1. Introduction

1.1 Aim and collection unit

This publication presents estimates in respect of the Census of Commercial Agriculture (CoCA), 2017 – Northern Cape. The survey aims to provide financial, production, employment and related information for the commercial agriculture industry in South Africa.

The last CoCA was conducted in 2007 (Reports No. 11-02-08 (2007)).

It is important to note that in 2007 the collection unit was a farming enterprise. The collection unit for CoCA 2017 is a farming unit, where a farming unit consists of one or more farms, holdings or pieces of land, whether adjacent or not, operated as a single unit and situated within the same local municipality. In this report, the word farm means farming unit.

1.2 Scope and coverage

CoCA 2017 covers enterprises registered for value added tax (VAT) and which are mainly or primarily engaged in the following activities classified according to the January 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth edition.

- Growing of crops, market gardening and horticulture (SIC 111),
- Farming of animals (SIC 112),
- A combination of the above (mixed farming) (SIC 113),
- Agricultural and animal husbandry services, except veterinary activities (SIC 114), and
- Game propagation, including related services (SIC 1151).

1.3 Data items

The following categories of data items were collected: general information, land use, field crops, horticultural crops, animals, employment, income, expenditure and details of purchases.

1.4 Reference period

The questionnaires were completed for the financial year ended on any date between 1 March 2017 and 28 February 2018, according to the usual reporting schedule of the enterprise, with the following exceptions:

- Animals on farms as at 30 September 2018, and
- Employment as at 30 June 2018.

1.5 Current prices

The rand values are at current prices.

1.6 Reliability of data

The following are some of the likely sources of non-sampling errors: frame not up to date, wrong definitions and classification, phrasing of questions, non-response, processing and estimation. Every effort is made to minimise non-sampling errors by updating the frame, careful design of questionnaires, testing them with a sample of respondents, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses.

1.7 Confidentiality

According to section 17 of the Statistics Act, 1999 (Act No. 6 of 1999), completed questionnaires remain confidential to Statistics South Africa (Stats SA). Individual business information is never disclosed. Results are presented in aggregated form only.

2. Key findings

2.1 Farming units, income, and employment

Table A - Number of farms/ farming units, income and employment in the commercial agriculture industry, 2017

Type of activity	Number of farms		Income		Employment	
	Number	% contribution	R'000	% contribution	Number	% contribution
Growing of cereals and other crops	1 157	24,0	3 769 409	20,2	10 207	14,8
Horticulture	331	6,9	4 140 806	22,1	28 089	40,7
Farming of animals	2 641	54,6	6 362 583	34,0	17 004	24,6
Mixed farming (growing of crops combined with farming of animals)	653	13,5	3 882 492	20,8	12 458	18,0
Agricultural services and fertiliser production	47	1,0	539 551	2,9	1 312	1,9
Northern Cape	4 829	100,0	18 694 841	100,0	69 070	100,0

The total number of farms/ farming units involved in the commercial agriculture industry in 2017 was 4 829. The largest proportion of farms was in farming of animals (2 641 farms or 54,6% of the total), followed by growing of cereals and other crops (1 157 or 24,0%).

The district municipality with the highest number of farms in 2017 was Pixley ka Seme (1 460 farms or 30,2% of the provincial total), followed by Z F Mgcawu (1 370 or 28,4%) and Namakwa (838 or 17,4%).

The total income for the commercial agriculture industry in 2017 was R18,7 billion, which was 261% higher than the R5,2 billion recorded for 2007. In 2017, the major contributor to total income was farming of animals (R6,4 billion or 34,0%), followed by horticulture (R4,1 billion or 22,1%) and mixed farming (R3,9 billion or 20,8%).

The district municipality contributing the most to total income in 2017 was Z F Mgcawu (R6,9 billion or 37,0%), followed by Pixley ka Seme (R5,3 billion or 28,6%) and Frances Baard (R4,1 billion or 22,0%).

The total number of persons employed in commercial agriculture on 30 June 2018 was 69 070, down from 70 319 on 28 February 2007 (-1,8%). In terms of employment, the major commercial agriculture activity in 2017 was horticulture (28 089 employees or 40,7% of the total), followed by farming of animals (17 004 or 24,6%).

