Introduction

Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. An annual survey of the remaining municipalities is conducted regarding buildings completed. The following information is presented in this report:

- In Part 1, Tables 1 to 6, information is published for the monthly survey on buildings completed by type of building at provincial level for 2018, 2019 and 2020.
- In Part 2, Tables 7 to 12, information is published for the monthly and annual surveys on buildings completed by type of building at provincial level for 2018, 2019 and 2020.
- Municipal reporting for buildings completed is available in Excel format from 2014 to 2020. The Excel files are available from Stats SA's website on the publication page for Report-50-11-01 – Building statistics, under 'Additional downloads' (see the link below).

http://www.statssa.gov.za/?page_id=1854&PPN=Report-50-11-01

Building plans passed and buildings reported as completed for 2021 (monthly survey only) were published in the annual statistical release P5041.3 – *Selected building statistics of the private sector as reported by local government institutions*, 2021 on 29 June 2022 and can be accessed on Stats SA's website, www.statssa.gov.za.

Purpose of the surveys

The results of these surveys are used in monitoring the state of the economy and the formulation of economic policy. The results are important inputs for estimating gross domestic product (GDP) and are extensively used by the private sector.

Table A – Value of buildings reported as completed to municipalities

| Year | Monthly survey R million | Monthly and annual surveys R million | % contribution of monthly survey to total of monthly and annual surveys |
|------|------------------------------------|--|---|
| | | | |
| 2018 | 73 416,3 | 82 733,4 | 88,7 |
| 2019 | 88 978,7 | 97 240,8 | 91,5 |
| 2020 | 49 102,7 | 56 034,4 | 87,6 |

The percentage contribution of the total value of buildings completed as reported in the monthly survey compared with the value of monthly and annual surveys decreased by 3,9 percentage points from 91,5% in 2019 to 87,6% in 2020 (see Table A).

| Total² | 97 240,8 | 56 034,4 | 100,0 | -42,4 | -42,4 | -41 206,4 |

¹The contribution (percentage points) is calculated by multiplying the percentage change of the type of building between 2019 and 2020 by the percentage contribution of the corresponding type of building to the total value of buildings completed during 2019, divided by 100.

²Figures have been rounded off.

As indicated in Table B, the value of buildings reported as completed to municipalities in the monthly and annual surveys decreased by 42,4% from R97 240,8 million in 2019 to R56 034,4 million in 2020. Decreases were reported for residential buildings (-49,4% or -R28 855,7 million), non-residential buildings (-39,4% or -R9 550,6 million) and additions and alterations (-19,3% or -R2 800,1 million).

Figure 1 – Contribution (percentage points) of type of building to the percentage change in the total value of buildings completed between 2019 and 2020

As indicated in Figure 1, negative contributions were made by residential buildings (contributing -29,7 percentage points), non-residential buildings (contributing -9,9 percentage points) and additions and alterations (contributing -2,9 percentage points) to the year-on-year growth rate of -42,4% in 2020.

Table C – Total value of buildings reported as completed (at current prices) for 2019 and 2020 by province

| Estimates at current prices | 2019 | 2020 | % contribution to the total value of buildings completed 2019 | % change between 2019 and 2020 | Contribution (% points) ¹ to the percentage change in the value of buildings completed between 2019 and 2020 | Difference in the value of buildings completed between 2019 and 2020 |

| Total² | 97 240,8 | 56 034,4 | 100,0 | -42,4 | -42,4 | -41 206,4 |

¹The contribution (percentage points) is calculated by multiplying the percentage change of each province between 2019 and 2020 by the percentage contribution of the corresponding province to the total value of buildings completed during 2019, divided by 100.

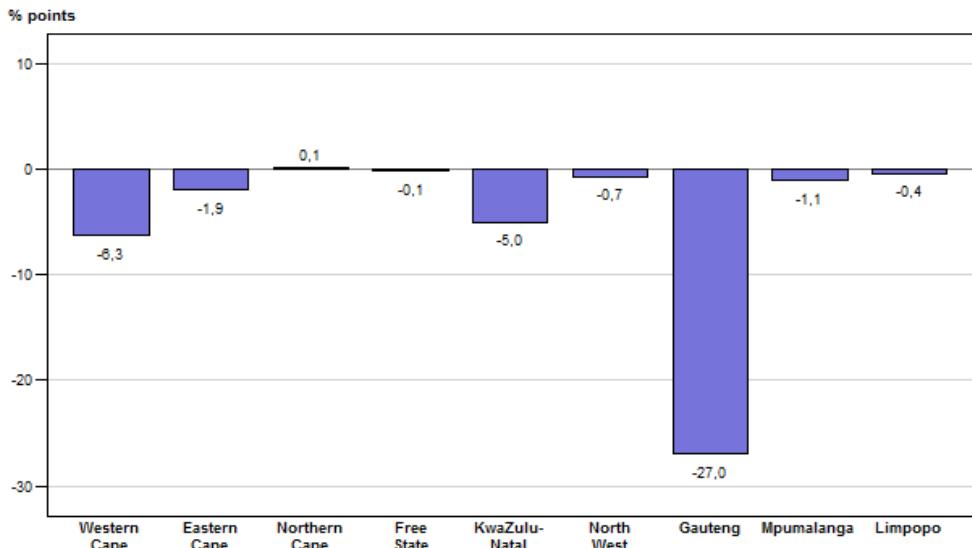

²Figures have been rounded off.

Table C and Figure 2 reflect that the largest provincial contributors to the decrease of 42,4% between 2019 and 2020 were Gauteng (contributing -27,0 percentage points or -R26 254,7 million), Western Cape (contributing -6,3 percentage points or -R6 149,7 million) and KwaZulu-Natal (contributing -5,0 percentage points or -R4 856,1 million).

