TOTAL EXPENDITURE BY NATIONAL AND PROVINCIAL EXTRA-BUDGETARY ACCOUNTS AND FUNDS AMOUNTED TO R48 865,6 MILLION FOR THE 2002/2003 FINANCIAL YEAR

Total expenditure by national and provincial extra-budgetary accounts and funds amounted to R48 865,6 million for the 2002/2003 financial year (ending 31 March 2003). This reflects an increase of 20,2% compared with the R40 661,6 million for the 2001/ 2002 financial year (see table A, p.4).

Economic classification of the expenditure by extra-budgetary accounts and funds

Economic classification of expenditure is in general a measure of the nature and economic effect of government operations on the economy of a country. Five main economically classified expenditure categories exist: current expenditure, capital expenditure, capital transfers, purchases of shares, loans and advances to non-general government institutions, and transfers and loans to other general government institutions and funds.

Current expenditure includes remuneration of employees; other goods and services; interest; subsidies; current transfers to households and current transfers to foreign countries and international institutions. Capital expenditure includes new constructions, purchases of land and existing constructions, purchases of machinery and equipment, intangible and other assets and also capitalised remuneration. Capital transfers include mainly transfers to businesses and households. Purchases of shares, loans and advances to non-general government institutions include transfers to businesses, households, foreign countries and international institutions. Transfers, loans and advances to other general government institutions and funds include transfers to national government, universities and technikons, other extra-budgetary accounts and funds and provincial and local governments.

In contrast to national departments, which keep their accounts on a cash basis, the accounts of extra-budgetary accounts and funds are kept on an accrual basis, i.e. the payments are recorded in the period to which the transactions relate and surpluses, deficits, assets and liabilities resulting from these transactions are carried over to the next financial year.

The largest contributor to the total expenditure of R48 865,6 million by the extra-budgetary accounts and funds for the 2002/2003 financial year was expenditure on other goods and services (R15 845,0 million) contributing 32,4% to total expenditure, followed by expenditure on current transfers to households (R14 502,3 million or 29,7%), remuneration of employees (R7 551,8 million or 15,5%), total capital transfers (R5 917,2 million or 12,1%) and total capital expenditure (R3 128,4 million or 6,4%) (see table A, p. 4, columns 3 and 6, and figure 1, p. 5).

The largest percentage increase in the economically classified expenditure categories for the 2002/2003 financial year compared with the 2001/2002 financial year was the increase of 484,5% (R66,3 million to R387,5 million) in subsidies, followed by an increase of 151,6% (R121,0 million to R304,4 million) in transfers, loans and advances to other extra-budgetary accounts and funds, 100,6% (R354,4 million to R711,0 million) in capital transfers to businesses, 87,5% (R101,8 million to R190,9 million) in purchases of land and existing constructions, 68,2% (R143,2 million to R240,9 million) in transfers, loans and advances to national government, 65,7% (R42,9 million to R71,1

million) in transfers, loans and advances to provincial governments, 35,6% (R1 413,3 million to R1 916,7 million) in capital expenditure on new constructions, 35,0% (R10 744,4 million to R14 502,3 million) in current transfers to households, 26,4% (R798,0 million to R1 008,9 million) in purchases of machinery and equipment, 19,2% (R2 773,9 million to R3 307,0 million) in capital transfers to households and 19,1% (R6 338,8 million to R7 551,8 million) in remuneration of employees.

The increase of 484,5% in subsidies was mainly due to higher refunding of diesel levies to the agricultural, forestry, fishing, mining and transport sectors as well as support to the private sector by the Innovation Fund for certain research projects.

The increase of 151,6% in transfers, loans and advances to other extra-budgetary accounts and funds can mainly be attributed to more funds allocated to Sector Education and Training Authorities for strategic projects by the National Skills Fund as well as support for research projects by the Innovation Fund to the Council for Science and Industrial Research, Medical Research Council, Council for Mineral Technology, Agricultural Research Council and the Council for Geosciences.

The increase of 100,6% in capital transfers to businesses was mainly due to higher capital transfers to the Development Bank of Southern Africa for the maintenance and operation of the Driekoppies water scheme, higher irrecoverable amounts written off and provision for doubtful debts by the Agricultural Credit Account as well as higher provision for debts, losses on sale of properties and other write offs by the Provincial Housing Funds.

