Income at constant 2019 prices: results for September 2024**Table A – Year-on-year percentage change in food and beverages income at constant 2019 prices by type of income**

Type of income	Apr-24	May-24	Jun-24	Jul-24	Aug-24	Sep-24
Food sales	-4,8	-0,5	-0,7	-4,9	1,9	-3,9
Bar sales	-4,4	3,4	-1,9	-4,5	11,5	-11,5
Other income	-1,9	-3,4	-11,4	-20,1	-18,7	-23,0
Total	-4,7	-0,2	-1,2	-5,4	2,1	-5,4

Measured in real terms (constant 2019 prices), total income generated by the food and beverages industry decreased by 5,4% in September 2024 compared with September 2023. The largest negative annual growth rates were recorded for ‘other’ income (-23,0%) and bar sales (-11,5%) – see Table A.

Table B – Year-on-year percentage change in food and beverages income at constant 2019 prices by type of enterprise

Type of enterprise	Apr-24	May-24	Jun-24	Jul-24	Aug-24	Sep-24
Restaurants and coffee shops	-7,0	-0,9	-5,4	-9,0	0,3	-6,6
Takeaway and fast-food outlets	-5,5	3,1	1,2	-5,1	2,6	-4,3
Catering services	9,3	-7,9	7,8	8,6	7,9	-4,5
Total	-4,7	-0,2	-1,2	-5,4	2,1	-5,4

In September 2024, the main contributors to the 5,4% year-on-year decrease were restaurants and coffee shops (-6,6% and contributing -3,2 percentage points) and takeaway and fast-food outlets (-4,3% and contributing -1,7 percentage points) – see Table B and Table 6.

Table C – Food and beverages income at constant 2019 prices for the latest three months by type of enterprise

Type of enterprise	Jul – Sep 2023 (R million)	Weight (%)	Jul – Sep 2024 (R million)	% change between Jul – Sep 2023 and Jul – Sep 2024	Contribution (% points) to the total % change
Restaurants and coffee shops	9 910,4	48,4	9 396,4	-5,2	-2,5
Takeaway and fast-food outlets	8 118,9	39,7	7 929,2	-2,3	-0,9
Catering services	2 444,1	11,9	2 543,0	4,0	0,5
Total	20 473,4	100,0	19 868,6	-3,0	-3,0

Total income decreased by 3,0% in the third quarter of 2024 compared with the third quarter of 2023. The main negative contributor to this decrease was restaurants and coffee shops (-5,2% and contributing -2,5 percentage points). The positive contributor was catering services (4,0% and contributing 0,5 of a percentage point) – see Table C.

