## SUMMARY OF FINDINGS: MINING PRODUCTION AND MINERAL SALES

### Key findings regarding mining production for May 2009

#### Seasonally adjusted mining production decreases

The total mining production for the three months ended May 2009, after seasonal adjustment, decreased by 1,5% compared with the previous three months. PGM (platinum group metal) production was the main contributor (-1,5 percentage points) to the 1,5% decrease (see Table 4).

The total mining production for the three months ended May 2009 decreased by 9,8% compared with the three months ended May 2008. Mining production for May 2009 decreased by 14,5% compared with May 2008, reflected by gold and non-gold minerals production decreasing by 10,5% and 15,1% respectively (see Table A).

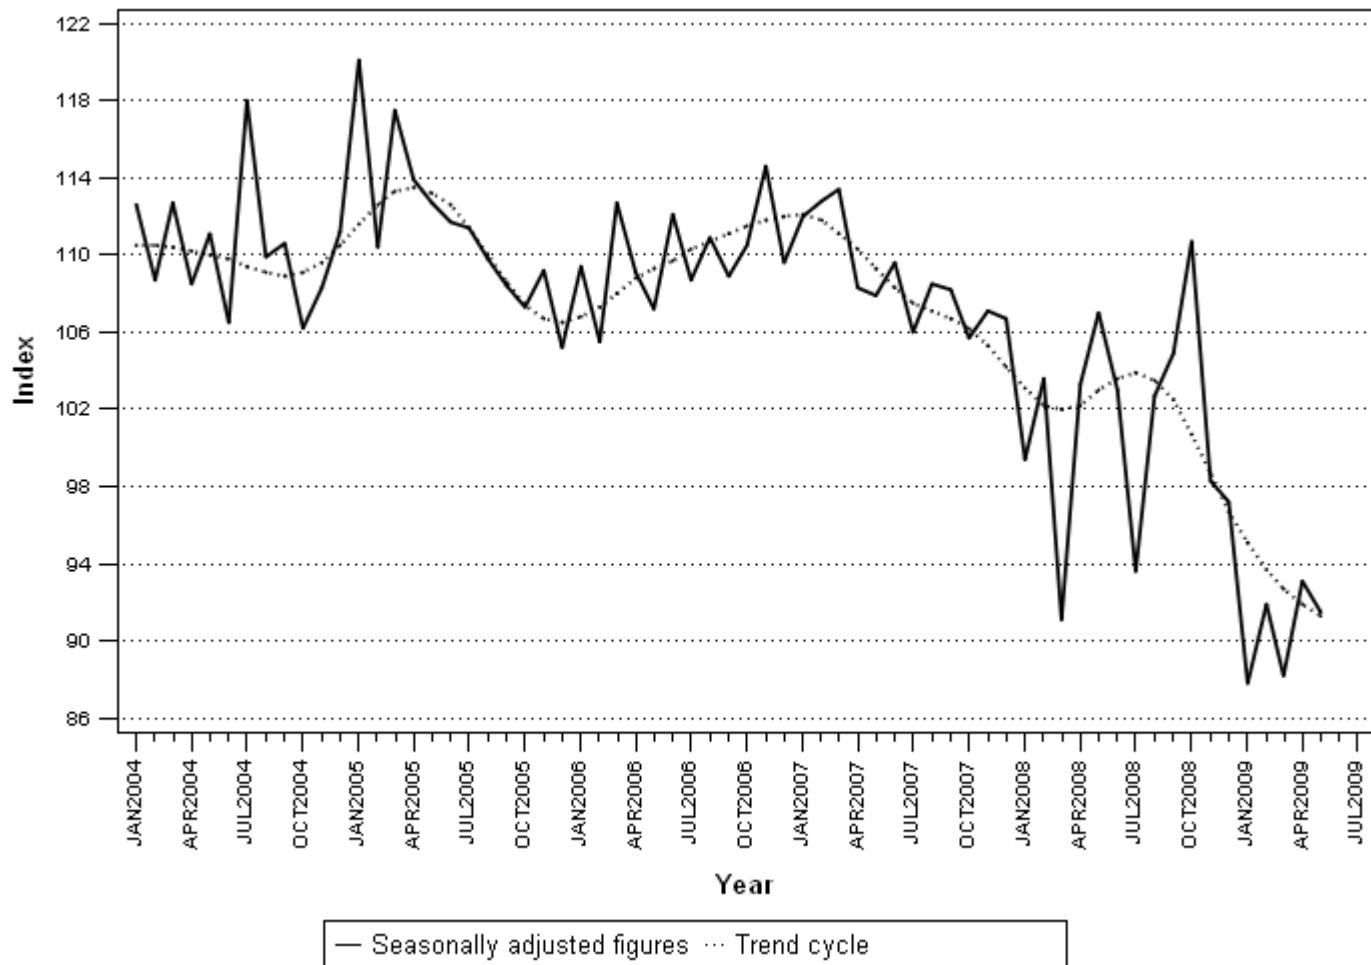

**Table A – Selected key figures regarding mining production for May 2009**

Actual estimates	Base : 2000=100		
	May 2009	% change between May 2008 and May 2009	% change between March to May 2008 and March to May 2009
<b>Index of the physical volume of mining production</b>			
<b>Gold</b>	45,8	-10,5	-10,2
<b>Non-gold</b>	109,1	-15,1	-9,7
<b>Total</b>	92,8	-14,5	-9,8

Shorter term seasonally adjusted estimates	Base : 2000=100		
	May 2009	% change between April and May 2009	% change between December 2008 to February 2009 and March to May 2009
<b>Index of the physical volume of mining production</b>			
<b>Gold</b>	46,3	1,5	-1,7
<b>Non-gold</b>	107,1	-2,2	-1,5
<b>Total</b>	91,5	-1,7	-1,5

Figure 1 shows the seasonally adjusted figures and trend series for the index of total mining production between January 2004 and May 2009.

