

# Statistical release

## P7162

### Land transport survey (Preliminary)

**November 2011**

**Embargoed until:  
23 January 2012  
11:30**

**Enquiries:**

User Information Services  
(012) 310 8600/8423/6360

**Forthcoming issue:**

December 2011

**Expected release date:**

20 February 2012

**Contents**

**Results for November 2011..... 2**

    Table A – Key figures for land transportation..... 2

    Table B – Contribution of each type of commodity to the percentage change in freight transportation income .. 3

    Table C – Contribution of each type of service to the percentage change in passenger transportation income . 3

**Tables ..... 4**

    Table 1 – Total freight transportation estimates..... 4

    Table 2 – Total passenger transportation estimates..... 5

    Table 3 – Total income according to the type of commodity for freight transportation (R million)..... 6

    Table 4 – Three-monthly and annual cumulative estimates and percentage changes for freight transportation . 7

    Table 5 – Three-monthly and annual cumulative estimates and percentage changes for passenger  
                   transportation..... 7

**Explanatory notes ..... 8**

**Technical note..... 10**

**Glossary ..... 10**

**General information ..... 11**

## Results for November 2011

**Table A – Key figures for land transportation**

Freight transportation estimates	November 2011 1/	% change between November 2010 and November 2011	% change between September to November 2010 and September to November 2011	% change between January to November 2010 and January to November 2011
<b>Payload (000 tons)</b>	64 366	11,0	10,9	7,2
<b>Total income (R million)</b>	7 942	18,1	18,1	12,9

1/ Units of measurement can be found next to the respective variables in the previous column.

Passenger transportation estimates	November 2011 1/	% change between November 2010 and November 2011	% change between September to November 2010 and September to November 2011	% change between January to November 2010 and January to November 2011
<b>Number of passengers (000)</b>	75 999	7,4	7,3	1,6
<b>Total income (R million)</b>	743	10,6	11,9	12,5

1/ Units of measurement can be found next to the respective variables in the previous column.

### Income from freight transportation

***The income from freight transportation for the three months ended November 2011 increased by 18,1% compared with the three months ended November 2010. Income from freight transportation for November 2011 increased by 18,1% compared with November 2010, while the volume of goods transported (payload) increased by 11,0% over this period.***

The year-on-year increase of 18,1% in income from freight transportation for the three months ended November 2011 was driven largely by primary mining and quarrying products (33,3% and contributing 10,3 percentage points), followed by manufactured food, beverages and tobacco products (11,3% and contributing 1,6 percentage points) and other freight (17,4% and contributing 1,6 percentage points) – see Table B on page 3.

### Income from passenger transportation

***The income from passenger transportation for the three months ended November 2011 increased by 11,9% compared with the three months ended November 2010. Income from passenger transportation for November 2011 increased by 10,6% compared with November 2010, while the number of passengers increased by 7,4% over this period.***

The main contributor to the year-on-year increase of 11,9% in income from passenger transportation for the three months ended November 2011 was road passenger transportation (11,6% and contributing 9,0 percentage points), followed by railway passenger transportation (13,0% and contributing 2,9 percentage points) – see Table C on page 3.

