Statistical release P6420

Food and beverages (Preliminary)

December 2015

The results published in the next statistical release (January 2016) will present food and beverages income at constant prices. Income at constant prices by type of enterprise and by type of income will be estimated by deflating income at current prices using the relevant components of the consumer price index for restaurants. The new layout of the statistical release can be obtained from keshneeg@statssa.gov.za.

Embargoed until: 22 February 2016 13:00

Statistics South Africa 2 P6420

Results for December 2015

Table A – Year-on-year percentage change in food and beverages income at current prices by type of income

Type of income	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15
Food sales	11,6	8,1	9,0	5,9	6,4	8,5
Bar sales	14,1	9,4	9,6	14,9	6,8	9,6
Other income	-0,9	4,5	-1,6	-7,8	14,8	-3,9
Total	11,6	8,2	8,8	6,6	6,7	8,4

Measured in nominal terms (current prices), total income generated by the food and beverages industry increased by 7,7% in 2015 compared with 2014.

In December 2015, total income increased by 8,4% year-on-year. Positive annual growth rates were recorded for bar sales (9,6%) and food sales (8,5%) – see Table A.

Table B – Year-on-year percentage change in food and beverages income at current prices by type of enterprise

Type of enterprise	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15
Restaurants and coffee shops	15,0	11,9	11,4	7,8	8,4	8,7
Takeaway and fast-food outlets	11,1	8,4	10,2	10,0	7,5	10,8
Catering services	4,3	-1,1	0,4	-3,0	1,0	1,2
Total	11,6	8,2	8,8	6,6	6,7	8,4

In December 2015, the highest annual growth rates were recorded for takeaway and fast-food outlets (10,8% and contributing 4,3 percentage points) and restaurants and coffee shops (8,7% and contributing 4,0 percentage points) – see Tables B and 5.

Table C - Food and beverages income at current prices for the latest three months by type of enterprise

Type of enterprise	Oct – Dec 2014 (R million)	Weight	Oct – Dec 2015 (R million)	% change between Oct – Dec 2014 and Oct – Dec 2015	Contribution (% points) to the total % change
Restaurants and coffee shops	5 769,1	44,9	6 248,4	8,3	3,7
Takeaway and fast-food outlets	4 887,3	38,0	5 352,6	9,5	3,6
Catering services	2 199,4	17,1	2 193,5	-0,3	-0,1
Total	12 855,8	100,0	13 794,5	7,3	7,3

Total income increased by 7,3% in the fourth quarter of 2015 compared with the fourth quarter of 2014. Positive contributors to this increase were:

- restaurants and coffee shops (8,3% and contributing 3,7 percentage points); and
- takeaway and fast-food outlets (9,5% and contributing 3,6 percentage points) see Table C.

Survey information

Introduction

The results presented in this publication are derived from the monthly survey of the food and beverages industry. This survey is based on a sample drawn from the 2015 business sampling frame (BSF) that contains businesses registered for value added tax (VAT).

Purpose of the survey

The food and beverages survey is a monthly survey covering a sample of public and private enterprises involved in the preparation of meals and drinks for immediate consumption in South Africa. The purpose of this survey is to monitor trends in the food and beverages industry.

The results of the food and beverage survey are used to compile estimates of the tourism satellite accounts (TSA) and the gross domestic product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used in the analysis of comparative business and industry performance.

Scope of the survey

This survey covers the following tax registered private and public enterprises, that are mainly engaged in providing food and beverages for immediate consumption:

- restaurants and coffee shops;
- takeaway and fast-food outlets; and
- catering services.

Classification by industry

The 1993 edition of the *Standard Industrial Classification of all Economic Activities* (SIC), Fifth Edition, Report No 09-09-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities* (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to an industry which reflects its predominant activity. Statistics in this publication are presented at 5-digit SIC level.

Collection rate

The preliminary collection rate for the survey on food and beverages for December 2015 was 82,3%. The improved collection rate for November 2015 was 84,7%.

Statistical unit

The statistical unit for which information is compiled and published is an enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its income activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

Revised figures

Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. Preliminary figures, as indicated in the relevant tables, are subject to change and when revised will not be indicated as such. Data are edited at the enterprise level.

