## SUMMARY OF FINDINGS: MINING PRODUCTION AND MINERAL SALES

### Key findings regarding mining production as at the end of August 2008

#### Seasonally adjusted mining production decreases

The total mining production for the three months ended August 2008, after seasonal adjustment, decreased by 0,5% compared with the previous three months, after large fluctuations since the start of 2008. The three biggest contributors to the 0,5% decrease were gold (-0,7 of a percentage point), diamonds (-0,5 of a percentage point) and coal (-0,4 of a percentage point). Iron ore production was the only significant positive contributor (0,9 of a percentage point) to the mining production for the three months ended August 2008 (see Table 4).

The total mining production for the three months ended August 2008 decreased by 8,0% compared with the three months ended August 2007. The actual total mining production for August 2008 decreased by 6,2% compared with August 2007, reflected by both gold and non-gold minerals production decreasing by 23,2% and 3,5% respectively (see Table A).

### Key figures regarding mining production as at the end of August 2008

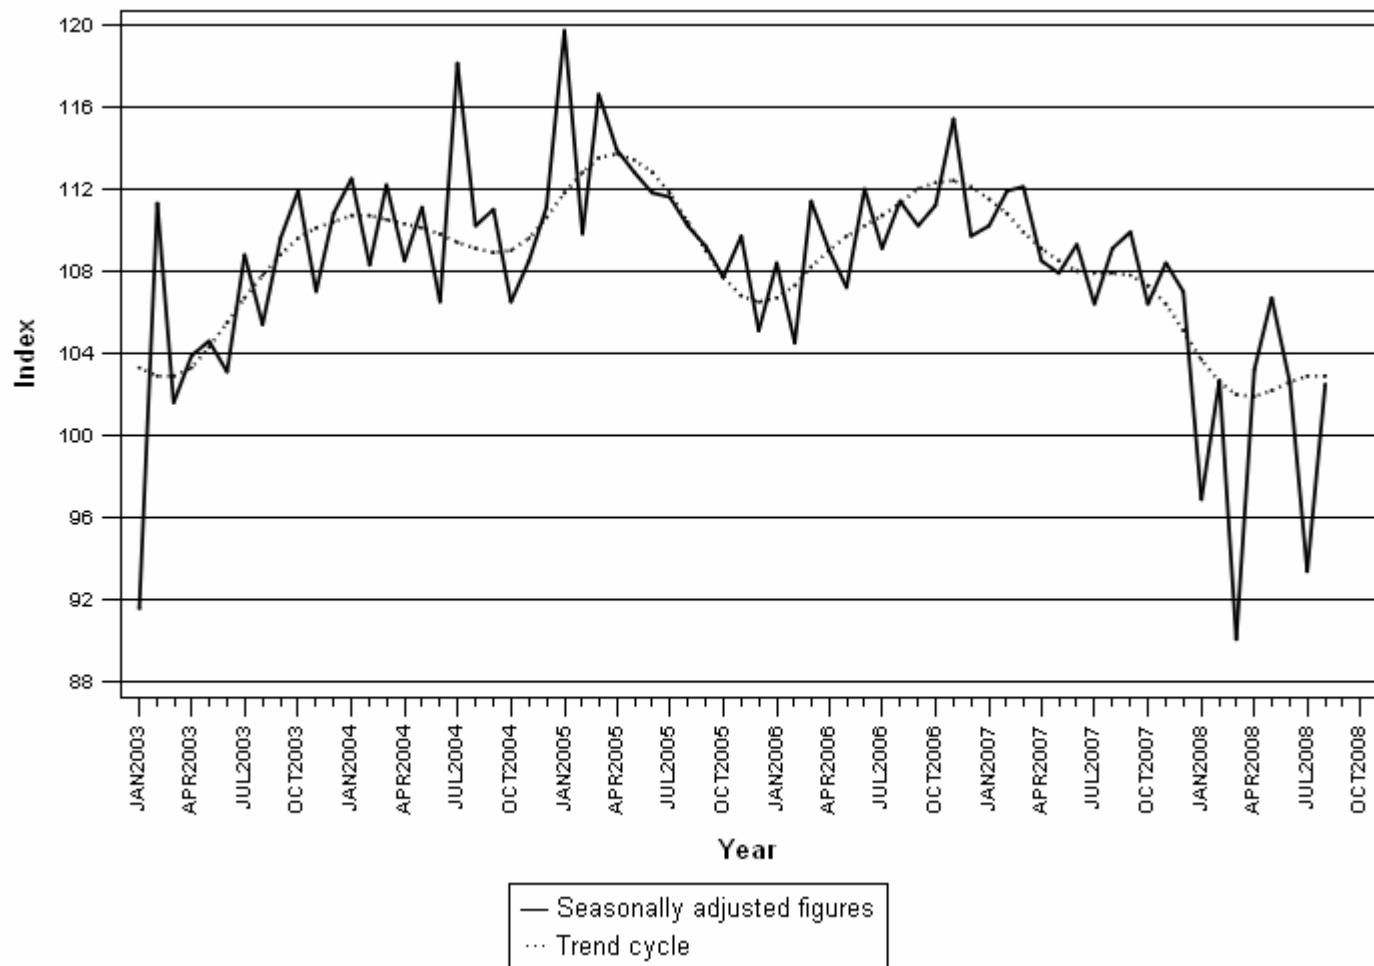

**Table A – Selected key figures regarding mining production for August 2008**

Actual estimates	Base : 2000=100		
	August 2008	% change between August 2007 and August 2008	% change between June to August 2007 and June to August 2008
<b>Index of the physical volume of mining production</b>			
<b>Gold</b>	47,6	-23,2	-17,5
<b>Non-gold</b>	127,2	-3,5	-6,5
<b>Total</b>	106,8	-6,2	-8,0

Shorter term seasonally adjusted estimates	Base : 2000=100		
	August 2008	% change between July and August 2008	% change between March to May 2008 and June to August 2008
<b>Index of the physical volume of mining production</b>			
<b>Gold</b>	45,6	-8,6	-5,6
<b>Non-gold</b>	122,1	12,5	0,3
<b>Total</b>	102,5	9,7	-0,5

