Statistiese vrystelling P3041.2
Statistical release

Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die owerheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydige beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

FABRIEKVERKOPE VAN DRANK EN MOTORVOERTUIG STYG MEER

Die fabriekverkope van drank en motorvoertuie toon vir Februarie 1994 'n toename van onderskeidelik 18,8% en 8,9% na seisoenaanpassing.

Die jongste opnameresultate vir Februarie 1994 toon dat fabriekverkope, na die daling gereflekteer in die Januarie-opname, in Februarie weer toegeneem het. Die vervaardigers het 'n toename van 1,8% in verkope vir Februarie 1994, na seisoenaanpassing gerapporteer vergeleke met Januarie 1994. Die fabriekverkope van drank en motorvoertuie het die meeste bygedra tot hierdie toename gevolg deur die voedsel- en tekstielverkope. Die vervaardigers van metaalprodukte en elektriese masjinerie het egter merkbaar afnames gerapporteer.

Die seisoenaangepaste fabrieksproduksie vir Februarie 1994 toon 'n toename van 0,9% vergeleke met Januarie 1994. Hoër produksiesyfers vir Februarie 1994 is in 18 van die 28 hoofgroepe in die fabriekswesektor aangeteken. Die belangrikste bydraers tot hierdie toename is die voedsel-, drank- en tekstielnywerhede.

Gedurende voornoemde tydperk is toenames ten opsigte van onvoltooides bestellings vir 11 van die 30 uitgesoekte fabriekswese-subgroepe gerapporteer. Merkbare toenames is by die tekstiel-, klerasie-, radio- en televisie- en motorvoertuignywerhede aangeteken.

MANUFACTURING SALES OF BEVERAGES AND MOTOR VEHICLES INCREASE AGAIN

The manufacturing sales of beverages and motor vehicles for February 1994 show increases of 18,8% and 8,9% respectively after seasonal adjustment.

The latest survey results for February 1994 indicate that manufacturing sales, following the drop reflected in the January survey, increased again in February. The manufacturers reported an increase of 1,8% in sales for February 1994 compared with January 1994 after seasonal adjustment. The manufacturing sales of beverages and motor vehicles contributed the most to this increase followed by food and textile sales. However, the manufacturers of metal products and electrical machinery reported noticeable decreases.

The seasonally adjusted manufacturing production for February 1994 shows an increase of 0,9% compared with January 1994. Higher production figures for February 1994 were recorded in 18 of the 28 manufacturing major groups in the manufacturing sector. The most important contributors to this increase were the food, beverage and textile industries.

During the aforementioned period increases were reported in respect of unfilled orders for 11 of the 30 selected manufacturing subgroups. Noticeable increases were recorded by the textile, clothing, radio and communication and motor vehicle industries.

SUBGROEPIINDEXSE

1. Produksie-indekse vir die onderskeie fabriekswesesubgroepe, wat in die verlede in die Bulletin van Statistieke gepubliseer is, is sedert die indekse vir Januarie 1993 gestaak. Aangesien subindekse van die Produksieprysindeks (PPI) wat as deflatore vir die waarde van produksie gebruik word tans slegs op 'n hoofgroepgrondslag beskikbaar is, kan produksie-indekse nie op 'n subgroepgrondslag volgens die nuwe metode van berekening verkry word nie. Die berekening van die PPI op 'n subgroepgrondslag word tans ondersoek. Die hervatting van die berekening en publikasie van die produksie-indekse op 'n subgroepgrondslag sal oorweeg word sodra toepaslike PPI-subindekse beskikbaar is.
2. Die produksie-indekse op 'n subgroepgrondslag kan egter by benadering verkry word deur die waarde van verkope volgens fabriekswesesubgroepe (kyk Tabel 6.2.2 Bulletin van Statistieke) te defleer met die produksieprysindekse (Tabel 3.1.2, Bulletin van Statistieke) vir die betrokke fabriekswesehoofgroep. Daar moet egter in gedagte gehou word dat die verloop van die produksieprysindeks vir 'n bepaalde hoofgroep nie noodwendig die verloop van die produksiepryse vir elk van die onderskeie subgroepe weerspieël nie.

