

Manufacturing: Production and sales

November 2003

Co-operation between Statistics South Africa (Stats SA), the citizens of the country, the private sector and government institutions is essential for a successful statistical system. Without continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

Embargoed until: 13:00
Date: 13 January 2004

Stats SA publishes approximately three hundred different releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally, but also by international economic and social-scientific communities, Stats SA releases are published in English only.

This data in this statistical release adheres to the Special Data Dissemination Standard (SDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data; access by the public; integrity; and quality of the disseminated data.

Key figures as at the end of November 2003

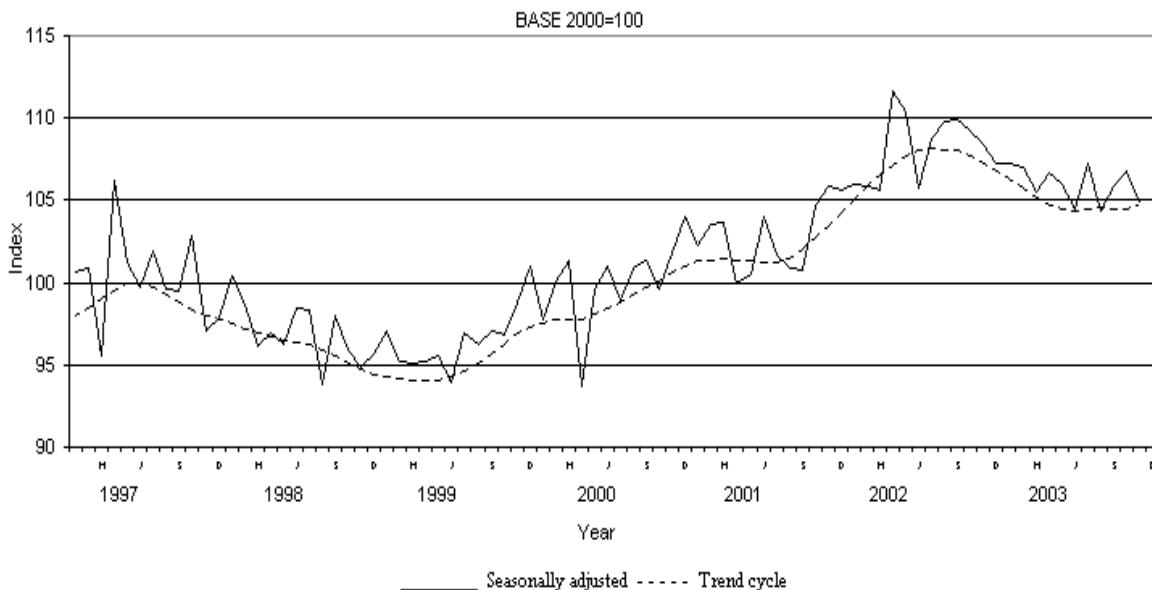

Actual estimates	November 2003	% change between November 2002 and November 2003	% change between October 2003 and November 2003	% change between September 2002 to November 2002 and September 2003 to November 2003	% change between January 2002 to November 2002 and January 2003 to November 2003
Physical volume of manufacturing production index (2000=100)	116,5	-3,8	-1,2	-3,3	-2,3
Total value of sales of manufactured products (R million)	56 129,6	-4,9	+0,2	-4,6	+0,1
Seasonally adjusted estimates	November 2003	% change between November 2002 and November 2003	% change between October 2003 and November 2003	% change between June 2003 to August 2003 and September 2003 to November 2003	
Physical volume of manufacturing production index (2000=100)	104,8	-3,4	-1,8	+0,4	
Total value of sales of manufactured products (R million)	50 433,4	-4,8	-1,4	+0,1	

Key findings as at the end of November 2003

Manufacturing production increases

Manufacturing production for the three months ended November 2003 reflected an increase of 0,4%, after seasonal adjustment, compared with the previous three months. Higher production was reported by 14 of the 27 manufacturing divisions. However, the manufacturing production for November 2003, after seasonal adjustment, reflected a decrease of 1,8% compared with October 2003. Furthermore, the actual manufacturing production for the first eleven months of 2003 reflected a decrease of 2,3% compared with the first eleven months of 2002.

The major contributor to the increase of 0,4%, after seasonal adjustment, in the total manufacturing production was the basic iron and steel products division (contributing +0,7 of a percentage point to total manufacturing production) and the basic precious and non-ferrous metal products division (contributing +0,2 of a percentage point). However, these increases were partially counteracted by a large decrease reported by the basic chemicals (contributing -0,3 of a percentage point) division (see table A).