**Table B – Contribution of each type of commodity to the percentage change in freight transportation income**

Type of commodity	September to November 2010 (R million)	Weight 1/	September to November 2011 (R million)	Difference in income between September to November 2010 and September to November 2011 (R million)	% change between September to November 2010 and September to November 2011	Contribution (% points) to the % change in total income 2/
<b>Agriculture and forestry primary products</b>	1 604	8,2	1 664	60	3,7	0,3
<b>Primary mining and quarrying products</b>	6 056	30,8	8 073	2 017	33,3	10,3
<b>Manufactured food, beverages and tobacco products</b>	2 869	14,6	3 193	324	11,3	1,6
<b>Textiles, clothing and leather goods</b>	138	0,7	170	32	23,2	0,2
<b>Chemicals, coke, petroleum, rubber, plastic and other mineral products</b>	1 668	8,5	1 782	114	6,8	0,6
<b>Basic metals and fabricated metal products</b>	1 328	6,7	1 404	76	5,7	0,4
<b>Non-metallic products</b>	824	4,2	924	100	12,1	0,5
<b>Electrical machinery, transport machinery and equipment</b>	444	2,3	526	82	18,5	0,4
<b>Motor vehicles, parts and accessories</b>	445	2,3	496	51	11,5	0,3
<b>Paper and paper products</b>	355	1,8	381	26	7,3	0,1
<b>Commercial products</b>	695	3,5	760	65	9,4	0,3
<b>Used household and office products</b>	228	1,2	231	3	1,3	0,0
<b>Containers</b>	930	4,7	1 174	244	26,2	1,2
<b>Parcels</b>	290	1,5	338	48	16,6	0,2
<b>Other freight</b>	1 804	9,2	2 117	313	17,4	1,6
<b>Total income 3/</b>	<b>19 680</b>	<b>100,0</b>	<b>23 234</b>	<b>3 554</b>	<b>18,1</b>	<b>18,1</b>

1/ Weight is the percentage contribution of each type of commodity to the total income for the three months up to the current month of the previous year.

2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of commodity with its corresponding weight, divided by 100.

3/ The figures have been rounded off. Therefore discrepancies may occur between the sums of the component items and the totals.

**Table C – Contribution of each type of service to the percentage change in passenger transportation income**

Type of service	September to November 2010 (R million)	Weight 1/	September to November 2011 (R million)	Difference in income between September to November 2010 and September to November 2011 (R million)	% change between September to November 2010 and September to November 2011	Contribution (% points) to the % change in total income 2/
<b>Railway passenger transportation</b>	453	22,3	512	59	13,0	2,9
<b>Road passenger transportation</b>	1 575	77,7	1 758	183	11,6	9,0
<b>Total income 3/</b>	<b>2 028</b>	<b>100,0</b>	<b>2 270</b>	<b>242</b>	<b>11,9</b>	<b>11,9</b>

1/ Weight is the percentage contribution of each type of service to the total income for the three months up to the current month of the previous year.

2/ The contribution to the percentage change is calculated by multiplying the percentage change of each type of service with its corresponding weight, divided by 100.

3/ The figures have been rounded off. Therefore discrepancies may occur between the sums of the component items and the totals.

**Description of type of commodity included in indicated group type in Table 3**

<b>Group type</b>	<b>Type of commodity included in group type</b>	<b>Group type</b>	<b>Type of commodity included in group type</b>
<b>Type A</b>	<b>Transportation of agriculture and forestry primary products</b>	<b>Type I</b>	<b>Transportation of motor vehicles, parts and accessories</b>
<b>Type B</b>	<b>Transportation of primary mining and quarrying products</b>	<b>Type J</b>	<b>Transportation of paper and paper products</b>
<b>Type C</b>	<b>Transportation of manufactured food, beverages and tobacco products</b>	<b>Type K</b>	<b>Transportation of commercial products</b>
<b>Type D</b>	<b>Transportation of textiles, clothing and leather products</b>	<b>Type L</b>	<b>Transportation of used household and office products</b>
<b>Type E</b>	<b>Transportation of chemicals, coke, petroleum, rubber, plastic and other mineral products</b>	<b>Type M</b>	<b>Transportation of containers</b>
<b>Type F</b>	<b>Transportation of basic metals and fabricated metal products</b>	<b>Type N</b>	<b>Transportation of parcels</b>
<b>Type G</b>	<b>Transportation of non-metallic products</b>	<b>Type O</b>	<b>Transportation of other freight</b>
<b>Type H</b>	<b>Transportation of electrical machinery, transport machinery and equipment</b>		

**Table 4 – Three-monthly and annual cumulative estimates and percentage changes for freight transportation**

Freight transportation estimates	September to November 2010	September to November 2011	% change between September to November 2010 and September to November 2011	January to November 2010	January to November 2011	% change between January to November 2010 and January to November 2011
<b>Payload (000 tons)</b>	170 435	188 930	10,9	594 126	636 935	7,2
<b>Total income (R million)</b>	19 680	23 234	18,1	68 479	77 289	12,9

