SUMMARY OF FINDINGS: MINING PRODUCTION AND MINERAL SALES

Key findings regarding mining production for 2007

Mining production for 2007 decreases

The index of total mining production was 0,2% lower in 2007 compared with 2006. The 0,2% drop in annual mining production followed a 1,5% decline in 2006 and a 1,3% rise in 2005.

The major contributors to the annual decrease of 0,2% in 2007 were gold (-1,0 percentage point), other non-metallic minerals (-0,3 of a percentage point), nickel and other metallic minerals (-0,2 of a percentage point each). However, the platinum group metals (PGMs) and the building materials group reported positive contributions of 0,4 and 0,3 of a percentage point respectively (see Table A and Table A.1).

Furthermore, total mining production for the fourth quarter of 2007, after seasonal adjustment, decreased by 0,7% compared with the previous quarter. The major contributors to this decrease of 0,7% in total mining were the decrease in the production of diamonds (-0,9 of a percentage point) and gold (-0,8 of a percentage point). However PGMs reported a positive contribution of 0,5 of a percentage point (see Table 4).

Key figures regarding mining production for 2007

Table A – Selected key figures regarding mining production for 2007

Actual estimates	Base : 2000=100			
	December 2007	% change between December 2006 and December 2007	% change between October 2006 to December 2006 and October 2007 to December 2007	% change between January 2006 to December 2006 and January 2007 to December 2007

Non-gold	128,1	-0,4	0,1
Total	109,6	0,3	-0,7

Table A.1 – Contribution of the mining divisions, mineral groups and minerals to total mining production

		Base : 2000=100				
		Weights	Jan. to Dec. 2006	Jan. to Dec. 2007	Annual percentage change between 2006 and 2007	Contribution (percentage points) to the percentage change in total mining production 1/
Gold		25,7	62,9	58,8	-6,5	-1,0
Non-gold minerals	Iron ore	3,1	122,1	122,8	0,5	0,0
	Chromium	1,1	111,4	145,3	30,4	0,3
	Copper	1,6	80,8	85,9	6,3	0,1
	Manganese ore	1,3	143,0	162,9	13,9	0,2
	PGMs	27,6	148,7	150,3	1,1	0,4
	Nickel	2,0	114,0	101,9	-10,6	-0,2
	Other metallic minerals	2,9	92,2	83,0	-10,0	-0,2
	Diamonds	8,4	137,6	137,2	-0,2	0,0
	Coal	20,0	108,6	109,4	0,8	0,2
	Building materials	2,6	128,2	139,8	9,1	0,3
	Other non-metallic minerals	3,8	84,6	74,8	-11,6	-0,3
Total non-gold minerals		74,3	126,3	127,3	0,8	0,7
Total minerals		100	110,0	109,7	-0,2	-0,2

1/ The annual contribution of a mineral or mineral group to total mining production is calculated by multiplying the weight of the mineral or mineral group with the change in the index for the mineral or mineral group and dividing by the total index for the previous period. Figures have been rounded off.

Figure 1 shows the seasonally adjusted figures and trend series for the index of mining production between January 2003 and December 2007. The trend series rose from the beginning of 2003 until February 2004, but levelled off until November of the same year. The trend reached a peak in April 2005 and a trough in January 2006. From February 2006 the trend increased until November 2006 but started to decline thereafter.

Figure 1 – Monthly indices of physical volume of total mining production including gold (Base: 2000=100)

Key findings regarding mineral sales as at the end of November 2007

Mineral sales increase

The total seasonally adjusted value of mineral sales at current prices for the three months ended November 2007 reflected an increase of 3,4% compared with the preceding three months. This increase of 3,4% (R1 845,6 million) can be attributed to an increase of 3,8% (R1 657,2 million) in the sales of non-gold minerals and an increase of 2,0% (R188,4 million) in the sales of gold (see Table B and Table 16).

The total actual value of mineral sales at current prices for the three months ended November 2007 increased by 0,4% compared with the three months ended November 2006. The major contributors to the increase of 0,4% year on year in the actual value of mineral sales at current prices were coal (1,5 percentage points or R834,8 million) and iron ore (1,2 percentage points or R668,4 million) (see Table 8).

