preface

In publishing the twenty-second edition of *South African Statistics*, Statistics South Africa (Stats SA) continues a tradition of making available in a single volume, comprehensive time series statistical data on important facets of South African life.

Data brought together in this edition are drawn from Stats SA's data sources only. Stats SA's data are mainly published as statistical releases and reports. Statistical releases reflect statistics on time periods immediately prior to release dates. A first level of time series data are published in Stats SA's quarterly *Bulletin of Statistics*. The *Bulletin of Statistics* also provides annual figures for the two years prior to the current year as well as monthly and/or quarterly figures for the second of these two years and monthly figures, if available, for the current year, immediately prior to publication date. A second level, longer time series data are published in *South African Statistics*.

We have updated figures for the 2007 period and data for the period that had not been released by end of August 2008 has not been incorporated in the 2008 edition. Where 2007 figures were not available, the most recent data is provided. The 2008 mid-year population estimates will be made available in the *South African Statistics 2009* edition.

I wish to thank all users and organisations as well as government departments who are always willing to collaborate with us.

Pali Lehohla
Statistician-General

Extract from the Report of the Census Subcommittee to the South African Statistics Council on Census 2001

Preliminary investigations indicate that the 2001 census probably resulted in:

- An underestimate of the number of children below age five;¹
- an overestimate of the number of teenagers aged between 10 and 20;
- an underestimate of the number of men relative to the number of women;¹
- an underestimate of the number in the white population;
- higher than expected numbers aged 80 and older, in the African population;
- an underestimate of the number of foreign-born, since some identified themselves incorrectly as being South African-born;
- age misstatement in the range 60-74;
- an overestimate of the extent of unemployment;
- an underestimate of those who were employed for only a few hours per week;
- an underestimate of household income; and
- an overestimate of the number of paternal orphans and the number of fathers missing from the household.

In addition:

- Scanning problems caused some births to be recorded in the wrong province. The number of cases is relatively small and should not lead to too much distortion for most purposes for which these data are used; however, it does produce obviously erroneous results when one tries to estimate the extent of inter-provincial migration of those born since the previous census.
- The fertility data (numbers of children ever born, children surviving) are problematic.

For further details of these investigations see the full report of the Census Subcommittee.

Tables comparing Census data

For Census 2001, imputation was used to allocate values for unavailable, unknown, incorrect or inconsistent responses, to other categories. 'Undetermined' values were used for only a few variables in a few cases (such as industry and occupation). For Census '96, all such values were grouped as 'Other' or 'Unspecified'.

¹ This is a common feature of censuses, particularly in developing countries.

abbreviations and symbols

Abbreviations used

South Africa; former and current provinces

SA - South Africa	EC - Eastern Cape	MP - Mpumalanga
C - Cape	FS - Free State	NC - Northern Cape
N - Natal	GP - Gauteng	NW - North West
OFS - Orange Free State	KZN - KwaZulu-Natal	WC - Western Cape
T - Transvaal	LP - Limpopo (previously known as Northern Province)	

Units of measurements

mm - millimetre	g - gram
c - cent(s)	kg - kilogram
cm - centimetre	t - ton (1 000kg)
m - metre	kW - kilowatt
km - kilometre	MW - megawatt
ha - hectare	Gwh - gigawatt hour
ml - millilitre	kWh - kilowatt hour
m ² - square metre	Mwh - megawatt hour
m ³ - cubic metre	

General (in alphabetical order)

col. - column
 CPD - Corporation for Public Deposits
 e.g. - for example
 Eskom - Electricity Supply Commission
 F - female
 fig. - figure
 FM - frequency modulation
 f.o.b. - free on board
 f.o.r. - free on rail
 GDP - Gross Domestic Product
 i.e. - that is
 incl. - including
 IMF - International Monetary Fund
 ISIC - International Standard Industrial Classification
 M - male
 NAAMSA - National Association of Automobile Manufacturers of South Africa
 N - number (agricultural tables)
 n.e.c. - not elsewhere classified
 n.e.s. - not elsewhere specified
 n.i.e. - not included elsewhere
 No. - number
 O - public ownership
 P - private ownership
 PES - post-enumeration survey
 PIC - Public Investment Commissioner
 pkt. - packet
 PMG - Paymaster-General
 R/D - refer to drawer
 SADC - South African Development Community
 SITC - Standard International Trade Classification
 SDR - Special drawing rights