Figure 1 - Number of farms, income and employment in the commercial agriculture industry by farm size, as a percentage of total, 2017

In 2017, 148 large farms (those with annual income of more than R22,5 million) constituted 3,1% of the total number of farms in the commercial agriculture industry, and accounted for 49,8% of total income and 44,8% of total employment. This was in contrast to the 2 609 micro farms (annual income below R1 million) which made up 54,0% of the total number of farms, but which accounted for just 5,2% of total income and 7,4% of total employment. Taken together, there were 1 283 large, medium and small farms in 2017, with combined shares of 26,6% of the number of farms, 87,7% of income, and 82,9% of employment.

Measured by farm size, small farming units were the second largest in terms of number of farms, income and employment in 2017.

Figure 2 - Number of farms, income and employment in the commercial agriculture industry by type of activity, as a percentage of total, 2017

Farming of animals had the largest share of number of farms (54,6%) and income (34,0%), as well as the second largest share of employment (24,6%) in 2017. Horticulture had the largest share of employment (40,7%) and the second largest share of income (22,1%). Growing of cereals and other crops had the second largest share of number of farms (24,0%).

Figure 3 - Number of farms, income and employment in the commercial agriculture industry by district municipality, as a percentage of total, 2017

The Pixley ka Seme district municipality recorded the largest provincial share of number of farms (30,2%) and the second largest share of income (28,6%) and employment (13,0%). Z F Mgcawu had the largest share of income (37,0%) and employment (67,0%) and the second largest share of number of farms (28,4%).

Table B - Commodity group contribution to gross farming income in the commercial agriculture industry, by district municipality, 2017

District municipality	Total		Field crops		Horticultural products		Animals and animal products		Other agricultural income	
	R'000	% contribution	R'000	% contribution	R'000	% contribution	R'000	% contribution	R'000	% contribution
Frances Baard	3 193 985	100,0	1 337 414	41,9	820 559	25,7	1 036 013	32,4	-	-
John Taolo Gaetsewe	804 417	100,0	-	-	-	-	804 418	100,0	-	-
Namakwa	1 133 599	100,0	168 120	14,8	535 087	47,2	430 392	38,0	-	-
Pixley ka Seme	4 516 637	100,0	2 799 552	62,0	267 314	5,9	1 449 709	32,1	64	0,0
Z F Mgcawu	5 927 823	100,0	356 082	6,0	3 269 943	55,2	2 301 800	38,8	-	-
Northern Cape	15 576 461	100,0	4 661 168	29,9	4 892 903	31,4	6 022 332	38,7	64	0,0

Of the total income of R18,7 billion in the commercial agriculture industry in 2017, R15,6 billion was derived directly from agricultural activities, which is herein referred to as gross farming income. The animals and animal products category was the biggest contributor to gross farming income with 38,7% of the provincial total, followed by horticultural products (31,4%). The John Taolo Gaetsewe district municipality had 100% of their gross farming income derived from animals and animal products.

2.2 Land use

Table C - Land use by district municipality as at 30 September 2018

District municipality	Total		Arable land		Grazing land		Other land	
	Hectares	% contribution	Hectares	% contribution	Hectares	% contribution	Hectares	% contribution
Namakwa	3 755 263	21,8	144 177	21,5	3 502 673	21,4	108 411	54,3
Frances Baard	449 164	2,6	40 531	6,0	408 074	2,5	555	0,3
John Taolo Gaetsewe	2 222 937	12,9	139 596	20,8	2 040 845	12,5	42 495	21,3
Pixley ka Seme	6 623 003	38,4	161 894	24,1	6 439 918	39,4	21 185	10,6
Z F Mgcawu	4 178 885	24,3	185 194	27,6	3 966 698	24,2	26 988	13,5
Northern Cape	17 229 260	100,0	671 400	100,0	16 358 215	100,0	199 643	100,0

On 30 September 2018, the total land used for commercial agriculture in Northern Cape was 17,2 million hectares, which represents 46,2% of the total land area of Northern Cape (37,3 million hectares). Commercial agricultural land use in Northern Cape comprised mainly grazing land (16,4 million hectares) and arable land (0,7 million hectares). Grazing land is used for livestock and game farming, and arable land is used for crop production.

The Pixley ka Seme district accounted for the largest share of Northern Cape's commercial agricultural land (38,4%), followed by Z F Mgcawu (24,3%) and Namakwa (21,8%). Frances Baard district (2,6%) recorded the smallest share.

Regarding grazing land, 85% was located in three districts, namely Pixley ka Seme (39,4%), Z F Mgcawu (24,2%) and Namakwa (21,4%). Z F Mgcawu (27,6%), Pixley ka Seme (24,1%) and Namakwa (21,5%) accounted for 73,2 % of arable land.