**Figure 1 – Monthly indices of physical volume of total mining production (Base: 2000=100)**

## Key findings regarding mineral sales for April 2009

### Seasonally adjusted mineral sales decrease

The total seasonally adjusted value of mineral sales at current prices for the three months ended April 2009 reflected a decrease of 1,0% compared with the previous three months. This decrease of 1,0% (R630,5 million) was a result of a decrease of 4,8% (R2 474,8 million) in the sale of non-gold minerals (see Table B and Table 16).

The actual estimated total value of mineral sales at current prices for the three months ended April 2009 decreased by 15,5% compared with the three months ended April 2008. The major contributors to this decrease of 15,5%, year-on-year, were PGMs (-12,8 percentage points or R9 363,0 million), manganese ore (-3,9 percentage points or R2 881,3 million), other non-metallic minerals (-1,9 percentage points or R1 373,8 million) and copper (-1,2 percentage points or R835,2 million). The two minerals that made substantial positive contributions to the change were iron ore (4,4 percentage points or R3 178,2 million) and gold (3,1 percentage points or R2 261,2 million) (see Table 8).

**Table B – Selected key figures regarding mineral sales for April 2009**

Actual estimates	April 2009	% change between April 2008 and April 2009	% change between February to April 2008 and February to April 2009
	R million		
<b>Mineral sales</b>			
Gold	3 899,4	6,5	20,3
Non-gold	16 659,3	-23,8	-21,9
<b>Total</b>	<b>20 558,7</b>	<b>-19,4</b>	<b>-15,5</b>

Shorter term seasonally adjusted estimates	April 2009	% change between March and April 2009	% change between November 2008 to January 2009 and February to April 2009
	R million		
<b>Mineral sales</b>			
Gold	4 307,1	-1,6	16,0
Non-gold	17 169,7	4,2	-4,8
<b>Total</b>	<b>21 476,8</b>	<b>3,0</b>	<b>-1,0</b>

Figure 2 shows the seasonally adjusted figures and trend series of the total value of mineral sales between January 2004 and April 2009.