Figure 1 shows the seasonally adjusted figures and trend series for the index of total mining production between January 2003 and August 2008.

**Figure 1 – Monthly indices of physical volume of total mining production (Base: 2000=100)**

## Key findings regarding mineral sales as at the end of July 2008

### Seasonally adjusted mineral sales increase

The total seasonally adjusted value of mineral sales at current prices for the three months ended July 2008 reflected an increase of 7,0% compared with the previous three months. This increase of 7,0% (R5 293,2 million) can be attributed to an increase of 7,9% (R5 059,4 million) in the sale of non-gold minerals and 2,1% (R233,8 million) in the sale of gold (see Table B and Table 16).

The actual estimated total value of mineral sales at current prices for the three months ended July 2008 increased by 48,7% compared with the three months ended July 2007. The major contributors to this increase of 48,7%, year-on-year, were PGMs (15,8 percentage points or R8 887,5 million), coal (14,1 percentage points or R7 922,7 million) and manganese ore (7,9 percentage points or R4 451,0 million) (see Table 8).

### Key figures regarding mineral sales as at the end of July 2008

**Table B – Selected key figures regarding mineral sales for July 2008**

Actual estimates	July 2008	% change between July 2007 and July 2008	% change between May to July 2007 and May to July 2008
	R million		
<b>Mineral sales</b>			
Gold	4 133,8	25,5	15,4
Non-gold	23 383,6	65,2	56,2
Total	27 517,5	57,7	48,7

Shorter term seasonally adjusted estimates	July 2008	% change between June and July 2008	% change between February to April and May to July 2008
	R million		
<b>Mineral sales</b>			
Gold	3 933,6	6,8	2,1
Non-gold	23 384,3	-1,2	7,9
Total	27 317,9	-0,1	7,0

Figure 2 shows the seasonally adjusted figures and trend series of the total value of mineral sales between January 2003 and July 2008.