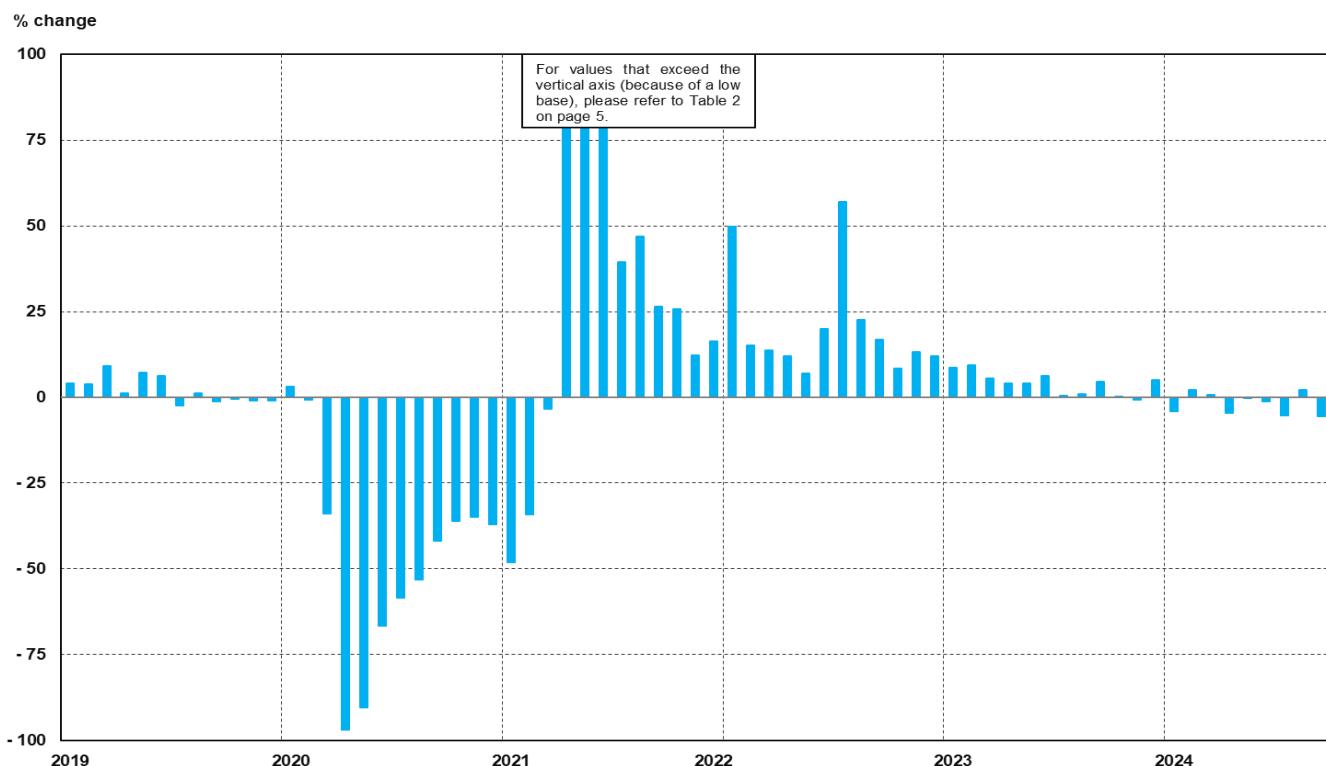

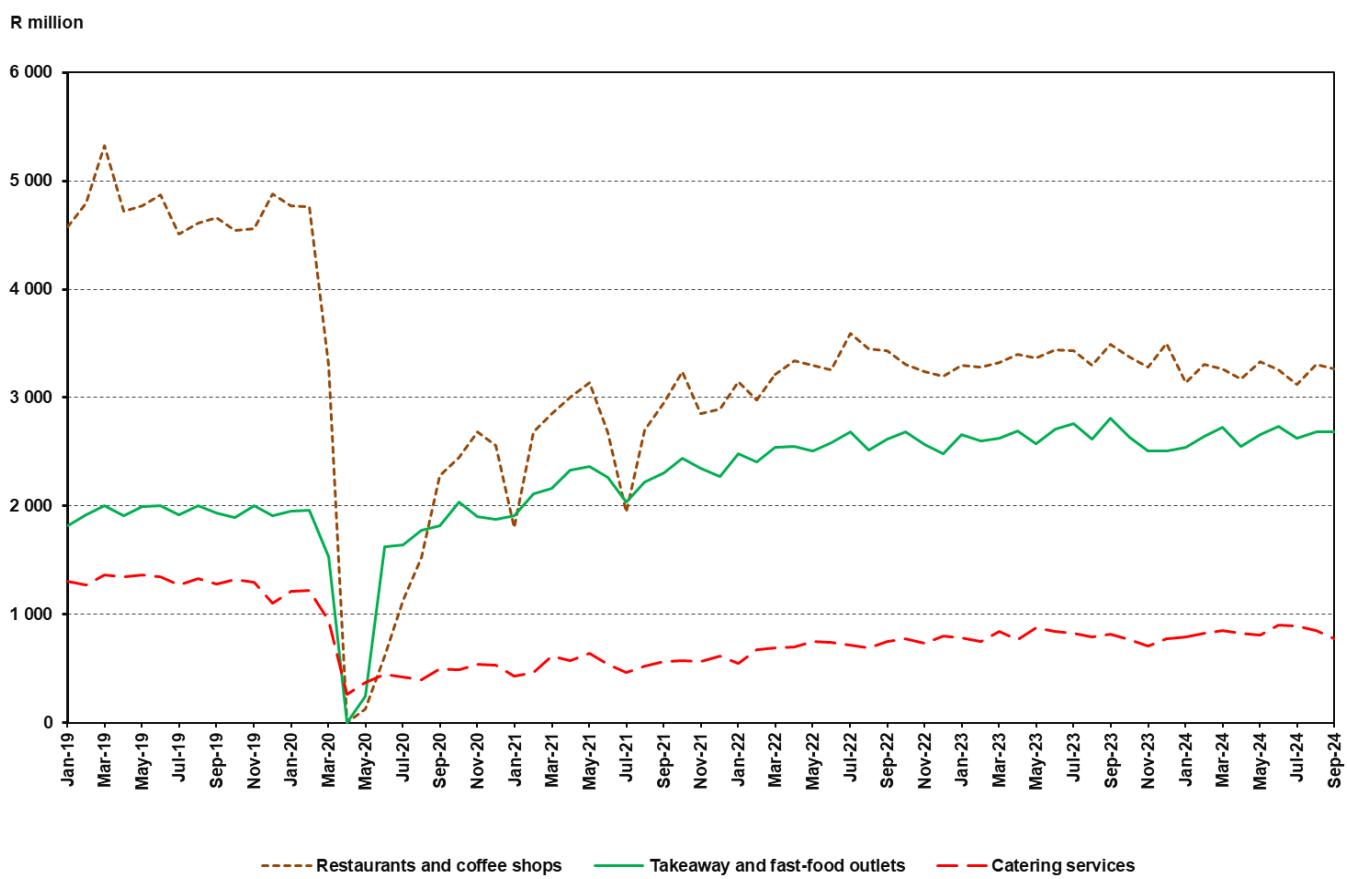

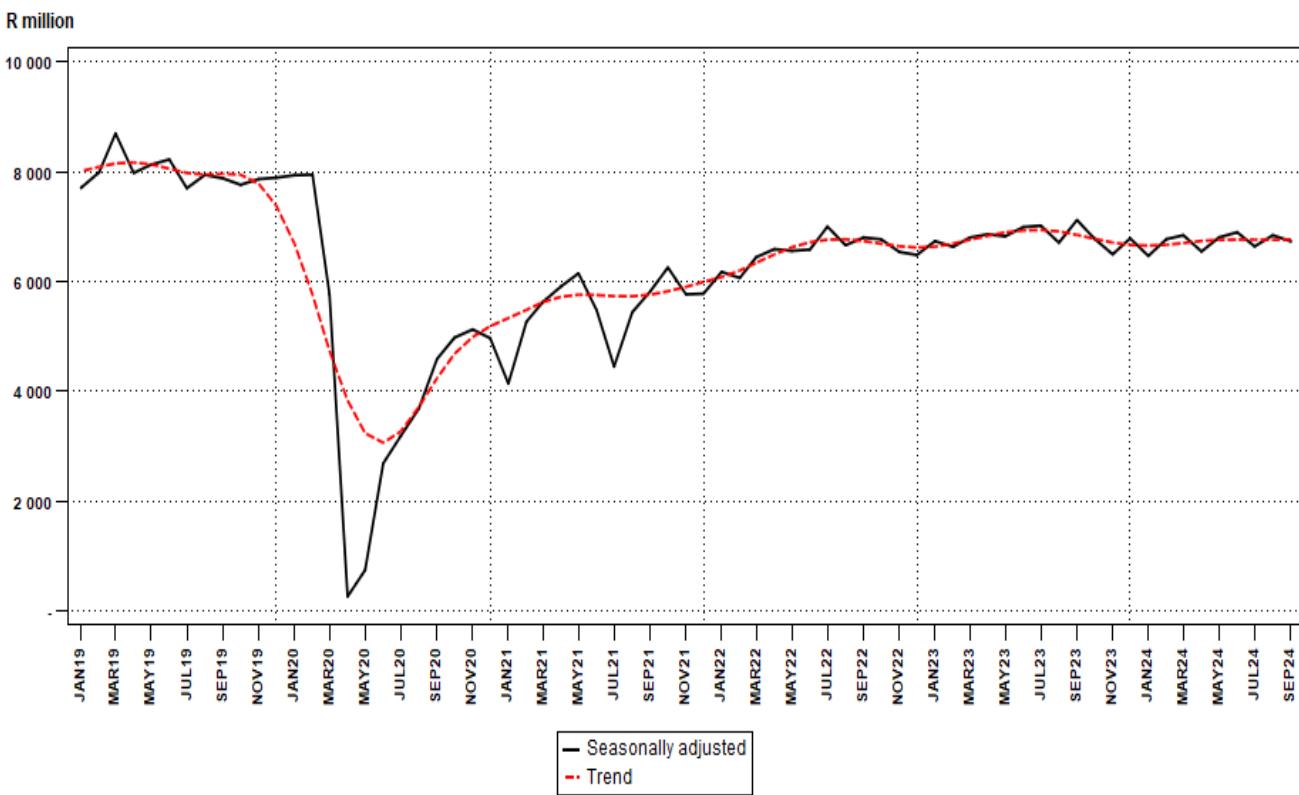

Figure 1 – Food and beverages income at constant 2019 prices: year-on-year percentage change**Figure 2 – Food and beverages income at constant 2019 prices by type of enterprise, seasonally adjusted**

