

P3001
Census of manufacturing
1996

Embargo: 13:00
Date: 20 October 1998

CONTENTS

Key findings

Notes

Tables

1. Principal statistics - Total manufacturing and major groups
2. Principal statistics - Total manufacturing and major groups by province:
 - 2.1 Western Cape
 - 2.2 Eastern Cape
 - 2.3 Northern Cape
 - 2.4 Free State
 - 2.5 KwaZulu-Natal
 - 2.6 North West
 - 2.7 Gauteng
 - 2.8 Mpumalanga
 - 2.9 Northern Province

1996 CENSUS OF MANUFACTURING

According to the 1996 Census of Manufacturing there were 25 402 factories with a total output of R331 502 million in the Republic of South Africa. Most of the factories were situated in Gauteng (11 534 factories or 45,4% of all factories), followed by KwaZulu-Natal (5 141 factories or 20,2%) and the Western Cape (4 670 factories or 18,4%). The largest contributor to the total manufacturing output was the food division (14,4% or R47 886 million), followed by the motor vehicle, trailer and semi-trailer (11,2% or R37 212 million), chemical (10,7% or R35 545 million), basic metal (9,7% or R32 158 million), paper (5,1% or R16 813 million) and the petroleum products (4,8% or R15 899 million) divisions.

NOTES

1. General

Statistics South Africa periodically conducts a census of manufacturing covering private manufacturing establishments, public corporations and government undertakings. The latest census for which information is available, is the 1996 census. This release contains the principal statistics of this census as well as comparable data of previous censuses.

The complete results of the census will be published during 1999 in fifteen reports, namely 30-01-01 (1996) to 30-01-16 (1996). These reports will be obtainable from the Government Printing Works, Pretoria or Cape Town.

2. Definitions of concepts used

2.1 Census year

Returns of questionnaires were rendered by manufacturing establishments in respect of their financial year which ended on any date between 1 July 1995 and 30 June 1996 - similarly for previous census years.

2.2 Establishment

Any premises under the same ownership or management on which one type of activity is performed, was regarded as an establishment. Premises under the same ownership or management in which two or more types of activities are carried out, were regarded as two or more establishments.

2.3 Output/income

Output is the aggregate value of goods manufactured and work done.

Output is calculated as follows:

- (i) Sales and transfers-out of own manufactures, factory waste and articles manufactured for this establishment; plus
- (ii) repairs; plus
- (iii) installation, erection and assembly; plus
- (iv) sundry trading revenue; plus
- (v) sales of factored goods minus purchases of factored goods; plus
- (vi) rent and leasing received; plus
- (vii) royalties received; plus

- (viii) closing value of work in progress, stocks of own manufactures and stocks of factored goods; plus
- (ix) head office charges; plus
- (x) other revenue; minus
- (xi) excise and customs duty paid; minus
- (xii) opening values of work in progress, finished goods and factored goods.

2.4 Intermediate consumption

Intermediate consumption is calculated as follows:

- (i) Purchases and transfers-in of materials; plus
- (ii) payments to other establishments for work done; plus
- (iii) other direct factory costs; plus
- (iv) rent and leasing paid; plus
- (v) head office charges; plus
- (vi) royalties, copyright, trade names and patent rights paid; plus
- (vii) advertising; plus
- (viii) insurance premiums; plus
- (ix) services; plus
- (x) secretarial and administrative fees; plus
- (xi) other expenses; plus
- (xii) closing value of inventories, materials and supplies; minus
- (xiii) Staff payments in kind; minus

(xiv) opening values of inventories, materials and supplies.

2.5 Value added

Value added is the value of output less intermediate consumption. It represents the value added to the cost of materials used in the process of production.

2.6 Stocks

Stocks include work in progress; stocks of raw materials, packing materials, fuel, consumable and maintenance stores and stocks of own manufactures and factored goods.

2.7 Net profit

Net profit is shown before income tax and company tax. Dividends paid were taken into account.

3. Comparison with national accounts

It should be noted that the value added figures, as shown in table 1, do not correspond with the national accounts estimates as published in Statistical Release P0441 Gross domestic product (GDP) at constant 1990 prices and at current prices, since the latter estimates include the informal sector and are also adjusted according to International National Accounting guidelines, the 1993 System of National Accounts (SNA93). An example in this regard is the so-called inventory valuation adjustment which is applied to the inventory figures in order to eliminate holding gains or losses from the value added estimates. Furthermore, it should also be noted that the manufacturing census relates to a so-called "census" (i.e. financial) year, whereas the national accounts relate to a calendar year. Therefore, the 1996 census of manufacturing is, for national accounts purposes, regarded as relating to the 1995 calendar year.

4. Comparability

As from 1996 the Census of Manufacturing includes information of the former TBVC states and the results are not strictly comparable with the results of 1991 and 1993. Published and unpublished information was obtained from Statistical Offices in the former TBVC states. It was ascertained that the former TBVC states contributed 1,8% to the total value of manufacturing production in 1995.

2. PRINCIPAL STATISTICS - TOTAL MANUFACTURING AND MAJOR GROUPS BY PROVINCE

2.1 WESTERN CAPE

| CENSUS YEAR | Number of esta- blishments | Intermediate | Output | Value added | Net profit/ loss | Stocks at end of the year | Book value of fixed assets at the beginning of the year | Capital expendi- ture on new assets |
