95,1	+2,3%	+0,2%		

# Key findings regarding mining production as at the end of July 2002

# Mining production increases

Total mining production for the three months ended July 2002 after seasonal adjustment reflected an increase of 0,2% compared with the previous three months. However, the total mining production for the first seven months of 2002 decreased by 1,0% compared with the first seven months of 2001.

The increase of 0,2% after seasonal adjustment in the total mining production was due to a seasonally adjusted increase of 0,4% in the production of non-gold minerals during the three months ended July 2002 compared with the previous three months. The major contributors to the seasonally adjusted increase of 0,4% in the production of non-gold minerals were coal, copper and diamond mines.

The decrease of 1,0% in the total mining production for the first seven months of 2002 compared with the first seven months of 2001 was due to a decrease of 1,1% in the production of non-gold minerals and 0,8% in gold production during the above-mentioned period.

# Key figures regarding mineral sales as at the end of June 2002

Actual estimates	June 2002 R million	% change between June 2001 and June 2002	% change between April 2001 to June 2001 and April 2002 to June 2002	% change between January 2001 to June 2001 and January 2002 to June 2002
Mineral sales				
Gold	3 578,3	+49,4%	+60,8%	+61,5%
Non-gold minerals	8 096,6	-1,5%	+12,1%	+12,3%
Total	11 674,9	+10,0%	+23,5%	+23,8%

Seasonally adjusted estimates	June 2002 R million	% change between May 2002 and June 2002	% change between January 2002 to March 2002 and April 2002 to June 2002
Mineral sales			
Gold	3 474,0	-5,2%	+14,3%
Non-gold minerals	7 853,6	-6,0%	+2,8%
Total	11 327,6	-5,8%	+6,2%

# Key findings regarding mineral sales as at the end of June 2002

# Mineral sales increases

The seasonally adjusted value of mineral sales at current prices for the second quarter of 2002 reflected an increase of 6,2% compared with the first quarter of 2002. Furthermore, the actual value of mineral sales at current prices for the second quarter of 2002 reflected an increase of 23,5% compared with the second quarter of 2001.

The increase of 6,2% in the seasonally adjusted value of mineral sales for the second quarter of 2002 compared with the first quarter of 2002 can mainly be attributed to an increase of 14,3% (+R1439,6 million) in sales of gold and 2,8% (+R661,6 million) in non-gold mineral sales.

The 23,5% increase in the actual value of mineral sales at current prices for the second quarter of 2002 compared with the second quarter of 2001 was mainly due to an increase of 60,8% (+R4 096,9 million) in sales of gold and 12,1% (+R2 674,6 million) in non-gold mineral sales. The increase of 12,1% in non-gold mineral sales was mainly due to increases of 67,6% (+R595,2 million) in sales of iron ore, 50,3% (+R401,1 million) in sales of 'other' metallic minerals, 28,3%(+R131,6 million) in sales of nickel, and 26,8% (+R1 682,8 million) in sales of coal.

Table A - Contribution by the different mining divisions to the total mineral sales.

Mining division	Percentage contribution to mineral sales during April 2001 to June 2001	Quarterly percentage change between April 2001 to June 2001 and April 2002 to June 2002	Contribution (percentage points) to the percentage change in the sales 1/	Difference in total mineral sales between April 2001 to June 2001 and April 2002 to June 2002 R million
Gold	23,4	60,8	14,2	4 096,9
Non-gold minerals				
Iron ore	3,1	67,6	2,1	595,2
Copper	1,6	14,8	0,2	67,8
Manganese ore	1,2	-1,6	0,0	-5,6
Chromium	1,0	-13,4	-0,1	-37,4
Platinum	31,5	-8,2	-2,6	-741,8
Nickel	1,6	28,3	0,5	131,6
Other metallic minerals	2,8	50,3	1,4	401,1
Coal	21,8	26,8	5,8	1 682,8
Building materials	2,5	9,4	0,2	67,0
Other non-metallic	9,5	18,3	1,8	513,9
Total non-gold minerals	76,6	12,1	9,3	2 674,6
<b>Total minerals</b>	100,0	23,5	23,5	6 771,5

The contribution to the percentage change in sales is calculated by multiplying the quarterly percentage change of each mineral with the percentage contribution to total mineral sales during April 2001 to June 2001, divided by 100.

