## P2041

# Mining: Production and sales (Preliminary)

April 2012

**Embargoed until:**  
**7 June 2012**  
**11:30**

**Enquiries:**

User Information Services  
Tel: (012) 310 8600

**Forthcoming issue:**

May 2012

**Expected release date:**

12 July 2012

**Contents**

**Production: results for April 2012..... 2**

**Sales: results for March 2012..... 4**

**Tables..... 6**

Table 1 – Index of the volume of mining production: 2006 – 2012..... 6

Table 2 – Annual percentage change in the volume of mining production: 2006 – 2012 ..... 6

## Production: results for April 2012

**Table A – Total mining production**

Actual estimate	Base: 2005=100			
	April 2012	% change between April 2011 and April 2012	% change between February to April 2011 and February to April 2012	% change between January to April 2011 and January to April 2012
Volume of mining production index	82,3	-10,6	-10,5	-9,4

Seasonally adjusted estimate	Base: 2005=100		
	April 2012	% change between March and April 2012	% change between November 2011 to January 2012 and February to April 2012
Volume of mining production index	86,4	0,9	-7,6

**Table B – Contribution of the mineral group and mineral to the total three-monthly seasonally adjusted growth in mining production**

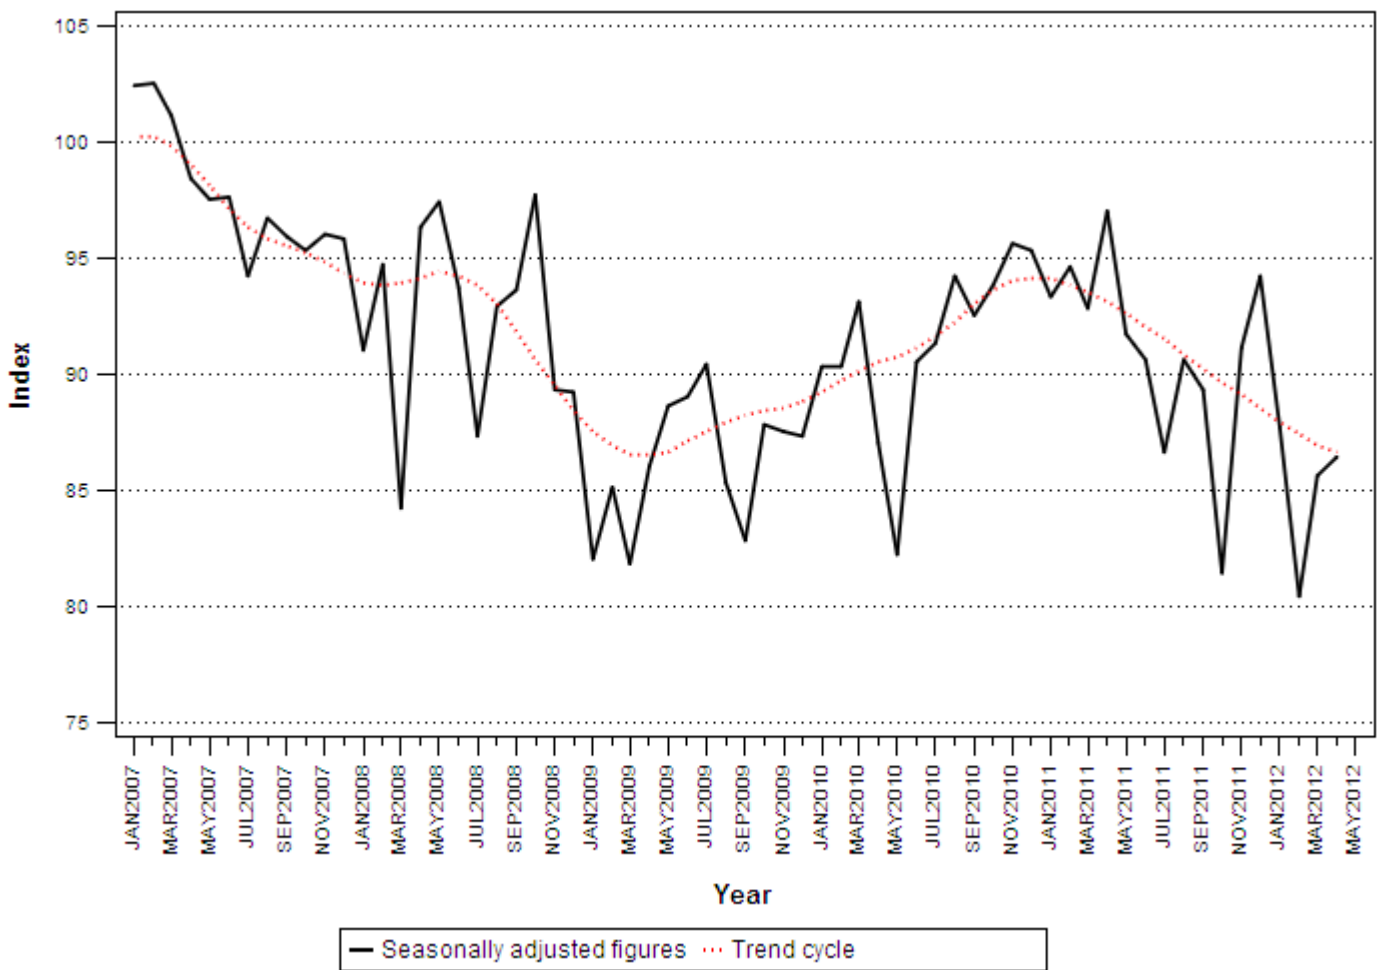

Mineral group and mineral	Base: 2005=100					
	Weights 2005	November 2011 to January 2012	February to April 2012	% change between November 2011 to January 2012 and February to April 2012	Difference between November 2011 to January 2012 and February to April 2012	Contribution (% points) to the % change in total mining production <sup>1/</sup>
Gold	17,2	59,3	55,7	-6,1	-3,6	-0,7
Iron ore	5,3	148,5	163,8	10,3	15,3	0,9
Chromium ore	1,3	154,6	146,9	-5,0	-7,7	-0,1
Copper	1,8	86,8	91,5	5,4	4,7	0,1
Manganese ore	1,5	184,2	201,0	9,1	16,8	0,3
PGMs	27,0	91,3	69,7	-23,7	-21,6	-6,4
Nickel	2,8	112,4	94,1	-16,3	-18,3	-0,6