The increase of 87,5% in purchases of land and existing constructions was mainly due to larger purchases by the South African National Parks and Provincial Housing Funds.

The increase of 68,2% in transfers, loans and advances to national government can mainly be attributed to a R50,0 million transfer from the Road Accident Fund to the Department of Transport regarding the road safety project as well as higher net surplus of the Deeds Registration Trading Account paid over to the National Revenue Fund.

The increase of 65,7% in transfers, loans and advances to provincial governments was mainly due to gambling levies and licence fees surrendered to the North West Provincial Government by the North West Gambling Board. The North West Gambling Board is covered in this series as from the 2002/2003 financial year.

The increase of 35,6% in new constructions was mainly due to higher expenditure on the upgrading of hostels by the Provincial Housing Funds, higher expenditure on non-residential buildings by the SA Revenue Service, South African National Parks and KwaZulu-Natal Nature Conservation Board.

The increase of 35,0% in current transfers to households can mainly be attributed to higher claims paid by the Compensation Fund and the Road Accident Fund, higher expenditure on legal aid rendered by the Legal Aid Board as well as higher grants and bursaries paid by the National Research Foundation.

The increase of 26,4% in expenditure on machinery and equipment can mainly be ascribed to higher purchases of vehicles, computers and other machinery and equipment.

The increase of 19,2% in capital transfers to households was mainly due to higher expenditure by Provincial Housing Funds on the different housing projects to establish and maintain habitable, stable and sustainable residential accommodation.

The increase of 19,1% in remuneration of employees can mainly be attributed to the inclusion of the accounts and funds in this series for the first time in 2002/2003 (see comparability with previous year, par. 14, p. 95).

The increase in capital transfers to foreign countries and international institutions from R0,6 million in 2001/2002 to R1 899,2 million in 2002/2003 was due to exchange rate losses of several extra-budgetary accounts and funds. The Special Defence Account suffered a loss of R1 874,0 million which is applicable to more than one financial year.

The amount of R16,4 million allocated to transfers, loans and advances to universities and technikons in 2002/2003 was due to the Innovation Fund supporting research projects by the Universities of Stellenbosch, Pretoria, Natal and Witwatersrand.

The amount of R0,3 million allocated to purchases of shares, loans and advances to businesses in 2002/2003 represent loans to individual house owners by the Gauteng Housing Fund.

The decrease of 6,5% in expenditure on other goods and services from R16 955,1 million in 2001/2002 to R15 845,0 million in 2002/2003 was mainly due to lesser expenditure by the Special Defence Account.

The decrease of 0,5% in current transfers to foreign countries and international institutions from R57,2 million in 2001/2002 to R56,9 million in 2002/2003 was mainly due to lesser funding of projects in foreign countries by the African Renaissance and International Co-operation Fund.

The decrease of 10,5% in expenditure on intangible assets from R13,3 million in 2001/2002 to R11,9 million in 2002/2003 can mainly be attributed to lesser development costs capitalised by the South African Revenue Service.

The decrease of 43,6% in expenditure not regarded as transactions from R9,4 million in 2001/2002 to R5,3 million in 2002/2003 can mainly be ascribed to lesser fruitless expenditure written off (originated from building contractors who did not fulfil their obligations to the Provincial Housing Funds).

1 The sum of the data may not necessarily add up to the totals due to rounding-off of figures.

2 The annual percentage change is the change in the type of expenditure of the current year compared with the same type of expenditure in the previous year, expressed as a percentage.

3 As the change cannot be meaningful calculated, the nominal change is indicated in Rand million rather than in percentage change.

Figure 1- Economic classification of the expenditure by extra-budgetary accounts and funds for the 2001/2002 and 2002/2003 financial years

Functional classification of the expenditure by extra-budgetary accounts and funds

Functional classification of expenditure measures the purpose for which transactions are undertaken. It is generally used to measure the allocation of resources by government in order to render various services and objectives to the community. The functional classified expenditure categories are indicated in table B, p. 9.

The largest contributor to the total expenditure (functionally classified) by extra-budgetary accounts and funds for the 2002/2003 financial year was the expenditure on community and social services (R23 465,4 million) contributing 48,0% to total expenditure, followed by total expenditure on economic services (R6 549,0 million or 13,4%), total expenditure on general services (R6 421,2 million or 13,1%), expenditure on defence (R6 398,1 million or 13,1%), total expenditure on government enterprises (R5 480,7 million or 11,2%), and expenditure on public order and safety (R551,2 million or 1,1%) (see table B, p. 9, columns 3 and 6, and figure 2, p. 10).