Key figures regarding mineral sales as at the end of November 2007

Table B – Selected key figures regarding mineral sales for November 2007

Actual estimates	November 2007	% change between November 2006 and November 2007	% change between September 2006 to November 2006 and September 2007 to November 2007
	R million		
Mineral sales			
Gold	3 544,4	13,0	-7,8
Non-gold	16 719,4	5,9	2,3
Total	20 263,8	7,1	0,4

Shorter term seasonally adjusted estimates	November 2007	% change between October 2007 and November 2007	% change between June 2007 to August 2007 and September 2007 to November 2007
	R million		
Mineral sales			
Gold	3 621,5	7,1	2,0
Non-gold	16 037,3	9,8	3,8
Total	19 658,8	9,3	3,4

Figure 2 shows the seasonally adjusted figures and trend series of the total value of mineral sales between January 2003 and November 2007. From January 2003 the trend decreased until August 2003. The trend series rose from September 2003 until March 2007. From September 2007 the trend cycle has been moving sideways after a short period of decrease.

Figure 2 – Total value of mineral sales including gold at current prices

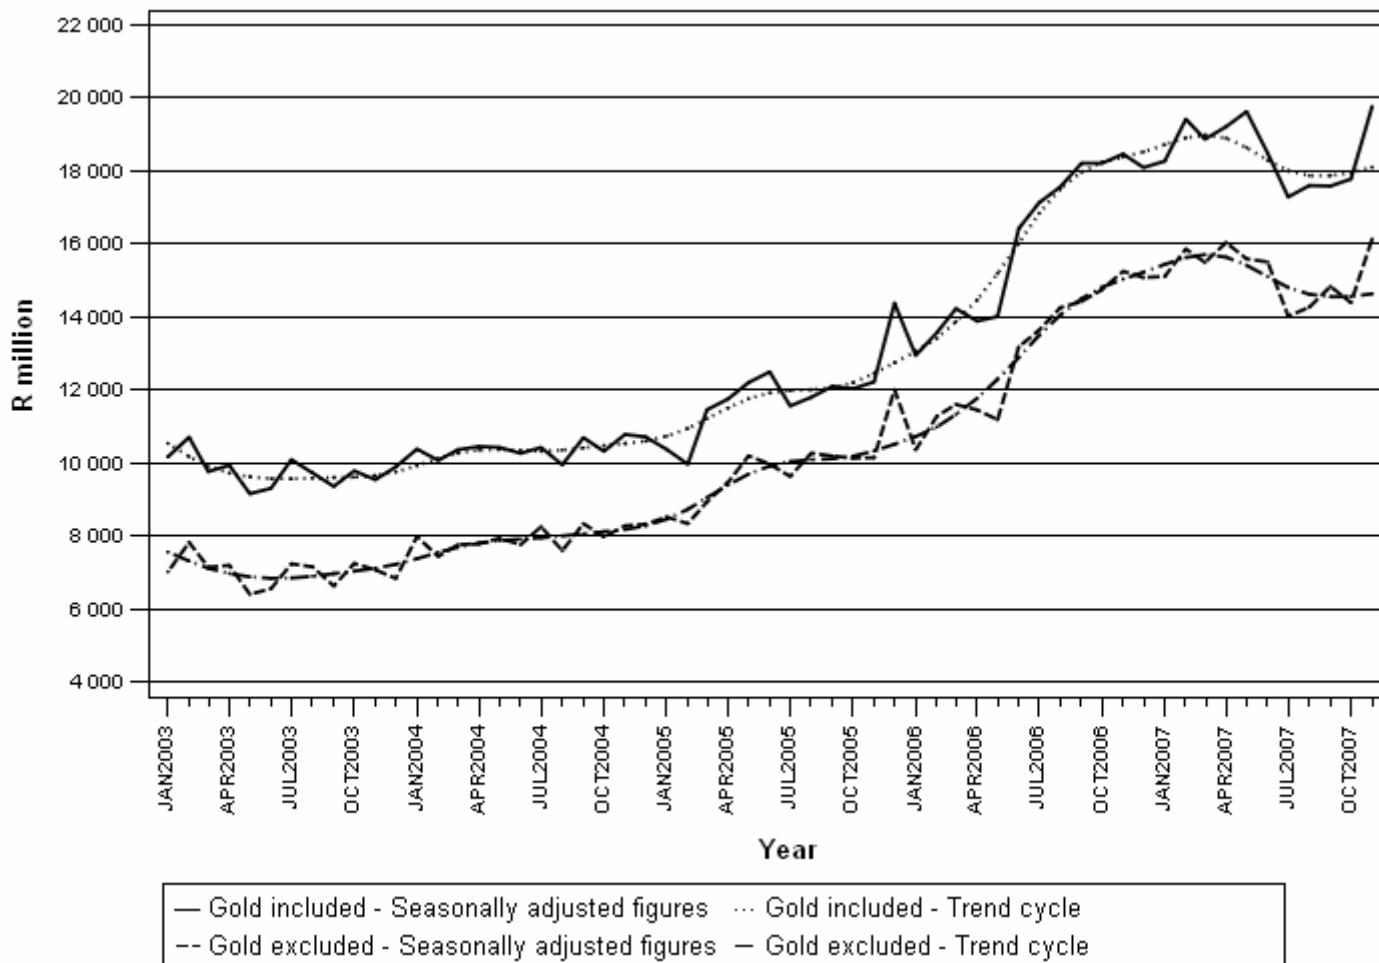

Figure 3 – Comparison of the last six years for the total value of mineral sales, including gold, for the three months ended November compared with the three months ended November of the previous year.