OPMERKINGS

1. Hierdie statistiese vrystelling toon indekse van die fisiese volume van fabrieksproduksie en die waarde van verkope en onvoltooide bestellings volgens fabriekswesehoofgroepe. Beide werklike en seisoensaangepaste syfers word getoon.
2. Die berekening van die maandelikse fabrieksproduksie-indekse is gebaseer op die waarde van vervaardigde produkte en artikels nadat die effek van prysveranderings uitgeskakel is met deflering deur gebruik te maak van toepaslike subindekse van die produksieprysindeks (PPI). Die waarde van vervaardigde produkte word verkry uit 'n maandelikse steekproefopname van die fabrieksinrigtings in die private en openbare sektore.
3. Die 1985-fabriekswesesensus het die raamwerk verskaf vir die keuse van 'n heriene steekproef wat vanaf Januarie 1989 in werking gestel is. 'n Gestratifiseerde sistematiese steekproefontwerp gebaseer op bruto opbrengs is gebruik. Inrigtings wat na die sensus met bedrywighede begin het, is ook in aanmerking geneem. Met ingang van 1988 is die beswaringsfaktore vir die samevoeging van die produksie-indekse vir die fabriekswesehoofgroepe na dié vir die totale fabriekswese bereken op grond van die netto opbrengsgegevens verkry uit die 1988-fabriekswesesensus.

SUBGROUP INDICES

1. Production indices for the various manufacturing subgroups that were previously published in the Bulletin of Statistics were discontinued as from the indices for January 1993. As the sub-indices of the Production Price Index (PPI) that are used as deflators for the value of production are at present available on a major group basis only, the production indices can not be obtained on a subgroup basis according to the new method of calculation. The calculation of the PPI on a subgroup basis is currently being investigated. The recommencement of the calculation and publication of the production indices on a subgroup basis will be considered as soon as the appropriate PPI sub-indices are available.
2. The production indices on a subgroup basis can however be obtained by approximation by deflating the value of sales according to manufacturing subgroups (see Table 6.2.2, Bulletin of Statistics) with the production price indices (Table 3.1.2, Bulletin of Statistics) for the relevant manufacturing major group. It must, however, be remembered that the trend of the production price index for a specific major group will not necessarily reflect the trend of the production prices for each of the various subgroups.

NOTES

1. This statistical release shows indices of the physical volume of manufacturing production and the value of sales and unfilled orders according to manufacturing major groups. Both actual and seasonally adjusted figures are shown.
2. The calculation of the monthly manufacturing indices is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). The value of the manufactured products is obtained from a monthly sample survey of manufacturing establishments in the private and public sectors.
3. The 1985 Manufacturing Census provided the framework for the selection of a revised sample implemented as from January 1989. A stratified systematic sample design based on gross output was used. Establishments which commenced operations after the census have also been taken into account. With effect from 1988 the weighting factors for the combining of the production indices for the manufacturing major groups to those for total manufacturing were calculated on the basis of the net output data obtained from the 1988 Manufacturing Census.

4. Die resultate van die 1988-fabriekswese-sensus is gebruik om die vlak van die indekse en die waarde van verkope te bepaal. Hierdie proses word hoogtemerkbepaling ("benchmarking") genoem.
 5. Meer volledige besonderhede oor die berekeningswyse en historiese gegewens ten opsigte van die produksie-indeks volgens fabriekswese hoofgroepe en die waarde van verkope vir die periode Januarie 1978 tot Julie 1993 is in statistiese vrystellings P3041.3 (getiteld Fabriekswesestatistieke: Indekse van die fisiese volume van fabrieksproduksie, Basis: 1990=100, Januarie 1978 tot Julie 1993) en P3041.4 (getiteld Fabriekswesestatistieke: Waarde van verkope, Januarie 1978 tot Julie 1993) gepubliseer.
4. The results of the 1988 Manufacturing Census were used to determine the level of the indices and the value of sales. This process is known as benchmarking.
 5. More comprehensive detail on the method of calculation and historical data in respect of the production indices according to manufacturing major groups and the value of sales for the period January 1978 to July 1993 were published in statistical releases P3041.3 (entitled Manufacturing statistics: Indices of the physical volume of manufacturing production, Base: 1990=100, January 1978 to July 1993) and P3041.4 (entitled Manufacturing statistics: Value of sales, January 1978 to July 1993).