**Figure 2 – Total value of mineral sales**

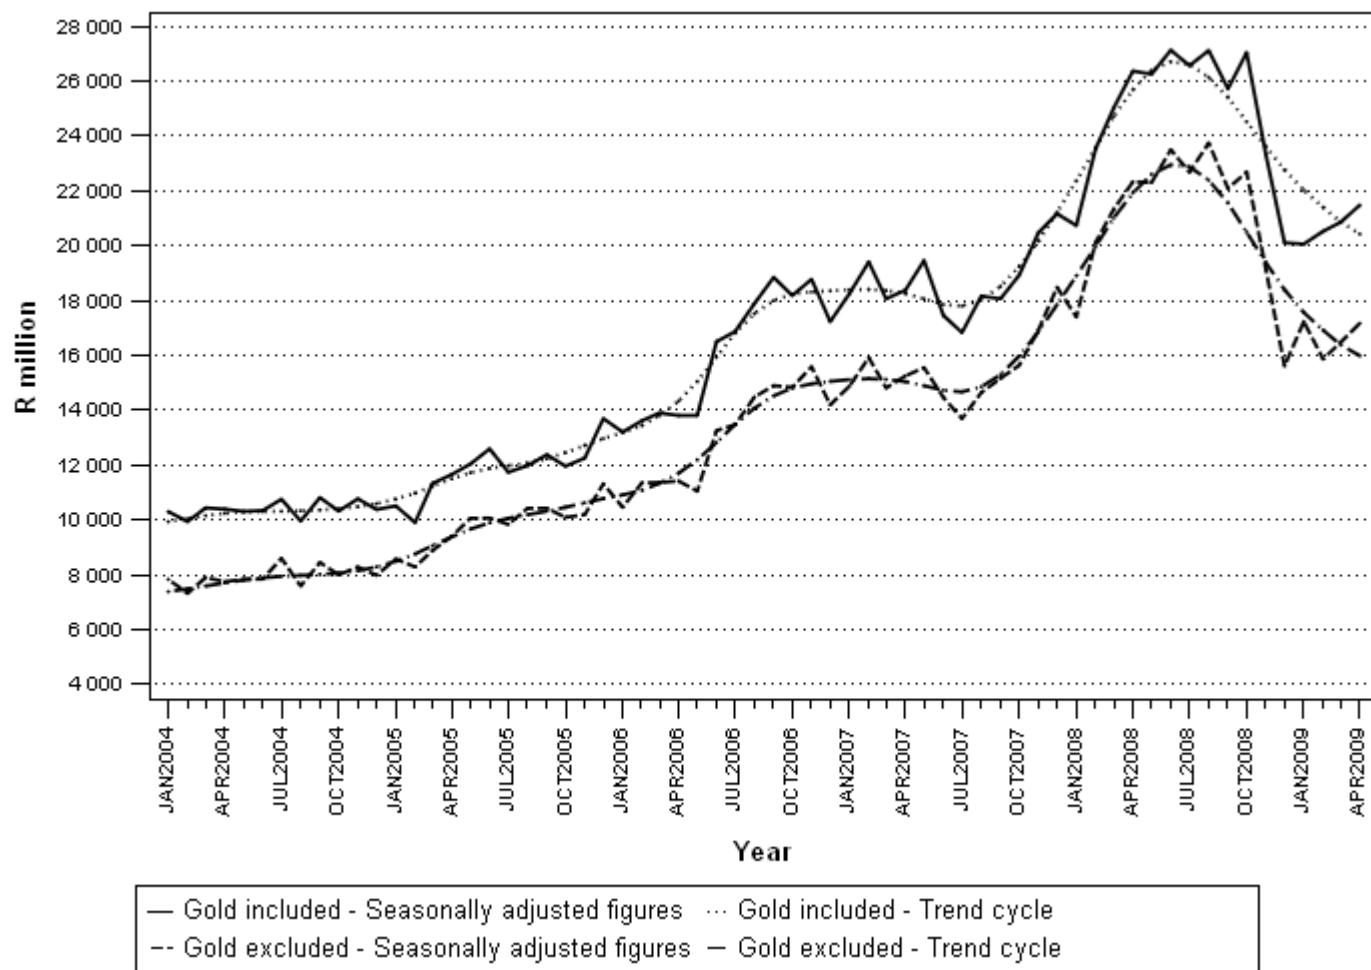

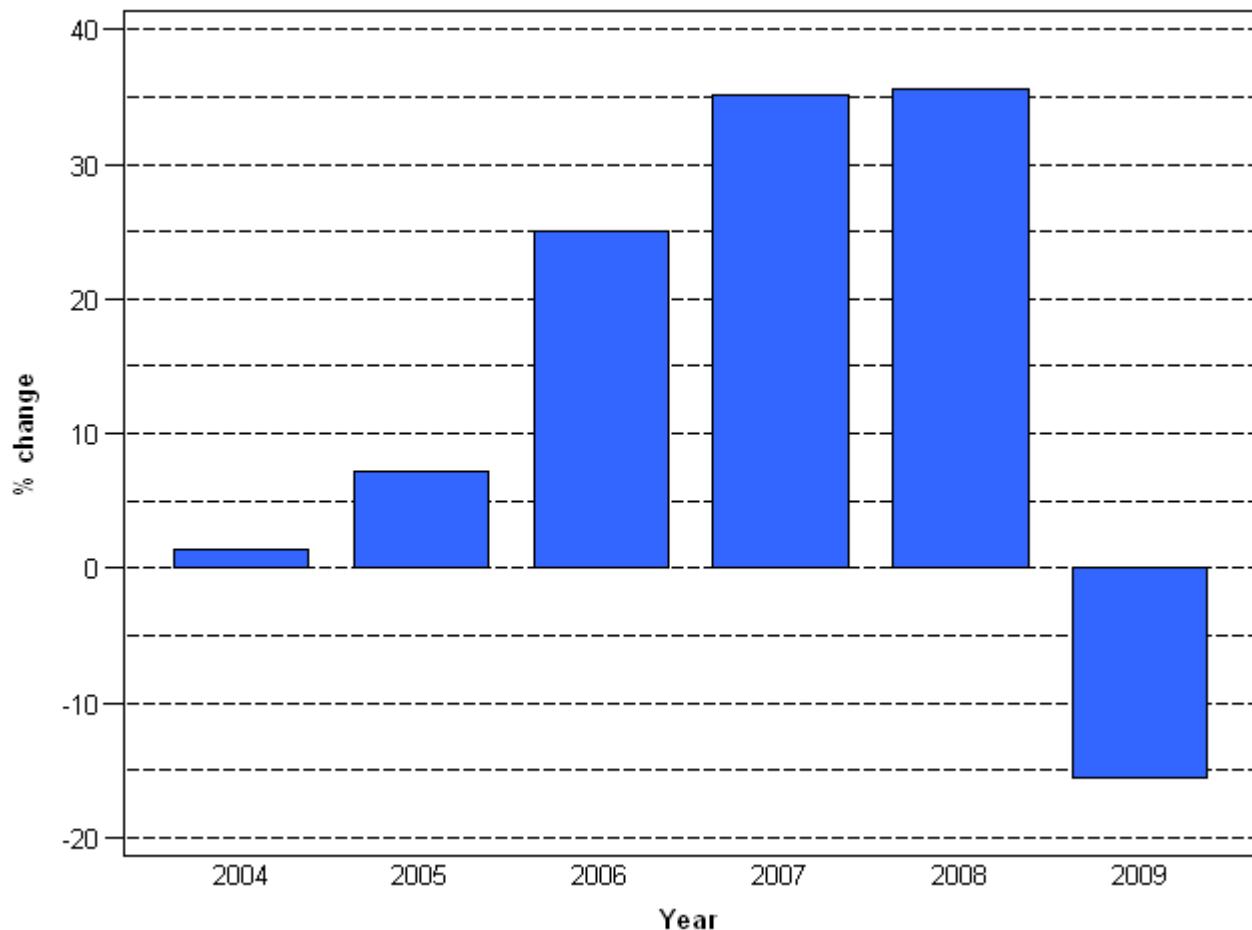

Figure 3 shows the -15,5% annual growth rate in the value of mineral sales for the three months ended April 2009 compared with the three months ended April 2008. The decrease for 2009 represents the lowest growth rate compared to the other years for the same period since the growth rate of 1,4% in 2004.

**Figure 3 – Comparison of the last six years for the total value of mineral sales for the three months ended April compared with the three months ended April of the previous year**

