

Documented Migration, 2001  
03-51-03

## SUMMARY

### Introduction

This report presents data on declared permanent immigration to, and permanent emigration from, South Africa (SA) during 2001. While there are several sources of emigration statistics, at present Statistics South Africa obtains its emigration statistics from the departure forms filled in by South African residents, upon departure from either of the three international airports of Johannesburg, Durban and Cape Town. By law it is compulsory for South African citizens to fill in these forms. However, for various logistical reasons, it is not always feasible to accurately verify the contents of the details filled in. In other words, an intending emigrant may not always fill in the form, and even if the intending emigrant does complete it, he/she may state that the purpose of visit is 'holiday' or 'business'. The emigration statistics reported here, therefore, refer to 'self-declared emigration', which is different from actual emigration. A comparative assessment of the data on self-declared emigration is given in the section following the summary. The possibility of obtaining and analysing different sources of migration data is being explored. Readers will be informed of any progress in this regard.

### Historical trend in documented immigration and self-declared emigration

#### *Trend in documented immigration to SA*

There have been wide fluctuations in the trends of documented immigration to SA. Figure 1 shows that there were two prominent peaks. One peak occurred in 1975 and the other in 1982. The 1975 peak was largely due to the doubling in the number of immigrants from the UK between 1973 and 1975 and to some extent, immigration into SA from Mozambique, after the country gained independence in that year. The 1982 peak was largely due to immigration to SA from the UK, China and Portugal. From 1990 onwards, there was a downward trend in the number of documented immigrants to SA. In 2001 the number of documented immigrants to SA was 4 832, an increase of 58,3% as compared to the 2000 figure of 3 053.

#### *Trend in self-declared emigration from SA*

The emigration data from 1970 to present show three major peaks. These peaks occurred in 1977, 1986 and 1994. During those peak years, the leading destination country for self-declared emigrants was the UK. In the post-1994 period, the trend in self-declared emigration from SA to other countries has been gradual. In 2001 the number of self-declared emigrants turned out to be 19,5% higher than that of 2000. The number of self-declared emigrants increased from 10 262 in 2000 to 12 260 in 2001.

#### **Documented immigration and self-declared emigration by country of origin and destination, respectively**

As stated earlier, the total number of self-declared emigrants from SA during 2001 was 12 260. Of these, 9 766 (79,7%) were South African citizens. The rest were permanent residents who were either returning to their countries of origin, or emigrating to other countries after having settled in SA for a while.

Figure 2 shows the distribution of the leading source countries (of previous permanent residence) of documented immigrants and leading destination countries of self-declared emigrants. During 2001 the UK was the leading source country of documented immigrants as well as the leading destination country of self-declared emigrants. A total of 4 043 self-declared emigrants (33,0%) went to settle in the UK and a total of 622 documented immigrants (12,9%) came to settle in SA from the UK. Other leading destination countries were: Australia, 1 820 (14,8%); the USA, 1 181 (9,6%); New Zealand, 1 091 (8,9%); Namibia, 540 (4,4%) and Canada, 478 (3,9%). Other leading source countries of documented immigrants were: India, 487 (10,1%); Germany, 349 (7,2%); Zimbabwe, 326 (6,7%); China, 254 (5,3%); Nigeria, 198 (4,1%) and Pakistan, (4,1%).

#### **Documented immigrants by country of previous permanent residence, country of birth and country of citizenship**

For a person who has been granted permanent residence status in SA, details are collected about the person's country of birth, the country of citizenship and the country of previous permanent residence. If for any given country, more immigrants report that country as their country of birth than their country of citizenship, this may reflect the emigration of second generation immigrants of that country. If for another given country, more immigrants report that given country as their country of previous permanent residence than their country of birth, this may reflect a step-wise migration process for short-term immigrants of that country. In effect, this refers to persons who emigrate from their home countries to another country where they stay for a while until they obtain permanent residence in that country and subsequently emigrate from there. Lastly, if for yet another given country, more immigrants report that country as their country of citizenship than their country of birth, this may reflect a step-wise migration process for long-term immigrants of that country. This refers to persons who emigrate from their home countries to another country where they stay till they obtain citizenship and then emigrate further from there.

During 2001 a total of 4 832 persons were granted permanent residence in SA. Of these, 1 534 (31,7%) were granted residence before arrival and 3 298 (68,3%) after arrival. Of the total number granted permanent residence, 3 407 (70,5%) were permanent residents of an overseas country and 1 419 (29,4%) were permanent residents of a mainland African country. Of the immigrants from overseas, the number reporting such a country as their country of birth (3 409) is about the same as those reporting such a country as their country of previous permanent residence (3 407). Of the immigrants from mainland Africa, the number reporting a mainland Africa as the country of birth (1 422) is also about the same as those reporting such a country as the previous permanent residence (1 419).

Slightly more immigrants reported an overseas country of citizenship (3 458) than their country of birth (3 409). This means that immigration to SA from overseas comprises not only of born-citizens of overseas countries but also of naturalised citizens of those countries. On the contrary, slightly more immigrants reported a mainland African country as their country of birth (1 422) than their country of citizenship (1 374). This means that immigration to SA includes not only citizens of those countries but also second-generation immigrants into those countries.

#### **Selected characteristics of documented immigrants and self-declared emigrants**

Age and occupation are two important characteristics of documented immigrants and self-declared emigrants. These two important characteristics have an impact on the labour force and its composition.

#### *Age profile of documented immigrants and self-declared emigrants*

The percentage distribution of both documented immigrants and self-declared emigrants by age group in 2001 is shown in Figure 3. Both age profiles show a major peak as in standard age profiles of migration. For self-declared emigrants, the peak is broad and occurs over the age range 25-34. For documented immigrants, the peak occurs over the age group 30-34. For documented immigrants a minor peak occurs at the age group 5-9, reflecting the phenomenon of young dependant children accompanying their migrating parents. For ages below five and ages 40 and over, there is relatively higher proportion of self-declared emigrants than documented immigrants, while for ages between 20 and 40 there is relatively higher proportion of documented immigrants than self-declared emigrants.

#### *Occupation background of documented immigrants and self-declared emigrants*

During 2001, out of the 4 832 persons granted permanent immigration status, 953 (19,7%) were economically active, while 3 879 (80,3%) were not economically active. For self-declared emigrants, out of a total of 12 260, 7 591 (61,9) were economically active, while 4 669 (38,1%) were not economically active. Of the economically active documented immigrants, 524 (10,8%) were in the professional category, followed by 258 (5,3%) in the managerial category. On the other hand, 2 929 (23,9%) of the economically active self-declared emigrants were in the professional category, followed by 1 279 (10,4%) in the clerical and sales category. Figure 4 shows this occupational breakdown among both the documented immigrants and the self-declared emigrants.
