Notes

The information in this statistical release is based on a monthly sample survey of retailers in the Republic of South Africa (the former TBVC sates are included). The results of the sample survey are raised to present the total of all retailers.

Total retail trade sales by type of merchandise and selected area are shown in Table 4. The survey is conducted on a firm basis and firms are requested to submit their total sales, distributed by type of merchandise and by selected area. The information in Table 4 is therefore imputations based on the assumption that the merchandise distribution of a firm's sales is the same for each selected area in which it trades.

Retail trade sales at current prices include VAT.

The value of sales at constant 1990 prices is obtained by deflating the sales value at current prices by means of sub-indices of the consumer price index on the base 1990=100.

The fifth edition of the Standard Industrial Classification has been implemented retrospectively.

This resulted in the businesses grocers and other dealers in foodstuffs, general department stores and general dealers currently being classified as general dealers.

In order to improve timeliness, some information for the current month has been estimated due to late response. This information for the latest month is therefore preliminary and subject to revision.
