STATISTIEKDIENS
CENTRAL
STATISTICAL SERVICE

Statistiese vrystelling P3041.2
Statistical release

Om 'n suksesvolle statistiese stelsel in die RSA te bedryf, is die samewerking tussen die Sentrale Statistiekdiens en die inwoners van die RSA, die private sektor en die overheidsinstellings onontbeerlik. Sonder hierdie volgehoue samewerking en welwillendheid sal die tydige beskikbaarstelling van relevante en betroubare amptelike statistieke nie moontlik wees nie.

Co-operation between the Central Statistical Service and the residents of the RSA, the private sector and the government institutions is essential for a successful statistical system in the RSA. Without this continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

FABRIEKSPRODUKSIE DAAL

Fabrieksproduksie vir die jongste drie maande tot Oktober 1995 toon na seisoensaanpassing'n afname van 1,9% vergeleke met die voorafgaande drie maande. Die fabrieksproduksie vir Oktober 1995 is na seisoensaanpassing 1,2% laer as vir September 1995, maar is nogtans 3,6% hoër as vir Oktober 1994.

Die hoofgroepes klerasie (-0,35 van 'n persentasiepunt), drukwerk en uitgewery (-0,23 van 'n persentasiepunt) en nywerheidschemikalieleë (-0,53 van 'n persentasiepunt) was die grootste bydraers tot die afname van 1,9% in die totale fabrieksproduksiesindeks. Gedurende voornoemde tydperk is afnames by 21 van die 28 hoofgroepes gerapporteer. Produksie in die voedsel- en petroleumproduktenwerheid het nie netmin 'n positiewe groei getoon oor hierdie tydperk.

Die totale seisoensaangepaste verkope van fabrieksprodukte het in Oktober 1995 dievlak van R25 500 miljoen bereik, wat sowat 14,3% hoër is as in Oktober 1994. In die jongste drie maande tot Oktober 1995 vergeleke met die voorafgaande drie maande, het vervaardigers afnames van meer as R100 miljoen gerapporteer in die nywerheidschemikalieleë (-R261 miljoen), elektriese masjinerie (-R204 miljoen) en klerasiebedryf (-R114 miljoen). Verkope van voedselprodukte is egter nog op stetige grondslag, met 'n toename van R673 miljoen (6,7%) in dié tydperk.

MANUFACTURING PRODUCTION DECREASES

Manufacturing production for the last three months up to October 1995 shows a decrease of 1,9% after seasonal adjustment compared with the previous three months. The manufacturing production for October 1995 is 1,2% lower than for September 1995 after seasonal adjustment, but is nevertheless 3,6% higher than for October 1994.

The major groups clothing (-0,35 of a percentage point), printing and publishing (-0,23 of a percentage point) and industrial chemicals (-0,53 of a percentage point) were the main contributors to the decrease of 1,9% in the total manufacturing production index. During the aforementioned period, decreases were reported in 21 of the 28 major groups. None the less, production in the food and petroleum products industries showed positive growth during this period.

The total seasonally adjusted sales of manufactured products reached the level of R25 500 million in October 1995, which is approximately 14,3% higher than in October 1994. In the last three months up to October 1995, compared with the preceding three months, manufacturers reported decreases exceeding R100 million in the industrial chemicals (-R261 million), electrical machinery (-R204 million) and clothing industries (-R114 million). Sales of food products is, however, still on a firm basis, with an increase of R673 million (6,7%) in this period.

OPSOMMING - TOTAAL FABRIEKSWESL

| Tydperk Period | Produksie- indexe Production Indices | Verkope Sales | Persentasieverandering van: Percentage change of: | |