T - total
 TB - Tuberculosis
 UK - United Kingdom
 UN - United Nations
 USA - United States of America
 w.e.f. - with effect from

Symbols used

..	= Data not available
0 or 0,0	= More than nothing but less than half the final digit shown
A blank space	= Data not yet available
-	= Nil or not applicable
_____	= A line drawn under a column of figures, indicates an interruption in the comparability of the series
-	= A minus sign before a figure, denotes 'less than'; -15 means less than 15
+	= A plus sign after a figure, denotes 'and over'; 50+ means 50 and over
a	= As a result of accountably low numbers of recorded births during January and February, the related rates as well as the natural increase for 1997, were calculated on an adjusted number of births and are indicated with an 'a'
*	= Revised since previous edition(s)

Limpopo is the new name for the province previously known as Northern Province, and the capital city of Limpopo is now Polokwane (previously Pietersburg).

Rounding-off

Figures are rounded off independently of one another; details, therefore, may not necessarily add to the total shown.

LAND AREA OF SOUTH AFRICA

1.2 List of local municipalities names and codes

Since the inception of the Local Government: Municipal Demarcation Act (Act No. 27 of 1998) the boundaries within provinces in terms of which government agencies function, are no longer magisterial districts but newly demarcated district and local municipal boundaries (see map on page 1.7).

District and local municipalities boundaries

Readers wishing to access more detailed information on district and local municipalities boundaries in the country, are requested to visit the website of the Municipal Demarcation Board at www.demarcation.org.za

VITAL STATISTICS

2.1 Recorded live births, deaths and stillbirths - All population groups

Particulars in respect of the former TBVC states are excluded from 1991-1993.

It should be noted that data on births, deaths, marriages and divorces are advanced as near as possible to the end of the relevant year on account of the closing date for these series. Late registrations that are consequently not included in the statistical series of the year concerned, will thus be included with the information for the following year. This amended procedure means that when interpreting the data, cognisance should be taken that the basis of the statistics is the year of registration and not the year of the event as such.

As from 1991 statistical information regarding births, deaths, stillbirths and marriages is not available by population group. Therefore, this table contains information for all four population groups. It should be clearly understood that the figures for 1991 and 1992 reflect RECORDED events (registrations) with regard to births, stillbirths and deaths and that they are lower than the actual numbers.

Year	Total recorded live births	Recorded deaths, excluding stillbirths		Recorded stillbirths 3/
		Total deaths	Infant deaths 2/	
	1	2	3	4
1991	537 999	176 475	18 185	8 872
1992	501 461	177 841	17 576	8 007
1993	557 995	201 273	17 851	6 879
1994	667 107	213 279	17 332	6 968
1995	809 439	268 125	22 865	8 946
1996 1/	998 798	327 253	24 606	10 630
1997 1/	1 046 095	316 507	24 725	5 982
1998	1 216 337	365 053	28 487	7 729

2003	1 677 415	553 718	38 287	14 623
2004	1 475 809	572 350	41 119	15 742
2005	1 380 496	591 213	46 026	13 685

Source: Stats SA, *Recorded live births* (Statistical release P0305)

1/ As a result of the loss of data at Bureau Nucleus, the number of registered births for 1996 were adjusted, while those for 1997 were estimated. Further details can be found in Statistical release P0305: *Recorded births, 1990-1997*.

2/ Deaths under one year of age.

3/ Stillbirths are not included in births. A stillbirth is the birth of a viable foetus that showed no sign of life after complete birth.

2.2 Recorded births

1/ Citizenship of the person whose birth has been registered.

2/ Others refer to the people whose citizenship is under investigation at the time of extracting the information from the register. Once the citizenship is resolved, these people will either be classified as citizens or as non-citizens.

VITAL STATISTICS

2.3 Marriages

As many couples did not specify their population groups, it was decided that an 'Unspecified' population group category had to be added. In the past mixed marriages were not reported in detail. However, since the beginning of 1996, data on mixed marriages are reported in detail.

2.3.1 All population groups by way of solemnisation

Year	Total	Marriages solemnised by -		Unspecified
		Religious ceremony	Civil ceremony	
	29	30	31	32
1991	108 929	52 879	45 372	10 678
1992	111 557	57 074	53 622	861
1993	120 159	59 638	57 681	2 840
1994	133 309	61 076	66 274	5 959

1/ The decrease in cremations at the crematorium in Cape Town as from 1992 was caused by the opening of crematoriums in Malmesbury and Worcester.