Rounding-off of figures

Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

Historical data

Historical food and beverages data are available on the Stats SA website. To access the data electronically, use the following link: http://www.statssa.gov.za/?page_id=1849

Past publications

Past food and beverages releases are available on the Stats SA website. To access the releases electronically, use the following link:

http://www.statssa.gov.za/?page_id=1866&PPN=P6420&SCH=5705

Technical notes

Survey methodology and design

The survey was conducted by mail, fax and telephone.

A sample of 941 enterprises was drawn from a population of 7 516 enterprises using stratified simple random sampling. The enterprises were first stratified at 5-digit level according to the SIC and then by size of enterprises. Large enterprises are completely enumerated. Turnover was used as the measure of size.

Class limits

The enterprises are divided into four size groups according to turnover. Large enterprises are enterprises with an annual turnover of R26 million and more. The cut-off points which define the size groups, namely large, medium, small and very small enterprises are given in Table D.

Table D - Measure of size classes (Rand)

Enterprise size	Size group	Lower limits	Upper limits
Very small	4	379 324	10 200 000
Small	3	10 200 001	12 000 000
Medium	2	12 000 001	26 000 000
Large	1	26 000 001	

Sample weighting

For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-collection in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form subgroup estimates. These procedures are in line with international best practice.

Reliability of estimates

Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, it may differ from the figures that would have been produced if the data had been obtained from all enterprises in the food and beverages industry in South Africa.

Relative standard error

One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.

Table E – Estimate of total food and beverages industry income within 95% confidence limits – December 2015

	Lower limit (R million)	Income (R million)	Upper limit (R million)	Relative standard error (RSE) %
Total income	4 794,9	5 164,3	6 057,3	5,9

Non-sampling errors

Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses.

Year-on-year percentage change

The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.

Contribution (percentage points)

The contribution (percentage points) to the annual percentage change for any given period is calculated by multiplying the percentage change of each type of enterprise by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of enterprise to total income in the corresponding period of the previous year.

Seasonal adjustment

Seasonally adjusted estimates will not be published until there are sufficient data points for this survey. As soon as sufficient data points are available, Stats SA will consider publishing seasonally adjusted estimates.

Glossary

Enterprise A legal unit or a combination of legal units that includes and directly controls all

functions necessary to carry out its activities.

Industry It is a group of enterprises engaged in the same or similar kinds of economic activity.

Industries are defined in the System of National Accounts (SNA) in the same way as in the Standard Industrial Classification of all Economic Activities, Fifth Edition; Report No

09-09-02 of January 1993 (SIC).

Income from food sales Refers to income from the sale of meals and non-alcoholic drinks.

Income from bar sales Refers to income from liquor sales.

Other income Includes all income not earned from bar or food sales.

Symbols and abbreviations

BSF Business sampling frame
GDP Gross domestic product
SARS South African Revenue Service

SIC Standard Industrial Classification of all Economic Activities

Stats SA Statistics South Africa TSA Tourism satellite accounts

VAT Value added tax

Restaurants and coffee shops

Enterprises involved in the sale and provision of meals and drinks, ordered from a menu, prepared on the premises for immediate consumption and with provided seating.

Takeaway and fast-food outlets

Enterprises involved in the sale and provision of meals and drinks, ordered from a menu, prepared on the premises for takeaway purposes in a packaged format, at a stand or in a location, with or without provided seating.

Catering services

Enterprises involved in the sale and supply of meals and drinks prepared on the premises on a contract basis and brought to other premises chosen by the person ordering them, to be served for immediate consumption to guests or customers. Catering services also include bars, taverns, other drinking places, ice-cream parlours, etc.

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division National Library of South Africa, Cape Town Division Natal Society Library, Pietermaritzburg Library of Parliament, Cape Town Bloemfontein Public Library Johannesburg Public Library Eastern Cape Library Services, King William's Town Central Regional Library, Polokwane Central Reference Library, Mbombela Central Reference Collection, Kimberley Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more detail about our electronic services, contact Stats SA's user information service at (012) 310 8600.
