Explanatory notes

Introduction

- 1 Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. This publication contains aggregated data for the twelve months of the calendar year 2020. The survey collects detailed information of building plans passed and buildings completed reported for:
- residential buildings;
 - non-residential buildings; and
 - additions and alterations.

The figures obtained from municipalities do not include the bulk of low-cost dwelling-houses. According to some municipalities they are not always notified about subsidised low-cost housing projects being executed in their area of jurisdiction.

Scope of the survey

- 2 This survey covers metropolitan municipalities and large local municipalities conducting activities for the private sector regarding:
- approval of building plans; and
 - final inspection of completed buildings and issuing of occupation certificates.

Classification

- 3 Building activities are classified in Division 5 according to the 1993 edition of the *Standard Industrial Classification of all Economic Activities (SIC), Fifth Edition, Report No. 09-90-02*. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities (ISIC)* with suitable adaptations for local conditions.

Statistical unit

- 4 The statistical unit for the collection of information is a municipality.

Survey methodology and design

- 5 Stats SA conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed. An annual survey of the remaining municipalities is conducted regarding buildings completed. The monthly survey represents approximately 88 per cent of the total value of buildings completed. Information is collected by email, telephone and visits.

Comparison between building plans passed and buildings completed

- 6 No direct comparison can be made between building plans passed and buildings completed for the following reasons:
- an unknown number of building plans are passed and afterwards not executed;
 - if building operations have not commenced within the first year after approval, building plans are resubmitted;
 - the time-lag between the date of passing of a building plan and the date of completion of the building varies considerably; and
 - according to municipalities, final inspections of completed buildings are not always executed and therefore not recorded as completed.

Reliability of estimates

- 7 Inaccuracies may occur because of imperfections in reporting by municipalities. Every effort is made to reduce errors to a minimum by carefully editing, evaluating and querying of data.

Collection rate

- 8 The collection rate for the year 2020 was 84,7%.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are only published in English.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
