FINANSIELLE STATISTIEKE VAN PLAASLIKE OWERHEDE,  
1990/91

FINANCIAL STATISTICS OF LOCAL GOVERNMENTS,  
1990/91

27 JULY/JULIE 1992

## OPSUMMING

Die totale lopende inkomste van die algemene owerheidsafdelings (insluitende riolerings- en reinigingsdienste) het vanaf R5 970 miljoen in 1989/90 tot R6 815 miljoen in 1990/91 toegenom, wat 'n toename van 14,1% verteenwoordig, terwyl lopende besteding (uitgesonderd delging van lenings, bydraes tot kapitaaluitgawes en netto oordragte na reserwefondse) vir dieselfde tydperk van R5 322 miljoen tot R5 895 miljoen ('n toename van 10,8%) toegeneem het.

Handelsdienste (uitsluitende riolerings- en reinigingsdienste) se lopende inkomste vir die betrokke finansiële jare het vanaf R7 834 miljoen tot R9 358 miljoen ('n 19,5% toename) en lopende besteding, (uitgesonderd delging van lenings, bydraes tot kapitaaluitgawes en netto oordragte na reserwefondse), van R6 607 miljoen tot R7 679 miljoen ('n 16,2% toename) gestyg.

Die totale kapitaalbesteding op nuwe konstruksies (Tabelle 11.1 en 11.2) het vanaf R2 411 miljoen in 1989/90 tot R2 461 miljoen in 1990/91 ('n 2,1% toename) gestyg.

## SUMMARY

Total current income of the general government divisions (including sewerage and cleansing services) increased from R5 970 million in 1989/90 to R6 815 million in 1990/91, representing an increase of 14,1%, while current expenditure (excluding redemption of loans, contributions to capital outlay and net additions to reserve funds) for the same period increased from R5 322 million to R5 895 million (an increase of 10,8%).

The current income of the trading services (excluding sewerage and cleansing services) for the relevant financial years, increased from R7 834 million to R9 358 million (a 19,5% increase) and current expenditure (excluding redemption of loans, contributions to capital outlay and net additions to reserve funds) increased from R6 607 million to R7 679 million (a 16,2% increase).

The total capital expenditure on new constructions (Tables 11.1 and 11.2) increased from R2 411 million in 1989/90 to R2 461 million in 1990/91 (a 2,1% increase).

## VERDUidelIKENDE OPMERKINGS

### Omvang en metode van opname

Hierdie nuusberig bevat gegewens van plaaslike overhede, uitgesonderd plaaslike overhede vir Swartes.

Die inligting vir die finansiële jaar 1990/91 is versamel deur middel van 'n steekproefopname. Die voorige volledige opname is gemaak ten opsigte van die jaar 1988/89 en in Verslag 91-14-01 (1988/89) gepubliseer.

Die gegewens van die steekproefopname is verhef om die totale vir alle plaaslike overhede te verkry; die verheffingsfaktore is gebaseer op die resultate van die volledige opname vir die 1988/89-finansiële jaar.

Die statistieke in hierdie nuusberig sluit nie die transaksies betreffende die lenings uit die Nasionale Behuisingsfonds wat aan nuthuise gesorg word nie en persone gemaak word en deur die plaaslike overhede geadmireer word, nie.

Hierdie nuusberig toon nie vermaakte statistieke van plaaslike overhede volgens statistiese streke nie.

Die getal en soorte plaaslike overhede wat gedurende die opname bestaan het en die getal wat by die steekproefopname ingesluit is, is soos volg:

### Vergelykbaarheid met voorige finansiële jare

Die gegewens van hierdie opname is streg vergelykbaar met dié wat vir die vorige boekjaar gepubliseer is. Begrippe "algemene overheid" en "overheidsdienstes"

In hierdie nuusberig word onderskei tussen die twee ekonomiese sektore, algemene overheid en overheidsdienstes, wat in hoofsaak uit die sogenaande handelsdienste bestaan, in ooreenstemming met die beginnels van nasionale rekeninge.

(i) Overheidsondernemings (handelsdienste)

Die bedrywighede wat onder die onderneming- of besigheidssektor ressorteer, omvat al die benuising-, abattoir-, elektrisiteits-, gas-, mark-, passierservoer- en waterdienste van plaaslike owerhede. Behalwe in die geval van die kleinste plaaslike owerhede waar die ondernemingsbedrywighede vir die algemeen tot die verskaffing van water en van mark- en abattoirdienste beperk is, bestaan daar afsonderlike fondse en dus ook afsonderlike rekenings vir elk van hierdie bedrywighede.

