STATISTIEKDIENS
CENTRAL
STATISTICAL SERVICE

Statistiese vrystelling P0441.1
Statistical release

Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die owerheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydige beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

ling is kwartaalike persentuele veranderings
wat uitgedruk word teen jaarkoerse.

**BBP VIR 1993 TOON WEER 'N POSITIEWE GROEIKOERS
NA DRIE JAAR VAN AFNAME**

Volgens voorlopige aanwysers het die totale reële BBP in 1993 met 1,1% teen markpryse (1,2% teen faktorinkome) toegeneem vergeleke met 1992. Dit is die eerste positiewe groeikoers vir 'n jaar sedert 'n groei van 2,3% (teen markpryse) in 1989. In die drie tussenin jare het die totale reële BBP met onderskeidelik 0,5%, 0,4% en 2,1% (teen markpryse) afgeneem.

Die toename van 1,2% (teen faktorinkome) is hoofsaaklik toe te skryf aan die beter landbouopbrengste in 1993 as in 1992, en die gevolglike groter bydrae van die landbousektor tot die totale reële BBP. Indien die bydrae van die landbousektor, wat in 1993 met 17,7% gegroei het, buite rekening gelaat word, het die totale reële BBP van die nie-landbousektor in 1993 met slegs 0,3% toegeneem vergeleke met 1992.

Wat die kwartaalverloop in 1993 betref, blyk dit dat die positiewe groeipatroon wat in die eerste kwartaal begin het, tot in die vierde kwartaal voortgesit is met groeikoerse (uitgedruk teen jaarkoerse) van onderskeidelik 2,1%, 5,9%, 8,6% en 6,4% (teen faktorinkome) in die totale seisoensaangesuiwerde reële BBP. Indien die landbousektor, wat baie sterk in al vier kwartale gegroei het, buite rekening gelaat word, was die toename in die seisoensaangesuiwerde reële BBP van die nie-landbousektor onderskeidelik 0,5%, 0,3%, 2,4% en 1,9% (uitgedruk teen jaarkoerse) in die vier kwartale van 1993. Dit is insiggewend dat die groei in die tweede helfte van die jaar sterker was as in die eerste helfte, beide vir die totale BBP en die nie-landbousektor.

NOTE:

All growth rates in this statistical release are
quarterly percentage changes which are indicated
at annualised rates.

**GDP FOR 1993 SHOWS A POSITIVE GROWTH RATE AFTER
THREE YEARS OF DECLINES**

According to preliminary estimates the total real GDP increased by 1,1% at market prices (1,2% at factor incomes) in 1993 compared with 1992. This is the first positive growth rate for a year since a growth of 2,3% (at market prices) in 1989. In the intervening three years the total real GDP declined by 0,5%, 0,4% and 2,1% respectively (at market prices).

The increase of 1,2% (at factor incomes) is mainly attributable to the better agricultural yields in 1993 than in 1992, and the resultant larger contribution of the agricultural sector to the total real GDP. If the contribution of the agricultural sector, which increased by 17,7% in 1993, is excluded, the total real GDP of the non-agricultural sector increased by only 0,3% in 1993 compared with 1992.

As far as the quarterly trend in 1993 is concerned it seems that the positive growth rate that started in the first quarter continued up to the fourth quarter with annualised growth rates of 2,1%, 5,9%, 8,6% and 6,4% respectively (at factor incomes) in the total seasonally adjusted real GDP. If the agricultural sector, which increased sharply in all four quarters, is excluded, the increase in the seasonally adjusted real GDP of the non-agricultural sector was 0,5%, 0,3%, 2,4% and 1,9% respectively (at annualised rates) in the four quarters of 1993. It is significant that the growth was stronger in the second half of the year than in the first half, both for the total GDP and the non-agricultural sector.

Die kwartaallikse veranderings in die BBP teen konstante 1985-pryse teen seisoensaangesuiwerde jaarkoerse is soos volg:

The quarterly changes in the GDP at constant 1985 prices at seasonally adjusted annualised rates are as follows:

	1992				1993
