## Key findings as at the end of May 2009

Table A - Key estimates as at the end of May 2009

| Estimates per type of income | May 2009 (R million) | \% change between <br> May 2008 <br> and <br> May 2009 | \% change between March to <br> May 2008 and March to <br> May 2009 | \% change between <br> January to <br> May 2008 and <br> January to <br> May 2009 |
| :---: | :---: | :---: | :---: | :---: |
| Income from food sales | 2 179,8 | -1,3 | -1,0 | 2,5 |
| Income from bar sales | 222,0 | -8,8 | -12,7 | -12,7 |
| Other income | 39,0 | -41,6 | -23,7 | -17,1 |
| Total income 1/ | 2 440,8 | -3,1 | -2,7 | 0,6 |

1/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.
Table B - Contribution by type of income to the percentage change in total income for May 2009 compared with May 2008

| Estimates per type of income | May 2008 (R million) | Weight 1/ | May 2009 (R million) | \% change between <br> May 2008 <br> and <br> May 2009 | Contribution to the percentage change 2/ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Income from food sales | 2 209,3 | 87,7 | 2 179,8 | -1,3 | -1,2 |
| Income from bar sales | 243,3 | 9,7 | 222,0 | -8,8 | -0,8 |
| Other income | 66,8 | 2,7 | 39,0 | -41,6 | -1,1 |
| Total income 3/ | 2 519,4 | 100,0 | 2 440,8 | -3,1 | -3,1 |

1/ Weight is the percentage contribution of each type of income to the total income for the current month of the previous year.
2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of income with the corresponding weight, divided by 100.
3/ Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

## Total income for food and beverages decreases

Total income for May 2009 decreased by 3,1\% compared with May 2008. This was due to decreases in income from food sales ( $-1,3 \%$ and contributing $-1,2$ percentage points) and other income ( $-41,6 \%$ and contributing $-1,1$ percentage points).

Table C-Contribution by type of income to the percentage change in total income for the three months ended May 2009 compared with the three months ended May 2008

| Estimates per type of income | March to May 2008 (R million) | Weight 1/ | March to May 2009 (R million) | \% change between March to <br> May 2008 and March to <br> May 2009 | Contribution to the percentage change 2/ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Income from food sales | 6773,8 | 87,8 | 6 702,9 | -1,0 | -0,9 |
| Income from bar sales | 769,1 | 10,0 | 671,1 | -12,7 | -1,3 |
| Other income | 173,5 | 2,2 | 132,4 | -23,7 | -0,5 |
| Total income 3/ | 7 716,4 | 100,0 | 7 506,4 | -2,7 | -2,7 |

1/ Weight is the percentage contribution of each type of income to the total income for the three months up to the current month of the previous year.
$2 /$ The contribution to the percentage change is calculated by multiplying the percentage change of each type of income with the corresponding weight, divided by 100.
3 / Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.
The total income generated by the food and beverages industry for the three months ended May 2009 decreased by $2,7 \%$ compared with the three months ended May 2008. This was largely due to decreases in income from bar sales ( $-12,7 \%$ and contributing $-1,3$ percentage points) and income from food sales ( $-1,0 \%$ and contributing $-0,9$ of a percentage point).

Figure 1 - Contribution to the percentage change in total income per enterprise type for the three months ended May 2009 compared with the three months ended May 2008

The $2,7 \%$ decrease in total income for the three months ended May 2009 compared with the three months ended May 2008 was mainly due to decreases reported by restaurants and coffee shops ( $-4,1 \%$ and contributing $-2,2$ percentage points) and caterers ( $-9,4 \%$ and contributing $-1,5$ percentage points). However, the decrease was counteracted by an increase in takeaway and fast-food outlets ( $6,0 \%$ and contributing 1,6 percentage points) (Figure 1 and Table D).