**Figure 2 – Total value of mineral sales**

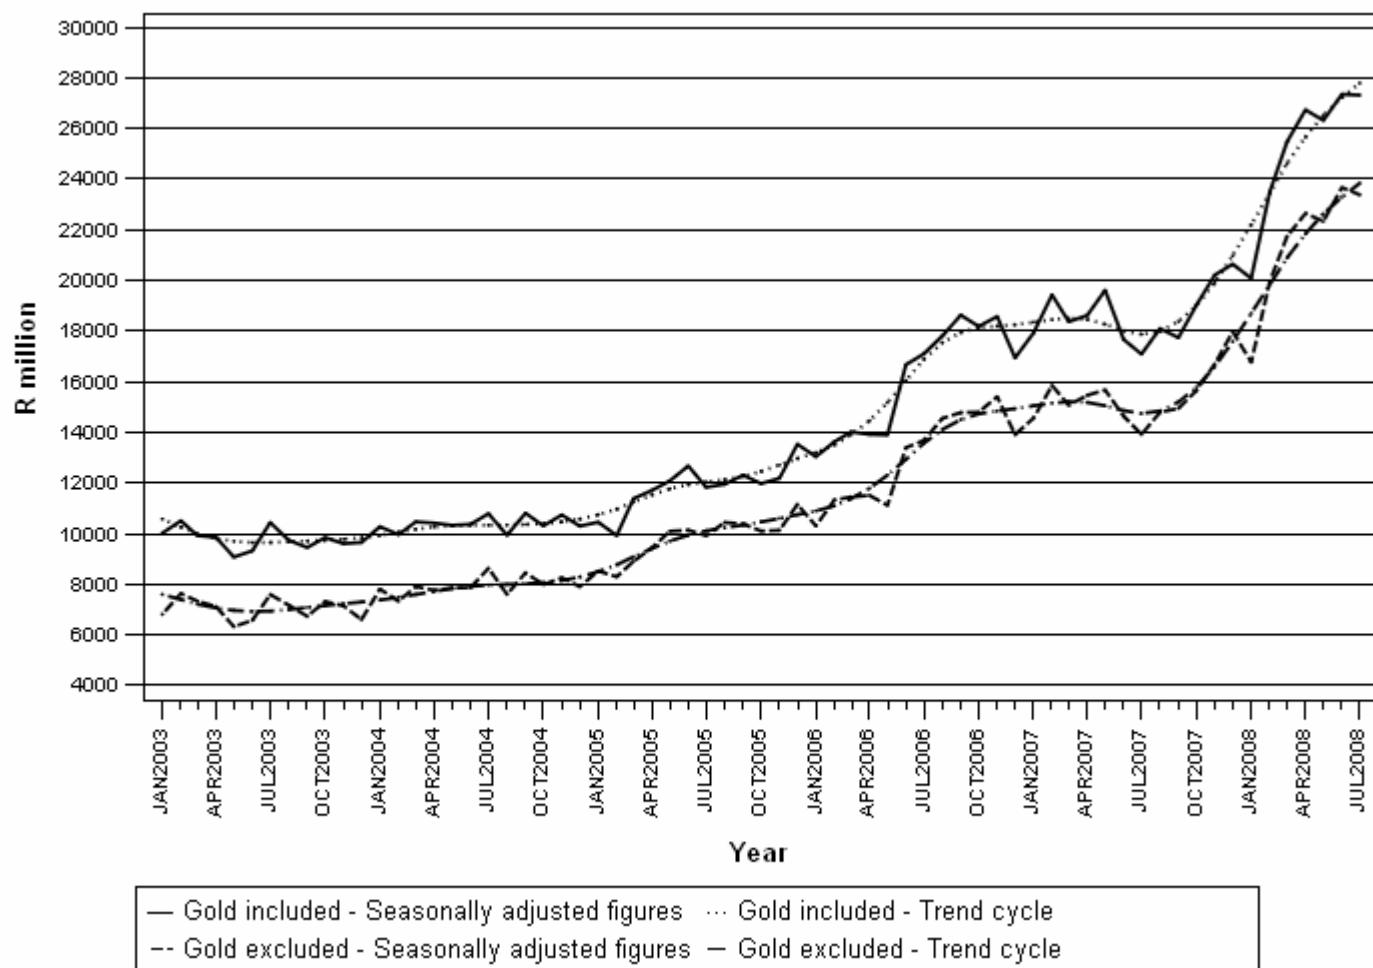

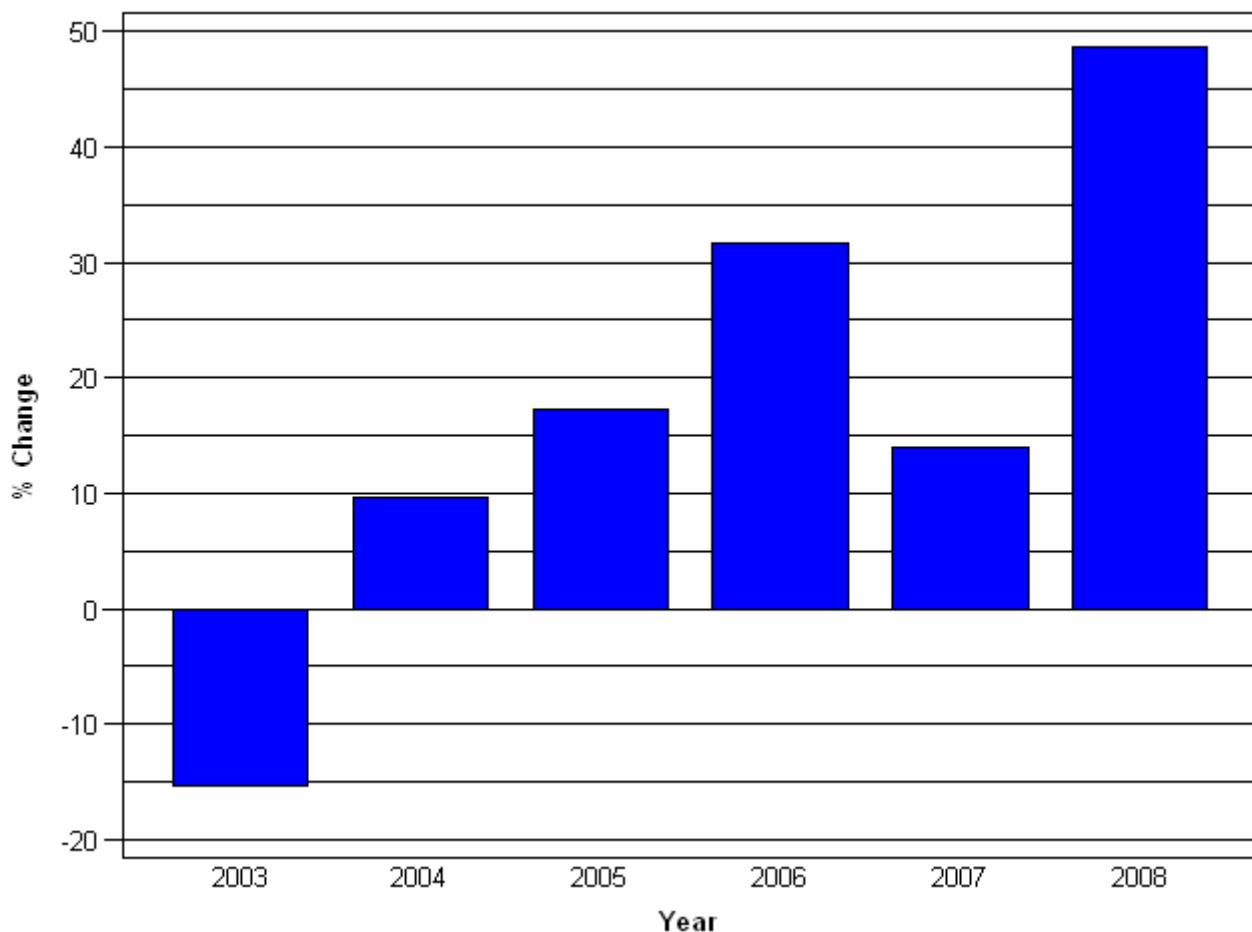

Figure 3 shows the 48,7% annual growth rate in the value of mineral sales for the three months ended July 2008. The increase for 2008 represents a higher growth rate compared to last years' growth rate (13,9%) for the same period and it is the fifth consecutive increase since 2003.

**Figure 3 – Comparison of the last six years for the total value of mineral sales, including gold, for the three months ended July compared with the three months ended July of the previous year**

1/ Preliminary.

\* Revised.