Figure 1 – Index of the physical volume of manufacturing production**Table A - Contribution of the production by the different manufacturing divisions to the total manufacturing production (Base 2000=100)**

Manufacturing Divisions	Percentage contribution to the total manufacturing production using the weights according to 1996 Census of Manufacturing	Average seasonally adjusted production index for the three months September 2003 to November 2003	Quarterly percentage change of September 2003 to November 2003 compared with the preceding three months	Contribution (percentage points) to the seasonally adjusted quarterly percentage change in total manufacturing production
Food and food products	10,7	103,5	+0,2	+0,0
Beverages	4,6	114,5	-0,5	-0,0
Total textiles	2,9	92,9	-0,1	-0,0
Total wearing apparel	3,6	97,3	-1,5	-0,1
Tanning and dressing of leather	0,4	95,9	-1,6	-0,0
Footwear	0,9	76,9	+1,6	+0,0
Wood and products of wood	1,9	102,8	-4,4	-0,1
Paper and paper products	5,3	100,3	+1,4	+0,1
Total publishing and printing	4,1	101,3	+1,3	+0,1
Coke and refined petroleum products	4,2	103,5	-2,2	-0,1
Basic chemicals	4,5	101,0	-5,7	-0,3
Other chemical products	6,2	107,4	+0,8	+0,1
Rubber products	1,4	96,3	-4,6	-0,1
Plastic products	3,1	121,0	+1,5	+0,1
Glass and glass products	1,0	118,0	+0,6	+0,0
Other non-metallic mineral products	3,5	98,9	+2,6	+0,1
Basic iron and steel products	7,6	108,7	+9,4	+0,7
Basic precious and non-ferrous metal products	3,2	104,3	+5,1	+0,2
Fabricated metal products	7,0	113,3	-0,7	-0,1
Total machinery and equipment	5,8	121,7	-1,6	-0,1
Electrical machinery, apparatus and radio, television and communication apparatus	3,4	107,2	+1,9	+0,1
Professional equipment	1,0	88,4	+8,9	+0,1
Motor vehicles; trailers; parts and accessories	0,5	122,6	+6,8	+0,0
Other transport equipment	8,0	108,5	-1,2	-0,1
Furniture	1,0	108,0	+9,2	+0,1
Other manufacturing divisions	1,6	102,2	-3,6	-0,1
Total	100,0	105,8	+0,4	+0,4

1/ The contribution is calculated by multiplying the quarterly percentage change of each manufacturing division with its corresponding weight in the base year, divided by 100.

Sales of manufactured products increase

The total value of sales of manufactured products at current prices for the three months ended November 2003 reflected a marginal increase of 0,1% (+R94 million), after seasonal adjustment, compared with the previous three months. Higher manufacturing sales were reported by 14 of the 27 manufacturing divisions during this period (see table B). Furthermore, the actual value of sales of manufactured products at current prices for the first eleven months of 2003 also reflected a marginal increase of 0,1% compared with the first eleven months of 2002. However, the actual value of sales of manufactured products at current prices for the three months ended November 2003 reflected a decrease of 4,6% compared with the three months ended November 2002 (see table C).

The increase of 0,1% after seasonal adjustment in the total value of sales of manufactured products at current prices for the three months ended November 2003 compared with the previous three months was mainly due to large increases reported by the ‘other’ manufacturing industries (+7,4% or +R322 million), basic precious and non-ferrous metal products (+6,7% or +R311 million), machinery and equipment (+4,2% or +R304 million) and coke and refined petroleum products (+4,1% or +R352 million) divisions. However, these increases were counteracted by large decreases reported by the motor vehicles, trailers, parts and accessories (-4,2% or -R851 million), basic iron and steel products (-3,9% or -R524 million) and food and food products (-2,0% or -R413 million) divisions (see table B).

Table B - Contribution of the manufacturing divisions to the total value of seasonally adjusted sales of manufactured products