2.3 Field crops

Table D - Field crops: area planted and production, 2007 and 2017

Type of crop	Planted hectares						Production in metric tons					
	Total		Dry land		Irrigated		Total		Dry land		Irrigated	
	2007	2017	2007	2017	2007	2017	2007	2017	2007	2017	2007	2017
Maize	64 974	50 755	22 544	4 939	42 430	45 815	464 931	448 449	79 158	10 863	385 772	437 585
Wheat	52 246	33 552	15 954	2 199	36 292	31 353	252 199	159 359	40 515	3 318	211 683	156 040

Field crops are important for food security, and they account for the largest portion of cultivated land in South Africa. In terms of area planted, the major field crops in both 2007 and 2017 were maize and wheat. Maize (90,3% of maize) and wheat (93,4% of wheat) were mostly planted under irrigation in 2017.

Between 2007 and 2017, maize production decreased by 3,5% (from 465 thousand to 448 thousand tons). However, there was an increase in the volume of production per hectare from 7,2 to 8,8 tons. Maize was mainly produced in Pixley ka Seme (85,9% of the province's total).

Wheat production decreased by 36,8% (from 252 thousand to 159 thousand tons) between 2007 and 2017. The Pixley ka Seme district produced 80,7% of wheat in Northern Cape province in 2017, followed by Frances Baard (18,4%) and Z F Mgcawu (0,9%).

2.4 Horticultural crops

2.4.1 Vegetables

Table E - Vegetables: area planted and production, 2007 and 2017

Commodity	Area planted in hectares		Production in metric tons	
	2007	2017	2007	2017
Potatoes	2 617	3 826	84 028	205 717
Onions	820	2 034	32 706	66 981
Carrots	213	541	8 187	28 152

The major vegetables in terms of production were potatoes, onions and carrots. Potatoes dominated area planted and production in both 2007 and 2017. Potatoes and carrots recorded an increase in volume of production per hectare.

Regarding production, there was an increase of 145% in potatoes (from 84 thousand to 206 thousand tons) between 2007 and 2017. Onions showed an increase of 105% (from 33 thousand to 67 thousand tons) between 2007 and 2017, and an increase of 244% (from 8 thousand to 28 thousand tons) was recorded for carrots.

Over 99% of potatoes in Northern Cape province were produced in two districts in 2017, namely Frances Baard (70,3% of the province's total) and Pixley ka Seme (29,0%). The majority of the province's onions were produced in the Frances Baard district (59,9%), and over 90% of carrots were produced in the Frances Baard district (2017).

Most of the potatoes (73,0%) and onions (82,8%) were sold to fresh produce markets in 2017, while over half of the carrots (53,0%) were sold direct to retailers and chain stores (including contract farming).

2.5 Fruits

2.5.1 Citrus fruits

Table F - Citrus fruits: area planted and production, 2007 and 2017

Commodity	Area planted in hectares		Production in metric tons	
	2007	2017	2007	2017
Oranges	603	859	13 930	16 066
Lemons	66	82	1 812	1 724

Citrus fruits continue to play an important role in the economy, with strong links to packaging, processing and distribution in the agriculture value chain. Oranges accounted for 859 hectares planted in 2017, up by 42,5% from 2007.

Regarding production, oranges increased by 15% between 2007 and 2017 (from 14 thousand to 16 thousand tons). Lemons recorded a decline in production of 5% (from 1,8 thousand to 1,7 thousand tons) between 2007 and 2017. Compared with 2007, both oranges and lemons showed a decrease in volume of production per hectare in 2017.

Over 95% of the province's oranges were produced in Frances Baard (49,6%) and in Z F Mgcawu (45,7%) in 2017. The Frances Baard district produced more than 90% of the province's lemons in 2017.

The export market accounted for 51,5% of oranges and 50,0% of lemons in 2017. The second largest marketing/distribution channel for lemons (20,0%) was through processing factories, while 32,7% of oranges were sold to fresh produce markets (2017).

2.5.2 Deciduous fruits and viticulture

Table G - Deciduous fruits and viticulture: area planted and production, 2007 and 2017

Commodity	Area planted in hectares		Production in metric tons	
	2007	2017	2007	2017
Table grapes	6 971	7 871	140 207	93 710
Wine grapes	9 101	6 402	92 522	102 406

Like other activities within the agriculture industry, the deciduous fruit and viticulture sector is continually changing and evolving to adapt to industry and climate demands. In terms of area planted, table grapes showed an increase whereas wine grapes fell by 29,6% between 2007 and 2017. Table grapes overtook wine grapes in terms of area planted, but the production shows a contrary pattern.

