Head: Central Statistical Service

SUMMARY OF FINDINGS

BUILDING PLANS PASSED

Since the second quarter of 1996 the total value of building plans passed showed a slight downward trend. This sluggish performance in the building industry is mainly due to a decline in the value of residential building plans passed.

The total value of building plans passed during the first four months of 1997 amounted to R5 697,0 million (at current prices) - an increase of only 0,7% (+R41,1 million) compared with the same period of 1996. A noticeable increase of 18,0% (+R279,3 million) occurred in respect of non-residential buildings. However, this increase was counteracted by decreases in the value of plans passed for residential buildings (-7,3% or R201,1 million) and additions and alterations (-2,7% or R37,1 million).

The total value of plans passed for non-residential buildings in April 1997 amounted to R573,5 million. The largest categories were office space (R184,0 million) and industrial and warehouse space (R145,9 million). The following eight local authorities accounted for almost two thirds of the R573,5 million, namely Sandton (R128,6 million), Pretoria (R64,0 million), Johannesburg (R52,0 million), Kempton Park (R33,5 million), Durban (R32,8 million), Centurion (R23,0 million), Boksburg (R18,4 million) and Pietersburg (R18,2 million).

The total value of plans passed for residential buildings and additions and alterations in

April

1997 was R753,3 million and R355,3 million respectively. 61,1% (R460,0 million) of the total value of residential building plans passed was for dwelling-houses, 17,3% (R130,3 million) for townhouses, 14,7% (R111,0 million) for other residential buildings and 6,9% (R52,0 million) for flats. Of the total number of plans passed (4 123), 2 336 were for dwelling-houses smaller than 81 square meters.

The total value of buildings completed for the first four months of 1997 was R3 519,1 million (at current prices). This represents an increase of 14,7% (+R450,0 million) compared with the same period in 1996. The largest provincial contributors to the increase were Gauteng (+14,6% or R195,9 million), KwaZulu-Natal (+24,2% or R125,1 million) and the Western Cape (+15,9% or R106,1 million).

The total value of non-residential buildings completed for the first four months of 1997 was R1069,7 million. This is R416,7 million more than for the same period in 1996. The largest increases were reported by Gauteng (+R357,0 million) and KwaZulu-Natal (+R55,8 million).

The increase of R357,0 million in Gauteng can mainly be attributed to increases in the value of office space completed in Johannesburg (+R127,1 million), Pretoria (+R75,6 million) and Sandton (+R62,7 million).

1. GENERAL NOTES

The data in the tables relate to building activities financed by the public and private sectors (Tables 1.1 and 1.2) according to provinces as well as those financed only by the private sector (Tables 2 to 11.3). The data for activities financed by the private sector are given according to provinces (Tables 2.1 and 2.2) and according to the 22 principal municipalities, their surrounding areas and smaller urban areas. In the case of building activities financed by the private sector, the monthly survey represents approximately 80 percent of total building activities financed by the private sector, which also includes public corporations.

The various areas, as well as the method of computation of values at constant 1990 prices,
are described in the Bulletin of Statistics.

Statistics on dwelling-houses smaller than 81m² are shown in Table 9.
The figures for the latest month are subject to revision.

A survey of buildings completed is undertaken each year and covers all those areas not included in this monthly survey (including those in the former self-governing territories and trust areas). The data are published in the report series 5011, building plans passed and buildings completed.

2. INCLUSION OF FORMER TBVC STATES

As from January 1995 selected local authorities of the former TBVC states are included. Comparisons with the previous years must thus be handled with circumspection. The contribution of selected local authorities in the former TBVC states to the total value of building plans passed amounted to 0,8% (R144,5 million) during 1995. Contributors to this increase are local authorities in North West (R83,7 million), Eastern Cape (R47,7 million) and the Northern Province (R13,1 million).

3. DEFINITIONS

3.1 Blocks of flats are high-density housing consisting of a number of self-contained dwelling-units (including at least one living-room together with a kitchen and bathroom), conjoined to similar units in one building.

3.2 Townhouses are multiple, medium-density dwelling-units and include cluster housing, group housing, simplexes, duplexes, triplexes and other similar dwelling-units which are usually grouped together, with one level of each unit on ground level.

4. SYMBOLS USED

* = revised

m² = construction areas in square metre
