## Sales at constant 2019 prices: results for May 2024

**Table A – Key growth rates in retail trade sales at constant 2019 prices**

	Dec-23	Jan-24	Feb-24	Mar-24	Apr-24	May-24
Year-on-year % change, unadjusted	3,2	-2,0	-0,7	2,3	0,7	0,8
Month-on-month % change, seasonally adjusted	1,3	-3,2	0,8	1,0	0,5	-0,7
3-month % change, seasonally adjusted <sup>1</sup>	0,0	0,0	-0,3	-1,1	-0,1	0,6

<sup>1</sup> Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Measured in real terms (constant 2019 prices), retail trade sales increased by 0,8% year-on-year in May 2024. The largest positive contributors to this increase were:

- general dealers (1,7% and contributing 0,7 of a percentage point);
- retailers in food, beverages and tobacco in specialised stores (4,4% and contributing 0,3 of a percentage point); and
- retailers in household furniture, appliances and equipment (6,2% and contributing 0,3 of a percentage point).

Retailers in textiles, clothing, footwear and leather goods was the only negative contributor (-4,5% and contributing -0,9 of a percentage point) – see Tables 5 and 6.

Seasonally adjusted retail trade sales decreased by 0,7% in May 2024 compared with April 2024. This followed month-on-month changes of 0,5% in April 2024 and 1,0% in March 2024.

**Table B – Retail trade sales at constant 2019 prices for the latest three months by type of retailer**

Type of retailer	Mar – May 2023 (R million)	Weight (%)	Mar – May 2024 (R million)	% change between Mar – May 2023 and Mar – May 2024	Contribution (% points) to the total % change
General dealers	119 637	43,1	123 107	2,9	1,2
Food, beverages and tobacco in specialised stores	21 464	7,7	21 790	1,5	0,1
Pharmaceuticals and medical goods, cosmetics and toiletries	21 129	7,6	21 282	0,7	0,1
Textiles, clothing, footwear and leather goods	50 232	18,1	49 578	-1,3	-0,2
Household furniture, appliances and equipment	12 210	4,4	12 909	5,7	0,3
Hardware, paint and glass	22 177	8,0	21 763	-1,9	-0,2
All other retailers	30 819	11,1	30 796	-0,1	0,0
<b>Total</b>	<b>277 668</b>	<b>100,0</b>	<b>281 225</b>	<b>1,3</b>	<b>1,3</b>

Retail trade sales increased by 1,3% in the three months ended May 2024 compared with the three months ended May 2023. The largest positive contributor to this increase was general dealers (2,9% and contributing 1,2 percentage points) – see Table B.

**Table C – Seasonally adjusted retail trade sales at constant 2019 prices for the latest three months by type of retailer**

Type of retailer	Dec 2023 – Feb 2024 (R million)	Weight (%)	Mar – May 2024 (R million)	% change between Dec 2023 – Feb 2024 and Mar – May 2024	Contribution (% points) to the total % change
General dealers	125 619	43,7	126 062	0,4	0,2
Food, beverages and tobacco in specialised stores	22 595	7,9	22 502	-0,4	0,0
Pharmaceuticals and medical goods, cosmetics and toiletries	21 063	7,3	21 159	0,5	0,0
Textiles, clothing, footwear and leather goods	51 181	17,8	51 590	0,8	0,1
Household furniture, appliances and equipment	13 488	4,7	13 675	1,4	0,1
Hardware, paint and glass	22 512	7,8	22 656	0,6	0,1
All other retailers	30 909	10,8	31 330	1,4	0,1
<b>Total</b>	<b>287 364</b>	<b>100,0</b>	<b>288 974</b>	<b>0,6</b>	<b>0,6</b>

Seasonally adjusted retail trade sales increased by 0,6% in the three months ended May 2024 compared with the previous three months. The largest contributor to the increase was general dealers (0,4% and contributing 0,2 of a percentage point) – see Table C.