2/ Durban total include Clare Estate, Stellawood and Chatsworth/Mobeni crematoriums.

3/ Johannesburg total include Braamfontein, Brixton and Fourways crematoriums.

4/ The crematorium in Brakpan has been privatised since October 1990. The municipality did not keep statistics of cremations during 1989.

5/ The number of cremations in respect of 1989-1992 has been certified as correct by the crematorium in Krugersdorp.

TOURISM

3.1 Historical table - Arrivals in South Africa, 1965-2007

Travellers to and from Botswana, Lesotho and Swaziland are only included in tourist statistics as from March 1970. With effect from December 1980, the data in respect of South Africa (SA) and Botswana, Lesotho and Swaziland citizens (except foreign travellers) are excluded, as the collection of the basic data has been discontinued. However, as from October 1991 all travellers to and from Botswana, Lesotho and Swaziland are once again included (contract workers excluded) in the tourism statistics. Data on SA citizens visiting these countries are still excluded, since the completion of the relevant source document is not required of them.

The present data on tourism between SA and Namibia are not comparable with the data for 1990 and earlier years, since full immigration control between SA and Namibia was established only from 1 January 1991.

1/ Includes Antarctica.

2/ As of January 2007, Indian Ocean Islands were merged with Africa.

TOURISM

3.4 Departures

3.4.1 Foreign travellers by mode of travel

With effect from 4 January 1993 South African residents were not required to complete departure or arrival forms when they leave or enter the country. Their particulars are obtained directly from their passports. Consequently, only the number and mode of travel of South African residents leaving or entering the country at computerised ports are available. Foreign travellers visiting SA still complete arrival forms, but do not complete forms on departure. The particulars of foreign travellers leaving the country are obtained by means of the computer system on the basis of the information furnished on arrival. However, as from 26 October 1993 the Department of Home Affairs implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports complete departure forms. This system made it possible to again obtain and process information on South African residents leaving the country through these three airports as from November 1993.

DOCUMENTED MIGRATION

4.1 Historical table - Documented immigrants and self-declared emigrants, 1965-2005

Stats SA published complete emigration data up to and including December 1992. Since basic information on emigration was not available thereafter, it was not possible to publish data on self-declared emigration on a monthly basis for the period January 1993 to October 1993.

However, as from 26 October 1993 the Department of Home Affairs implemented a system according to which South African residents departing for overseas from Johannesburg, Cape Town and Durban International Airports complete departure forms. This system was implemented at these three airports only, as approximately 97% of the self-declared emigrants left the country through these three ports. This system made it possible to again obtain and process information on self-declared emigrants leaving the country through these three airports as from November 1993. In order to estimate the number of self-declared emigrants for the period January 1993 to October 1993, an interpolation was carried out with the aid of a regression model.

Year	Documented immigrants			Self-declared emigrants			Net gain/loss

LABOUR

Employment and gross earnings

As from 2003, the employment statistics component of Statistics South Africa (Stats SA) implemented a new and larger sample covering all the industries in the formal non-agricultural business sector of the South African economy. The survey covers employment statistics of the mining and quarrying industry; the manufacturing industry; the electricity, gas and water supply industry; the construction industry; the wholesale and retail trade; repair of motor vehicles, motor cycles and personal and household goods; hotels and restaurants industry; the transport, storage and communication industry; the financial intermediation, insurance, real estate and business services industry; and the community, social and personal services industry. The survey does not cover the agriculture, hunting, forestry and fishing industry and excludes domestic services and the informal sector. The previous sample only covered selected industries and did not collect information from agriculture, hunting, forestry and fishing; restaurants and other eating and drinking places, boarding houses, caravan parks and guest farms; air and water transport; telecommunication services; financial institutions other than banking institutions, building societies and insurance companies; real estate and business services; educational services; medical, dental and other health services; welfare organisations; religious organisations; and other recreational and culture services. It also excluded domestic services and the informal sector. Therefore, as from 2003, published data are not comparable with data published prior to 2003.

As from 2005, Stats SA introduced a new employment statistics survey that covers all employing enterprises in the formal non-agricultural business sector of the South African economy that is registered for Income Tax (IT), resulting in the extensive coverage of all small businesses. Previously the coverage was restricted to both employing and non-employing VAT registered enterprises with an annual turnover of R300 000 or more.