During 2020, Gauteng experienced year-on-year decreases in all three major categories, namely residential buildings (-65,2% or -R19 482,7 million), non-residential buildings (-50,7% or -R5 730,9 million) and additions and alterations (-36,1% or -R1 041,1 million).

Large decreases in non-residential buildings were reported for Western Cape (-42,0% or -R2 447,9 million) and KwaZulu-Natal (-32,4% or -R1 520,1 million) – see Table 7.

Figure 2 – Provincial contribution (percentage points) to the percentage change in the total value of buildings reported as completed between 2019 and 2020

Buildings reported as completed in Gauteng were to a large extent dominated by data recorded for City of Johannesburg, contributing 36,6% or R6 531,6 million to the total of R17 825,0 million reported for this province.

City of Johannesburg was the largest contributor to non-residential buildings (contributing 49,3% or R2 739,1 million), while City of Tshwane was the largest contributor to additions and alterations (contributing 37,0% or R682,9 million) and residential buildings (contributing 36,5% or R3 806,2 million) in Gauteng.

The largest contributor in all three major building categories reported as completed in Western Cape was City of Cape Town, with additions and alterations contributing 75,9% (R4 746,7 million), non-residential buildings contributing 73,2% (R2 473,9 million) and residential buildings contributing 59,2% (R5 398,7 million).

Explanatory notes

Introduction

- 1 Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. An annual survey of the remaining municipalities is conducted regarding buildings completed. This report contains buildings reported as completed to all municipalities, aggregated to provincial level for 2018, 2019 and 2020 (see Part 1 and Part 2). Municipal reporting for buildings completed are available in Excel format from 2014 to 2020. The Excel files are available from Stats SA's website on the publication page for Report-50-11-01 – Building statistics, under 'Additional downloads' on the following link: http://www.statssa.gov.za/?page_id=1854&PPN=Report-50-11-01

Scope of the survey

- 2 This survey covers municipalities conducting activities regarding:
- final inspection of completed buildings and issuing of occupation certificates.

Statistical unit

- 3 The statistical units for the collection of information are metropolitan municipalities, local municipalities and district municipalities.

Classification

- 4 Building activities are classified in Division 5 according to the 1993 edition of the *Standard Industrial Classification of all Economic Activities*, (SIC) Fifth Edition, Report No. 09-90-02. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities* (ISIC) with suitable adaptations for local conditions.

Survey methodology and design

- 5 Stats SA conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed. An annual survey of the remaining municipalities is conducted regarding buildings completed. Information regarding building plans passed and buildings completed for the private sector is collected by mail, email and telephone.

Comparison between building plans passed and buildings completed

- 6 No direct comparison can be made between building plans passed and buildings completed for the following reasons:
- an unknown number of building plans are passed and afterwards not executed;
 - if building operations have not commenced within the first year after approval, building plans are resubmitted;
 - the time-lag between the date of passing of a building plan and the date of completion of the building varies considerably; and
 - according to municipalities, final inspections of completed buildings are not always executed and therefore not recorded as completed.

Number of dwelling-houses

- 7 The number of dwelling-houses is shown and not the number of plans passed or completed, since one plan may cover more than one dwelling-house.

Reliability of estimates

9 Inaccuracies may occur because of imperfections in reporting by municipalities. Every effort is made to reduce errors to a minimum by carefully editing and evaluating data and querying of data.

Rounding-off of figures

10 The figures in the tables have, where necessary, been rounded off to the nearest digit shown. There may, therefore, be slight discrepancies between the sums of the constituent items and the totals shown.

|----------------------------------|---|
| Additions and alterations | Extensions to existing buildings as well as internal and external alterations of existing buildings. |
| Annual percentage change | Annual percentage change is the change in the value of building plans passed or buildings completed for a certain year compared with the value of building plans passed and buildings completed in a previous year expressed as a percentage. |
| Blocks of flats | High-density housing consisting of a number of self-contained dwelling-units with at least one living-room together with a kitchen and bathroom conjoined to similar units in one building. |
| Dwelling-house | A free-standing, complete structure on a separate stand or a self-contained dwelling-unit, e.g. granny flat, on the same premises as an existing residence. Out-buildings and garages are included. |
| District municipality | A municipality that has municipal executive and legislative authority in an area that includes more than one municipality, and which is described in Section 155(1) of the Constitution as a category C municipality (refer to Local Government: Municipal Structure Act, 1998 (Act No. 117 of 1998)). |
| District Management Area | District municipalities are not in general responsible for passing of building plans or issuing of final occupation certificates. These functions are primarily the responsibility of the metropolitan municipalities and the local municipalities. However, district municipalities will execute these functions in the following cases: <ul style="list-style-type: none"> • For rural areas that do not fall under the jurisdiction of either a metropolitan or local municipality. These areas are referred to as District Management Areas (DMA), and are managed directly by district municipalities. • Where local municipalities have requested the district municipality to perform this function. In such cases an agreement known as a service level agreement is reached between the local municipality and the district municipality. The local municipality will pay a fee to the district municipality for the service rendered. |
| Local municipality | A municipality that shares municipal executive and legislative authority in its area with a district municipality within whose area it falls, and which is described in section 155(1) of the Constitution as a category B municipality (refer to Local Government: Municipal Structure Act, 1998 (Act No. 117 of 1998)). |
| Metropolitan municipality | A municipality that has municipal executive and legislative authority in an area that includes more than one municipality, and which is described in section 155(1) of the Constitution as a category A municipality (refer to Local Government: Municipal Structure Act, 1998 (Act No. 117 of 1998)). |
| Municipality | A generic term describing the unit of government in the third sphere responsible for local government in a geographically demarcated area. It includes district, metropolitan and local municipalities. |
