## Freight transportation: results for March 2024

**Table A – Year-on-year percentage change in freight transportation (income at current prices)**

	Oct-23	Nov-23	Dec-23	Jan-24	Feb-24	Mar-24
Freight payload	-1,1	3,2	-2,8	-6,7	-0,1	-4,8
Freight income	6,2	3,7	3,8	-0,4	6,2	0,6

The volume of goods transported (payload) decreased by 4,8% in March 2024 compared with March 2023. The corresponding income increased by 0,6% over the same period.

**Table B – Freight transportation income at current prices for the latest three months by type of commodity**

Type of commodity	Jan – Mar 2023 (R million)	Weight (%)	Jan – Mar 2024 (R million)	% change between Jan – Mar 2023 and Jan – Mar 2024	Contribution (% points) to the total % change
Agriculture and forestry primary products	3 490	6,7	3 244	-7,0	-0,5
Primary mining and quarrying products	17 802	34,0	18 371	3,2	1,1
Manufactured food, beverages and tobacco products	7 144	13,7	6 369	-10,8	-1,5
Textiles, clothing and leather goods	1 209	2,3	1 280	5,9	0,1
Chemicals, coke, petroleum, rubber, plastic and other mineral products	2 602	5,0	2 518	-3,2	-0,2
Basic metals and fabricated metal products	647	1,2	706	9,1	0,1
Non-metallic products	408	0,8	448	9,8	0,1
Electrical machinery, transport machinery and equipment	966	1,8	1 290	33,5	0,6
Motor vehicles, parts and accessories	1 472	2,8	1 530	3,9	0,1
Paper and paper products	273	0,5	306	12,1	0,1
Commercial products	1 061	2,0	1 402	32,1	0,6
Used household and office products	1 119	2,1	1 140	1,9	0,0
Containers	2 320	4,4	3 356	44,7	2,0
Parcels	1 340	2,6	1 487	11,0	0,3
Other freight	10 469	20,0	9 951	-4,9	-1,0
<b>Total income</b>	<b>52 323</b>	<b>100,0</b>	<b>53 404</b>	<b>2,1</b>	<b>2,1</b>

Income from freight transportation increased by 2,1% in the first quarter of 2024 compared with the first quarter of 2023. The main positive contributors to this increase were:

- containers (44,7% and contributing 2,0 percentage points);
- primary mining and quarrying products (3,2% and contributing 1,1 percentage points);
- electrical machinery, transport machinery and equipment (33,5% and contributing 0,6 of a percentage point); and
- commercial products (32,1% and contributing 0,6 of a percentage point).

The main negative contributors were manufactured food, beverages and tobacco products (-10,8% and contributing -1,5 percentage points) and 'other' freight (-4,9% and contributing -1,0 percentage point) – see Table B.

**Table C – Seasonally adjusted payload for the latest three months by type of transport**

Payload	Oct – Dec 2023 (000 tons)	Weight (%)	Jan – Mar 2024 (000 tons)	% change between Oct – Dec 2023 and Jan – Mar 2024	Contribution (% points) to the total % change
Rail	39 893	15,6	40 257	0,9	0,1
Road	215 653	84,4	212 602	-1,4	-1,2
<b>Total</b>	<b>255 548</b>	<b>100,0</b>	<b>252 859</b>	<b>-1,1</b>	<b>-1,1</b>

Seasonally adjusted payload decreased by 1,1% in the first quarter of 2024 compared with the fourth quarter of 2023. Road freight decreased by 1,4% (contributing -1,2 percentage points) while rail freight increased by 0,9% (contributing 0,1 of a percentage point) – see Table C.

**Figure 1 – Freight transportation: seasonally adjusted payload**

**Figure 2 – Freight transportation: year-on-year percentage change in payload**

**Passenger transportation: results for March 2024**

**Table D – Year-on-year percentage change in passenger transportation (income at current prices)**

	Oct-23	Nov-23	Dec-23	Jan-24	Feb-24	Mar-24
Passenger journeys	23,0	16,6	9,2	21,4	17,2	5,6
Passenger income	15,1	12,9	6,6	13,6	10,0	3,9

The number of passenger journeys increased by 5,6% in March 2024 compared with March 2023. The corresponding income increased by 3,9% over the same period.