Purpose of the survey	sample of mining establis survey are used to calc	duction and sales survey is a country-wide sample survey covering a shments operating in the South African economy. The results of this ulate physical volume of mining production indices in order to stic product (GDP) and its components, which in turn are used to rernment policy.
Additional info	rmation	
<b>Explanatory notes</b>		
Introduction	industry covering release contains of mining production	frica (Stats SA) publishes monthly information regarding the mining a sample of mining establishments (branches). This statistical detailed information regarding indices of the physical volume of a and the total value of mineral sales according to mining divisions on a monthly basis.
	basis of mining	e tables are compiled by Statistics South Africa (Stats SA) on the production figures and mineral sales furnished by the Minerals ent of Minerals and Energy.
		oduction figures being available earlier than mineral sales figures, indices are published one month earlier than mineral sales.
	The value of min basis.	eral sales is calculated, in general, on a free-on-rail/free-on-board
	been estimated d	ove timeliness, some information for the current month may have ue to late response. These estimates will be revised in future s) as soon as more up-to-date information is available.
Scope of the survey	6 This survey covers	s mining establishments conducting activities regarding -
	• the extracting example solids such as	, dressing and beneficiating of minerals occurring naturally, for coal and ores.
Classification	(SIC), Fifth Edition the survey. The Classification of a conditions. Statis	of the Standard Industrial Classification of all Economic Activities on, Report No. 09-90-02, was used to classify the statistical units in e SIC is based on the 1990 International Standard Industrial all Economic Activities (ISIC) with suitable adaptations for local stics in this publication are presented at SIC division, major group

Statistical unit

The basic statistical unit for the collection of information is the mining establishment. An establishment is the smallest economic unit that functions as a separate entity. Each statistical unit is classified to an industry (cf. paragraph 7).

predominant activity of the establishment (branch).

and subgroup level. Each statistical unit is classified to an industry which reflects the

#### Weighting

9

10

11

14

15

The weights which are used to aggregate minerals to mineral groups and mineral groups to total mining, are based on the value of production derived from detailed information for 1995 supplied by the Minerals Bureau, Department of Minerals and Energy.

#### Rebasing

In accordance with international practice, the indices have to be rebased every five years to a new base year. The indices in this statistical release have been calculated on the basis of 1995=100. The first results on this basis were published in May 1998. Both actual and seasonally adjusted figures are presented.

#### Seasonal adjustment

Seasonally adjusted estimates of all items are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.

Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.

#### **Reliability of estimates**

Estimates are subject to sampling and non-sampling errors. Figures for the latest month are preliminary.

#### **Related publications**

Users may also wish to refer to the following publications which are available from Stats SA -

- Bulletin of Statistics.
- SA Statistics.

# **Unpublished statistics**

In some cases Stats SA can also make available statistics which are not published. The statistics can be made available via: computer printouts or diskette or CD. Generally a charge is made for providing unpublished statistics.

#### **Rounding-off of figures**

The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

Glossary

Enterprise An enterprise (firm) is a legal entity consisting of one or more establishments (branches).

The establishments need not necessarily all be mining establishments, but some may be classifiable as other industries of the economy, such as manufacturing, wholesale trade, retail

trade, motor trade and construction.

**Establishment** An establishment is defined as an enterprise, or part of an enterprise, that is situated at a

single location and in which only a single (non-ancillary) productive activity is carried out or

in which the principal productive activity accounts for most of the value added.

Free-on-rail Free-on-rail relates to goods sold on the local market where no railage or road transport costs

are involved.

Free-on-board basis Free-on-board relates to goods destined for the export market. Railage, road transport and

docking charges are involved but no charges are made for the transport by sea.

Index of physical volume of mining production

The index of physical volume of mining production or a production index is a statistical measure of the change in the volume of production. The production index of a major group is the ratio between the volume of production of a major group in a given period and the volume of production of the same major group in the base period. The current base period is

1995. The production in the base period is set at 100.

**Industry** An industry consists of a group of establishments engaged in the same or similar kinds of

economic activity. Industries are defined in the System of National Accounts (SNA) in the same way as in the Standard Industrial Classification (SIC) of all Economic Activities, Fifth

Edition of May 1993.

Sales Sales are the total value of sales and transfers-out of goods mined by the mining

establishments and the amounts received for installation, erection or assembly or other

services rendered.

Weight The weight of a major group is the ratio of the production of a major group to the total

production of the mining industry. The weight of a major group reflects the importance of the major group in the total mining industry. The weights change over time due to quality changes and changes in relative prices. New weights need to be calculated from time to

time.

#### For more information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

#### Advanced release calendar

An advanced release calendar is disseminated on http://www.statssa.gov.za

#### **Stats SA products**

A complete set of Stats SA publications is available in the Stats SA Library, and in the following public libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Pietersburg
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

#### **Electronic services**

A large range of data are available via on-line services, diskette, CD and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/4892/8496/8095.