Introduction of the new sample from the June quarter 2006 enables Stats SA to provide users with survey results for the June and September 2006 quarters from the new sample.

Stats SA has been working for some years to improve the quality of its economic statistics. The latest series to benefit from these improvements are those for employment and average monthly earnings derived from the Quarterly Employment Statistics (QES) survey, a survey of formal non-agricultural businesses and other entities which are employers.

Considerable work has been undertaken over the last two years to improve the completeness of the list of employers in the economy, held on Stats SA's Business Register, from which the samples for the survey are drawn. Greater use has been made of additional administrative sources of employer entities, particularly the lists maintained by the South African Revenue Service (SARS) of employers making contributions on behalf of their employees for Pay As You Earn (PAYE), and the Department of Labour's Unemployment Insurance Fund (UIF).

It is important to distinguish between the lift in the level of the series from improvements in the coverage of employers and the growth in employment shown by the series due to new employer entities entering the economy and continuing employers taking on additional staff. This break in series relates mainly to the level of employment, rather than the growth rate of employment. However, an outcome of not publishing data from a sample revised in 2005 has been that any new employer entity commencing operations from early 2004 onwards would not have had a chance of being selected until the reselection of the sample in March 2006. The effect is that the published series based on the 2004 sample show somewhat smaller growth than would have been shown from a sample revised in 2005.

Further factors affecting the growth of the series between 2004 and 2006 were the expansion of the formal sector as a result of legislative changes, growth resulting from small businesses moving from the informal to the formal sector and greater overall compliance by businesses leading to their registration for PAYE and/or UIF.

Employment and gross earnings - Unless otherwise indicated in a subscription, the following is applicable:

Employment refers to the number of people employed by the business, who received payment (in salaries; wages; commission, in addition to a retainer, salary or wage; piece rates; or payments in kind) for any part of the reference period. This excludes independent contractors and consultants; working proprietors; sole and joint owners; employees paid on a commission basis where a retainer, salary or wage was not paid; and employees based in South Africa but paid from abroad, e.g. embassy employees.

Annual employment data are shown as at 30 June of the relevant year.

Gross earnings are payments for ordinary, standard or agreed hours during the reference period for all permanent, temporary, casual, executive and managerial employees, before taxation and other deductions. Gross earnings include salaries and/or fees paid to all directors, executives and managers; employers' contributions to holiday, pension, provident and medical funds and contributions to the Unemployment Insurance and Compensation Funds; payments paid from South Africa to employees based abroad, e.g. embassy employees; payments for all types of leave, except those paid on termination; fringe benefits paid in cash such as housing, mortgage and rent subsidies, transport allowances, and cell phone allowances; allowances and penalty payments relating to ordinary-time hours.

Annual gross earnings data reflect the total gross earnings for the relevant year, except the annual gross earnings for 2006, where the total includes only the three quarters (i.e. June 2006 – December 2006).

LABOUR

5.2 Number of employees and gross earnings according to industry

5.2.1 Total mining and quarrying

Saltworks, power supply companies and iron and steel works are excluded. Data of the mining and quarrying sector include data in respect of the former TBVC states as from January 1994. The total employment in these states for January 1994 amounted to approximately 9,0% of the total employment of the mining and quarrying sector.

LABOUR

5.2 Number of employees and gross earnings according to industry

5.2.3 Electricity, gas and water supply

The data are based on a sample survey and refer to private establishments and public corporations which have as their main activity the generation and/or distribution of electricity, gas and water supply.

As from January 1996 data on the electricity sector also include particulars of the former TBVC states. According to the information at the disposal of Stats SA, the contribution regarding the former TBVC states for March 1996 amounted to 1,9% of the total employment of the electricity sector.

As from 1998 there has been a reclassification of water boards from local governments into the electricity, gas and water supply industry. This change was brought about by a new Act, the Water Services Act No. 108 of 1997, which caused a change in the definition of the main industrial activity of the water boards. Water boards are now classified under the *Standard Industrial Classification of all Economic Activities (SIC)* as the 'collection, purification and distribution of water', which falls under the electricity, gas and water supply industry.

