Sales at current prices: results for September 2014

Table A – Key growth rates in motor trade sales at current prices

	Apr-14	May-14	Jun-14	Jul-14	Aug-14	Sep-14
Year-on-year % change, unadjusted	-0,9	-0,8	6,8	3,7	1,7	8,1
Month-on-month % change, seasonally adjusted	1,0	-0,8	2,6	1,3	-0,4	1,3
3-month % change, seasonally adjusted 1/	1,0	0,6	1,0	1,9	3,1	2,9

1/ Percentage change between the previous 3 months and the 3 months ending in the month indicated.

Measured in nominal terms (current prices), motor trade sales increased by 8,1% year-on-year in September 2014. The highest annual growth rates were recorded for workshop income (18,1%) and sales of accessories (14,7%) – see Table 5.

Seasonally adjusted motor trade sales increased by 1,3% in September 2014 compared with August 2014. This followed month-on-month changes of -0,4% in August 2014 and 1,3% in July 2014.

Seasonally adjusted motor trade sales increased by 2,9% in the third quarter of 2014 compared with the previous quarter.

Table B – Motor trade sales at current prices for the latest three months by type of activity

Type of activity	Jul – Sep 2013 (R million)	Weight	Jul – Sep 2014 (R million)	% change between Jul – Sep 2013 and Jul – Sep 2014	Contribution (% points) to the total % change
New vehicle sales	40 811	29,6	40 981	0,4	0,1
Used vehicle sales	23 444	17,0	24 817	5,9	1,0
Workshop income	8 504	6,2	9 372	10,2	0,6
Income from the sales of accessories	22 547	16,3	24 139	7,1	1,2
Income from fuel sales	37 987	27,5	39 739	4,6	1,3
Income from convenience store sales 1/	4 709	3,4	5 068	7,6	0,3
Total	138 003	100,0	144 119	4,4	4,4

1/ Includes 'other' sales and trading income.

Motor trade sales increased by 4,4% in the third quarter of 2014 compared with the third quarter of 2013. The main contributors to this increase were:

- fuel sales (4,6% and contributing 1,3 percentage points);
- sales of accessories (7,1% and contributing 1,2 percentage points); and
- used vehicle sales (5,9% and contributing 1,0 percentage point) – see Table B.

Table 6 – Contribution of each type of activity to the year-on-year percentage change in motor trade sales at current prices

Type of activity	Apr-14	May-14	Jun-14	Jul-14	Aug-14	Sep-14
New vehicle sales	-2,1	-2,6	0,4	-0,6	-1,3	2,4
Used vehicle sales	-0,1	-0,2	1,2	1,0	0,4	1,6
Workshop income	0,1	0,2	0,4	0,4	0,5	1,1
Income from the sales of accessories	-0,7	-0,1	1,5	0,5	0,6	2,4
Income from fuel sales	1,9	1,9	3,3	2,2	1,2	0,4
Income from convenience store sales 1/	0,1	0,0	0,1	0,2	0,3	0,3
Total	-0,9	-0,8	6,8	3,7	1,7	8,1

1/ Includes 'other' sales and trading income.

Survey information

Introduction	1	Statistics South Africa (Stats SA) conducts a monthly survey covering enterprises in the motor trade industry (see 4 below). This survey is based on a sample drawn from Stats SA's 2014 business sampling frame (BSF) that contains businesses registered at the South African Revenue Service (SARS) for value added tax (VAT). Stats SA continuously updates its BSF, which is linked to the SARS administrative data.
	2	In order to improve timeliness, some information for the latest month had to be estimated due to late response. These estimates will be revised in future statistical releases as soon as information becomes available. Published motor trade sales estimates exclude VAT.
Purpose of the survey	3	The results of the monthly motor trade sales survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
Scope of the survey	4	The survey collects information from a sample of enterprises in South Africa that are predominantly involved in motor trade. These enterprises include: <ul style="list-style-type: none">• motor vehicle dealers, filling stations and workshops;• motor cycle dealers;• spares and accessories;• tyre dealers;• automotive electricians;• radiator repairs;• panel beaters and spray painters;• 'other' specialised motor repair services; and• 'other' motor trade.
Classification	5	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities</i> (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to the industry which reflects its predominant activity. Statistics in this publication are presented at SIC group (four digits) level.
Collection rate	6	The preliminary collection rate for the survey on motor trade sales for September 2014 was 82,1%. The improved collection rate for August 2014 was 86,2%.
Statistical unit	7	The statistical unit for which information is compiled and published is the enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its sales and service activities.
Revised figures	8	Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. Preliminary figures, as indicated in the relevant tables, are subject to change and when revised will not be indicated as such.
Related publications	9	Users may also refer to the following publications available from Stats SA: <ul style="list-style-type: none">• <i>Bulletin of Statistics</i> issued quarterly;• <i>Stats in Brief</i> issued annually; and• <i>South African Statistics</i> issued annually.

Seasonal adjustment	5	<p>Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the US Bureau of the Census, 1968. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for motor trade sales is described in more detail on the Stats SA website at:</p> <p>Click to Download Seasonal adjustment Motor Trade Sales June 2014</p>
Trend cycle	6	<p>The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimates of the underlying trend cycle.</p>
Reliability of estimates	7	<p>Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the motor trade industry in South Africa. Estimates are subject to sampling and non-sampling errors.</p>
	8	<p>Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.</p>
Month-on-month percentage change	9	<p>The month-on-month percentage change in a variable for any given month is the change between that month and the previous month, expressed as a percentage of the latter.</p>
Year-on-year percentage change	10	<p>The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.</p>
Contribution (percentage points)	11	<p>The contribution (percentage points) to the year-on-year percentage change is calculated by multiplying the percentage change of each type of activity by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of activity to total motor trade sales in the corresponding period of the previous year.</p>

Glossary

Enterprise

An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities.

Industry

An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the *System of National Accounts (SNA)* in the same way as in the *Standard Industrial Classification of all Economic Activities (SIC)*, Fifth Edition, Report No. 09-90-02 of January 1993.

Symbols and abbreviations

BSF	Business sampling frame
GDP	Gross domestic product
ISIC	International Standard Industrial Classification
IT	Income tax
Rm	Rand million
SIC	Standard Industrial Classification of all Economic Activities
SARS	South African Revenue Service
Stats SA	Statistics South Africa
VAT	Value added tax

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

An advance release calendar is disseminated on www.statssa.gov.za

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more detail about our electronic services, contact Stats SA's user information service at (012) 310 8600.