Die behuisingskenas van plaaslike owerhede word as overheidsondernemings beskou slegs waar daar afsonderlike rekenings of fondse bestaan. Die gewens wat in hierdie nuusberig vir die behuisingsondernemings gecsoom word, is ook slegs 'n weergawe van die transaksies wat in die plaaslike owerhede se rekenings verskyn. So soos die lopende rekenings (Tabel 2) slegs die uitgawe wat die plaaslike behuisingsdienste in berekening gebring het. Hierdie tabel le slyt dus geen voortetting in vir die dienste wat die algemene owerheidsdienste van die plaaslike owerhede kosteloos aan die behuisingsdienste verskaf het nie. Die huijngeld wat ontvang word vir wonings wat nie deur die definisie van 'n behuisingskrediet gedeck word nie, word afsonderlik in Tabel 1 getoon. Hierdie tabel sluit ook die huur in wat plaaslike owerhede ontvang ten opsigte van grond en geboue wat vir openbare doeleindes aangekoop is en verhuur word totdat dit aangewend kan word vir die doeleindes waarvoor dit aangekoop is.

Die riolering- en reinigingsdienste is by die algemene owerhede ingesluit, ongeag of sulke dienste deur die plaaslike owerhede as afsonderlike owerheidsondernemings of as deel van die Belasting- en Algemene Dienste beskou word.

Wat betref die ondernemingsbedrywighede van plaaslike owerhede wat nie hierbo genoem is nie, word slegs die ondernemingsbedrywighede waarvoor afsonderlike rekenings gehou word of waarvoor die inligting gereeldlik beskikbaar is, as ondernemingsdienste beskou. Hierdie groep omvat hoofsaaklik sekere land- en bosboubedrywighede, minerale baddens, klapbrekerye en lughawens.

Die overheidsondernemings is gewoonlik in staat om die grootste deel van hulle uitgawe uit die opbrengs van plaslike owerhede soos hierbo gedefinieer, en die gegewens word afsonderlik getoon.

(ii) Algemene owerheid (Belasting- en Algemene Dienste)

Alle bedrywighede wat nie by die overheidsondernemings ingesluit is nie word onder die algemene owerheidsektor geklassifiseer. Dit omvat hoofsaaklik die dienste wat by die Belasting- en Algemene Dienste van plaaslike owerhede ingesluit word. Riolerings- en reinigingsdienste is ook ingesluit.

Dit was moontlik om feitlik volledige en noukeurige gegewens te bekom ten opsigte van die ondernemingsbedrywighede van plaslike owerhede te dek.

Dit was moontlik om feitlik volledige en noukeurige gegewens te bekom ten opsigte van die ondernemingsbedrywighede van plaslike owerhede te dek.

Lopende rekenings(i) Konsolidasie van die verskillende fondse en rekenings

Afsonderlike lopende rekenings vir die algemene owerheidsektor en vir elke owerheidsondermeling word aangesloton. 'n Gekonsolideerde lopende rekening vir al die lopende transaksies van die plaaslike owerhede word nie verstrek nie.

Die lopende transaksies van die Belasting- en Algemene Dienste, Dorpsaanlegsuspensierekening, Erfvertrusfonds, Beleidfonds, Beleidmeterfonds, Parkermeterfonds, Geleentheidsfonds, Gekonsolideerde Lefingsfonds, Kapitaal- (Ontwikkelings), Verbetterings-, hernuwings-, herstel-, verselerings-, slegte skulde en ander fondse en rekenings van die plaaslike owerhedsdiensts betrekking het nie, is op so 'n wyse gekonsolideer dat, uitgesonderd interne rente, alle interne transaksies (soos oordragte na en van reservewondse en ordingte van 'n ander om te korte termyn, ens.) uitgeskakel is. Kapitaaltransaksies, soos grondaankope en -verkope, en bydraes vir kapitaalbesteding van die Dorpsaanlegsuspensierekening, Erfvertrusfonds, Openbare Verbeteringsfonds en Wenteelfonds is nie in die lopende rekening ingesluit nie.

Al die lopende transaksies van die verskillende fondse en rekenings wat op owerheidsondermings betrekking het, is op diese lopende wyse gekonsolideer.

(ii) Voorsiening vir waardevermindering

Lopende uitgawes behoort in beginsel voorsiening vir waardevermindering van vaste bates in te sluit. Die berekening van die waardevermindering vir sommige vaste bates van die algemene owerheid, by, paaie, lewer egter konsepuele en praktiese moeilikhede op. Wat cie algemene owerheidssekretor betref, is dit daarom internasionale gebruik om waardevermindering slegs vir geboue en groot uitrusting te raam. In die geval van die owerheidsonderneemings egter, behoort voorsiening vir die waardevermindering van alle vaste bates gemaak te word. Vir die doeleindes van nasionale rekeninge behoort die voorsiening op die vervangingswaarde van die bates gebaseer te word.

