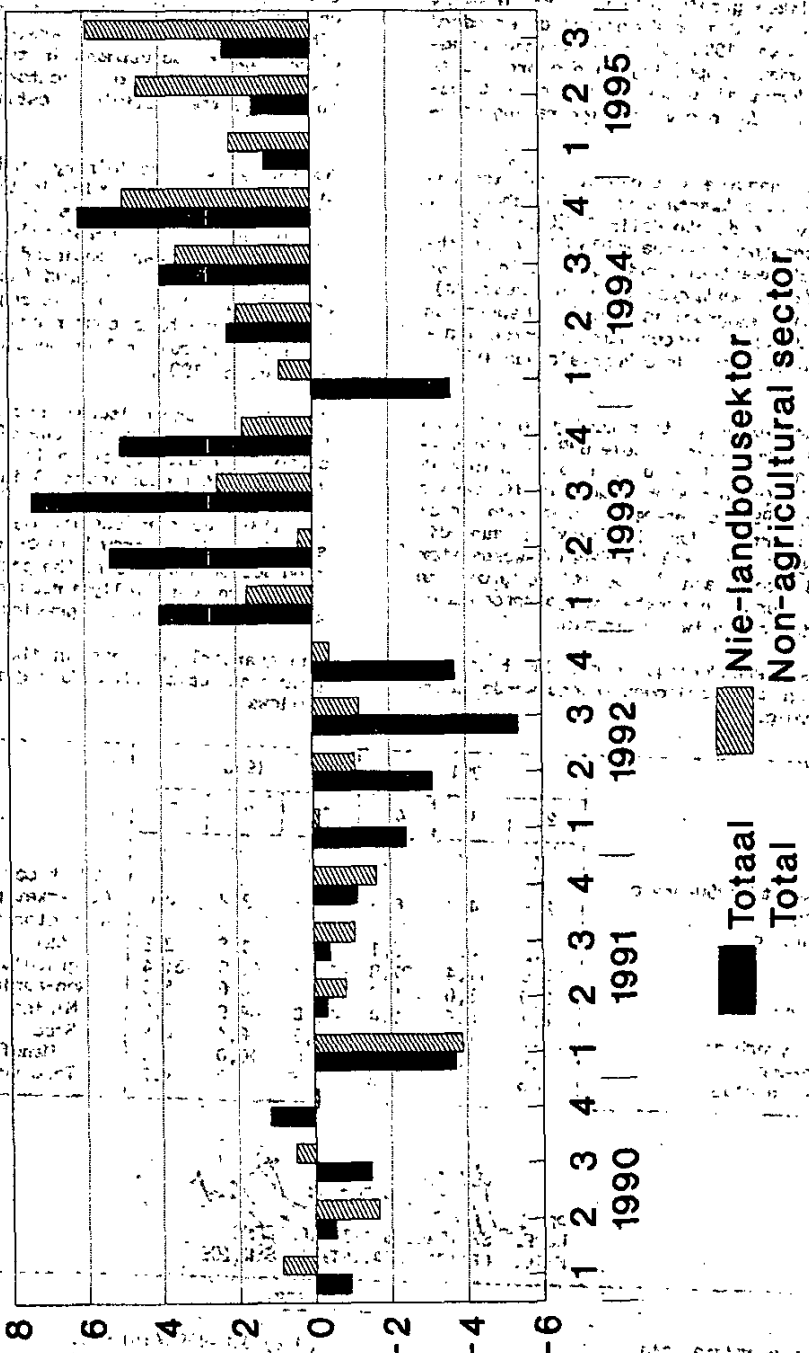

According to preliminary indicators the rising trend, which was recorded in the first two quarters of 1995 with growth rates of 1,6% and 2,2% respectively in the total seasonally adjusted real GDP at market prices, was continued in the third quarter with a growth rate of 3,0% (at market prices at an annualised rate). This strong positive growth was recorded despite a continuous declining seasonally adjusted agricultural production in the first three quarters of 1995.

Should the agricultural sector be excluded, the seasonally adjusted real GDP of the non-agricultural sector increased by annualised rates of 2,1%, 4,6% and 5,9% (at factor incomes) in the first three quarters of 1995, respectively. The stronger growth in the third quarter can mainly be attributed to the sustained strong growth in especially the manufacturing sector and also to the positive growth in mining production, especially a recovery in gold production, after decreases in the previous two quarters.

The quarterly changes in the GDP at constant 1990 prices at seasonally adjusted annualised rates are as follows:

**Gross Domestic Product  
at constant 1990 prices  
Seasonally adjusted  
Quarterly % change  
at annual rates**

**Bruto Binnelandse Produk  
teen konstante 1990-prise  
Seisoensaangepas
