# Statistical release

**P3041.2**

## Manufacturing: Production and sales (Preliminary)

**October 2015**

**Embargoed until:  
8 December 2015  
13:00**

**Enquiries:**

Gerda Bruwer  
Tel. (012) 310 8249

**Forthcoming issue:**

November 2015

**Expected release date**

12 January 2016

**Contents**

**Production: results for October 2015** ..... **2**

Table A – Key growth rates in the volume of manufacturing production ..... 2

Table B – Seasonally adjusted manufacturing production for the latest three months by division  
and major group (Base: 2010=100) ..... 3

Figure 1 – Volume of manufacturing production (Base: 2010=100) ..... 4

Figure 2 – Volume of manufacturing production (Base: 2010=100): year-on-year percentage change ..... 4

**Sales: results for October 2015** ..... **5**

Table C – Key growth rates in manufacturing sales at current prices ..... 5

Table D – Seasonally adjusted manufacturing sales at current prices for the latest three months by division ..... 5

**Tables** ..... **6**

Table 1 – Index of the volume of manufacturing production (Base: 2010=100) ..... 6

Table 2 – Year-on-year percentage change in the volume of manufacturing production ..... 6

Table 3 – Seasonally adjusted volume of manufacturing production ..... 6

Table 4 – Index of the volume of manufacturing production by division and major group (Base: 2010=100) ..... 7

Table 5 – Year-on-year percentage change in the volume of manufacturing production by division  
and major group (Base: 2010=100) ..... 8

Table 6 – Contribution of each division and major group to the year-on-year percentage change in the  
volume of manufacturing production (percentage points) ..... 9

Table 7 – Seasonally adjusted index of the volume of manufacturing production by division and major group  
(Base: 2010=100) ..... 10

Table 8 – Manufacturing sales at current prices (R million) ..... 11

Table 9 – Year-on-year percentage change in manufacturing sales at current prices ..... 11

Table 10 – Seasonally adjusted manufacturing sales at current prices ..... 11

Table 11 – Manufacturing sales at current prices by division and major group (R million) ..... 12

Table 12 – Year-on-year percentage change in manufacturing sales at current prices by division and  
major group ..... 13

Table 13 – Contribution of each division and major group to the year-on-year percentage change in  
manufacturing sales at current prices (percentage points) ..... 14

**Production: results for October 2015**

**Table A – Key growth rates in the volume of manufacturing production**

	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15
Year-on-year % change, unadjusted	-1,8	-0,7	5,2	-0,4	1,2	-2,1
Month-on-month % change, seasonally adjusted	-0,9	1,0	0,0	0,4	2,4	-1,7
3-month % change, seasonally adjusted <sup>1</sup>	-0,6	-1,6	-1,4	-0,4	1,4	1,6

<sup>1</sup> Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Manufacturing production decreased by 2,1% in October 2015 compared with October 2014. The largest negative contributions were made by the following divisions:

- basic iron and steel, non-ferrous metal products, metal products and machinery (-10,3% and contributing -1,9 percentage points); and
- motor vehicles, parts and accessories and other transport equipment (-6,2% and contributing -0,5 of a percentage point).

The largest positive contribution was made by the food and beverages division (3,9% and contributing 0,9 of a percentage point) – see Tables 5 and 6.

Seasonally adjusted manufacturing production decreased by 1,7% in October 2015 compared with September 2015. This followed month-on-month changes of 2,4% in September 2015 and 0,4% in August 2015 – see Table A.