Plaaslike overhede in die vier provinsies skryf nie die boekwaarde van hulle bates jaarliks af nie. Die bates word hoofsaaklik met leningsfondse gefinansier en die lenings word afgeloos of 'n korter tydperk as die levensduur van die bates. Die uitsaande leningskuld word gewoonlik regstreks uit die lopende rekenings in paaisemente afgeloos sonder dat van 'n delgingsfonds gebruik gemaak word. Die meeste groot plaaslike owerheds het gekonsolideerde leningstonde, terwyl kleiner paastryke ammunitie-lenslengs aangaan. Hernuwingfondse word ook in sommige gevalle gebruik.

In hierdie nuusberig word die "oorskot" op die lopende rekenings aangegetoon voordat vir die waardevermindering of vir die delging van lenings voorsering gemaak is. Besonderhede oor die werklike delging van lenings word egter in Tabel 10 getoon.

(iii) Oorskot op lopende rekenings

Die "oorskot" op lopende rekenings word aangegetoon voordat vir waardevermindering, delging van lenings en bydraes tot kapitaaluitgawes voorsering gemaak is en voordat oordragte tussen die owerheids- en ondernemingsdiensste in berekening gebring is. In die geval van reservefondse is die oordragte na die reservefondse uitgedeel uit die besteding uit die reserwestabilisasiestelsel-/geleykstellingsrekenings uitgeskakel.

(iv) Oorskot op en oordragte tussen lopende rekenings en die aanwending van die oorskot

Die oordragte tussen die algemene owerheids- en ondernemingsdiensste word in Tabel 10 aangegetoon. Wat die delging van lenings betref, word die werklike bedrag wat gedeel is, aangegetoon. In die gevalle waar plaaslike owerheds delgingsfondse uitgeskakel en is die bedrag van die delging uit die delgingsfondse in die plek daarvan gestel. Die syfers in die tabel omvat die delging van beide interne en eksterne lenings.

Transaksies in kapitaalgodedere (Tabele 11.1 en 11.2)

Die aankoop van bates soos grond, geboue, uitrusting, voertuie, meubels en ander bates van 'n kapitale aard wat in normale gebruik 'n lewe van minstens vyf jaar het, word gekapitaliseer.

Die pos "ander konstruksies" in die tabelle sluit hoof leidings en meters, transformators, opgaardamme, filtereininstallasies, koeltorings en damme van die elektrisiteits- en waterdiensste, asook straatbeligting en soortgelyke konstruksies in.

Gesamentlike balansstaat (Tabel 12)

Die gesamentlike balansstaat dek alle bates en laste van plaaslike owerheds. Die besonderhede oor al die bates en laste van die verskillende dienste van die plaaslike owerhede word nie afsonderlik deur die Sentrale Statistiekdens versamel nie.

Scope and method of survey

This news release contains information of local authorities, except local authorities for Blacks.

The information for the 1990/91 financial year was collected by means of a sample survey. The previous complete survey was undertaken for the year 1988/89 and were published in Report 91-14-01 (1988/89).

The data from the sample survey were raised to obtain the total for all local authorities; the raising factors were based on the results of the complete survey for the 1988/89 financial year.

The statistics in this news release do not include the transactions relating to loans made from the National Housing Fund to utility companies, welfare organisations and persons administered by local authorities.

This news release does not show principal statistics of local authorities by statistical region.

The numbers and types of local authorities which existed at the time of the survey and the number included in the sample survey, are as follows:

Local authority	Cape (inc. Walvis Bay)		Natal		Transvaal		Orange Free State		Grand total	
	Total	Sample survey	Total	Sample survey	Total	Sample survey	Total	Sample survey	Total	Sample survey
Municipalities	169	10	35	5	63	23	70	2	337	40

Comparability with previous financial years

The figures of this survey are strictly comparable with those published for the previous financial year.

The concepts "general government" and "enterprises"

This news release distinguishes between the two economic sectors, general government and enterprises, which consist mainly of the so-called trading services in accordance with the principles of national accounts.

(i) Government enterprises (trading services)

The activities classified under the enterprise or business sector comprise all housing, abattoir, electricity, gas, market, passenger transport and water services of local authorities. Except in the case of the smallest local authorities, where the enterprise activities are usually confined to the supply of water and of market and abattoir services, there are separate funds and therefore also separate accounts for each of these activities.