Table D - Contribution by type of enterprise to the percentage change in total income for the three months ended May 2009 compared with the three months ended May 2008

| Enterprise type | March to May 2008 (R million) | Weight 1/ | March to May 2009 (R million) | \% change between March to <br> May 2008 and March to <br> May 2009 | Contribution to the percentage change 2/ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Restaurants and coffee shops | 4 113,3 | 53,3 | 3 943,9 | -4,1 | -2,2 |
| Takeaway and fast-food outlets | 2072,0 | 26,9 | 2 195,5 | 6,0 | 1,6 |
| Caterers | 1242,5 | 16,1 | 1126,3 | -9,4 | -1,5 |
| Other catering services | 288,6 | 3,7 | 240,7 | -16,6 | -0,6 |
| Total industry 3/ | 7716,4 | 100,0 | 7 506,4 | -2,7 | -2,7 |

1/ Weight is the percentage contribution of each type of enterprise to the total enterprise income for the three months up to the current month of the previous year.
$2 /$ The contribution to the percentage change is calculated by multiplying the percentage change of each type of enterprise with the corresponding weight, divided by 100
3 / Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.

Table E-Contribution by type of enterprise to the percentage change in total income for May 2009 compared with May 2008

| Enterprise type | May 2008 (R million) | Weight 1/ | May 2009 (R million) | \% change between <br> May 2008 <br> and <br> May 2009 | Contribution to the percentage change 2/ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Restaurants and coffee shops | 1312,5 | 52,1 | 1206,4 | -8,1 | -4,2 |
| Takeaway and fast-food outlets | 668,1 | 26,5 | 751,6 | 12,5 | 3,3 |
| Caterers | 447,8 | 17,8 | 406,9 | -9,1 | -1,6 |
| Other catering services | 91,0 | 3,6 | 75,9 | -16,6 | -0,6 |
| Total industry 3/ | 2 519,4 | 100,0 | 2 440,8 | -3,1 | -3,1 |

1/ Weight is the percentage contribution of each type of enterprise to the total enterprise income for the current month of the previous year.
2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of enterprise with the corresponding weight, divided by 100 .
3 / Figures have been rounded off. Therefore, discrepancies may occur between sums of the component items and the totals.
The main contributors to the decrease of $3,1 \%$ in total income for May 2009 compared with May 2008 were restaurants and coffee shops ( $-8,1 \%$ and contributing $-4,2$ percentage points) and caterers ( $-9,1 \%$ and contributing $-1,6$ percentage points). However, the decrease was counteracted by an increase in takeaway and fast-food outlets (12,5\% and contributing 3,3 percentage points).

## Statistical unit

## Survey methodology and design

The results presented in this publication are derived from the monthly survey of the food and beverages industry. This survey is based on a sample drawn from the 2008 Business Sampling Frame (BSF) that contains businesses registered for value-added tax (VAT).

The food and beverages survey is a monthly survey covering a sample of public and private enterprises involved in the preparation of meals and drinks for immediate consumption in South Africa. The purpose of this survey is to monitor trends in the food and beverages industry.
The results of the survey are used to compile estimates of the Tourism Satellite Accounts (TSA) and the Gross Domestic Product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used in the analysis of comparative business and industry performance. The results of this monthly survey are published monthly in the statistical release P6420: Food and beverages.

This survey covers the following tax registered private and public enterprises that are mainly engaged in providing food and beverages for immediate consumption:

- Restaurants and coffee shops,
- Takeaway and fast-food outlets,
- Caterers, and
- Other catering services.

The preliminary response rate for the 'Food and beverages' survey for May 2009 was 91,2\%. The improved response rate for April 2009 was 94,8\%.

The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth Edition, Report No. 09-09-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 International Standard Industrial Classification of all Economic Activities (ISIC) with suitable adaptations for local conditions. Statistics in this publication are presented at 5-digit SIC level. Each enterprise is classified to an industry, which reflects its predominant activity.

