Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die owerheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydigte beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

## FABRIEKSPRODUKSIE AAN DIE AFNEEM

Fabrieksproduksie toon 'n skerp dalende tendens sedert 'n hoogtepunt in Mei 1995 bereik is. Nieteenstaande hierdie afname is die totale produksie vir die eerste elf maande van 1995 7,6% hoër as vir die ooreenstemmende tydperk van 1994.

Laer produksie vir die jongste drie maande tot November 1995 vergeleke met die vorige drie maande is in 19 van die 28 fabriekswese hoofgroepe gerapporteer wat 66,4% van die totale fabriekswese produksie verteenwoordig.

Fabrieksproduksie vir die jongste drie maande tot November 1995 toon 'n afname van 2,3% na seisoensaangepassing vergeleke met die vorige drie maande. Die grootste bydraers tot hierdie afname is die nywerheidschemikalieë- (0,8 van 'n persentasiepunt), motorvoertuig- (0,7 van 'n persentasiepunt) en die basiese yster- en staalnywerheid (met 0,3 van 'n persentasiepunt).

Die seisoensaangepaste waarde van verkope van vervaardigde produkte het met 1,8% (R1 386 miljoen) toegeneem gedurende die voorgenoemde tydperk. Die grootste toenames is aangeteken deur die voedselnywerheid (+R444 miljoen) gevolg deur die metaalprodukte (+R418 miljoen) en masjinerienywerheid (+R362 miljoen). Hierteenoor het die motorvoertuignywerheid 'n afname van R493 miljoen in verkope gedurende hierdie periode gerapporteer.

## MANUFACTURING PRODUCTION ON THE DECREASE

Manufacturing production is showing a sharp declining trend since the peak reached in May 1995. Notwithstanding this decrease the total production for the first eleven months of 1995 is 7,6% higher than for the corresponding period of 1994.

Lower production for the last three months up to November 1995 compared with the previous three months was reported in 19 of the 28 manufacturing major groups which represent 66,4% of the total manufacturing production.

Manufacturing production for the last three months up to November 1995 shows a decrease of 2,3% after seasonal adjustment compared with the previous three months. The main contributors to this decrease were the industrial chemical (0,8 of a percentage point), motor vehicle (0,7 of a percentage point) basic iron and steel industries (0,3 of a percentage point).

The seasonally adjusted value of sales of manufactured products increased by 1,8% (R1 386 million) during the aforementioned period. The largest increases were recorded by the food industry (+R444 million) followed by the metal products (+R418 million) and the machinery industries (+R362 million). Opposed to this, the motor vehicle industry reported a decrease of R493 million in sales during this period.

## OPMERKINGS

1. Hierdie statistiese vrystelling toon, na hoogtemerkbepaling, die indekse van die fisiese volume van fabrieksproduksie en die waarde van verkope en onvoltooide bestellings volgens fabriekswese-hoofgroepe. Beide werklike en seisoensaangepaste syfers word getoon. Verkope- en produksiesyfers t.o.v. Walvisbaai is uitgesluit vanaf 1 Maart 1994. Die voormalige TBVC-state is ingesluit.
2. Die resultate van die 1988- en 1991-fabriekswese-sensus is gebruik om die vlak van die indekse en die waarde van verkope aan te pas. Hierdie proses word hoogtemerkbepaling ("benchmarking") genoem. Die waarde van bruto opbrengs van die fabriekswesehoofgroepe (wat die totale waarde van werk verrig deur die inrigtings in hierdie groepe verteenwoordig), soos verkry uit die onderskeie fabriekswesesensusse, is gedefleer met geskikte subindekse van die produksieprysindeks om die reële bruto opbrengs te bereken. Laasgenoemde het as bakenpunte gedien om die vlak van die maandelikse volume-indeks te verifieer of aan te pas. Die vlakaanpassings is gedoen op die volume-indeks vir Januarie van die betrokke sensusjaar (bv. die 1988-sensusjaar strek van 1 Julie 1987 tot 30 Junie 1988 en derhalwe is die hoogtemerkbepaling op die indeks van Januarie 1988 gedoen).
3. Die berekening van die maandelikse fabrieksproduksie-indeks is gebaseer op die waarde van vervaardigde produkte en artikels nadat die effek van prysveranderings uitgeskakel is met deflering deur gebruik te maak van toepaslike subindekse van die produksieprysindeks (PPI). Die waarde van vervaardigde produkte word verkry uit 'n maandelikse steekproefopname van die fabrieksinrigtings in die private en openbare sektore.
4. Die 1988-fabriekswesesensus het die raamwerk verskaf vir die keuse van 'n hersiene steekproef wat vanaf Januarie 1995 in werking gestel is. 'n Gestratifiseerde sistematiese steekproefontwerp gebaseer op bruto opbrengs is gebruik. Inrigtings wat na die sensus met bedrywighede begin het, is ook in aanmerking geneem. Die beswaringsfaktore vir die samevoeging van die produksie-indeks vir die fabriekswesehoofgroepe na dié vir die totale fabriekswese is bereken op grond van die netto opbrengsgegewens verkry uit die 1991-fabriekswesesensus.
5. Die 1988- en 1991-fabriekswesesensus, asook die steekproefopname (voor 1995) het nie die inligting van die voormalige TBVC-state ingesluit nie. Om die tydreeks vergelykbaar te maak, is gepubliseerde en ongepubliseerde inligting vir 1988 en 1991 van die Statistiese Kantore van die voormalige TBVC-state bekom en ingewerk. Die vlak van die steekproefresultate is daarna gelik om aan te sluit by die hoogtemerkpunte. Die steekproefgegewens gee nie die invloed van die sikliese beweging voor Januarie 1995 van die inrigtings in die voormalige TBVC-state weer nie.
6. Produksie-indeks vir die onderskeie fabriekswesesubgroepe, wat in die verlede in die Bulletin van Statistieke gepubliseer is, is sedert die indeks vir Januarie 1993 gestaak. Die produksie-indeks op 'n subgroepprondslag kan by benadering verkry word deur die waarde van verkope volgens fabriekswesesubgroepe te defleer met die produksieprysindeks in statistiese vrystelling P0142.1 (getiteld Produksieprysindeks) vir die betrokke fabriekswesesubgroepe.