The housing schemes of local authorities are regarded as government enterprises only where separate accounts or funds exist in respect thereof. The particulars of housing enterprises furnished in this news release merely reflect the transactions appearing in the accounts of local authorities. Thus, the current accounts (Table 2) include only the expenditure debited by the local authorities to their housing services. These tables, therefore, do not include provisions for services rendered free of charge to the housing services by the general government services of the local authorities. The rents received in respect of dwellings excluded from the definition of a housing scheme are shown separately in Table 1. This table also includes rent received by local authorities in respect of land and buildings purchased for public purposes and rented until such premises can be used for the purpose for which they were purchased.

The sewerage and cleansing services of all local authorities, irrespective of whether such services are regarded by local authorities as separate government enterprises or as part of the Rate and General Services, are included in general government.

As regards enterprise activities of local authorities other than those enumerated above, only the enterprise activities in respect of which separate accounts are kept or where the information is readily available, are regarded as government enterprises. This group comprises mainly certain agriculture and forestry activities, mineral baths, quarries and airports.

The government enterprises are generally in a position to meet most of their costs from the proceeds of sales.

It was possible to obtain virtually complete and accurate data in respect of the enterprise activities of local authorities as defined above, and the data are shown separately.

(ii) General government (Rate and General Services)

All activities not included in government enterprises are classified under the general government sector. These comprise mainly the services which are included in the Rate and General Services of local authorities. Sewerage and cleansing services are also included.

Normally the government sector does not charge direct fees on an economic basis for the goods and services it provides; the expenditure is met mainly from taxes and grants received from other government bodies.

Current accounts(i) Consolidation of the various funds and accounts

Separate current accounts are shown for the general government sector and for each government enterprise. A consolidated current account is, however, not furnished for all current transactions of local authorities.

All current transactions of the Rate and General Services, Parking Meter Fund, Endowment Fund, Township Suspense Account, Erven Trust Fund, Land Trust Fund, Public Improvement Fund, Revolving Fund, Consolidated Loans Fund and all loan redemption, capital (development), improvement, rentals, repairs, insurance, bad debts and other funds and accounts of local authorities not relating to a government enterprise, have been consolidated in such a manner as to eliminate all internal transactions (such as transfers to or from reserve funds, transfers from one account to another to meet deficits, etc.) except internal interest. Capital transactions, such as purchases of land, land sales and contributions to capital outlay of the Township Suspense Account, Erven Trust Fund, Public Improvement Fund and Revolving Fund are not included in the current accounts.

All the current transactions of the various funds and accounts relating to a government enterprise have been consolidated in the same way.

(ii) Provision for depreciation

P9105.1

Current expenditure should, in principle, include provision for the depreciation of fixed assets. However, the calculation of depreciation of some fixed assets of the general government sector, e.g. roads, presents conceptual and practical difficulties. As far as the general government sector is concerned, it is therefore international practice to estimate depreciation for buildings and major equipment only. In the case of local government enterprises, however, provision should be made for the depreciation of all fixed assets. For purposes of national accounts, the provision should be based on the replacement value of the assets.

Local authorities in the four provinces do not write off the book value of their assets annually. The assets are mainly financed from loan funds and the loans are redeemed within a shorter period than the life of the assets. The outstanding loan debt is usually redeemed directly against the current accounts by way of instalments and without making use of a redemption fund. Most of the large local authorities have consolidated loan funds, while smaller local authorities negotiate annuity loans. Renewal funds are also used in certain cases.

In this news release the "surplus" on current account is shown before provision is made for depreciation or for the redemption of loans. Particulars of the actual redemption of loans are, however, shown in Table 10.

(iii) Surplus on current accounts

The "surplus" on current accounts is shown before provision is made for depreciation, the redemption of loans and contributions to capital outlay and before transfers between the government and enterprise services are accounted for. In the case of reserve funds the transfers to the reserve funds are eliminated and the actual current expenditure for the reserve funds substituted. In the same way transfers to rates/tariff stabilisation/equalisation accounts are eliminated.

(iv) Surplus and transfers between current accounts and appropriation of the surplus

The transfers between the general government and government enterprise services are shown in Table 10. With regard to the redemption of loans, the actual amount redeemed is shown. In cases where local authorities use redemption funds the transfers to the redemption funds have been eliminated and the amount of redemption from redemption funds substituted. The amounts in the table include the redemption of internal and external loans.

Transactions in capital goods (Tables 11.1 and 11.2)

Purchases of assets, such as land, buildings, equipment, vehicles, furniture and other assets of a capital nature with a lifespan of at least five years in normal use, are capitalised.

The item "other constructions" in the tables includes mains and meters, transformers, reservoirs, filtration plants, cooling towers and dams of the electricity and water services and also street lighting and similar constructions.

Aggregate balance sheet (Table 12)

The aggregate balance sheet covers all assets and liabilities of local authorities. The particulars of all the assets and liabilities of the various services of the local authorities are not collected separately by the Central Statistical Service.