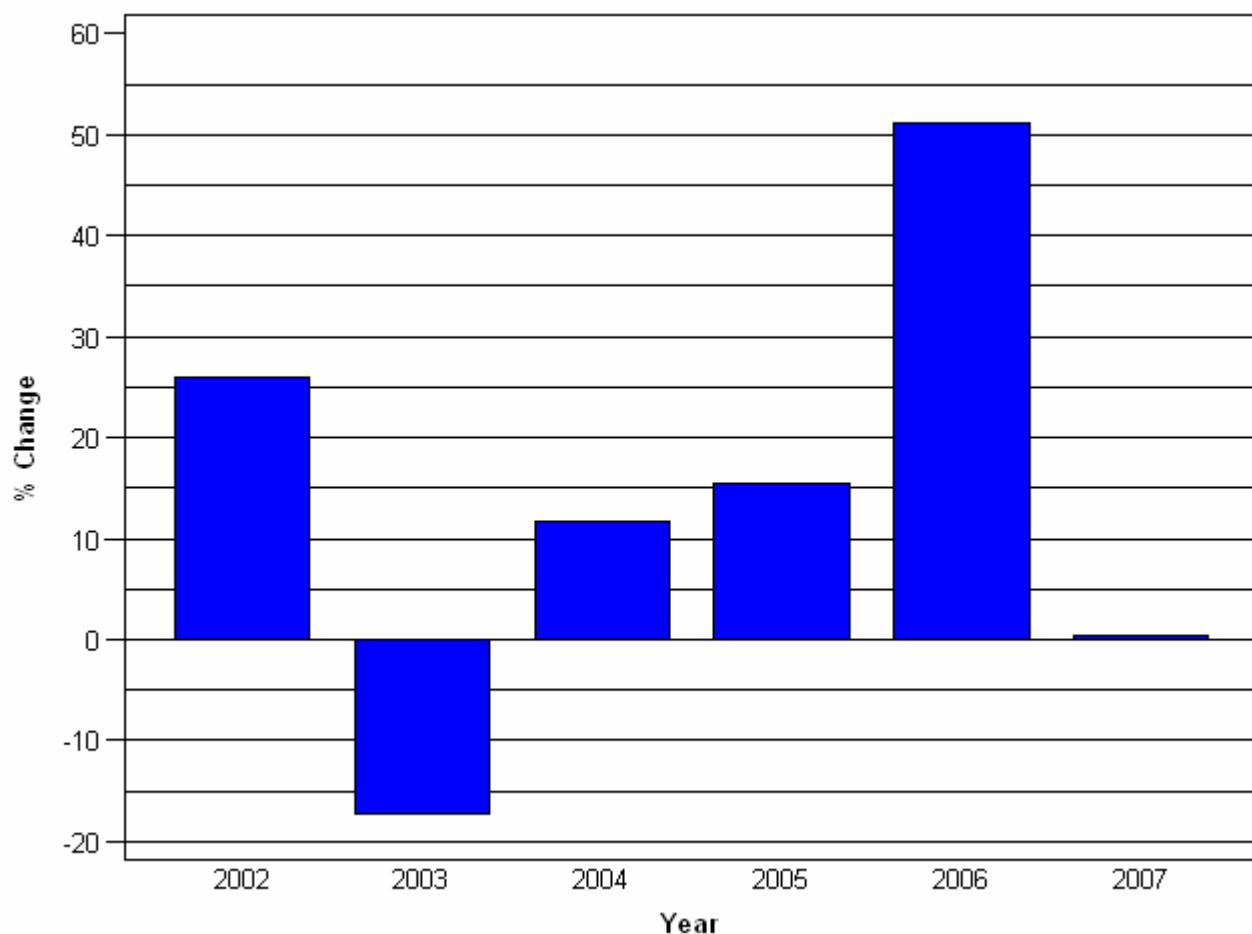

Figure 3 shows the 0,4% annual growth rate in the value of mineral sales for the three months ended November 2007. From 2004 this specific quarter grew quite significantly with a peak growth rate during the three months ended November 2006 (51,2%).

* Revised.

Table 4 – Contribution of the mining divisions, mineral groups and minerals to total mining production (seasonally adjusted)

		Base : 2000=100			
		Percentage contribution to total mining production using the weights according to the value of production in the base year	Average seasonally adjusted production index for October 2007 to December 2007	Quarterly percentage change October 2007 to December 2007 compared with the preceding three months	Contribution (percentage points) to the percentage change in total mining production 1/
Gold		25,7	55,8	-5,7	-0,8
Non-gold minerals	Iron ore	3,1	121,2	-0,7	0,0
	Chromium	1,1	143,2	-1,7	0,0
	Copper	1,6	86,8	1,2	0,0
	Manganese ore	1,3	166,9	2,9	0,1
	PGMs	27,6	153,0	1,3	0,5
	Nickel	2,0	102,7	4,9	0,1
	Other metallic minerals	2,9	87,8	6,2	0,1
	Diamonds	8,3	133,8	-7,9	-0,9
	Coal	20,0	106,4	-0,6	-0,1
	Building materials	2,6	149,6	8,3	0,3
Total non-gold minerals		74,3	127,4	0,1	0,1
Total minerals		100,0	109,0	-0,7	-0,7