**Table 5 – Three-monthly and annual cumulative estimates and percentage changes for passenger transportation**

Passenger transportation estimates	September to November 2010	September to November 2011	% change between September to November 2010 and September to November 2011	January to November 2010	January to November 2011	% change between January to November 2010 and January to November 2011
<b>Number of passengers (000)</b>	212 816	228 389	7,3	762 712	775 046	1,6
<b>Total income (R million)</b>	2 028	2 270	11,9	6 997	7 872	12,5

## Explanatory notes

<b>Introduction</b>	1	Statistics South Africa (Stats SA) conducts a monthly survey of the land transportation industry, covering passenger and freight transportation by rail and road (see 4 below). This survey is based on a sample drawn from the 2011 Business Sampling Frame (BSF) that contains businesses registered for value added tax (VAT).
	2	As is usual, information for the latest month had to be estimated for respondents who have not reported by the cut-off date for production of results. These estimates will be revised in future statistical releases when their reported information becomes available. Published land transportation income estimates exclude VAT.
<b>Purpose of the survey</b>	3	The results of the monthly land transport survey are used to compile estimates of the gross domestic product (GDP) and its components, which are used in monitoring the state of the economy and formulation of economic policy. These statistics are also used in the analysis of comparative business and industry performance.
<b>Scope of the survey</b>	4	<p>This survey covers enterprises involved in land transportation according to the following types of transportation:</p> <ul style="list-style-type: none"> <li>• Railway transport (including passenger and freight transportation);</li> <li>• Other scheduled passenger land transport – urban, suburban and inter-urban bus and coach passenger lines and school buses;</li> <li>• Other non-scheduled passenger land transport – safaris and sightseeing bus tours, metered taxis and other passenger transport including renting of motor cars with drivers; and</li> <li>• Freight transport by road.</li> </ul>
<b>Exclusions</b>	5	<p>Passenger transportation excludes:</p> <ul style="list-style-type: none"> <li>• Minibus taxis;</li> <li>• Gautrain;</li> <li>• Metropolitan buses (including the Bus Rapid Transport system– BRT); and</li> <li>• Rental of private cars/buses without drivers.</li> </ul> <p>Freight transportation excludes:</p> <ul style="list-style-type: none"> <li>• Renting of trucks without drivers; and</li> <li>• In-house transportation.</li> </ul>
<b>Classification</b>	6	The 1993 edition of the <i>Standard Industrial Classification of all Economic Activities (SIC)</i> , Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 <i>International Standard Industrial Classification of all Economic Activities (ISIC)</i> with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division (two-digit) level. Each enterprise is classified to the industry which reflects its predominant activity.
<b>Response rate</b>	7	The preliminary response rate for the survey on land transportation for November 2011 was 81,0%. The improved response rate for October 2011 was 90,3%.
<b>Statistical unit</b>	8	The statistical unit for which information is compiled and published is the enterprise, defined as a legal unit or a combination of legal units that includes and directly controls all functions necessary to carry out its income activities.
<b>Survey methodology and design</b>	9	Questionnaires are collected monthly and the results are published on a monthly basis. Questionnaires are sent to a sample of about 700 enterprises from a population of about 4 400 enterprises. Completed questionnaires are required to be returned to Stats SA within 10 days after the end of the reference month. Fax and telephone reminders are used to follow up non-respondents.