The increase of 21,8% in expenditure on general administration from R2 967,9 million in 2001/2002 to R3 614,6 million in 2002/2003 was mainly due to higher current and capital expenditure by the SA Revenue Service.

The increase of 27,0% in expenditure on basic research from R1 736,7 million in 2001/2002 to R2 206,4 million in 2002/2003 was mainly attributable to higher current expenditure by the Council for Scientific and Industrial Research as well as higher grants by the National Research Foundation, the inclusion of Innovation Fund and higher expenditure by the Human Science Research Council.

The increase of 36,3% in expenditure on other general services from R397,9 million in 2001/2002 to R542,3 million in 2002/2003 was mainly due to higher expenditure by the Sector Education and Training Authorities as well as the inclusion of the SA Local Government Association and the SA Management Development Institute Trading Account as from the 2002/2003 financial year.

The decrease of 19,7% in expenditure on defence from R7 970,5 million in 2001/2002 to R6 398,1 million in 2002/2003 can mainly be ascribed to lesser current expenditure by the Special Defence Account.

The increase of 16,0% in expenditure on police services from R21,3 million in 2001/2002 to R24,7 million in 2002/2003 was mainly due to higher payments for services rendered to the Police, Private Security, Legal and Correctional Services Sector Education and Training Authority.

The increase of 33,5% in expenditure on law courts from R394,4 million in 2001/2002 to R526,4 million in 2002/2003 can mainly be ascribed to higher costs of legal aid rendered by the Legal Aid Board as well as higher expenditure by the Special Investigating Unit and the Public Protector.

The increase of 20,9% in expenditure on education from R834,8 million in 2001/2002 to R1 009,3 million in 2002/2003 was mainly due to increased bursaries and loans to students by the National Student Financial Aid Scheme and the inclusion of the Education Labour Relations Council as from the 2002/2003 financial year.

The increase of 393,1% in expenditure on health services from R240,9 million in 2001/2002 to R1 187,8 million in 2002/2003 was mainly due to higher expenditure by the SA Medical Research Council and the Sector Education and Training Authority as well as the inclusion of the Council for Medical Schemes and the National Health Laboratory Service as from the 2002/2003 financial year.

The increase of 30,9% in expenditure on social security and welfare services from R11 204,4 million in 2001/2002 to R14 670,6 million in 2002/2003 was mainly due to higher claims paid by the Road Accident Fund as well as higher expenditure by the Compensation Fund.

The increase of 20,3% in expenditure on housing and community development from R4 024,9 million in 2001/2002 to R4 841,1 million in 2002/2003 was mainly due to higher expenditure by Provincial Housing Funds as well as the inclusion of the following institutions as from the 2002/2003 financial year: Social Housing Foundation and Municipal Infrastructure Investment Unit.

The increase of 21,3% in expenditure on recreation and culture from R746,8 million in 2001/2002 to R905,7 million in 2002/2003 was mainly due to higher expenditure by the National Botanic Institute and the inclusion of the following institutions as from the 2002/2003 financial year: National Arts Council of South Africa, Market Theatre Foundation, Nelson Mandela National Museum and North West Gambling Board.

The increase of 22,4% in expenditure on environment protection from R695,1 million in 2001/2002 to R851,0 million in 2002/2003 can mainly be ascribed to higher expenditure by the KZN Nature Conservation Board and SA National Parks as well as the inclusion of Greater St. Lucia Wetlands Park.

Regarding economic services, the increase of 60,2% in expenditure on state water schemes and other water services from R126,8 million in 2001/2002 to R203,1 million in 2002/2003 was mainly due to higher expenditure by the Water Research Commission and higher expenditure on services rendered to the Local Government, Water and Related Services Sector Education and Training Authority.

The increase of 158,9% in expenditure on fuel and energy from R120,5 million in 2001/2002 to R312,0 million in 2002/2003 was mainly due to the merging of the National Electricity Regulator's normal business and its electrification fund into one overall and comprehensive financial report in 2002/2003, whereas separate financial reports were developed previously in which case only the normal business was included for the 2001/2002 financial year.