1/ The quarterly contribution of a mineral or mineral group to total seasonally adjusted mining production is calculated by multiplying the weight of the mineral or mineral group with the change in the index for the mineral or mineral group and dividing by the total index for the previous period. Figures have been rounded off.

1/ Preliminary.

* Revised.

Table 8 – Contribution of the mining divisions, mineral groups and minerals to the total value of mineral sales

		Percentage contribution to total mineral sales during September 2006 to November 2006	Percentage change between September 2006 to November 2006 and September 2007 to November 2007	Contribution (percentage points) to the percentage change in the total value of mineral sales 1/	Difference in sales of mining divisions between September 2006 to November 2006 and September 2007 to November 2007
					R million
Gold		18,7	-7,8	-1,5	-841,0
Non-gold minerals	Iron ore	4,9	23,9	1,2	668,4
	Chromium	1,1	27,2	0,3	174,3
	Copper	2,7	5,1	0,1	79,4
	Manganese ore	1,0	73,9	0,7	417,6
	PGMs	34,5	-1,6	-0,6	-314,6
	Nickel	4,5	-42,7	-1,9	-1 103,4
	Other metallic minerals	2,9	-19,6	-0,6	-329,9
	Coal	18,7	7,8	1,5	834,8
	Building materials	2,5	13,4	0,3	194,5
	Other non-metallic minerals	8,4	9,4	0,8	453,7
Total non-gold minerals		81,3	2,3	1,9	1 074,8
Total minerals		100,0	0,4	0,4	233,7

1/ The contribution to the percentage change in sales is calculated by multiplying the quarterly percentage change of each mineral with the percentage contribution to total mineral sales during September 2006 to November 2006, divided by 100.