**Table E – Seasonally adjusted passenger journeys for the latest three months by type of transport**

Passenger journeys	Oct – Dec 2023 (000)	Weight (%)	Jan – Mar 2024 (000)	% change between Oct – Dec 2023 and Jan – Mar 2024	Contribution (% points) to the total % change
Rail	12 628	15,5	13 959	10,5	1,6
Road	68 663	84,5	67 835	-1,2	-1,0
<b>Total</b>	<b>81 291</b>	<b>100,0</b>	<b>81 794</b>	<b>0,6</b>	<b>0,6</b>

Seasonally adjusted passenger journeys increased by 0,6% in the first quarter of 2024 compared with the fourth quarter of 2023. Rail passenger journeys increased by 10,5% (contributing 1,6 percentage points) while road passenger journeys decreased by 1,2% (contributing -1,0 percentage point) – see Table E.

**Figure 3 – Passenger transportation: seasonally adjusted passenger journeys**

**Figure 4 – Passenger transportation: year-on-year percentage change in passenger journeys**

## Explanatory notes

<b>Introduction</b>	1	Statistics South Africa (Stats SA) conducts a monthly survey of the land transportation industry, covering passenger and freight transportation by rail and road (see point 4 below). This survey is based on a sample drawn from the 2023 statistical business register (SBR) that contains businesses registered for value-added tax (VAT) and income tax.
	2	In order to improve timeliness, some information for the latest month had to be imputed due to late response. These imputations will be revised in future statistical releases as soon as information becomes available. Published land transportation income estimates exclude VAT.
<b>Purpose of the survey</b>	3	The results of the monthly land transport survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
<b>Scope of the survey</b>	4	This survey covers enterprises involved in land transportation according to the following types of transportation: <ul style="list-style-type: none"> <li>• railway transport (including passenger and freight transportation);</li> <li>• ‘other’ scheduled passenger land transport – urban, suburban and inter-urban bus and coach passenger lines and school buses;</li> <li>• ‘other’ non-scheduled passenger land transport – safaris and sightseeing bus tours, metered taxis and ‘other’ passenger transport including renting of motor cars with drivers; and</li> <li>• freight transport by road.</li> </ul>
<b>Exclusions</b>	5	Passenger transportation excludes: <ul style="list-style-type: none"> <li>• minibus taxis;</li> <li>• metropolitan buses (including the Bus Rapid Transport system – BRT); and</li> <li>• rental of private cars/buses without drivers.</li> </ul> <p>Freight transportation excludes:</p> <ul style="list-style-type: none"> <li>• renting of trucks without drivers; and</li> <li>• in-house transportation.</li> </ul>
<b>Classification</b>	6	The 1993 edition of the <i>Standard Industrial Classification of All Economic Activities</i> (SIC), Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of All Economic Activities</i> (ISIC) with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division (two-digit) level. Each enterprise is classified to the industry which reflects its predominant activity.
<b>Collection rate</b>	7	The preliminary collection rate for the survey on land transportation for March 2024 was 72,1%. The improved collection rate for February 2024 was 74,6%.
<b>Statistical unit</b>	8	The statistical unit for which information is compiled and published is an enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its income activities. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.
<b>Revised figures</b>	9	Revised figures are mainly due to late submission of data to Stats SA, or respondents reporting revisions or corrections to their figures. Preliminary figures, as indicated in the relevant tables, are subject to change and when revised will not be indicated as such.
<b>Related publications</b>	10	Users may also wish to refer to the following publication available from Stats SA – <ul style="list-style-type: none"> <li>• <i>Stats in Brief</i> issued annually.</li> </ul>

- Rounding-off of figures** 11 Where figures have been rounded off, discrepancies may occur between sums of the component items and the totals.
- Historical data** 12 Historical land transport data are available on the Stats SA website. To access the data electronically, use the following link:  
[Click to download historical data.](#)
- Past publications** 13 Past land transport releases are available on the Stats SA website. To access the releases electronically, use the following link:

## Technical notes

- Survey methodology and design** 1 The survey is conducted on a monthly basis. Questionnaires are sent to a sample of 784 enterprises from a population of 5 136 enterprises. Completed questionnaires are required to be returned to Stats SA within 10 days after the end of the reference month. Email and telephone reminders are used to follow up on non-respondents.
- 2 A stratified random sample was drawn at the SIC four-digit level in April 2023 from Stats SA's statistical business register (SBR). Strata were formed using a combination of Standard Industrial Classification and the measure of size classes for enterprises (see paragraph 3 below).