Other metallic minerals	2,8	108,2	104,3	-3,6	-3,9	-0,1
Diamonds	7,6	37,9	38,3	1,1	0,4	0,0
Coal	24,9	108,3	107,0	-1,2	-1,3	-0,4
Building materials	2,1	100,7	92,5	-8,1	-8,2	-0,2
Other non-metallic minerals	5,7	65,6	58,8	-10,4	-6,8	-0,4
<b>Total</b>	<b>100,0</b>	<b>91,0</b>	<b>84,1</b>	<b>-7,6</b>	<b>-6,9</b>	<b>-7,6</b>

1/ The contribution (percentage points) of a mineral or mineral group to the percentage change in the total seasonally adjusted mining production is calculated by multiplying the difference in the index for the mineral or mineral group by the weight of the mineral or mineral group and then dividing by the previous period's total index. Figures have been rounded off.

Seasonally adjusted mining production decreased by 7,6% for the three months ended April 2012 compared with the three months ended January 2012. The most significant downward contribution to the 3-month percentage change came from PGMs (contributing -6,4 percentage points) (see Table B).

Actual mining production decreased by 10,5% for the three months ended April 2012 compared with the three months ended April 2011. A year-on-year decrease of 10,6% was recorded in April 2012 compared with a revised 8,0% decrease in March 2012 (see Table 2).

Figure 1 – Volume of mining production (Base: 2005=100)

## Sales: results for March 2012

**Table C – Total value of mineral sales**

Actual estimate	March 2012	% change between March 2011 and March 2012	% change between January to March 2011 and January to March 2012
	R million		
Total value of mineral sales	31 547,9	0,5	6,9

Seasonally adjusted estimate	March 2012	% change between February and March 2012	% change between October to December 2011 and January to March 2012
	R million		
Total value of mineral sales	29 894,5	-6,7	-6,5

**Table D – Contribution of the mineral group and mineral to the seasonally adjusted three-monthly growth in the total value of mineral sales (R million)**