**Table 8 – Contribution of the mining divisions to the total value of mineral sales**

		Percentage contribution to total mineral sales during May to July 2007	Percentage change between May to July 2007 and May to July 2008	Contribution (percentage points) to the percentage change in the total value of mineral sales 1/	Difference in sales of mining divisions between May to July 2007 and May to July 2008
					R million
<b>Gold</b>		18,2	15,4	2,8	1 581,7
<b>Non-gold minerals</b>	<b>Iron ore</b>	5,6	56,2	3,1	1 766,6
	<b>Chromium</b>	1,3	101,4	1,3	754,1
	<b>Copper</b>	2,9	7,1	0,2	116,3
	<b>Manganese ore</b>	1,3	604,8	7,9	4 451,0
	<b>PGMs</b>	34,9	45,2	15,8	8 887,5
	<b>Nickel</b>	4,5	-35,8	-1,6	-908,5
	<b>Other metallic minerals</b>	2,6	-6,6	-0,2	-94,8
	<b>Coal</b>	18,5	76,0	14,1	7 922,7
	<b>Building materials</b>	2,8	7,8	0,2	123,1
	<b>Other non-metallic minerals</b>	7,3	69,0	5,0	2 850,3
<b>Total non-gold minerals</b>		81,8	56,2	46,0	25 868,3
<b>Total minerals</b>		100,0	48,7	48,7	27 450,2

1/ The contribution to the percentage change in sales is calculated by multiplying the quarterly percentage change of each mineral with the percentage contribution to total mineral sales during May to July 2007, divided by 100.

**Table 9 – Percentage change in the indices of mining production between the current month and the corresponding month of the previous year**