The enterprises are divided into four size groups according to turnover. Large enterprises are enterprises with an annual turnover of R13 million and more. The Department of Trade and Industry (DTI) cut-off points defining the size groups, namely large, medium, small and micro enterprises, are given in table D.
Table D - Size groups for the food and beverages industry

| Size group | Annual Turnover |
| :--- | :--- |
| Large | Turnover $\geq$ R13 000 000 |
| Medium | R6 000 000 $\leq$ Turnover < R13 000 000 |
| Small | R5 100 000 $\leq$ Turnover < R6 000 000 |
| Micro | Turnover < R5 100 000 |

The statistical units for the collection of the information are enterprises and establishments.

The survey was conducted by mail, fax and telephone.
A sample of approximately 900 enterprises was drawn using stratified simple random sampling. The enterprises were first stratified at 5-digit level according to the SIC and then by size of enterprises. Large enterprises are completely enumerated. Turnover was used as the measure of size.

## Weighting methodology

## Relative standard error

For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form division estimates. These procedures, which are in line with international best practice, are described in more detail on the Stats SA website at: http://www.statssa.gov.za/publications/ publicationsearch.asp.

Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the food and beverages industry in South Africa.

One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.

Table E - Estimate of total industry income within $95 \%$ confidence limits - May 2009

| Estimate | Lower limit <br> (R million) | Income <br> (R million) | Upper limit <br> (R million) | Relative <br> standard <br> error <br> (RSE) <br> $\%$ |
| :---: | ---: | ---: | ---: | ---: |
| Total income | 2100,4 | 2440,8 | 2781,4 | 7,1 |

## Non-sampling errors

## Revised figures

Seasonal adjustment

Symbols and abbreviations

## Rounding of figures

Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses.

Revised figures are due to respondents reporting revisions or corrections to their figures and late submission of their data to Stats SA. Preliminary figures are indicated in the relevant tables. Data are edited at the enterprise level.

Seasonally adjusted estimates will not be published until there are sufficient data points for the new survey. As soon as sufficient data points are available, Stats SA will consider publishing seasonally adjusted estimates.

GDP Gross Domestic Product
SARS South African Revenue Service
SIC Standard Industrial Classification of all Economic Activities
Stats SA Statistics South Africa
VAT Value-added tax

* Revised figures

Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

## Glossary

| Caterers | Enterprises involved in the sale and supply of meals and drinks prepared on the <br> premises on a contract basis and brought to other premises chosen by the person <br> ordering it, to be served for immediate consumption to guests or customers. |
| :--- | :--- |
| Enterprise | A legal unit or a combination of legal units that includes and directly controls all <br> functions necessary to carry out its activities. |
| Income from bar sales | Refers to income from liquor sales. |
| Income from food sales | Refers to income from the sale of meals and non-alcoholic drinks. |
| Industry | It is a group of enterprises engaged in the same or similar kinds of economic activity. <br> Industries are defined in the System of National Accounts (SNA) in the same way as in <br> the Standard Industrial Classification of all Economic Activities, Fifth Edition; Report |
| No. 09-09-02 of April 1993 (SIC). |  |
| Other catering services | Includes bars, taverns, other drinking places, ice-cream parlours, etc. |
| Other income | Includes all income not earned from food sales or bar sales. |
| Restaurants and coffee | Enterprises involved in the sale and provision of meals and drinks, ordered from a <br> menu, prepared on the premises for immediate consumption and with provided seating. |
| shops |  |
| Total income |  |
| Takeaway and fast-food | Includes income from food sales, income from bar sales and other income. |
| Enterprises involved in the sale and provision of meals and drinks, ordered from a |  |
| menu, prepared on the premises for takeaway purposes in a packaged format (not on |  |
| plates), at a stand or in a location, with or without provided seating. |  |

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:
National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, King William's Town
Central Regional Library, Polokwane
Central Reference Library, Nelspruit
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho
Stats SA also provides a subscription service.

## Electronic services

A large range of data are available via on-line services, diskette and computer printouts. For more details about our electronic data services, contact (012) 310 8600/8390/8351/4892/8496/8095.

You can visit us on the Internet at: www.statssa.gov.za