Mineral group and mineral	% contribution to total mineral sales during October to December 2011	October to December 2011	January to March 2012	% change between October to December 2011 and January to March 2012	Contribution to the % change in the total value of mineral sales <sup>1/</sup>	Difference between October to December 2011 and January 2012 to March 2012
		R million	R million			% points
Gold	20,2	20 558,1	19 659,2	-4,4	-0,9	-898,9
Iron ore	16,0	16 320,7	15 931,6	-2,4	-0,4	-389,1
Chromium ore	2,3	2 306,7	1 974,8	-14,4	-0,3	-331,9
Copper	1,3	1 372,8	1 490,0	8,5	0,1	117,2
Manganese ore	2,4	2 483,3	2 317,4	-6,7	-0,2	-165,9
PGMs	21,8	22 130,8	17 006,8	-23,2	-5,1	-5 124,0
Nickel	1,9	1 907,4	1 534,4	-19,6	-0,4	-373,0
Other metallic minerals	3,3	3 379,6	2 683,7	-20,6	-0,7	-695,9
Coal	24,3	24 691,9	24 502,9	-0,8	-0,2	-189,0
Building materials	2,0	2 045,0	1 899,4	-7,1	-0,1	-145,6
Other non-metallic minerals	4,5	4 538,8	6 098,3	34,4	1,5	1 559,5
<b>Total</b>	<b>100,0</b>	<b>101 735,1</b>	<b>95 098,5</b>	<b>-6,5</b>	<b>-6,5</b>	<b>-6 636,6</b>

1/ The contribution (percentage points) to the percentage change in sales is calculated by multiplying the percentage change of each mineral with the percentage contribution to total mineral sales during October to December 2011, divided by 100. Figures have been rounded off.