LABOUR

5.2 Number of employees and gross earnings according to industry

5.2.5 Wholesale and retail trade; repair of motor vehicles, motor cycles and personal and household goods; hotels and restaurants

The data relating to wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods; hotels and restaurants are based on a sample survey. Data on the former TBVC states were included in this industry as from the first quarter of 1996. Information available to Stats SA indicates that the total employment of the commercial industries in these areas for March 1996 amounted to approximately 0,1% of the total employment for the wholesale trade industry, 1,0% of the total employment for the retail trade industry, and 0,7% of the total employment for the motor trade industry. For the hotels industry data on the former TBVC states were included as from the first quarter of 1995. The total employment in these states for March 1995 amounted to approximately 16,0% of the total employment of the hotels industry.

LABOUR

5.2 Number of employees and gross earnings according to industry

5.2.7 Financial intermediation, insurance, real estate and business services

For banking institutions, building societies and insurance companies, data on the former TBVC states were included as from the first quarter of 1995. The total employment in these states for March 1995 amounted to approximately 1,0% of the total employment of the financial institutions industry.

5.2.8 Community, social and personal services

As from January 1993, the agricultural marketing boards are, according to the *Standard Industrial Classification of all Economic Activities (SIC)*, included in this major group and not as previously shown in the major group 'Wholesale, retail and motor trade and hotels'.

As from the second quarter of 1994 the information on the governments and the local governments of the former TBVC states was included in the public sector, which is part of the community, social and personal services industry. The total employment in these states for June 1994 amounted to approximately 12,0% of the total employment of the public sector. As from the first quarter of 1996 the information on all the universities of the former TBVC states is included in the public sector. The total employment for universities in these states for March 1996 amounted to approximately 11,0% of the total employment of the universities.

5.2.8.1 Government sector

5.2.8.1.1 National departments

National departments do not include Transnet Ltd, SA Post Office Ltd or Telkom SA Ltd. Particulars relating to elected office bearers and part-time members of commissions are excluded. The State's contributions to pension, medical aid and other funds are, as from March 1992, included in salaries and wages. The average salaries and wages are, therefore, not strictly comparable with the information of previous years.

5.2.8.1.3 Local governments

Local governments include city councils, municipalities, town councils and health committees. The data are derived from periodic censuses and a sample survey. Local governments of the former TBVC states are included as from the second quarter of 1994.

As from 1998 there has been a reclassification of water boards from local governments into the electricity, gas and water supply industry. This change was brought about by a new Act, the Water Services, 1997 (Act No. 108 of 1997), which caused a change in the definition of the main industrial activity of the water boards. Water boards are now classified under the *Standard Industrial Classification of all Economic Activities (SIC)* as the 'collection, purification and distribution of water', which falls under the electricity, gas and water supply industry.

LABOUR

5.3 Labour force survey (LFS)

The LFS is a twice-yearly rotating panel household survey, specifically designed to measure the dynamics of employment and unemployment in the country. It measures a variety of issues related to the labour market, including unemployment rates (official and expanded), according to standard definitions of the International Labour Organisation (ILO).

A rotating panel sample involves visiting the same dwelling units on a number of occasions (in this instance, five at most), and after the panel is established, replacing a proportion of these dwelling units each round (in this instance 20%). New dwelling units are added to the sample to replace those that are taken out. The advantage of this type of design is that it offers the ability to see how the work situation of members of the same dwelling units change over time, while retaining the larger picture of the overall employment situation in the country.

OFFICIAL AND EXPANDED UNEMPLOYMENT RATES

Statistics South Africa (Stats SA) uses the following definition of unemployment as its **official** definition: The *unemployed* are those people within the *economically active population* who, (a) did not work during the seven days prior to the interview, (b) want to work and are available to start work within a week of the interview, and (c) have taken active steps to look for work or to start some form of self-employment in the four weeks prior to the interview. The **expanded unemployment rate** excludes criterion (c).

Among those who are included in the expanded, but not the official definition of unemployment, will be discouraged job seekers (those who said they were unemployed but had not taken active steps to find work in the four weeks prior to the interview).

Stats SA reports on the situation of the unemployed using both the official and the expanded definition. In the present economic climate, there is a proportion of discouraged job seekers who face constraints, for example high travel costs and lack of transport, when seeking work.

LABOUR

5.4 Labour force survey (LFS) comparison

Stats SA has updated the entire series of LFS results to reflect the new population estimates released in February 2005. Until now, only the two most recent rounds of the LFS (released in March and June this year) reflected these estimates. In addition, all rounds of the series have now been benchmarked to Census 2001, including the early rounds that were previously benchmarked to Census '96. The resulting estimates are now comparable for the entire series to date.

