Retail trade sales November 2003

Co-operation between Statistics South Africa (Stats SA), the citizens of the country, the private sector and government institutions is essential for a successful statistical system. Without continued co-operation and goodwill, the timely release of relevant and reliable official statistics will not be possible.

Stats SA publishes approximately three hundred different releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally, but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Embargoed until:

4 February 2004 11:00

NB The January 2004 release on retail trade sales will be published on data from the new sample.

The detail of information published may not necessarily be the same as in this publication.

Key figures as at the end of November 2003

Actual estimates	November 2003		% change between September 2002 to November 2002 and September 2003 to November 2003	% change between January 2002 to November 2002 and January 2003 to November 2003		
Retail trade sales at current prices (R million)	21 198,9	+10,2	+10,1	+10,6		
Retail trade sales at constant 1995 prices (R million)	13 909,0	+9,5	+8,5	+5,0		

Seasonally adjusted estimates	November 2003	% change between October 2003 and November 2003	% change between June 2003 to August 2003 and September 2003 to November 2003
Retail trade sales at current prices (R million)	20 349,2	+1,8	+3,5
Retail trade sales at constant 1995 prices (R million)	13 231,6	+2,1	+3,3

Key findings as at the end of November 2003

Real retail trade sales reflect an increase

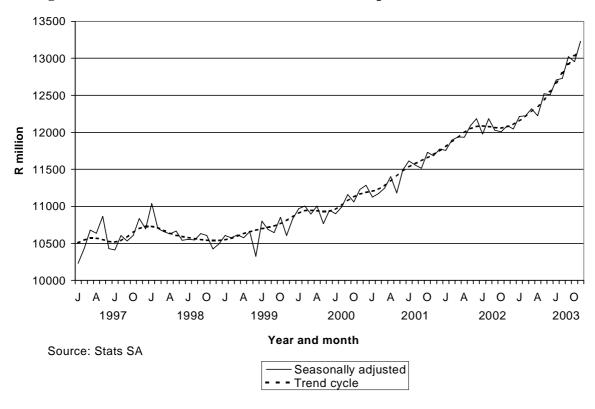

Real retail trade sales (at constant 1995 prices) for November 2003 reflected an increase of 9,5% compared with November 2002.

Furthermore, real retail trade sales (at constant 1995 prices) for the first eleven months of 2003 reflected an increase of 5,0% compared with the first eleven months of 2002. Real retail trade sales for the three months ended November 2003 increased by 8,5% compared with the three months ended November 2002. Seasonally adjusted real retail trade sales for the three months ended November 2003 increased by 3,3% compared with the three months ended August 2003.

The major contributors to the 5,0% increase in real retail trade sales for the first eleven months of 2003 compared with the first eleven months of 2002 were perishable and processed food products (contributing +0.9 of a percentage point), followed by footwear for men, ladies and children (contributing +0.8 of a percentage point) and men's and boys' clothing and accessories (contributing +0.7 of a percentage point).

Cash sales comprised 76,9% of total sales for November 2003. This is 0,4 of a percentage point higher than the 76,5% for November 2002. Hire purchases as a percentage of total sales decreased by 0,2 of a percentage point (from 9,9% to 9,7%) and other credit sales as a percentage of total sales decreased by 0,1 of a percentage point (from 13,6% to 13,5%).

Explanatory notes

Introduction

- 1 Statistics South Africa (Stats SA) conducts a monthly survey of the retail trade industry covering private retail trade enterprises.
- 2 The statistical release contains information regarding -
 - actual and seasonally adjusted values of retail trade sales (including value added tax (VAT)) according to type of business at current prices as well as at constant 1995 prices;
 - actual and seasonally adjusted values of retail trade sales (including VAT) according to type of merchandise at current prices as well as at constant 1995 prices;
 - actual values of retail trade sales (including VAT) at current prices according to province; and
 - actual and seasonally adjusted values of cash sales, instalment sale transactions and other credit sales (including VAT) at current prices.

Scope of the survey

- 3 The survey of retail trade sales covers a sample of retail trade enterprises. The survey collects information on the total sales of all retail trade branches from each enterprise in the sample. This survey includes -
 - butchers;
 - general dealers;
 - bottle stores;
 - dealers in clothing, footwear and textiles;
 - dealers in furniture and household requisites;
 - bookstores and stationers;
 - jewellers;
 - · chemists; and
 - dealers in miscellaneous goods.

Classification

4 The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of all Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in table 1 of this publication are presented at SIC subgroup level (5 digit level). Each statistical unit is classified to the type of business which reflects the predominant activity of the enterprise.

Statistical unit

5 The statistical unit for this survey is an enterprise. An enterprise is a legal entity consisting of one or more branches, including the head office, but excluding holding or subsidiary companies. Data are only collected for those branches of the enterprise that are predominately engaged in the retail trade industry.

Survey methodology and design

- All statistical units are stratified by type of business according to SIC and measure of size, where measure of size is the turnover of the enterprise. All large enterprises (size category one cases) are completely enumerated. For medium size enterprises (size category two) and small enterprises (size category three), samples are drawn by systematically selecting enterprises with equal probability. The results of the sample survey are raised to represent total retail trade sales in South Africa.
- 7 The survey is collected by mail each month from a sample of approximately 1 600 retail trade enterprises. Questionnaires have to be returned to Stats SA within 10 days after the end of the month concerned. Fax and telephone reminders are used to follow up non-respondents.

Seasonal adjustment

- 8 Seasonally adjusted estimates of retail trade sales are generated each month, using the X-11 Seasonal Adjustment Program developed by US Bureau of the Census Economic Research and Analyses Division, 1968.
- 9 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour.

Trend cycle

10 The trend cycle is a long-term pattern or movement of a time series. The X-11 Seasonal Adjustment Program is used for smoothing seasonally adjusted data.

Reliability of estimates

- 11 Data presented in this publication are based on information obtained from a sample of enterprises and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all retail trade enterprises in South Africa.
- 12 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in collection and processing of the data. Inaccuracies of this kind are referred to as nonsampling error. Every effort is made to reduce non-sampling error to a minimum by careful designing of the questionnaire, pilot studies, editing of data and efficient operating procedures.

Constant price estimates of retail trade sales

13 The value of retail trade sales at constant prices measures the retail trade sales in terms of ruling prices in a specific base year. The current base year for retail trade sales is 1995 = 100.

Glossary

Branch A branch is defined as the smallest economic unit which operates as a separate entity for

which comprehensive financial records are kept.

Enterprise An enterprise is a legal entity consisting of one or more branches including the head office,

but excluding holding or subsidiary companies.

Instalment sales Instalment sales are credit sales on conditions which provides for the repayment of the

principal, together with the interest, by regular instalments.

Real retail trade sales Real retail trade sales figures represent the estimated total sales of merchandise in the retail

trade sector, measured at constant prices (i.e. at the price ruling in a specific base year).

Reference month Reference month for the survey refers to one calendar month.

Retail trade Retail trade is the resale (sale without transformation) of new and used goods and products to

the general public for household use.

Retailer A retailer is an enterprise deriving more than 50% of its turnover from sales of goods to the

general public for household use.

General information

Stats SA publishes approximately 300 different releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
