Key findings as at the end of August 2009

Table A - Key estimates as at the end of August 2009

Estimates per type of income	August 2009 (R million)	% change between August 2008 and August 2009	% change between June to August 2008 and June to August 2009	% change between January to August 2008 and January to August 2009
Income from food sales	2 436,2	-1,7	1,3	3,7
Income from bar sales	275,4	-7,9	-6,0	-7,7
Other income	41,9	1,2	-8,9	-15,1
Total income 1/	2 753,5	-2,3	0,4	2,1

1/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

Total income for food and beverages decreases for August 2009

The total income generated by the food and beverages industry for August 2009 decreased by -2,3% compared with August 2008. The decrease was due to decreases in income from food sales (-1,7% and contributing -1,5 percentage points) and income from bar sales (-7,9% and contributing -0,8 of a percentage point) (see Table B).

Table B - Contribution by type of income to the percentage change in total income for August 2009 compared with August 2008

Estimates per type of income	August 2008 (R million)	Weight 1/	August 2009 (R million)	% change between August 2008 and August 2009	Contribution to the percentage change 2/
Income from food sales	2 477,9	87,9	2 436,2	-1,7	-1,5
Income from bar sales	299,2	10,6	275,4	-7,9	-0,8
Other income	41,4	1,5	41,9	1,2	0,0
Total income 3/	2 818,5	100,0	2 753,5	-2,3	-2,3

1/ Weight is the percentage contribution of each type of income to the total income for the current month of the previous year.

2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of income with the corresponding weight, divided by 100.

3/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

The main contributors to the decrease of -2,3% in total income for August 2009 compared with August 2008 were restaurants and coffee shops (-2,7% and contributing -1,5 percentage points), caterers (-8,2% and contributing -1,3 percentage points) and other catering services (-20,0% and contributing -1,0 percentage point). However, these decreases were partly counteracted by an increase in income by takeaway and fast-food outlets (6,7% and contributing 1,5 percentage points) (see Table C, page 4).

Table C - Contribution by type of enterprise to the percentage change in total income for August 2009 compared with August 2008

Estimates per type of enterprise	August 2008 (R million)	Weight 1/	August 2009 (R million)	% change between August 2008 and August 2009	Contribution to the percentage change 2/
Restaurants and coffee shops	1 568,4	55,6	1 525,4	-2,7	-1,5
Takeaway and fast-food outlets	651,2	23,1	694,7	6,7	1,5
Caterers	458,6	16,3	421,2	-8,2	-1,3
Other catering services	140,3	5,0	112,2	-20,0	-1,0
Total industry 3/	2 818,5	100,0	2 753,5	-2,3	-2,3

1/ Weight is the percentage contribution of each type of enterprise to the total industry income for the current month of the previous year.

2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of enterprise with the corresponding weight, divided by 100.

3/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

Total income for food and beverages increases marginally during the three months ended August 2009

The total income generated by the food and beverages industry for the three months ended August 2009 increased by 0,4% compared with the three months ended August 2008. This was mainly due to the increase in income from food sales (1,3% and contributing 1,2 percentage points). However, there were decreases reported for income from bar sales (-6,0% and contributing -0,7 of a percentage point) and other income (-8,9% and contributing -0,1 of a percentage point) (see Table D).

Table D - Contribution by type of income to the percentage change in total income for the three months ended August 2009 compared with the three months ended August 2008

Estimates per type of income	June to August 2008 (R million)	Weight 1/	June to August 2009 (R million)	% change between June to August 2008 and June to August 2009	Contribution to the percentage change 2/
Income from food sales	7 203,1	87,5	7 300,0	1,3	1,2
Income from bar sales	891,6	10,8	837,7	-6,0	-0,7
Other income	136,2	1,7	124,0	-8,9	-0,1
Total income 3/	8 230,8	100,0	8 261,7	0,4	0,4

1/ Weight is the percentage contribution of each type of income to the total income for the three months up to the current month of the previous year.

2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of income with the corresponding weight, divided by 100.

3/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

The 0,4% increase in total income for the three months ended August 2009 compared with the three months ended August 2008 was due to an increase in income by takeaway and fast-food outlets (11,6% and contributing 2,6 percentage points). However, the increase was counteracted by decreases reported by other catering services (-18,3% and contributing -0,9 of a percentage point), restaurants and coffee shops (-1,4% and contributing -0,8 of a percentage point) and caterers (-3,2% and contributing -0,5 of a percentage point) (see Table E and Figure 1, page 5).

Table E - Contribution per type of enterprise to the percentage change in total income for the three months ended August 2009 compared with the three months ended August 2008

Estimates per type of enterprise	June to August 2008 (R million)	Weight 1/	June to August 2009 (R million)	% change between June to August 2008 and June to August 2009	Contribution to the percentage change 2/
Restaurants and coffee shops	4 620,3	56,1	4 556,0	-1,4	-0,8
Takeaway and fast-food outlets	1 850,0	22,5	2 064,1	11,6	2,6
Caterers	1 346,1	16,4	1 302,9	-3,2	-0,5
Other catering services	414,4	5,0	338,7	-18,3	-0,9
Total industry 3/	8 230,8	100,0	8 261,7	0,4	0,4

1/ Weight is the percentage contribution of each type of enterprise to the total industry income for the three months up to the current month of the previous year.
 2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of enterprise with the corresponding weight, divided by 100.
 3/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

Figure 1 - Contribution to the percentage change in total income per type of enterprise for the three months ended August 2009 compared with the three months ended August 2008

1/ The percentage change is the change in food and beverages statistics of the relevant month compared with the food and beverages statistics of the same month in the previous year expressed as a percentage.