5.4.1 Labour market trends March 2007 and September 2007: Using the official definition of unemployment within 95% confidence limits

Variable			Lower limit ('000)	Estimate ('000)	Upper limit ('000)

PRICES

6.1 Production prices

6.1.1 Historical table, 1930-2007

This series was previously known as 'Wholesale price indices'. The compilation of the indices shown for 1960 and earlier years differs considerably from that for the subsequent years where the series, 'Commodities for South African Consumption', are shown. Indices on various bases have been linked to the current series with 2000 as base (columns 1-3).

2000=100

Year	Production price index: Commodities for SA consumption		
	Total	South African	Imported
	1	2	3

Annual percentage change**

PRICES

6.2 Production price index

The production price index (PPI) measures price trends of commodities produced throughout the major sectors of the economy, i.e. agriculture, forestry, fishing, mining, manufacturing, electricity, gas and water and wholesale and retail trade (in the case of imported goods).

All commodities included in the PPI are classified according to the *Standard Industrial Classification of all Economic Activities (SIC)*. The SIC is based on a standard industrial classification compiled by the United Nations (UN) for international use. Commodities in the manufacturing sector are divided into 23 major industrial groups according to the *SIC*.

Price information is collected for products known as 'indicator products'. Indicator products are identified as those products whose sale value represents the largest part of the total value of sales (turnover) in an industrial group. Prices are collected at the first sales point after production, which is producers in the case of locally produced commodities, and wholesalers or retailers in the case of imported commodities. Prices 'ex-factory' are requested but 'delivered' or 'free on rail/free on board' are accepted if it is the normal basis of quotation. Where prices are dependent on the quantity purchased or the class of purchaser, the price for the predominant quantity or class of purchaser is collected. Value-added tax (VAT) is excluded and normal discounts generally available to purchasers are deducted from quoted prices.

Where possible, price information is collected at successive time intervals, for the same grade or quality of commodities. In the case of specialised commodities, such as machinery and transport equipment, price information is collected for equivalent items. Where quality or other changes occur in commodities, or where substitute commodities are introduced, the price indices are adjusted to compensate for any change in the price solely due to quality or similar changes.

Price information refers to the first seven days of the relevant month, except in the mining and agricultural sectors where average prices for the relevant month are collected. Most prices for commodities manufactured locally are collected at three-monthly intervals, while prices of imported commodities are collected monthly. If Statistics South Africa (Stats SA) was notified of price changes for products not surveyed on a monthly basis, products would be surveyed whenever price changes occur.

The weighting system has been obtained mainly from industrial and agricultural production statistics as well as foreign trade statistics (columns 4-348).

Commodity group index: Value of total South African production plus imports, less exports (columns 4-15; 40-51; 76-87; 112-124; 151-160; 181-192; 217-226; 247-256; 277-287 and 310-322).

1974	5,4	12,5	4,1	13,3	181,3	159,3	19,3	50,0	40,0	19,1	41,6

1/ Over the period shown, the indices have differed in name, scope and coverage, but have remained comparable. Indices for the period prior to 1990 have been converted to the base 2000=100.

2/ Average annual inflation rate.

3/ May 1941-1947 standard bread; 1948-1959 bread predominantly sold (mainly white); 1959 and later white bread 900g prior to July 1985.

4/ Up to 1938 prices collected from grocers; 1939 to January 1955 prices at market stalls. Subsequent to January 1955 prices at market stalls and vegetable dealers. Prices are collected by means of a postal survey from 1991. Prices of goods are collected by enumerators visiting retail outlets from 2006.

5/ Factory packed sugar as from 1976.

Source: As from 1939, Directorate: Agricultural Economic Trends, National Department of Agriculture

1/ Over the period shown, the indices have differed in name, scope and coverage, but have remained comparable. Indices for the period prior to 1990 have been converted to the base 2000=100.

2/ Average annual inflation rate.

3/ May 1941-1947 standard bread; 1948-1959 bread predominantly sold (mainly white); 1959 and later white bread 900g prior to July 1985.

4/ Up to 1938 prices were collected from grocers; 1939 to January 1955 prices at market stalls. Subsequent to January 1955 prices were collected at market stalls and vegetable dealers. Prices have been collected by means of a postal survey since 1991. Prices of goods are collected by enumerators visiting retail outlets from 2006.