OPMERKINGS

1. Hierdie statistiese vrystelling toon, na hoogtemerkbepaling, die indekse van die fisiese volume van fabrieksproduksie en die waarde van verkope en onvoltooide bestellings volgens fabriekswese-hoofgroep. Beide werklike en seisoensaangepaste syfers word getoon. Verkope- en produksiesyfers t.o.v. Walvisbaai is uitgesluit vanaf 1 Maart 1994. Die voormalige TBVC-state is ingesluit.
2. Die resultate van die 1988- en 1991-fabriekswesesensus is gebruik om die vlak van die indekse en die waarde van verkope aan te pas. Hierdie proses word hoogtemerkbepaling ("benchmarking") genoem. Die waarde van bruto opbrengs van die fabriekswesehoofgroep (wat die totale waarde van werk verrig deur die inrigtings in hierdie groep verteenwoordig), soos verkry uit die onderskeie fabriekwesenesensusse, is gedefleer met geskikte subindekse van die produksieprysindeks om die reëlle bruto opbrengs te bereken. Laasgenoemde het as bakenpunte gedien om die vlak van die maandelikse volume-indekse te verifieer of aan te pas. Die vlakaanpassings is gedoen op die volume-indekse vir Januarie van die betrokke sensusjaar (bv. die 1988-sensusjaar strek van 1 Julie 1987 tot 30 Junie 1988 en derhalwe is die hoogtemerkbepaling op die indeks van Januarie 1988 gedoen).
3. Die berekening van die maandelikse fabrieksproduksie-indekse is gebaseer op die waarde van vervaardigde produkte en artikels nadat die effek van prysveranderings uitgeskakel is met deflating deur gebruik te maak van toepaslike subindekse van die produksieprysindeks (PPI). Die waarde van vervaardigde produkte word verkry uit 'n maandelikse steekproefopname van die fabrieksinrigtings in die private en openbare sektore.
4. Die 1988-fabriekwesenesensus het die raamwerk verskaf vir die keuse van 'n hersiene steekproef wat vanaf Januarie 1995 in werking gestel is. 'n Ge-stratificeerde sistematiese steekproefontwerp gebaseer op bruto opbrengs is gebruik. Inrigtings wat na die sensus met bedrywigheid begin het, is ook in aanmerking geneem. Die beswaringsfaktore vir die samevoeging van die produksie-indekse vir die fabriekwesehoofgroep na dié vir die totale fabriekwese is bereken op grond van die netto opbrengsgegewens verkry uit die 1991-fabriekwesenesensus.
5. Die 1988- en 1991-fabriekwesenesensus, asook die steekproefopname (voor 1995) het nie die inligting van die voormalige TBVC-state ingesluit nie. Om die tydreeks vergelykbaar te maak, is gepubliseerde en ongepubliseerde inligting vir 1988 en 1991 van die Statistiese Kantore van die voormalige TBVC-state bekom en ingewerk. Die vlak van die steekproefresultate is daarna gelig om aan te sluit by die hoogtemerkpunte. Die steekproefgegewens gee nie die invloed van die stikliese beweging voor Januarie 1995 van die inrigtings in die voormalige TBVC-state weer nie.
6. Produksie-indekse vir die onderskeie fabriekwesesubgroep, wat in die verlede in die Bulletin van Statistiek gepubliseer is, is sedert die indekse vir Januarie 1993 gestaak. Die produksie-indekse op 'n subgroupgrondslag kan by benadering verkry word deur die waarde van verkope volgens fabriekwesesubgroep te defleer met die produksieprysindekse in statistiese vrystelling P0142.1 (getiteld Produksieprysindeks) vir die betrokke fabriekwesesubgroep.

NOTES

1. This statistical release shows indices of the physical volume of manufacturing production and the value of sales and unfilled orders, after benchmarking, according to manufacturing major groups. Both actual and seasonally adjusted figures are shown. Sales and production figures for Walvis Bay are excluded as from 1 March 1994. The former TBVC states are included.
2. The results of the 1988 and 1991 Manufacturing Censuses were used to adjust the level of the indices and the value of sales. This process is known as benchmarking. The total value of gross output of the manufacturing major groups (which represents the total value of work done by the establishments in these groups) as obtained from the respective manufacturing censuses, was deflated with appropriate subindices of the Production Price Index in order to calculate the real gross output. The latter served as benchmarks to verify or adjust the level of the monthly volume indices. The level adjustments were done on the volume indices for January of the relevant census year (e.g. the 1998 census year covers the period 1 July 1987 to 30 June 1988 and therefore the benchmarking was done on the index of January 1988).
3. The calculation of the monthly manufacturing indices is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI). The value of the manufactured products is obtained from a monthly sample survey of manufacturing establishments in the private and public sectors.
4. The 1988 Manufacturing Census provided the framework for the selection of a revised sample implemented as from January 1995. A stratified systematic sample design based on gross output was used. Establishments which commenced operations after the census have also been taken into account. The weighting factors for the combining of the production indices for the manufacturing major groups to those for total manufacturing were calculated on the basis of the net output data obtained from the 1991 Manufacturing Census.
5. The 1988 and 1991 manufacturing censuses as well as the sample survey (before 1995) did not include information of the former TBVC states. To make the time series comparable, published and unpublished information for 1988 and 1991 was obtained from Statistical offices of the former TBVC states and has been incorporated. Thereafter, the level of the sample results was raised to link up with the benchmarks. The sample data do not reflect the influence of the cyclic movement of the establishments before January 1995 in the former TBVC states.
6. Production indices for the various manufacturing subgroups that were previously published in the Bulletin of Statistics were discontinued as from the indices for January 1993. The production indices on a subgroup basis can be obtained by approximation by deflating the value of sales according to manufacturing subgroups in statistical release P0142.1 (entitled Production Price Index) with the production price indices for the relevant manufacturing subgroups.

7. Meer volledige besonderhede oor die berekeningswyse en historiese gegewens ten opsigte van die produksie-indexe volgens fabriekswese hoofgroepe en die waarde van verkope vir die periode Januarie 1987 tot Augustus 1995 is in statistiese vrystellings P3041.3 (getiteld Fabriekwesestatistieke: Indekse van die fisiese volume van fabrieksproduksie, Basis: 1990=100, Januarie 1987 tot Augustus 1995) en P3041.4 (getiteld Fabriekwesestatistieke: Waarde van verkope, Januarie 1987 tot Augustus 1995) gepubliseer.
7. More comprehensive detail on the method of calculation and historical data in respect of the production indices according to manufacturing major groups and the value of sales for the period January 1987 to August 1995 were published in statistical releases P3041.3 (entitled Manufacturing statistics: Indices of the physical volume of manufacturing production, Base: 1990=100, January 1987 to August 1995) and P3041.4 (entitled Manufacturing statistics: Value of sales, January 1987 to August 1995).