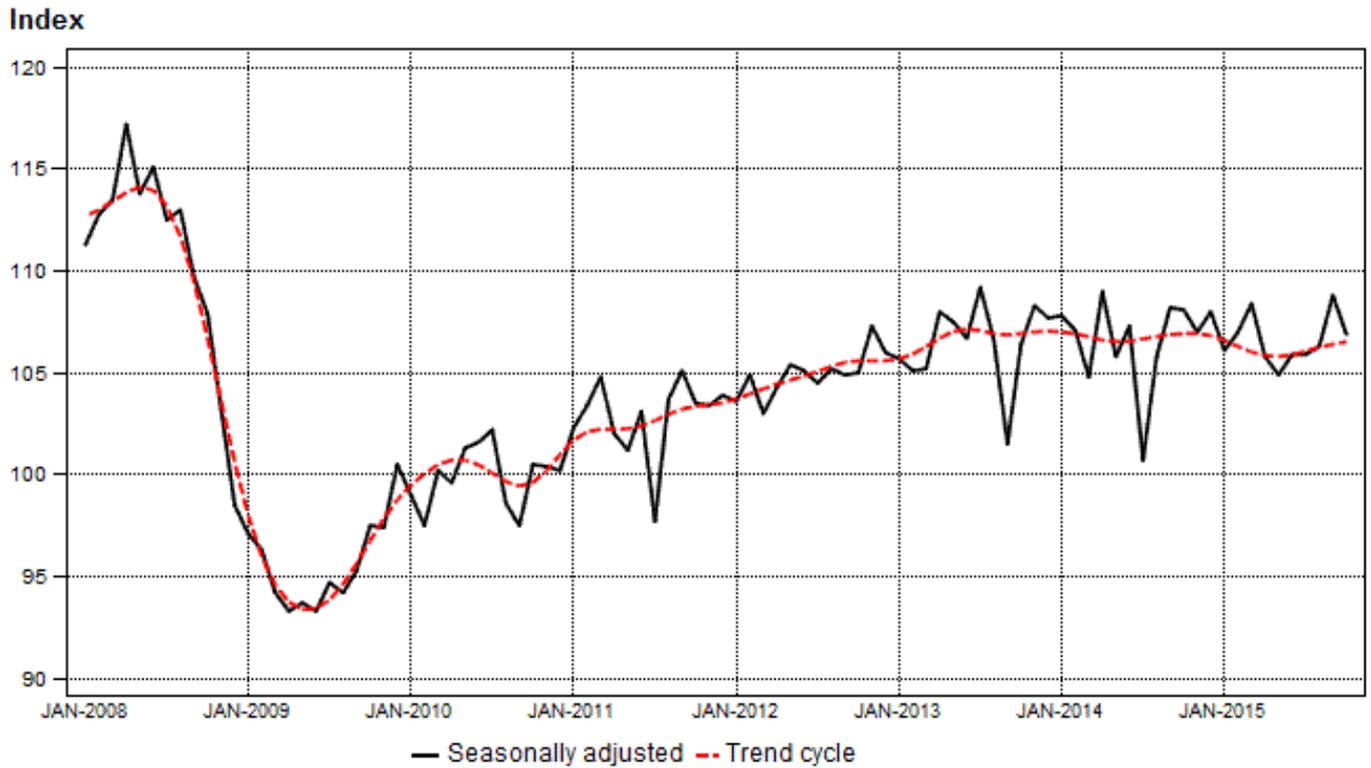

In the three months ended October 2015, seasonally adjusted manufacturing production increased by 1,6% compared with the previous three months. Eight of the ten manufacturing divisions reported positive growth rates over this period.

The main contributors to the 1,6% increase were the petroleum, chemical products, rubber and plastic products division (7,0% and contributing 1,5 percentage points) and the food and beverages division (2,9% and contributing 0,7 of a percentage point) – see Table B.