## Explanatory notes

<b>Introduction</b>	<b>1</b>	Statistics South Africa (Stats SA) publishes monthly information regarding the mining industry on the basis of mining production figures and mineral sales furnished by the Minerals Bureau, Department of Minerals and Energy. This statistical release contains detailed information regarding indices of the physical volume of mining production and the total value of mineral sales according to mining divisions and mineral groups on a monthly basis.
	<b>2</b>	In accordance with international practice, the indices have to be re-based every five years to a new base year. The base year of the index of the physical volume of mining production is currently 2000=100. Both actual and seasonally adjusted figures are presented.
	<b>3</b>	Due to mining production figures being available earlier than mineral sales figures, mining production indices are published one month earlier than mineral sales.
	<b>4</b>	The value of mineral sales is calculated, in general, on a free-on-rail/free-on-board basis.
	<b>5</b>	In order to improve timeliness, some information for the current month may have been estimated due to late response. These estimates will be revised in future statistical release(s) as soon as more up-to-date information is available.
<b>Purpose of the survey</b>	<b>6</b>	The monthly mining production and sales survey is conducted by the Minerals Bureau, covering all mining establishments operating in the South African economy. The results of this survey are used to calculate physical volume of mining production indices in order to estimate the gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy.
<b>Scope of the survey</b>	<b>7</b>	This survey covers mining establishments conducting activities regarding <ul style="list-style-type: none"> <li>• The extracting, dressing and beneficiating of minerals occurring naturally, for example solids such as coal and ores.</li> </ul>
<b>Classification</b>	<b>8</b>	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities (ISIC)</i> with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division, major group and subgroup level. Each statistical unit is classified to an industry which reflects the predominant activity of the establishment.
<b>Statistical unit</b>	<b>9</b>	The basic statistical unit for the collection of information is the mining establishment. An establishment is the smallest economic unit that functions as a separate entity. Each statistical unit is classified to an industry (see paragraph 8).
<b>Weighting</b>	<b>10</b>	The weights which are used to aggregate minerals to mineral groups and mineral groups to total mining are based on the value of production derived from detailed information for 2000 supplied by the Minerals Bureau, Department of Minerals and Energy.

<b>Seasonal adjustment</b>	<b>11</b>	Seasonally adjusted estimates of all items are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.
		Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.
<b>Reliability of estimates</b>	<b>12</b>	Estimates are subject to sampling and non-sampling errors. Figures for the latest month are preliminary.
<b>Historical data</b>	<b>13</b>	More comprehensive detail on the method of calculation and historical data in respect of the production indices according to mining mineral groups for the period February 1990 to November 2002 is available in statistical release P2041.1, entitled <i>Mining statistics: Indices of the physical volume of mining production, Base: 2000=100, February 1990 to November 2002</i> , published on 11 February 2003 on the Stats SA website: <a href="http://www.statssa.gov.za">www.statssa.gov.za</a>
<b>Related publications</b>	<b>14</b>	<p>Users may also wish to refer to the following publications which are available from Stats SA -</p> <ul style="list-style-type: none"> <li>• <i>Bulletin of Statistics</i>.</li> <li>• <i>SA Statistics</i>.</li> </ul>
<b>Unpublished statistics</b>	<b>15</b>	In some cases Stats SA can also make available statistics not included in standard publications. The statistics can be made available via computer printouts or diskette or CD. Generally, a charge is made for providing unpublished statistics.
<b>Rounding-off of figures</b>	<b>16</b>	The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

## Glossary

<b>Free-on-rail</b>	Free-on-rail relates to goods sold on the local market where no railage or road transport costs are involved.
<b>Free-on-board basis</b>	Free-on-board relates to goods destined for the export market. Railage, road transport and docking charges are involved but no charges are made for the transport by sea.
<b>Index of physical volume of mining production</b>	The index of physical volume of mining production or a production index is a statistical measure of the change in the volume of production. The production index of a mineral group is the ratio between the volume of production of a mineral group in a given period and the volume of production of the same mineral group in the base period. The current base period is 2000. The production in the base period is set at 100.
<b>Industry</b>	An industry consists of a group of establishments engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification (SIC) of all Economic Activities</i> , Fifth Edition of January 1993.
<b>PGMs - Platinum Group Metals</b>	Platinum Group Metals include platinum; iridium; osmiridium; palladium; rhodium; ruthenium and osmium.
<b>Sales</b>	Sales are the total value of sales and transfers-out of goods mined by the mining establishments and the amounts received for installation, erection or assembly or other services rendered.
<b>Weight</b>	The weight of a mineral group is the ratio of the sales of a mineral group to the total sales of the mining industry. The weight of a mineral group reflects the importance of the mineral group in the total mining industry. The weights change over time due to quality changes and changes in relative prices. New weights need to be calculated from time to time.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

### Advanced release calendar

An advanced release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za)

### Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Nelspruit  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

### Electronic services

A large range of data is available via on-line services, diskette, CD and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/8496/4892/8095.

You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