The Neyman optimal allocation formula given below was used to allocate samples to each stratum:

$$n_h = n * ( N_h * S_h ) / [ \sum ( N_i * S_i ) ].$$

Neyman allocation formula not only allocates sample sizes to each stratum but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata was 1,2%.

- Sample design and class limits** 3 The land transportation industry is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to medium (size group two) and small (size groups three and four) enterprises. The total value of income of the large enterprises (size group one) is added to the weighted totals of size groups two, three and four to reflect the total value of income.

### Measure of size classes (Rand)

Enterprise size	Size group	Lower limit	Upper limit
Very small	4	1 375 366	9 000 000
Small	3	9 000 001	39 000 000
Medium	2	39 000 001	78 000 000
Large	1	78 000 001	

- Sample weighting** 4 For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form division estimates. These procedures are in line with international best practice.
- Reliability of estimates** 5 Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the land transport industry in South Africa. Estimates are subject to sampling and non-sampling errors.
- 6 Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and

implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.

**Relative standard error**

- 7 One measure is the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of enterprises was used. The relative standard error (RSE) provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer to the size of the estimate.

**Estimates of land transport within 95% confidence limits – March 2024**

	Lower limit (R million)	Estimate (R million)	Upper limit (R million)	Relative standard error (RSE) %
Freight income	15 893	17 934	19 975	5,8
Passenger income	1 066	1 080	1 093	0,6

**Year-on-year percentage change**

- 8 The year-on-year percentage change in a variable for any given period is the change between that period and the corresponding period of the previous year, expressed as a percentage of the latter.

**Contribution (percentage points)**

- 9 The contribution (percentage points) to the annual percentage change for any given period is calculated by multiplying the percentage change of each type of commodity/service by its corresponding weight, divided by 100. The weight is the percentage contribution of each type of commodity/service to total income in the corresponding period of the previous year.

**Seasonal adjustment**

- 10 Seasonally adjusted estimates are generated each month using the X-12-ARIMA Seasonal Adjustment Program developed by the United States Census Bureau. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be recognised more clearly. Seasonal adjustment does not aim to remove irregular or non-seasonal influences which may be present in any particular month. Influences that are volatile or unsystematic can still make it difficult to interpret the movement of the series even after adjustment for seasonal variations. Therefore, the month-to-month movements of seasonally adjusted estimates may not be reliable indicators of trend behaviour. The X-12-ARIMA procedure for land transportation is described in more detail on the Stats SA website at: [Click to download seasonal adjustment land transport February 2022.](#)

**Trend cycle**

- 11 The trend is the long-term pattern or movement of a time series. The X-12-ARIMA Seasonal Adjustment Program is used for smoothing seasonally adjusted estimates to estimates of the underlying trend cycle.

**Glossary**

**Enterprise**

An enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its activities.

**Industry**

An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the *System of National Accounts* (SNA) in the same way as in the *Standard Industrial Classification of All Economic Activities* (SIC), Fifth Edition, Report No. 09-90-02 of January 1993.

**Symbols and abbreviations**

GDP	Gross domestic product
ISIC	International Standard Industrial Classification
SARS	South African Revenue Service
SBR	Statistical Business Register
SIC	Standard Industrial Classification of All Economic Activities
Stats SA	Statistics South Africa
VAT	Value-added tax

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's 12 official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advance release calendar

A release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za).

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, Qonce  
Central Regional Library, Polokwane  
Central Reference Library, Mbombela  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via online services. For more details about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the internet at: [www.statssa.gov.za](http://www.statssa.gov.za).