**Figure 1 – Retail trade sales at constant 2019 prices**

**Figure 2 – Retail trade sales at constant 2019 prices: year-on-year percentage change**

## Sales at current prices: results for May 2024

**Table D – Key growth rates in retail trade sales at current prices**

	Dec-23	Jan-24	Feb-24	Mar-24	Apr-24	May-24
Year-on-year % change, unadjusted	8,5	3,0	3,8	6,2	4,1	4,1
Month-on-month % change, seasonally adjusted	1,2	-1,3	0,5	0,7	0,4	-0,3
3-month % change, seasonally adjusted <sup>1</sup>	1,1	1,8	1,5	0,7	0,6	0,7

<sup>1</sup> Percentage change between the previous 3 months and the 3 months ending in the month indicated.

**Table E – Retail trade sales at current prices for the latest three months by type of retailer**

Type of retailer	Mar – May 2023 (R million)	Weight (%)	Mar – May 2024 (R million)	% change between Mar – May 2023 and Mar – May 2024	Contribution (% points) to the total % change
General dealers	150 238	45,8	162 233	8,0	3,7
Food, beverages and tobacco in specialised stores	27 302	8,3	28 436	4,2	0,3

## Explanatory notes

- Introduction** 1 Statistics South Africa (Stats SA) conducts a monthly survey of the retail trade industry, covering retail enterprises (see point 3 below). This survey is based on a sample drawn from Stats SA's 2023 statistical business register (SBR) that contains businesses registered for value-added tax (VAT). Published retail trade sales estimates include VAT.
- Purpose of the survey** 2 The results of the monthly retail trade sales survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
- Scope of the survey** 3 This survey covers retail enterprises according to the following types of retailers:
- general dealers:
    - retail trade in non-specialised stores with food, beverages and tobacco predominating; and
    - 'other' retail trade in non-specialised stores.
  - retailers in food, beverages and tobacco in specialised stores:
    - retailers in fresh fruit and vegetables;
    - retailers in meat and meat products;
    - retailers in bakery products;
    - retailers in beverages;
    - retailers in tobacco; and
    - retailers in 'other' food in specialised stores.
  - retailers in pharmaceutical and medical goods, cosmetics and toiletries;
  - retailers in textiles, clothing, footwear and leather goods:
    - retailers in men's and boys' clothing;
    - retailers in ladies', girls' and infants' clothing;
    - general outfitters; and
    - retailers in footwear.
  - retailers in household furniture, appliances and equipment;
  - retailers in hardware, paint and glass; and
  - all 'other' retailers:
    - retailers in reading matter and stationery;
    - retailers in jewellery, watches and clocks;
    - retailers in sport goods and entertainment requisites;
    - retailers in 'other' specialised stores;
    - repair of personal and household goods;
    - retail trade in second-hand goods in stores; and
    - retail trade not in stores.
- Classification** 4 The 1993 edition of the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of All Economic Activities* (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to the industry which reflects its predominant activity. Statistics in this publication are presented at SIC group (four digit) level.
- Collection rate** 5 The preliminary collection rate for the survey on retail trade sales for May 2024 was 73,9%. The revised collection rate for April 2024 was 78,9%.

**Statistical unit** 6 The statistical unit for which information is compiled and published is the enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

**Revised figures** 7 Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy. It is important to note that seasonally adjusted figures are revised monthly.

Statistical release	Reason for revision	Period subject to revision
May-24	Additional information from respondents	Apr-24
Jun-24	Additional information from respondents	May-24
Jul-24	Additional information from respondents New sample	Jan-02 - Jun-24
Aug-24	Additional information from respondents	Jul-24
Sep-24	Additional information from respondents	Aug-24
Oct-24	Additional information from respondents	Sep-24
Nov-24	Additional information from respondents	Oct-24
Dec-24	Additional information from respondents	Nov-24
Jan-25	Additional information from respondents	Dec-24
Feb-25	Additional information from respondents	Jan-25
Mar-25	Additional information from respondents	Feb-25
Apr-25	Additional information from respondents	Mar-25
New weights for retail deflators in 2025/26 - periodic, approximately four- to five-year intervals		
New base year in 2027/28 - periodic, approximately four- to five-year intervals

**Technical notes**

**Survey methodology and design**

- 1 The survey is conducted on a monthly basis. Questionnaires are sent to a sample of 3 038 enterprises from a population of 22 677 enterprises. Completed questionnaires are required to be returned to Stats SA within ten days after the end of the reference month. Fax, email and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the SIC four-digit level in April 2023 from Stats SA’s statistical business register (SBR). Strata were formed using a combination of the Standard Industrial Classification and the measure of size classes for enterprises (see point three below).