Explanatory notes

Introduction The results presented in this publication are derived from the monthly survey of the food and beverages industry. This survey is based on a sample drawn from the 2009 Business Sampling Frame (BSF) that contains businesses registered for value added tax (VAT).

Purpose of the survey The food and beverages survey is a monthly survey covering a sample of public and private enterprises involved in the preparation of meals and drinks for immediate consumption in South Africa. The purpose of this survey is to monitor trends in the food and beverages industry.

The results of the survey are used to compile estimates of the Tourism Satellite Accounts (TSA) and the Gross Domestic Product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used in the analysis of comparative business and industry performance. The results of this monthly survey are published monthly in this statistical release P6420: *Food and beverages*.

Scope of the survey This survey covers the following **tax registered** private and public enterprises that are **mainly** engaged in providing food and beverages for immediate consumption:

- Restaurants and coffee shops;
- Takeaway and fast-food outlets;
- Caterers; and
- Other catering services.

Response rate The preliminary response rate for the 'Food and beverages' survey for August 2009 was 88,0%. The improved response rate for July 2009 was 90,0%.

Classification by industry The 1993 edition of the *Standard Industrial Classification of all Economic Activities (SIC)*, Fifth Edition, Report No. 09-09-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities (ISIC)* with suitable adaptations for local conditions. Statistics in this publication are presented at 5-digit SIC level. Each enterprise is classified to an industry, which reflects its predominant activity.

Size groups The enterprises are divided into four size groups according to turnover. Large enterprises are enterprises with an annual turnover of R13 million and more. The Department of Trade and Industry (DTI) cut-off points defining the size groups, namely large, medium, small and micro enterprises, are given in Table F.

Table F : Size groups for the food and beverages industry

Size group	Annual Turnover
Large	Turnover ≥ R13 000 000
Medium	R6 000 000 ≤ Turnover < R13 000 000
Small	R5 100 000 ≤ Turnover < R6 000 000
Micro	Turnover < R5 100 000

Statistical unit The statistical units for the collection of the information are enterprises.

Survey methodology and design The survey was conducted by mail, fax and telephone.
A sample of approximately 900 enterprises was drawn using stratified simple random sampling. The enterprises were first stratified at 5-digit level according to the SIC and then by size of enterprises. Large enterprises are completely enumerated. Turnover was used as the measure of size.

Weighting methodology

For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form subgroup estimates. These procedures, which are in line with international best practice, are described in more detail on the Stats SA website at: <http://www.statssa.gov.za/publications/publicationsearch.asp>

Relative standard error

Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, it may differ from the figures that would have been produced if the data had been obtained from all enterprises in the food and beverages industry in South Africa.

One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.

Table G : Estimate of total industry income within 95% confidence limits – August 2009

Estimate	Lower limit (R million)	Income (R million)	Upper limit (R million)	Relative standard error (RSE) %
Total income	2 424,6	2 753,5	3 082,4	6,1

Non-sampling errors

Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses.

Revised figures

Revised figures are due to respondents reporting revisions or corrections to their figures and late submission of their data to Stats SA. Preliminary figures are indicated in the relevant tables. Data are edited at the enterprise level.

Seasonal adjustment

Seasonally adjusted estimates will not be published until there are sufficient data points for the new survey. As soon as sufficient data points are available, Stats SA will consider publishing seasonally adjusted estimates.

Symbols and abbreviations

- GDP Gross Domestic Product
- SARS South African Revenue Service
- SIC Standard Industrial Classification of all Economic Activities
- Stats SA Statistics South Africa
- VAT Value added tax
- * Revised figures

Rounding of figures

Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

Glossary

Caterers	Enterprises involved in the sale and supply of meals and drinks prepared on the premises on a contract basis and brought to other premises chosen by the person ordering them, to be served for immediate consumption to guests or customers.
Enterprise	A legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its activities.
Income from bar sales	Refers to income from liquor sales.
Income from food sales	Refers to income from the sale of meals and non-alcoholic drinks.
Industry	It is a group of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts (SNA)</i> in the same way as in the <i>Standard Industrial Classification of all Economic Activities, Fifth Edition; Report No. 09-09-02 of January 1993 (SIC)</i> .
Other catering services	Includes bars, taverns, other drinking places, ice-cream parlours, etc.
Other income	Includes all income not earned from food sales or bar sales.
Restaurants and coffee shops	Enterprises involved in the sale and provision of meals and drinks, ordered from a menu, prepared on the premises for immediate consumption and with provided seating.
Total income	Includes income from food sales, income from bar sales and other income.
Takeaway and fast-food outlets	Enterprises involved in the sale and provision of meals and drinks, ordered from a menu, prepared on the premises for takeaway purposes in a packaged format (not on plates), at a stand or in a location, with or without provided seating.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/4892/8496/8095.