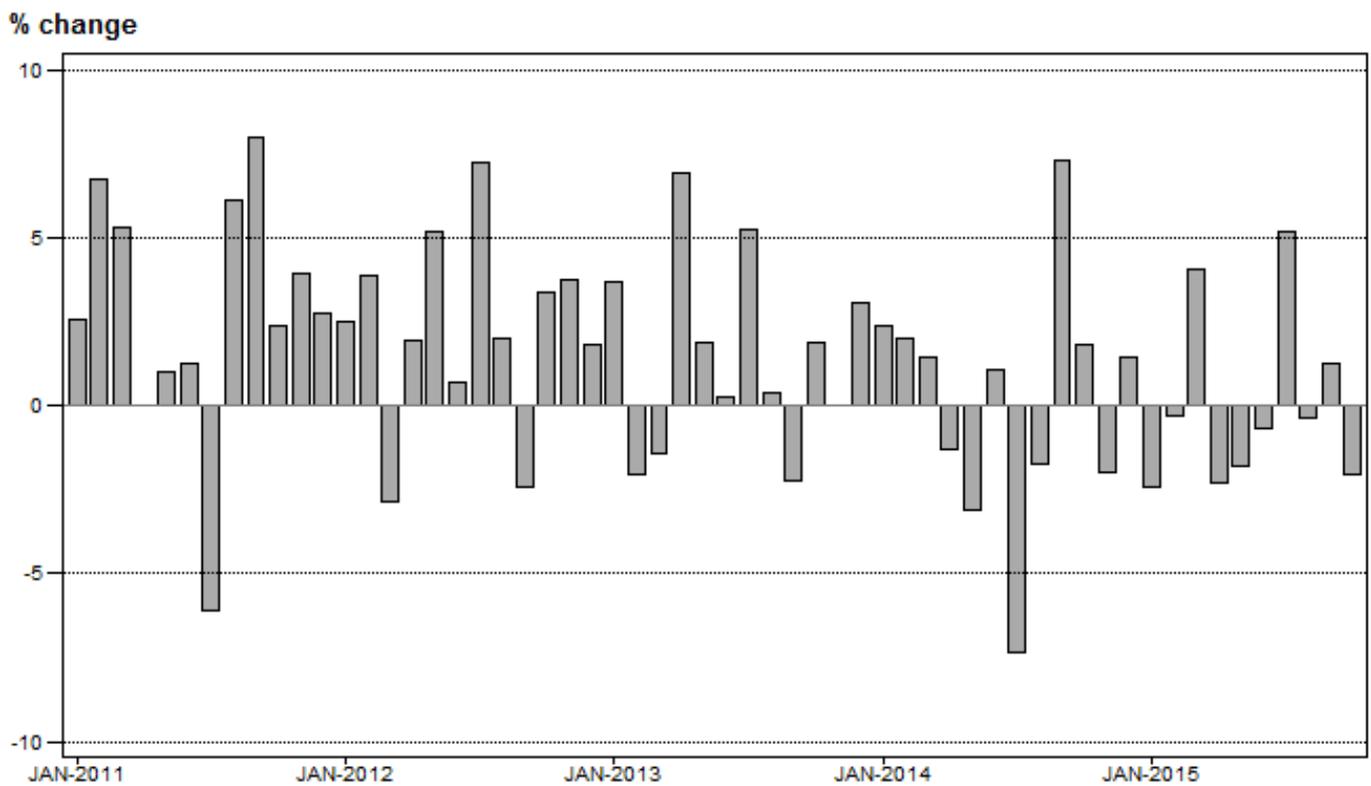

**Table B – Seasonally adjusted manufacturing production for the latest three months by division and major group (Base: 2010=100)**

Manufacturing division and major group	Weight (2012)	May – Jul 2015	Aug – Oct 2015	% change between May – Jul 2015 and Aug – Oct 2015	Contribution (% points) to the total % change
<b>Food and beverages</b>	<b>24,44</b>	<b>111,9</b>	<b>115,1</b>	<b>2,9</b>	<b>0,7</b>
Meat, fish, fruit, etc.	5,39	117,5	121,2	3,1	0,2