The Neyman optimal allocation formula given below was used to allocate samples to each stratum:

$$n_h = n * ( N_h * S_h ) / [ \sum ( N_i * S_i ) ] .$$

Neyman allocation formula not only allocates sample sizes to each stratum, but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata did not exceed 8,0%.

**Class limits**

- 3 The retail sampling frame is divided into four size groups. All large and medium enterprises (size groups one and two) are completely enumerated. Simple random sampling is applied to size groups three and four (small and very small) enterprises. The total value of sales of the large and medium enterprises (size groups one and two) is added to the weighted totals of size groups three and four to reflect the total value of sales.

**Measure of size classes (Rand)**

Enterprise size	Size group	Lower limit	Upper limit
Very small	4	1 461 520	8 000 000
Small	3	8 000 001	38 000 000
Medium	2	38 000 001	78 000 000
Large	1	78 000 001	

**Sample weighting**

- 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form group estimates. These procedures are consistent with international best practice.

**Seasonal adjustment**

- 5 Seasonally adjusted estimates are generated each month using the X-12 Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series, even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for retail trade sales is described in more detail on the Stats SA website: [Click to download seasonal adjustment retail trade sales December 2022.](#)

**Trend cycle**

- 6 The trend is the long-term pattern or movement of a time series. The X-12 Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimate the underlying trend cycle.

- Constant prices**
- 7** For January 2002 to December 2007 retail trade sales at constant prices were calculated using the consumer price index (CPI) for goods, excluding petrol and purchases of vehicles, for all urban areas to deflate total sales at current prices. From January 2008 onwards total retail trade sales at constant prices are obtained by adding up the deflated sales by type of retailer.
- 8** Retail trade sales at constant prices by type of retailer are obtained by deflating estimated sales at current prices by the relevant weighted price index. To obtain total retail trade sales at constant prices, estimates of the deflated sales for each type of retailer are aggregated.
- Reliability of estimates**
- 9** Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the retail industry in South Africa. Estimates are subject to sampling and non-sampling errors.
- 10** Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.
- Relative standard error**
- 11** One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.
- Estimates of total retail trade sales within 95% confidence limits – May 2024**
- |                    | Lower limit<br>(R million) | Sales<br>(R million) | Upper limit<br>(R million) | Relative<br>standard error<br>(RSE) (%) |
|--------------------|----------------------------|----------------------|----------------------------|---|
| Retail trade sales | 112 467                    | 115 694              | 118 921                    | 1,4                                     |
- Month-on-month percentage change**
- 12** The month-on-month percentage change in a variable for any given month is the change between that month and the previous month, expressed as a percentage of the latter.
- Year-on-year percentage change**
- 13** The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
- Contribution (percentage points)**
- 14** The contribution (percentage points) to the year-on-year percentage change for any given period is calculated by multiplying the percentage change of each type of retailer by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of retailer to total retail trade sales in the corresponding period of the previous year.

## Glossary

<b>Enterprise</b>	An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities.	
<b>Industry</b>	An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts</i> (SNA) in the same way as in the <i>Standard Industrial Classification of All Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02 of January 1993.	
<b>Retail trade</b>	Retail trade includes the resale (sale without transformation) of new and used goods and products to the general public for household use.	
<b>Retailer</b>	A retailer is an enterprise deriving more than 50% of its turnover from sales of goods to the general public for household use.	
<b>Symbols and abbreviations</b>	CPI	Consumer price index
	GDP	Gross domestic product
	ISIC	International Standard Industrial Classification
	SARS	South African Revenue Service
	SBR	Statistical Business Register
	SIC	Standard Industrial Classification of All Economic Activities
	SNA	System of National Accounts
	Stats SA	Statistics South Africa
	VAT	Value-added tax
	*	Revised figures

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

A release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za).

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, Qonce  
Central Regional Library, Polokwane  
Central Reference Library, Mbombela  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via online services. For more details about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can also visit us on the internet at: [www.statssa.gov.za](http://www.statssa.gov.za).