## NOTES

1. This statistical release shows indices of the physical volume of manufacturing production and the value of sales and unfilled orders, after benchmarking, according to manufacturing major groups. Both actual and seasonally adjusted figures are shown. Sales and production figures for Walvis Bay are excluded as from 1 March 1994. The former TBVC states are included.
2. The results of the 1988 and 1991 Manufacturing Censuses were used to adjust the level of the indices and the value of sales. This process is known as benchmarking. The total value of gross output of the manufacturing major groups (which represents the total value of work done by the establishments in these groups) as obtained from the respective manufacturing censuses, was deflated with appropriate subindices of the Production Price Index in order to calculate the real gross output. The latter served as benchmarks to verify or adjust the level of the monthly volume indices. The level adjustments were done on the volume indices for January of the relevant census year (e.g. the 1988 census year covers the period 1 July 1987 to 30 June 1988 and therefore the benchmarking was done on the index of January 1988).
3. The calculation of the monthly manufacturing indices is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). The value of the manufactured products is obtained from a monthly sample survey of manufacturing establishments in the private and public sectors.
4. The 1988 Manufacturing Census provided the framework for the selection of a revised sample implemented as from January 1995. A stratified systematic sample design based on gross output was used. Establishments which commenced operations after the census have also been taken into account. The weighting factors for the combining of the production indices for the manufacturing major groups to those for total manufacturing were calculated on the basis of the net output data obtained from the 1991 Manufacturing Census.
5. The 1988 and 1991 manufacturing censuses as well as the sample survey (before 1995) did not include information of the former TBVC states. To make the time series comparable, published and unpublished information for 1988 and 1991 was obtained from Statistical offices of the former TBVC states and has been incorporated. Thereafter, the level of the sample results was raised to link up with the benchmarks. The sample data do not reflect the influence of the cyclic movement of the establishments before January 1995 in the former TBVC states.
6. Production indices for the various manufacturing subgroups that were previously published in the Bulletin of Statistics were discontinued as from the indices for January 1993. The production indices on a subgroup basis can be obtained by approximation by deflating the value of sales according to manufacturing subgroups in statistical release P0142.1 (entitled Production Price Index) with the production price indices for the relevant manufacturing subgroups.

7. Meer volledige besonderhede oor die berekeningswyse en historiese gegewens ten opsigte van die produksie-indekse volgens fabriekswese hoofgroepe en die waarde van verkope vir die periode Januarie 1987 tot Augustus 1995 is in statistiese vrystellings P3041.3 (getiteld Fabriekswesestatistieke: Indekse van die fisiese volume van fabrieksproduksie, Basis: 1990=100, Januarie 1987 tot Augustus 1995) en P3041.4 (getiteld Fabriekswesestatistieke: Waarde van verkope, Januarie 1987 tot Augustus 1995) gepubliseer.

7. More comprehensive detail on the method of calculation and historical data in respect of the production indices according to manufacturing major groups and the value of sales for the period January 1987 to August 1995 were published in statistical releases P3041.3 (entitled Manufacturing statistics: Indices of the physical volume of manufacturing production, Base: 1990=100, January 1987 to August 1995) and P3041.4 (entitled Manufacturing statistics: Value of sales, January 1987 to August 1995).