The increase of 43,2% in expenditure on agriculture, forestry, fishing and hunting from R760,3 million in 2001/2002 to R1 088,6 million in 2002/2003 can mainly be ascribed to higher current expenditure on other goods and services and capital expenditure on vessels by the Marine Living Resources Fund, higher refunding of diesel levies to the agriculture, forestry and fishing sectors as well as higher payments for services rendered to the Sector Education and Training Authorities.

The increase of 48,3% in expenditure on mining services from R443,8 million in 2001/2002 to R658,0 million in 2002/2003 was mainly due to higher expenditure on services rendered to the Mining Qualification Authority as well as higher refunding of diesel levies to the mining sector in the 2002/2003 financial year.

The increase of 82,6% in expenditure on manufacturing services from R334,0 million in 2001/2002 to R610,0 million in 2002/2003 can mainly be ascribed to higher expenditure on services rendered to the Chemical Industries Education and Training Authority, Clothing Textiles, Footwear and Leather Sector Education and Training Authority, Food and Beverages Manufacturing Industry Sector Education and Training Authority and Manufacturing, Engineering and Related Services Education and Training Authority.

The increase of 474,5% in expenditure on construction from R16,1 million in 2001/2002 to R92,5 million in 2002/2003 was due to higher expenditure on services rendered to the Construction Industry Development Board and higher expenditure on other goods and services by the Construction Education and Training Authority.

The increase of 52,3% in expenditure on transport and communication from R487,8 million in 2001/2002 to R743,1 million in 2002/2003 can mainly be attributed to higher expenditure on services rendered to the Sector Education and Training Authorities, refunding of diesel levies to the transport sector, transfer (R50,0 million) from the Road Accident Fund to the National Department of Transport regarding the road safety project as well as funds allocated to Sector Education and Training Authorities for strategic project by the National Skills Fund.

The increase of 27,0% in expenditure on other economic services from R2 237,4 million in 2001/2002 to R2 841,7 million in 2002/2003 was mainly due to higher expenditure on services rendered to the Sector Education and Training Authorities, higher expenditure by the Gauteng Tourism Authority, funds allocated to the Sector Education and Training Authorities for strategic projects, higher expenditure by the SA Weather Service and the inclusion of the Micro Finance Regulatory Council and the Companies and Intellectual Property Registration Office as from the 2002/2003 financial year.

As far as government enterprises are concerned, the decrease of 83,2% in expenditure on agriculture, forestry and sea fisheries from R344,0 million in 2001/2002 to R57,7 million in 2002/2003 can mainly be attributed to the fact that the Industrial Plantations Trading Account ceased to exist.

The increase of 51,6% in expenditure on manufacturing from R379,6 million in 2001/2002 to R575,6 million in 2002/2003 was mainly due to higher current expenditure by Government Printing Works Trading Account.

The increase of 16,8% in expenditure on electricity and water services from R2 827,3 million in 2001/2002 to R3 302,4 million in 2002/2003 can mainly be ascribed to higher current expenditure on other goods and services and higher expenditure on other constructions by the Trading Account for State Water Schemes.

The decrease of 2,6% in expenditure on trade and catering services from R639,4 million in 2001/2002 to R622,8 million in 2002/2003 can mainly be ascribed to the commercialisation of certain services by the SA National Parks.

The increase of 41,3% in expenditure on transport and communication from R652,5 million in 2001/2002 to R922,2 million in 2002/2003 was mainly due to increased expenditure on other goods and services and higher capital expenditure on machinery and equipment by the Government Motor Transport Trading Accounts.

EXPLANATORY NOTES

Introduction

- 1 This statistical release provides economic and functional classifications of the expenditure of the extra-budgetary accounts and funds of the national and provincial governments for the 2002/2003 financial year, ended 31 March 2003. National and Provincial extra-budgetary accounts and funds consist of 186 institutions for the 2002/2003 financial year (see explanatory note 9, p. 87 with regard to the list of extra-budgetary accounts and funds used in this publication).
- 2 Extra-budgetary accounts and funds refer to accounts and funds of national and provincial governments not included in normal budget totals and which do not operate through normal parliamentary budgetary procedures, e.g., trading accounts and general government accounts.
- 3 The information in this release contains details of extra-budgetary accounts and funds for-
 - # the national government including those which are administered by government departments and/or by the institution itself; and
 - # provincial extra-budgetary accounts and funds which are not administered by the provincial administrations.
- 4 The transactions of the Secret Services Account are excluded from these tables and shall only be included in the statistical release of the consolidated expenditure of the general government sector (P9119).
- 5 The transactions of the following institutions are excluded from the tables-
 - # Pension and provident funds of the state; and
 - # Public Investment Commissioners (certain particulars on the acquisition of funds by this institution are published in the quarterly bulletin of the South African Reserve Bank (SARB)).