Explanatory notes

Introduction	1	Statistics South Africa (Stats SA) publishes monthly information regarding the mining industry on the basis of mining production figures and mineral sales furnished by the Minerals Bureau, Department of Minerals and Energy. This statistical release contains detailed information regarding indices of the physical volume of mining production and the total value of mineral sales according to mining divisions and mineral groups on a monthly basis.
	2	In accordance with international practice, the indices have to be re-based every five years to a new base year. The base year of the index of the physical volume of mining production is currently 2000=100. Both actual and seasonally adjusted figures are presented.
	3	Due to mining production figures being available earlier than mineral sales figures, mining production indices are published one month earlier than mineral sales.
	4	The value of mineral sales is calculated, in general, on a free-on-rail/free-on-board basis.
	5	In order to improve timeliness, some information for the current month may have been estimated due to late response. These estimates will be revised in future statistical release(s) as soon as more up-to-date information is available.
Purpose of the survey	6	The monthly mining production and sales survey is conducted by the Minerals Bureau, covering all mining establishments operating in the South African economy. The results of this survey are used to calculate physical volume of mining production indices in order to estimate the gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy.
Scope of the survey	7	This survey covers mining establishments conducting activities regarding <ul style="list-style-type: none"> • The extracting, dressing and beneficiating of minerals occurring naturally, for example solids such as coal and ores.
Classification	8	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities (ISIC)</i> with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division, major group and subgroup level. Each statistical unit is classified to an industry which reflects the predominant activity of the establishment.
Statistical unit	9	The basic statistical unit for the collection of information is the mining establishment. An establishment is the smallest economic unit that functions as a separate entity. Each statistical unit is classified to an industry (see paragraph 8).
Weighting	10	The weights which are used to aggregate minerals to mineral groups and mineral groups to total mining are based on the value of production derived from detailed information for 2000 supplied by the Minerals Bureau, Department of Minerals and Energy.

Seasonal adjustment	11	Seasonally adjusted estimates of all items are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.
		Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.
Reliability of estimates	12	Estimates are subject to sampling and non-sampling errors. Figures for the latest month are preliminary.
Historical data	13	More comprehensive detail on the method of calculation and historical data in respect of the production indices according to mining mineral groups for the period February 1990 to November 2002 is available in statistical release P2041.1, entitled <i>Mining statistics: Indices of the physical volume of mining production, Base: 2000=100, February 1990 to November 2002</i> , published on 11 February 2003 on the Stats SA website: www.statssa.gov.za
Related publications	14	Users may also wish to refer to the following publications which are available from Stats SA - <ul style="list-style-type: none">• <i>Bulletin of Statistics</i>.• <i>SA Statistics</i>.
Unpublished statistics	15	In some cases Stats SA can also make available statistics not included in standard publications. The statistics can be made available via computer printouts or diskette or CD. Generally, a charge is made for providing unpublished statistics.
Rounding-off of figures	16	The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

Glossary

Free-on-rail	Free-on-rail relates to goods sold on the local market where no railage or road transport costs are involved.
Free-on-board basis	Free-on-board relates to goods destined for the export market. Railage, road transport and docking charges are involved but no charges are made for the transport by sea.
Index of physical volume of mining production	The index of physical volume of mining production or a production index is a statistical measure of the change in the volume of production. The production index of a mineral group is the ratio between the volume of production of a mineral group in a given period and the volume of production of the same mineral group in the base period. The current base period is 2000. The production in the base period is set at 100.
Industry	An industry consists of a group of establishments engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification (SIC) of all Economic Activities</i> , Fifth Edition of January 1993.
PGMs - Platinum Group Metals	Platinum Group Metals include platinum; iridium; osmiridium; palladium; rhodium; ruthenium and osmium.
Sales	Sales are the total value of sales and transfers-out of goods mined by the mining establishments and the amounts received for installation, erection or assembly or other services rendered.
Weight	The weight of a mineral group is the ratio of the sales of a mineral group to the total sales of the mining industry. The weight of a mineral group reflects the importance of the mineral group in the total mining industry. The weights change over time due to quality changes and changes in relative prices. New weights need to be calculated from time to time.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages.

Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advanced release calendar

An advanced release calendar is disseminated on www.statssa.gov.za

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via on-line services, diskette, CD and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/8496/4892/8095.