Between 2007 and 2017, wine grape production increased by 10,7% (from 93 thousand to 102 thousand tons) and table grape production fell by 33,2% (from 140 thousand to 94 thousand tons). Compared with 2007, wine grapes showed an increase in production per hectare in 2017 while table grapes showed a decrease.

Most of the table grapes in the province were produced in Z F Mgcawu (86,6%) in 2017. In 2017, over 90% of wine grapes in Northern Cape were produced in the Z F Mgcawu district.

Significant amounts of wine grapes (98,2%) were sold to processing factories in 2017, and 64,3% of table grapes were exported.

2.5.3 Tree nuts

Table H - Tree nuts: area planted and production, 2007 and 2017

Commodity	Area planted in hectares		Production in metric tons	
	2007	2017	2007	2017
Pecan nuts	814	8 764	992	11 911

There was substantial growth in the tree nut industry between 2007 and 2017. Pecan nuts grew by 977% in terms of area planted and by 1 101% in terms of production (production per hectare increased).

The two leading districts in pecan nut production in 2017 were Frances Baard (77,2% of the province's total) and Z F Mgcawu (13,7%). Most pecan nuts (85,4%) were sold to processing factories in 2017.

2.6 Animals**Table I - Number of animals sold and on farm, 2007 and 2017/2018**

Type of animal	Number sold		Number on farm	
	2007	2017	2007	2018
Cattle	162 069	165 480	337 524	406 943
Sheep	1 986 498	1 086 266	3 839 344	2 361 261
Chickens	1 881 138	6 490 328	204 831	802 212

Cattle, sheep and chickens are the most reared animals in commercial agriculture in Northern Cape province.

Between 2007 and 2017, the number of cattle sold increased by 2% (from 162 thousand to 165 thousand). The leading districts in cattle sales in 2017 were John Taolo Gaetsewe (33,2% of the province's total), Z F Mgcawu (28,6%) and Frances Baard (25,9%). The number of cattle on farm in the province increased by 21% (from 338 thousand to 407 thousand) between 2007 and 2018.

Compared with 2007, the number of sheep sold in 2017 decreased by 45% (from 2,0 million to 1,1 million). Most sheep in 2017 were sold in the Pixley ka Seme district (48,6%), Z F Mgcawu (27,0%) and Namakwa (21,9%). The number of sheep on farm fell by 39% from (3,8 million to 2,4 million) between 2007 and 2018. In 2018, Pixley ka Seme (54,1%), Z F Mgcawu (23,6%) and Namakwa (19,6%) were the leading districts in the number of sheep on farm.

The number of chickens sold increased by 245% (from 1,9 million to 6,5 million) between 2007 and 2017, and the number of chickens on farm increased by 292% (from 205 thousand to 802 thousand) between 2007 and 2018. In 2017, 100% of chicken sales took place in Pixley ka Seme, and in 2018 Pixley ka Seme accounted for 99,9% of the number of chickens on farm.

Explanatory notes**Background**

The results presented in this publication have been derived from the Census of Commercial Agriculture (CoCA), 2017 – Northern Cape. This publication summarises data on the size, structure and nature of the commercial agriculture industry.

The frame was drawn from Stats SA's business register. The business register is mainly based on the value added tax (VAT) database of the South African Revenue Service (SARS).

The last CoCA was conducted for the year 2007 (Report No. 11-02-04 (2007)).

Value added tax (VAT)

All figures exclude value added tax (VAT).

Reference period

The information was collected from enterprises for their financial year which ended on any date between 01 March 2018 and 28 February 2019.

Statistical unit

The statistical unit is an enterprise. An enterprise is a legal unit (or a combination of legal units) that includes and directly controls all functions necessary to carry out its production activities.

Collection unit

The collection unit is a farming unit. A farming unit consists of one or more farms, holdings or pieces of land, whether adjacent or not, operated as a single unit and situated within the same local municipality. Thus, an enterprise can have one or more farming units.