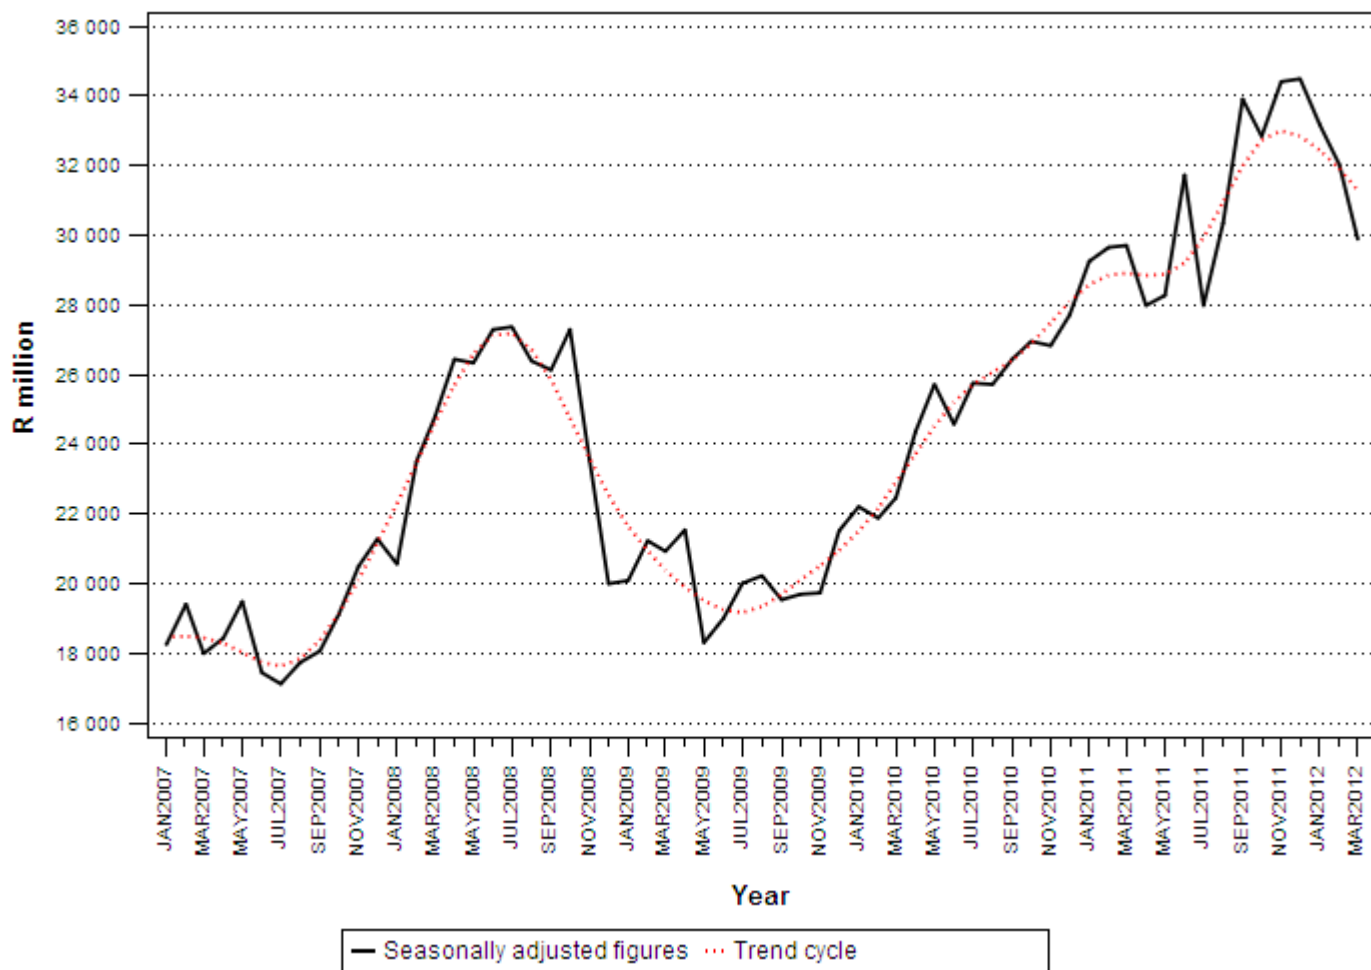

The seasonally adjusted value of mineral sales at current prices reflected a decrease of 6,5% in the first quarter of 2012 compared with the fourth quarter of 2011. The fall of 6,5% (-R6 636,6 million) was mainly due to a decrease in the sales value of PGMs (contributing -5,1 percentage points or -R5 124,0 million). The largest upward effect came from 'other' non-metallic minerals (contributing 1,5 percentage points or R1 559,5 million) (see Table D).

The actual value of mineral sales at current prices in the first quarter of 2012 increased by 6,9% compared with the first quarter of 2011. The major contributors to this increase were:

- gold (contributing 5,6 percentage points or R4 723,3 million);
- coal (contributing 4,8 percentage points or R4 008,5 million);
- iron ore (contributing 1,6 percentage points or R1 364,0 million); and
- 'other' non-metallic minerals (contributing 1,1 percentage points or R933,5 million).

PGMs sales decreased over this period, contributing -5,9 percentage points or -R4 962,7 million (see Table 13).

Nickel	2,3	1 919,4	1 488,4	-22,5	-0,5	-431,0
Other metallic minerals	2,3	1 917,7	2 394,6	24,9	0,6	476,9
Coal	23,7	19 980,2	23 988,7	20,1	4,8	4 008,5
Building materials	2,0	1 666,0	1 788,8	7,4	0,1	122,8
Other non-metallic minerals	5,1	4 300,4	5 233,9	21,7	1,1	933,5
<b>Total</b>	<b>100,0</b>	<b>84 334,0</b>	<b>90 121,7</b>	<b>6,9</b>	<b>6,9</b>	<b>5 787,7</b>

1/ The contribution (percentage points) to the percentage change in sales is calculated by multiplying the percentage change of each mineral with the percentage contribution to total mineral sales during January to March 2011, divided by 100. Figures have been rounded off.