## Explanatory notes

<b>Introduction</b>	<b>1</b>	Statistics South Africa (Stats SA) publishes monthly information regarding the mining industry on the basis of mining production figures and mineral sales furnished by the Minerals Bureau, Department of Minerals and Energy. This statistical release contains detailed information regarding indices of the physical volume of mining production and the total value of mineral sales according to mining divisions and mineral groups on a monthly basis.
	<b>2</b>	In accordance with international practice, the indices have to be re-based every five years to a new base year. The base year of the index of the physical volume of mining production is currently 2000=100. Both actual and seasonally adjusted figures are presented.
	<b>3</b>	Due to mining production figures being available earlier than mineral sales figures, mining production indices are published one month earlier than mineral sales.
	<b>4</b>	The value of mineral sales is calculated, in general, on a free-on-rail/free-on-board basis.
	<b>5</b>	In order to improve timeliness, some information for the current month may have been estimated due to late response. These estimates will be revised in future statistical release(s) as soon as more up-to-date information is available.
<b>Purpose of the survey</b>	<b>6</b>	The monthly mining production and sales survey is conducted by the Minerals Bureau, covering all mining establishments operating in the South African economy. The results of this survey are used to calculate physical volume of mining production indices in order to estimate the gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy.
<b>Scope of the survey</b>	<b>7</b>	This survey covers mining establishments conducting activities regarding <ul style="list-style-type: none"> <li>• The extracting, dressing and beneficiating of minerals occurring naturally, for example solids such as coal and ores.</li> </ul>
<b>Classification</b>	<b>8</b>	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities (ISIC)</i> with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division, major group and subgroup level. Each statistical unit is classified to an industry which reflects the predominant activity of the establishment.
<b>Statistical unit</b>	<b>9</b>	The basic statistical unit for the collection of information is the mining establishment. An establishment is the smallest economic unit that functions as a separate entity. Each statistical unit is classified to an industry (see paragraph 8).
<b>Weighting</b>	<b>10</b>	The weights which are used to aggregate minerals to mineral groups and mineral groups to total mining are based on the value of production derived from detailed information for 2000 supplied by the Minerals Bureau, Department of Minerals and Energy.

<b>Seasonal adjustment</b>	<b>11</b>	Seasonally adjusted estimates of all items are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month.  Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. This means the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.
<b>Reliability of estimates</b>	<b>12</b>	Estimates are subject to sampling and non-sampling errors. Figures for the latest month are preliminary.
<b>Historical data</b>	<b>13</b>	More comprehensive detail on the method of calculation and historical data in respect of the production indices according to mining mineral groups for the period February 1990 to November 2002 is available in statistical release P2041.1, entitled <i>Mining statistics: Indices of the physical volume of mining production, Base: 2000=100, February 1990 to November 2002</i> , published on 11 February 2003 on the Stats SA website: <a href="http://www.statssa.gov.za">www.statssa.gov.za</a>
<b>Related publications</b>	<b>14</b>	Users may also wish to refer to the following publications which are available from Stats SA - <ul style="list-style-type: none"><li>• <i>Bulletin of Statistics</i>.</li><li>• <i>SA Statistics</i>.</li></ul>
<b>Unpublished statistics</b>	<b>15</b>	In some cases Stats SA can also make available statistics not included in standard publications. The statistics can be made available via computer printouts or diskette or CD. Generally, a charge is made for providing unpublished statistics.
<b>Rounding-off of figures</b>	<b>16</b>	The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

## Glossary

<b>Free-on-rail</b>	Free-on-rail relates to goods sold on the local market where no railage or road transport costs are involved.
<b>Free-on-board basis</b>	Free-on-board relates to goods destined for the export market. Railage, road transport and docking charges are involved but no charges are made for the transport by sea.
<b>Index of physical volume of mining production</b>	The index of physical volume of mining production or a production index is a statistical measure of the change in the volume of production. The production index of a mineral group is the ratio between the volume of production of a mineral group in a given period and the volume of production of the same mineral group in the base period. The current base period is 2000. The production in the base period is set at 100.
<b>Industry</b>	An industry consists of a group of establishments engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification (SIC) of all Economic Activities</i> , Fifth Edition of January 1993.
<b>PGMs - Platinum Group Metals</b>	Platinum Group Metals include platinum; iridium; osmiridium; palladium; rhodium; ruthenium and osmium.
<b>Sales</b>	Sales are the total value of sales and transfers-out of goods mined by the mining establishments and the amounts received for installation, erection or assembly or other services rendered.
<b>Weight</b>	The weight of a mineral group is the ratio of the sales of a mineral group to the total sales of the mining industry. The weight of a mineral group reflects the importance of the mineral group in the total mining industry. The weights change over time due to quality changes and changes in relative prices. New weights need to be calculated from time to time.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

### Advanced release calendar

An advanced release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za)

### Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Nelspruit  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

### Electronic services

A large range of data is available via on-line services, diskette, CD and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/8496/4892/8095.

You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