Methodology

- 6 The transactions between the various extra-budgetary accounts and funds have not been eliminated, but are shown as transfers to other extra-budgetary accounts and funds.
- 7 In contrast to national departments, which keep their accounts on a cash basis, the accounts of extra-budgetary accounts and funds, with a few exceptions, are kept on an accrual basis, i.e. the payments are recorded in the period to which the transactions relate and surpluses, deficits, assets and liabilities are carried over to the next financial year. In the case of the cash basis, the transactions are recorded at the time when cheques are issued for payment. Depreciation represents the provision shown in the audited financial statements of the accounts or funds. There is, however, no uniformity in the method providing for depreciation. In some cases the assets are written off over their lifetime, while in other cases the assets are written off in full in the year of purchase.
- 8 The information is processed from audited financial statements of the extra-budgetary accounts and funds.

Scope of the financial statistics of the extra-budgetary accounts and funds

National government.
Universities and technikons.
Other extra-budgetary accounts and funds.
Provincial governments.
Local authorities.

12 Functional Classification

Functional classification measures the purpose for which transactions are undertaken. It is generally used to measure the allocation of resources by government in order to provide various services and objectives to the community.

Expenditure is classified functionally as follows:

A. General Government**# General services**

General administration.
Foreign affairs.
Basic research.
Other.

Defence**# Public order and safety**

Police.
Correctional services.
Law courts.

Community and social services

Education.
Health.

Housing and community amenities.
Recreation and culture.
Environment protection.

Economic services

State water schemes and other water services.
Fuel and energy.
Agriculture, forestry, fishing and hunting.
Mining.
Manufacturing.
Construction.
Transport and communication.
Other economic services.

B. Government enterprises

Agriculture, forestry, fishing and hunting.
Mining and energy.
Manufacturing.
Electricity and water services.
Trade and catering services.
Transport and communication.
Finance, insurance and real estate.
Community services.

13 Individual and collective services

This statistical release also includes tables in which government consumption expenditure is broken down into individual and collective services (see table 8, p. 67). The breakdown between subsidies on products and subsidies on production is also given (see. table 9, p.73). These categories are recommended by the 1993 System of National Accounts (SNA) of the United Nations.

Comparability with previous statistical releases 14

The following accounts and or funds came into effect in this statistical release as from the 2002/2003 financial year and are therefore included for the first time –

- # SA Local Government Association (functionally classified as other general services);
- # Accounting Standard Board (functionally classified as financial and fiscal services);
- # Innovation Fund (functionally classified as basic research);
- # Academy of Science of SA (functionally classified as basic research);
- # SA Management Development Institute Trading Account (functionally classified as other general services);
- # Council for Medical Schemes (functionally classified as health);
- # National Health Laboratory Service (functionally classified as health);
- # Social Housing Foundation (functionally classified as housing);
- # Municipal Infrastructure Investment Unit (functionally classified as community development);