Classification

The 1993 edition of the Standard Industrial Classification of all Economic Activities (SIC), Fifth Edition, Report No. 09-09-02, was used to classify the statistical units in this census. The SIC is based on the third revision of the 1990 International Standard Industrial Classification of all Economic Activities (ISIC), with suitable adaptations for local conditions. Farming sectors included were classified to the five-digit (subgroup) level for the detailed results.

Size groups

The enterprises are divided into four size groups according to the value of turnover recorded for them on the Stats SA business register. Table J presents the cut-off points for size groups.

Table J - Income size groups for the Census of Commercial Agriculture, 2017

Size group	Income (annual)
Large enterprises	Income > R22 500 000
Medium enterprises	R13 500 000 < Income <= R22 500 000
Small enterprises	R2 250 000 < Income <= R13 500 000
Micro enterprises (one million and above)	R1 000 000 <= Income <= R2 250 000
Micro enterprises (below one million)	Income < R1 000 000

Survey methodology and design

Initially, telephones were used to contact enterprises and update their information on the frame in terms of specific agriculture activity and location. Enterprises were given an option of either self-enumeration or a visit by a Stats SA official. CAPI (Computer Assisted Personal Interview), on both tablet and desktop, was used to conduct the interview and/or capture the data.

Collection rate

Collection rate = ((collected enterprises + finalised investigations) / sample size) * 100. The collection rate was 76,9%.

Turnover collection rate	Turnover collection rate = $((\text{collected enterprises BR turnover} + \text{finalised investigations BR turnover}) / \text{population BR turnover}) * 100$. The turnover collection rate was 88,9%.
Revisions to 2007 results	Revisions were made to previous results due to new information obtained after publication.
Non-sampling errors	Inaccuracies may occur because of imperfections in reporting by enterprises and errors made in the collection and processing of the data. Inaccuracies of this kind are referred to as non-sampling errors. Every effort is made to minimise non-sampling errors by updating the frame, careful design of questionnaires, testing them in pilot studies, editing reported data and implementing efficient operating procedures. Non-sampling errors occur in both sample surveys and censuses
Unpublished data	Where possible, Stats SA makes available unpublished statistics on request.
Symbols and abbreviations	DTI: Department of Trade and Industry GDP: Gross domestic product ISIC: International Standard Industrial Classification of all Economic Activities IT: Income tax SARS: South African Revenue Service SIC: Standard Industrial Classification of all Economic Activities SNA: System of National Accounts Stats SA: Statistics South Africa VAT: Value added tax -: Nil or less than half the final digit shown ^: Too small to publish ..: Data not available
Rounding-off of figures	The figures in the tables have, where necessary, been rounded off to the nearest final digit shown. There may therefore be slight discrepancies between the sums of the constituent items and the totals shown.

Glossary

Dry land	Main source of water was rain.
Employees	People employed by the business or organisation who received payment (salaries, wages, commission, piece rates or payments in kind) for the last pay period ended on or before 30 June 2018.
Enterprise	A legal entity or a combination of legal units that includes and directly controls all functions necessary to carry out its production activities.
Exports	Outward flow of goods and services leaving the economic territory of a country to the outside world.
Farmer	A farmer is the individual, partnership, close corporation, company, or other enterprise that operates a farming unit for their own account; or the manager, foreman or other person to whom the control of the farming unit was entrusted.
Farm operator/ manager	This is the person who exercises management control over the agricultural holding operation and takes major decisions regarding the use of resources.
Farming unit	A farming unit consists of one or more farms, holdings or pieces of land, whether adjacent or not, operated as a single unit and situated within the same local municipality.
Field crops	Includes grains, oil seeds, legumes, fodder crops and other field crops (e.g. cotton, sugarcane and tobacco).
Fodder crops	Includes grass, lucerne and maize for silage.
Game	Includes elephant, buffalo, rhino, springbok, impala, wildebeest, kudu, zebra, lion, leopard and cheetah.
Grains	Includes maize (white & yellow), wheat, sorghum, barley, oats and rye.
Gross farming income	Includes income earned from agricultural products sold, but excludes other income generated outside farming.
Imports	Inward flow of goods and services entering the economic territory of a country from the outside world.
Legumes	Includes beans and peas.
Livestock	Includes cattle (beef and dairy breeds), sheep (wool and non-wool breeds), pigs, goats (meat, milk and mohair breeds), horses and poultry (chickens, turkeys, ducks, ostriches and geese) etc.
Livestock products	Includes eggs, honey, meat, milk, hides and skins.
Oil seeds	Includes sunflower, groundnuts, canola and soya beans.