## Survey information

- Introduction**
- 1 Statistics South Africa (Stats SA) conducts a monthly survey of the manufacturing industry, covering manufacturing enterprises. This statistical release contains the results of a sample drawn from the business sampling frame (BSF), with enhanced coverage of South African businesses (see 4). The release contains monthly indices of the volume of manufacturing production and monthly value of sales of manufactured products by division and major group.
  - 2 In accordance with international practice, the indices are usually re-based every five years to a new base year. The current base period of the index is 2010. Both estimated and seasonally adjusted figures are presented.
  - 3 In order to improve timeliness, some information for the latest month had to be estimated due to late response. These estimates will be revised in future statistical releases as soon as information becomes available.
  - 4 Stats SA is continuously updating its BSF, based on units registered for value added tax (VAT) and income tax (IT) obtained from the South African Revenue Service (SARS).
- Purpose of the survey**
- 5 The results of the monthly manufacturing production and sales survey are used to calculate the volume of manufacturing production indices in order to estimate the gross domestic product (GDP) and its components, which in turn are used to develop and monitor government policy. These indices provide an indicator of the real level of manufacturing activity in the economy.
- Special Data Dissemination Standard of the IMF**
- 6 The data in this statistical release adhere to the Special Data Dissemination Standard (SDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data, access by the public, integrity, and quality of the disseminated data.
- Scope of the survey**
- 7 This survey covers manufacturing enterprises, i.e. those conducting activities in -
    - the manufacturing, processing, making or packing of products;
    - the slaughtering of animals, including poultry; and
    - installation, assembly, completion, repair and related work.
- Classification**
- 8 The 1993 edition of the *Standard Industrial Classification of all Economic Activities (SIC)*, Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities (ISIC)* with suitable adaptations for local conditions. Each enterprise is classified to an industry which reflects its predominant activity. Statistics in this publication are presented at SIC division (two digit) and major group (three digit) level.
- Collection rate**
- 9 The preliminary collection rate for the survey on manufacturing production and sales for October 2015 was 90,2%. The improved collection rate for September 2015 was 92,4%.
- Statistical unit**
- 10 The statistical unit for which information is compiled and published is an enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.
- Revised figures**
- 11 Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. Preliminary figures, as indicated in the relevant tables, are subject to change and when revised will not be indicated as such.

**Related publications** 12 Users may also wish to refer to the following publications available from Stats SA -

- *Bulletin of Statistics* issued quarterly; and
- *SA Statistics* issued annually.

**Rounding-off of figures** 13 Where necessary, the figures in the tables have been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

**Historical data** 14 Historical manufacturing data are available on the Stats SA webpage. Click on the following link ([Time series data](#)) to access the data electronically.

**Past publications** 15 Past manufacturing releases are available on the Stats SA webpage. Click on the following link ([Past publications](#)) to access the releases electronically.

**Technical notes**

**Survey methodology and design**

- 1 The survey is conducted monthly. Questionnaires are sent to a sample of 3 027 enterprises from a population of 45 285 manufacturing enterprises. Completed questionnaires are required to be returned to Stats SA within 10 days after the end of the reference month. Fax and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the Standard Industrial Classification (SIC) three-digit level in April 2015 from Stats SA’s business sampling frame (BSF). Strata were formed using a combination of the SIC and the measure of size classes for enterprises (see point 3 below).

The Neyman optimal allocation formula used to allocate samples to each stratum is given by a formula below:

$$n_h = \frac{N_h S_h}{\sum N_h S_h}$$

$N_h$  and  $S_h$  are the stratum population size and the stratum variance respectively.

**Class limits**

- 3 Each manufacturing major group is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to medium (size group two) and to small (size group three and four) enterprises. The total value of sales of manufactured products of large enterprises (size group one) in a major group is added to the weighted totals of size group two, three and four of that major group to reflect the total value of sales of the major group.

**Measure of size classes (Rand)**

Enterprise size	Size group	Lower limits	Upper limits
Very small	4	1 882 214	15 000 000
Small	3	15 000 001	39 000 000
Medium	2	39 000 001	153 000 000
Large	1	153 000 001	

**Sample weighting**

- 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form major group and division estimates. These procedures are consistent with international best practice.

**Index of the volume of manufacturing production**

5 The index of the volume of manufacturing production, also known as a production index, is a statistical measure of the change in the volume of production. The production index of a major group is the ratio between the volume of production of a major group in a given period and the volume of production of the same major group in the base period. The current base period is 2010. The production in the base period is set at 100.

**Calculation of production index**

6 The calculation of the monthly production indices is based on the value of sales of products and articles manufactured and change in monthly value of stocks of manufactured products, after the effect of price changes has been eliminated through deflation using appropriate indices of the production price index (PPI). For 38 of the 44 major groups in manufacturing, the value of production is calculated from the value of sales and stocks of manufactured products obtained from the monthly survey of manufacturing enterprises.