- # North West Gambling Board (functionally classified as recreation);
 - # Nelson Mandela National Museum (functionally classified as culture: museum);
 - # Market Theatre Foundation (functionally classified as other culture);
 - # National Arts Council of SA (functionally classified as other culture);
 - # Greater St. Lucia Wetlands Park (functionally classified as environmental protection);
 - # The Education Labour Relations Council (functionally classified as education);
 - # Micro Finance Regulatory Council (functionally classified as other economic services); and
 - # Companies and Intellectual Property Registration Office (functionally classified as other economic services).
- 15** The following accounts/funds were previously included but are now excluded from the current tables –
- # North West Communication Service (functionally classified as other general services);
 - # Truth and Reconciliation Commission (functionally classified as law courts);
 - # Free State Tourism Marketing Board (functionally classified as tourism);
 - # Industrial Plantations Trading Account (functionally classified as government enterprises: agriculture, forestry, hunting and fisheries).
- 16** As from 2002/2003 financial year the North West Arts Council merged with Mmabana Cultural Foundation and the Foundation for Education, Science and Technology incorporated with the National Research Foundation.
- 17** Regarding expenditure on housing services, detailed information could not be obtained from the Provincial Housing Funds of the Northern Cape, Limpopo, North West and Eastern Cape. In these cases the classified expenditure were estimated based on the transfers to them.
- 18** The detailed transactions of the Independent Electoral Commission are included in the 2002/2003 tables for the first time. The figures in tables A and B for the 2001/2002 financial year are adjusted accordingly with the expenditure of the Commission.
- 19** Extra-budgetary accounts and funds refer to accounts and funds of national and provincial governments which are not included in normal budget totals and do not operate through normal budgetary procedures, and are financed or managed by national or provincial governments. These institutions compile their own financial statements which are audited by the Auditor-General (see paragraph 9, p. 88 to 93 for a complete list).

GLOSSARY

| | |
|---|--|
| Annual percentage change | The annual percentage change is the change in the type of expenditure or type of service of the current year compared with the same type of expenditure or type of service in the previous year, expressed as a percentage. |
| Collective services | Collective services refer to the services provided collectively to the community and are particularly applicable on services such as general administration, public order and safety and economic services. |
| Economic classification | Economic classification is a measure of the nature and economic effect of government operations on the economy of the country. |
| Extra-budgetary accounts and funds | Extra-budgetary accounts and funds refer to accounts and funds of national and provincial governments which are not included in normal parliamentary budget totals and do not operate through normal parliamentary budgetary procedures, e.g. trading accounts and general government accounts. |
| Public financial institutions | Public financial institutions are units primarily engaged in both incurring liabilities and acquiring financial assets in the market. Financial institutions may be entirely or mainly owned and / or controlled by the government in which case they are regarded as public financial institutions. It is the prime function of public financial institutions to act as intermediaries. |
| Functional classification | Functional classification measures the purpose for which government transactions are undertaken. It is generally used to measure the allocation of resources by government to provide various services to the community. |
| Household | Household may be defined as individuals or a group of persons who share the same living accommodation. |
| Individual services | Individual services refer to services rendered to individuals or to a small group of persons. This category applies particularly to community and social services, e.g. education, health and welfare. |
| Intangible assets | Intangible fixed assets consist of mineral exploration, computer software, entertainment, literary and artistic originals and miscellaneous other intangible fixed assets. Other intangible fixed assets consist of new information and specialised knowledge. |
| Machinery and equipment | Machinery and equipment include motor vehicles, ships, aircraft, equipment and furniture. Expenditure for military purposes is included in this definition. |
| Non-financial public enterprises | Non-financial public enterprises are government owned and/or government controlled units, which sell industrial or commercial goods and services to the public on a large scale. |
| Non-profit institutions serving households (NPISH) | NPISH are institutions mainly engaged in non-market production. Government does not necessarily finance and / or control NPISH. |
| Non-residential buildings | Non-residential buildings include hospitals, offices and office blocks (also for military purposes), warehouses, laboratories and workshops. |
| Other constructions | Other constructions include fencing, soil conservation works, sewerage and storm water drainage. |

| | |
|----------------------------------|---|
| Other goods and services | Other goods and services include purchases of all goods and services, except remuneration of employees, for current activities. In accordance with recommendations of the 1993 SNA these kinds of expenditure exclude capital expenditure relating to defence and office, school, hospital and household furniture and equipment. |
| Remuneration of employees | Remuneration of employees include primarily salaries, wages, services and other bonuses, allowances (including car allowances), overtime payments, retirement benefits, contributions to medical, pension and provident funds, unemployment insurance, accident funds and housing subsidies. |
| Residential buildings | Residential buildings are buildings that are used entirely or primarily as residences and include flats, hotels and nursing homes. |
| Subsidies | Subsidies are current unrequited payments that general government institutions pay to enterprises on the basis of the quantities or values of the goods and services, which they produce, sell or import. |
| Subsidies on products | Subsidies on products are payments made per unit of good or service. |
| Subsidies on production | Subsidies on production are payments which resident enterprises may receive as a consequence of engaging in production. |

General information

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also by international economic and social-scientific communities, Stats SA releases are published in English only.

Stats SA has copyright on this publication. Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.