Figure 3 – Food and beverages income at constant 2019 prices

Seasonally adjusted income for the food and beverages industry decreased by 1,6% in September 2024 compared with August 2024. This followed month-on-month changes of 3,0% in August 2024 and -3,7% in July 2024 – see Table 3 and Table 7.

Explanatory notes

Introduction

The results presented in this publication are derived from the monthly survey of the food and beverages industry. This survey is based on a sample drawn from the 2024 statistical business register (SBR) that contains businesses registered for value-added tax (VAT).

Purpose of the survey

The food and beverages survey is a monthly survey covering a sample of public and private enterprises involved in the preparation of meals and drinks for immediate consumption in South Africa. The purpose of this survey is to monitor trends in the food and beverages industry.

The results of the food and beverages survey are used to compile estimates of the tourism satellite accounts (TSA) and the gross domestic product (GDP) and its components, which are used to develop and monitor government policy. These statistics are also used in the analysis of comparative business and industry performance.

Scope of the survey

This survey covers the following tax registered private and public enterprises, that are mainly engaged in providing food and beverages for immediate consumption:

- restaurants and coffee shops;
- takeaway and fast-food outlets; and
- catering services.

Classification by industry

The 1993 edition of the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of All Economic Activities* (ISIC) with suitable adaptations for local conditions. Each enterprise is classified to an industry which reflects its predominant activity. Statistics in this publication are presented at five-digit SIC level.

Collection rate

The preliminary collection rate for the survey on food and beverages for September 2024 was 75,5%. The revised collection rate for August 2024 was 80,7%.

Statistical unit

The statistical unit for which information is compiled and published is an enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its income activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

Revised figures

Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. The reasons for routine revisions are outlined in the following schedule. Any unscheduled revisions will be promptly indicated in relevant tables to maintain transparency and accuracy. It is important to note that seasonally adjusted figures are revised monthly.

Statistical release	Reason for revision	Period subject to revision
Sep-24	Additional information from respondents	Aug-24
Oct-24	Additional information from respondents	Sep-24
Nov-24	Additional information from respondents	Oct-24
Dec-24	Additional information from respondents	Nov-24
Jan-25	Additional information from respondents	Dec-24
Feb-25	Additional information from respondents	Jan-25
Mar-25	Additional information from respondents	Feb-25
Apr-25	Additional information from respondents	Mar-25
May-25	Additional information from respondents	Apr-25
Jun-25	Additional information from respondents	May-25
Jul-25	Additional information from respondents	Jun-25
Aug-25	Additional information from respondents	Jul-25
New base year in 2027/28 – periodic, approximately four- to five-year intervals		

Rounding-off of figures

Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.