7 More direct indicators are used for the value of production of the following major groups:

- tobacco;
- coke and refined petroleum products;
- basic iron and steel products;
- basic precious and non-ferrous metal products;
- motor vehicles; and
- parts and accessories for motor vehicles.

The volume indices for these major groups are calculated on the basis of quantities. This method is used by the national statistical agencies of many other countries for petroleum products as the results are considered more satisfactory (mainly because these commodities are relatively homogeneous).

**Index weighting**

8 For indices, a weight is calculated for every major group according to the value added of the major group (i.e. output of a major group minus intermediate consumption) relative to the total value added of the manufacturing industry as a whole, based on the results of the most recent census of manufacturing, large sample survey (LSS) of the manufacturing industry or national accounts (NA) value added data. The production indices of all divisions are multiplied by the applicable weights and aggregated to produce the index for the total volume of manufacturing production. Weights between census/LSS/NA years are fixed. The table below reflects the period and the census/LSS/NA which were used as base year for the given period.

Period	Source
1998 to 2000	1996 Census of Manufacturing
2001 to 2004	2001 LSS
2005 to 2009	2005 LSS
2010 to 2015	NA

9 The weights reflect the importance of the major group/division to the total manufacturing industry. The weights change over time due to changes in the relative performance of industries, due to factors such as quality changes, changes in relative prices, and changes in customer preferences. New weights need to be calculated from time to time.

**Table E – Weights by division and major group**

Manufacturing divisions and major groups	Weights according to national accounts value added		
	2010	2011	2012 – 2015
<b>Food and beverages</b>	<b>22,08</b>	<b>23,82</b>	<b>24,44</b>

Furniture	0,94	1,05	1,08
Other manufacturing groups	2,24	3,01	2,53
<b>Total</b>	<b>100</b>	<b>100</b>	<b>100</b>

- Seasonal adjustment** 10 Seasonally adjusted estimates of all major groups are generated each month, using the X-12 Seasonal Adjustment Program developed by the US Bureau of the Census, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences, which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for manufacturing production and sales is described in more detail on the Stats SA website: [Click to Download Seasonal adjustment Manufacturing January 2015](#)
- Trend cycle** 11 The trend is the long-term pattern or movement of a time series. The X-12 Seasonal Adjustment Programme is used for smoothing seasonally adjusted estimates to estimates of the underlying trend.
- Reliability of estimates** 12 Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the manufacturing industry in South Africa. Estimates are subject to sampling and non-sampling errors.
- 13 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.
- Month-on-month percentage change** 14 The month-on-month percentage change in a variable for any given month is the change between that month and the previous month, expressed as a percentage of the latter.
- Year-on-year (annual) percentage change** 15 The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
- Index contribution (percentage points)** 16 The contribution (percentage points) of a major group or division to the total manufacturing production percentage change for a given period is calculated by multiplying the difference in the index of each major group or division by the weight of the major group or division and then dividing by the previous period total manufacturing index.
- Sales contribution (percentage points)** 17 The contribution (percentage points) of a division or major group to the percentage change in total manufacturing sales for a given period is calculated by multiplying the percentage change of each major group or division with its percentage contribution to the total sales of the previous period, divided by 100.

## Glossary

<b>Enterprise</b>	The enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.	
<b>Industry</b>	An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>1993 Standard Industrial Classification of all Economic Activities</i> , Fifth Edition, Report No. 09-90-02 of January 1993 (SIC).	
<b>Sales</b>	Sales are the total value of sales and transfers-out of all own manufactured products/articles and the amounts received for installation, erection or assembly or other services rendered.	
<b>Symbols and abbreviations</b>	BSF	Business sampling frame
	GDP	Gross domestic product
	IMF	International Monetary Fund
	ISIC	International Standard Industrial Classification
	LSS	Large sample survey
	PPI	Producer price index
	Rm	R million
	SIC	Standard Industrial Classification of all Economic Activities
	SARS	South African Revenue Service
	SDDS	Special Data Dissemination Standard
	Stats SA	Statistics South Africa
	VAT	Value added tax
	*	Revised figures

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

An advance release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za)

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Mbombela  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via online services. For more details about our electronic data services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
