EXPLANATORY NOTES

The information in this statistical release is based on a monthly sample survey of retailers in the Republic of South Africa. The results of the sample survey are raised to represent the total of all retailers.

Total retail trade sales by type of merchandise and selected area is shown in Table 4. The survey is conducted on a firm basis and firms are requested to submit their total sales, distributed by type of merchandise and by selected area. The information in Table 4 therefore represents imputations based on the assumption that the merchandise distribution of a firm's sales is the same for each selected area in which it trades.

Retail trade sales at current prices include VAT.

The value of sales at constant 1995 prices is obtained by deflating the sales value at current prices by means of sub-indices of the Consumer Price Index on the base 1995=100.

The fifth edition of the Standard Industrial Classification has been implemented retrospectively, resulting in

the businesses 'grocers and other dealers in foodstuff', 'general department stores' and 'general dealers' being reported as general dealers.

In order to improve timeliness, some information for the current month has been estimated due to late response. The information for the latest month is therefore preliminary and subject to revision.

Stats SA is currently redesigning this survey, including the questionnaire. Any inputs regarding the new questionnaire will be appreciated.