## Explanatory notes

<b>Introduction</b>	1	Statistics South Africa (Stats SA) publishes monthly mining production indices and mineral sales figures on the information furnished by the Department of Mineral Resources (DMR). Data in this release are presented by mineral group and mineral.
	2	In accordance with international practice, the indices are usually re-based every five years to a new base year. The current base year of the index of the volume of mining production is 2005=100. Both actual and seasonally adjusted figures are presented.
	3	Due to mining production figures being available earlier than mineral sales figures, mining production indices are published one month earlier than mineral sales.
	4	The value of mineral sales is calculated, in general, on a free-on-rail/free-on-board basis.
	5	In order to improve timeliness, some information for the current month had to be estimated due to late response. These estimates will be revised in future statistical release(s) as soon as more up-to-date information is available.
<b>Purpose of the survey</b>	6	The monthly mining production and sales survey is conducted by the Department of Mineral Resources (DMR), covering all mining establishments operating in the South African economy. The results of this survey are used to calculate the volume of mining production indices in order to estimate the gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy.
<b>Scope of the survey</b>	7	This survey covers mining establishments conducting activities regarding the extracting, dressing and beneficiating of minerals occurring naturally, for example solids such as coal and ores.
<b>Classification</b>	8	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities (ISIC)</i> with suitable adaptations for local conditions. Each statistical unit is classified to an industry which reflects the predominant activity of the establishment. Statistics in this publication are presented according to mineral group and mineral.
<b>Statistical unit</b>	9	The statistical unit for the collection of information is the mining establishment. An establishment is the smallest economic unit that functions as a separate entity.
<b>Related publications</b>	10	Users may also wish to refer to the following publications which are available from Stats SA – <ul style="list-style-type: none"> <li>• <i>Bulletin of Statistics</i> issued quarterly; and</li> <li>• <i>SA Statistics</i> issued annually.</li> </ul>
<b>Rounding-off figures</b>	11	The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.
<b>Historical data and past publications</b>	12	Historical data and past publications are available on the Stats SA webpage. Click on the following links ( <a href="#">Time series data</a> ) or ( <a href="#">Past publications</a> ) to access the data and releases electronically.

## Technical notes

<b>Index of the volume of mining production</b>	<b>1</b>	The index of the volume of mining production (production index) is a statistical measure of the change in the volume of production. The production index of a mineral group is the ratio between the volume of production of a mineral group in a given period and the volume of production of the same mineral group in the base period. The current base period is 2005. The production in the base period is set at 100.
<b>Index weighting</b>	<b>2</b>	The weight of a mineral group is the ratio of the sales of a mineral group to the total sales of the mining industry. The weight of a mineral group reflects the importance of the mineral group in the total mining industry. The weights change over time due to quality changes and changes in relative prices. New weights need to be calculated from time to time.
	<b>3</b>	The weights, which are used to aggregate minerals to mineral groups; and mineral groups to total mining, are based on the value of sales derived from detailed information for 2005 supplied by the Department of Mineral Resources (DMR).
<b>Seasonal adjustment</b>	<b>4</b>	Seasonally adjusted estimates of all items are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.
	<b>5</b>	Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.
<b>Trend cycle</b>	<b>6</b>	The trend is the long-term pattern or movement of a time series. The X-11 Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimate the underlying trend cycle.
<b>Reliability of estimates</b>	<b>7</b>	Figures for the latest 2 calendar years are preliminary.
<b>Month-on-month percentage change</b>	<b>8</b>	The month-on-month percentage change is the difference between the index/sales of the relevant month and the previous month expressed as a percentage of the latter.
<b>Year-on-year (annual) percentage change</b>	<b>9</b>	The year-on-year percentage change is the change in the index/sales of the relevant month of the current year compared with the corresponding month of the previous year expressed as a percentage of the latter.
<b>Production index contribution (percentage points)</b>	<b>10</b>	The contribution (percentage points) of a mineral group or mineral to the percentage change in the total mining production for a given period is calculated by multiplying the difference in the index for each mineral group or mineral by the weight of the mineral group or mineral and then dividing by the previous period's total index.
<b>Sales contribution (percentage points)</b>	<b>11</b>	The contribution (percentage points) to the percentage change in total sales is calculated by multiplying the percentage change of each mineral group or mineral for a given period with its percentage contribution to total mineral sales of the previous period, divided by 100.

## Glossary

<b>Free-on-rail</b>	Free-on-rail relates to goods sold on the local market where no railage or road transport costs are involved.																
<b>Free-on-board</b>	Free-on-board relates to goods destined for the export market. Railage, road transport and docking charges are involved but no charges are made for the transport by sea.																
<b>Industry</b>	An industry consists of a group of establishments engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification (SIC) of all Economic Activities</i> , Fifth Edition of January 1993.																
<b>PGMs – Platinum group metals</b>	Platinum group metals include platinum; iridium; osmiridium; palladium; rhodium; ruthenium and osmium.																
<b>Sales</b>	Sales are the total value of sales of primary minerals at the first point of saleability by the mining establishment.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advanced release calendar

An advanced release calendar is disseminated on [www.statssa.gov.za/Publications](http://www.statssa.gov.za/Publications)

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Nelspruit  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via on-line services. For more detail about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