Past publications	Past food and beverages releases are available on the Stats SA website. To access the releases electronically, use the following link: Click to download past releases.																				
Technical notes																					
Survey methodology and design	The survey was conducted by email and telephone. The 2024 sample of 887 enterprises was drawn from a sampling frame of 5 501 enterprises using stratified simple random sampling. The enterprises were first stratified at five-digit level according to the SIC and then by size of enterprises. All large, medium and small enterprises are completely enumerated. Turnover was used as the measure of size for stratification.																				
Size groups	The enterprises are divided into four size groups according to turnover. All large and medium and small enterprises (size groups one, two and three) are completely enumerated. Simple random sampling is applied to size group four (very small) enterprises. The total income of the large and medium enterprises (size groups one, two and three) is added to the weighted totals of size group four to reflect the total income.																				
Measure of size groups (Rand)																					
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left; padding: 2px;">Enterprise size</th> <th style="text-align: left; padding: 2px;">Size group</th> <th style="text-align: left; padding: 2px;">Lower limit</th> <th style="text-align: left; padding: 2px;">Upper limit</th> </tr> </thead> <tbody> <tr> <td style="text-align: left; padding: 2px;">Very small</td><td style="text-align: left; padding: 2px;">4</td><td style="text-align: left; padding: 2px;">3 573 590</td><td style="text-align: left; padding: 2px;">25 500 000</td></tr> <tr> <td style="text-align: left; padding: 2px;">Small</td><td style="text-align: left; padding: 2px;">3</td><td style="text-align: left; padding: 2px;">25 500 001</td><td style="text-align: left; padding: 2px;">30 000 000</td></tr> <tr> <td style="text-align: left; padding: 2px;">Medium</td><td style="text-align: left; padding: 2px;">2</td><td style="text-align: left; padding: 2px;">30 000 001</td><td style="text-align: left; padding: 2px;">65 000 000</td></tr> <tr> <td style="text-align: left; padding: 2px;">Large</td><td style="text-align: left; padding: 2px;">1</td><td style="text-align: left; padding: 2px;">65 000 001</td><td style="text-align: left; padding: 2px;"></td></tr> </tbody> </table>		Enterprise size	Size group	Lower limit	Upper limit	Very small	4	3 573 590	25 500 000	Small	3	25 500 001	30 000 000	Medium	2	30 000 001	65 000 000	Large	1	65 000 001	
Enterprise size	Size group	Lower limit	Upper limit																		
Very small	4	3 573 590	25 500 000																		
Small	3	25 500 001	30 000 000																		
Medium	2	30 000 001	65 000 000																		
Large	1	65 000 001																			
Sample weighting	For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-collection in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form subgroup estimates. These procedures are in line with international best practice.																				
Seasonal adjustment	Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for food and beverages income is described in more detail on the Stats SA website at: Click to download seasonal adjustment food and beverages April 2022.																				
Trend cycle	The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimates of the underlying trend cycle.																				
Reliability of estimates	Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the food and beverages industry in South Africa.																				
Relative standard error	One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.																				

Estimates of total food and beverages income within 95% confidence limits – September 2024

	Lower limit (R million)	Income (R million)	Upper limit (R million)	Relative standard error (RSE) %
Total income	7 543,4	8 389,9	9 236,6	5,1

Non-sampling errors	Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses.
Constant prices	Food and beverages income at constant prices by type of enterprise and by type of income is estimated by deflating income at current prices using the relevant components of the consumer price index for restaurants.
Year-on-year percentage change	The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.
Contribution (percentage points)	The contribution (percentage points) to the annual percentage change for any given period is calculated by multiplying the percentage change of each type of enterprise by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of enterprise to total income in the corresponding period of the previous year. The same result is given by $T \times [\Delta C / \Delta T]$, where T = change in the total, ΔC = change in the component (in rands), and ΔT = change in the total (in rands).

Glossary

Enterprise	A legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its activities.																
Industry	It is a group of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the <i>System of National Accounts</i> (SNA) in the same way as in the <i>Standard Industrial Classification of All Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02 of January 1993.																
Income from food sales	Refers to income from the sale of meals and non-alcoholic drinks.																
Income from bar sales	Refers to income from liquor sales.																
Other income	Includes all income not earned from bar or food sales.																
Symbols and abbreviations	<table> <tr> <td>GDP</td> <td>Gross domestic product</td> </tr> <tr> <td>SARS</td> <td>South African Revenue Service</td> </tr> <tr> <td>SBR</td> <td>Statistical Business Register</td> </tr> <tr> <td>SIC</td> <td>Standard Industrial Classification of All Economic Activities</td> </tr> <tr> <td>Stats SA</td> <td>Statistics South Africa</td> </tr> <tr> <td>TSA</td> <td>Tourism satellite accounts</td> </tr> <tr> <td>VAT</td> <td>Value-added tax</td> </tr> <tr> <td>*</td> <td>Revised figures</td> </tr> </table>	GDP	Gross domestic product	SARS	South African Revenue Service	SBR	Statistical Business Register	SIC	Standard Industrial Classification of All Economic Activities	Stats SA	Statistics South Africa	TSA	Tourism satellite accounts	VAT	Value-added tax	*	Revised figures

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively locally and by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Advance release calendar

A release calendar is disseminated on www.statssa.gov.za.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library
Johannesburg Public Library
Eastern Cape Library Services, Qonce
Central Regional Library, Polokwane
Central Reference Library, Mbombela
Central Reference Collection, Kimberley
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

Electronic services

A large range of data is available via online services. For more details about our electronic services, contact Stats SA's user information service at (012) 310 8600.