<b>Sample design</b>	<b>10</b>	The value of income is obtained monthly from the sample of about 700 enterprises (which was drawn in April 2011 at the SIC four-digit level) from a population of about 4 400 land transportation enterprises. The land transportation industry is divided into four size groups. All large enterprises (size group one) are completely enumerated. Simple random sampling is applied to size groups two (medium sized), three and four (small) enterprises. The total value of income of the large enterprises (size group one) is added to the weighted totals of size groups two, three and four to reflect the total value of income.																				
<b>Weighting methodology</b>	<b>11</b>	For those strata not completely enumerated, the weights to produce estimates are the inverse ratio of the sampling fraction, modified to take account of non-response in the survey. Stratum estimates are calculated and then aggregated with the completely enumerated stratum to form division estimates. These procedures, which are in line with international best practice, are described in more detail on the Stats SA website at <a href="http://www.statssa.gov.za/publications/publicationsearch.asp">http://www.statssa.gov.za/publications/publicationsearch.asp</a> .																				
<b>Reliability of estimates</b>	<b>12</b>	Data presented in this publication are based on information obtained from a sample and are, therefore, subject to sampling variability; that is, they may differ from the figures that would have been produced if the data had been obtained from all enterprises in the land transport industry in South Africa. Estimates are subject to sampling and non-sampling errors. Preliminary figures are indicated in the tables.																				
	<b>13</b>	Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Fluctuations may occur in consecutive months as a result of seasonal and economic factors.																				
<b>Revised figures</b>	<b>14</b>	Revised figures are due to respondents reporting revisions or corrections to their figures and late submission of their data to Stats SA. Preliminary figures are indicated in the relevant tables. Data are edited at the enterprise level.																				
<b>Related publications</b>	<b>15</b>	Users may also wish to refer to the following publications available from Stats SA - <ul style="list-style-type: none"> <li>• <i>Bulletin of Statistics</i> issued quarterly; and</li> <li>• <i>SA Statistics</i> issued annually.</li> </ul>																				
<b>Rounding-off of figures</b>	<b>16</b>	Where figures have been rounded off discrepancies may occur between sums of the component items and the totals.

**Technical note**

**Neyman optimal allocation**

A stratified random sample was drawn from the population of enterprises on the business sampling frame (BSF). Strata were formed using a combination of Standard Industrial Classification and the measure of size classes for enterprises. The Neyman optimal allocation formula given below was used to allocate samples to each stratum.

$$n_h = \frac{N_h S_h}{\sum N_h S_h}$$

$N_h$  and  $S_h$  are the stratum population size and the stratum variance respectively.

Neyman allocation formula not only allocates sample sizes to each stratum but also calculates the relative precision for each stratum as well as the relative precision for all strata. The relative precision for these strata did not exceed 1,0%.

**Class limits**

Enterprise size	Size Group	Lower limits	Upper limits
Very small	4	0	9 000 000
Small	3	9 000 001	39 000 000
Medium	2	39 000 001	78 000 000
Large	1	78 000 001	

**Glossary**

**Enterprise**

The enterprise is a legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its sales activities.

**Industry**

An industry is made up of enterprises engaged in the same or similar kinds of economic activity. Industries are defined in the *System of National Accounts (SNA)* in the same way as in the *Standard Industrial Classification of all Economic Activities, Fifth Edition, Report No. 09-90-02 of January 1993 (SIC)*.

**Statistical unit**

A statistical unit is a unit about which statistics are tabulated, compiled or published. The statistical units are derived from and linked to the South African Revenue Service (SARS) administrative data.

**Number of passengers**

The number of passengers refers to the passenger journeys.

## General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data: and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

## Advanced release calendar

An advanced release calendar is disseminated on [www.statssa.gov.za](http://www.statssa.gov.za)

## Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division  
National Library of South Africa, Cape Town Division  
Natal Society Library, Pietermaritzburg  
Library of Parliament, Cape Town  
Bloemfontein Public Library  
Johannesburg Public Library  
Eastern Cape Library Services, King William's Town  
Central Regional Library, Polokwane  
Central Reference Library, Nelspruit  
Central Reference Collection, Kimberley  
Central Reference Library, Mmabatho

Stats SA also provides a subscription service.

## Electronic services

A large range of data is available via online services. For more detail about our electronic services, contact Stats SA's user information service at (012) 310 8600.

You can visit us on the Internet at: [www.statssa.gov.za](http://www.statssa.gov.za)