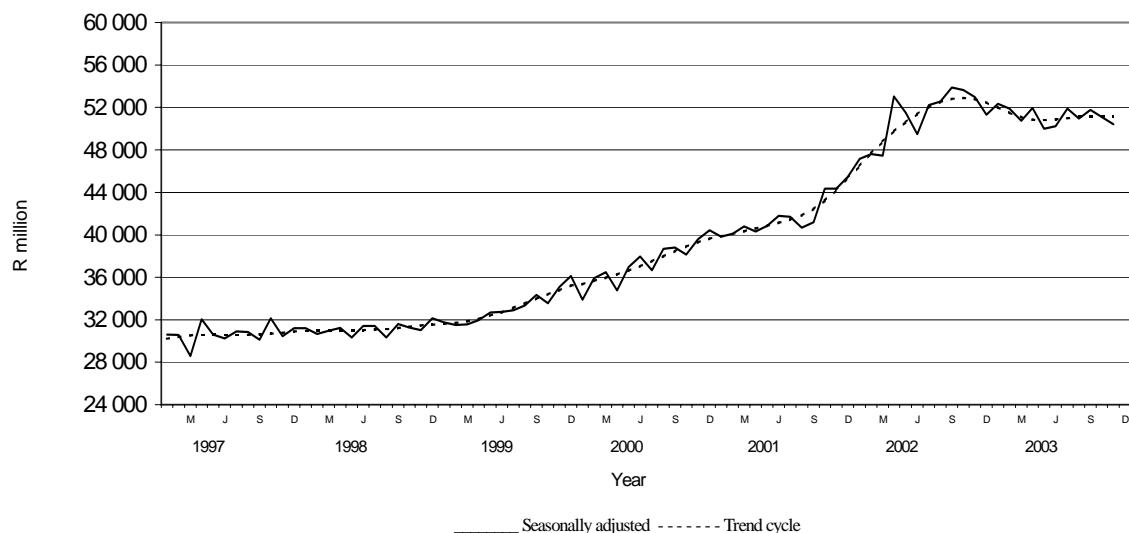

Manufacturing Divisions	Seasonally adjusted sales September 2003 to November 2003 R'000	Percentage change between June 2003 to August 2003 and September 2003 to November 2003	Difference in seasonally adjusted sales of manufacturing divisions between June 2003 to August 2003 and September 2003 to November 2003 R'000

Other manufacturing industries	4 656 513	+7,4	322 087
Total	153 270 149	+0,1	93 736

The major contributors to the decrease of 4,6% in the actual value of sales of manufactured products at current prices for the three months ended November 2003 compared with the three months ended November 2002 were the coke and refined petroleum products (-1,6 percentage points or -R2 862 million), motor vehicles, trailers, parts and accessories (-0,9 of a percentage point or -R1 539 million), food and food products (-0,7 of a percentage point or -R1 194 million), basic iron and steel products (-0,5 of a percentage point or -R871 million) and basic chemicals (-0,4 of a percentage point or -R761 million) divisions. However, these decreases were partially counteracted by large increases reported by the beverage (+0,4 of a percentage point or +R703 million) and machinery and equipment (+0,4 of a percentage point or +R680 million) divisions (see table C).

Table C - Contribution of the manufacturing divisions to total value of sales products

Manufacturing	Percentage contribution to total value of sales of manufactured products September 2002 to November 2002	Percentage change between September 2002 to November 2002 and September 2003 to November 2003	Contribution (percentage points) to the percentage change in the total value of sales of manufactured products 1/	Difference in sales of manufacturing divisions between September 2002 to November 2002 and September 2003 to November 2003 R'000

Purpose of the survey	The monthly Manufacturing Production and Sales survey is a survey covering a sample of private establishments, public corporations and government establishments operating in the manufacturing industry in the South African economy. The results of this survey are used to calculate physical volume of manufacturing production indices in order to estimate the Gross Domestic Product (GDP) to monitor and develop government policy.	
Response rates	The response rate for the survey on manufacturing production and sales for October 2003 was 78,6% and for November 2003 it was 64,6 %.

Explanatory notes

Introduction

- 1 Statistics South Africa (Stats SA) conducts a monthly survey of the manufacturing industry covering private manufacturing establishments, public corporations and government establishments. This statistical release contains historical information regarding indices of the physical volume of manufacturing production, the total value of sales of manufactured products and unfilled orders, according to manufacturing divisions and major groups on a monthly basis.
- 2 In accordance with international practice, the indices have to be re-based every five years to a new base year. The indices in this statistical release have been calculated on the basis of 2000=100. Both actual and seasonally adjusted figures are presented.
- 3 In order to improve timeliness, some information for the current month (November 2003) have been estimated due to late response. These estimates will be revised in future statistical release(s) as soon as more up-to-date information is available.

Scope of the survey

- 4 This survey covers manufacturing establishments conducting activities regarding -
 - the manufacturing, processing, making or packing of products;
 - the slaughtering of animals, including poultry; and
 - installation, assembly, completion, repair and related work.

Classification

- 5 The 1993 edition of the *Standard Industrial Classification of all Economic Activities (SIC)*, Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities (ISIC)* with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division and major group level. Each statistical unit is classified to an industry which reflects the predominant activity of the establishment .

Statistical unit

- 6 The basic statistical unit for the collection of information is the manufacturing establishment. An establishment is the smallest economic unit that functions as a separate entity. Each statistical unit is classified to an industry (see paragraph 5).

Weighting

- 7 A weight is calculated for every major group according to the value added of the relevant major group compared with the value added of the total manufacturing industry based on the 1991, 1993 and 1996 Censuses of Manufacturing. Weights between census years are fixed and are based on the results of the most recent Census of Manufacturing. The production indices of all the major groups are multiplied by the applicable weights and aggregated to reflect the total physical volume of manufacturing production index (see table D for the fixed weights which were used for the three periods 1990 to 1992, 1993 to 1995 and 1996 to 2003).

Re-basing

- 8 In accordance with international practice, the indices have to be re-based every five years to a new base year. The indices in this statistical release have been calculated on the basis of 2000=100. The first results on this basis were published in the December 2002 statistical release. Both actual and seasonally adjusted figures are presented.

Survey methodology and design

- 9 The calculation of the monthly production indices is based on the value of products and articles manufactured, after the effect of price changes has been eliminated through deflation by using appropriate sub-indices of the Production Price Index (PPI). The value of the manufactured products is obtained from a monthly survey of manufacturing establishments in the private and public sectors.
- 10 The survey is collected by mail each month from a sample of approximately 2 400 manufacturing establishments.