5/ Factory packed sugar as from 1976.

**Fig. 6.2 - Consumer price index
Annually percentage change**

PRICES

6.5 Consumer price index

The weights are based on surveys of household expenditure conducted in November 1955, November 1966, November 1975, November 1985 and August to November 1990. The current weighting system was published in Statistical release P0141.5, dated 28 February 2002.

The average index for the different urban areas of SA combined, is calculated on a weighted basis by means of the following weights (based on white population until December 1977, all population groups since January 1978):

Urban areas	February 2002
Cape Peninsula.....	18,58
Port Elizabeth and Uitenhage.....	3,56
East London.....	1,72
Kimberley.....	0,64
Pietermaritzburg.....	2,09
Durban and Pinetown.....	11,23
Pretoria, Centurion and Akasia.....	17,39
Witwatersrand.....	38,32
Bloemfontein.....	2,48
Free State Goldfields.....	1,91
Nelspruit/Witbank.....	1,75
Polokwane (Pietersburg).....	0,33
Total.....	100,00

7 | mining

7.1	Summary statistics, 1991-2007	7.2
7.2	Value of minerals sold	7.3
7.3	Production and sales of minerals	7.3
7.4	Index of the physical volume of mining production	7.10
7.5	World gold production	7.11

Figures

Fig. 7.1	Value of minerals sold at constant 2000 prices	7.2
Fig. 7.2	Physical volume of mining production, total and three major contributors as regards gross value of production	7.10

MINING

A. PRODUCTION AND SALES

Particulars are obtained from the Minerals Bureau, Department of Minerals and Energy.

B. VALUES OF MINERALS

The values of minerals are calculated, in general, on a free-on-rail basis when sales are effected in South Africa (SA) and on a free-on-board basis when shipped.

C. INDICES OF THE PHYSICAL VOLUME OF MINING PRODUCTION

The indices are calculated by Statistics South Africa (Stats SA) on the basis of information furnished by the Minerals Bureau, Department of Minerals and Energy. Two indices are shown for total mining production, namely an index including gold production and an index which excludes gold production.

The index of the physical volume of mining production or the production index is a statistical measure of the change in the volume of production. The production index of a major group is the ratio between the volume of production of a major group in a given period and the volume of production of the same major group in the base period. The current base period is 2000. The production in the base period is set at 100. In accordance with international practice, the indices have to be rebased every five years to a new base year. Indices in this publication are published on the basis of 2000=100. Weights have been adjusted according to the production of the year 2000. The Statistical release P2041.1 *Mining Statistics: Indices of the physical volume of mining production, Base: 2000=100* contains historical information for the period January 1990 to November 2002.

D. GOLD PRICE OBTAINED FROM SA RESERVE BANK

E. COVERAGE

(a) The following mining activities in South Africa are covered:

- Any activities in connection with underground and surface mining/open channel mining, including stone quarries, clay and sand pits, wells (except for water) and salt pans, as well as all supplemental activities for the dressing and beneficiating of ores and other crude materials, such as crushing, screening, washing, cleaning, grading, milling, flotation, melting, pelleting, topping and other preparations needed to render the material marketable;
- restoration, rehabilitation, reshaping, revegetating and reclaiming of areas affected by mining activities undertaken by the mine itself; and
- any administrative, clerical, sales, research or other activities directly related to any activity referred to in (a)(i) or (a)(ii).

(b) Establishments which perform the following activities or main function are excluded -

- Work performed on a contract or fee basis in the development and as preparation of mining properties and sites, such as drilling, shaft-sinking, tunneling, cementation and mining construction work by outside contractors;
- the refining of gold and other minerals on a contract or fee basis; and
- exploration, prospecting or prospecting services.

MINING

7.1 Summary statistics

Data in respect of power supply companies as such, and iron and steel works are not included.

1/ Iron ore includes haemetite and magnetite.

7.3 Production and sales of minerals

The values of minerals are calculated, in general, on a free-on-rail basis when sales are effected in South Africa and on a free-on-board basis when shipped.

(a) Metallic minerals

Year	Gold 1/		Silver 1/, 2/		Platinum		
	Sales		Sales		Production	Sales	
	kg	R'000	kg	R'000	kg	kg	R'000
	19	20	21	22	23	24	25
1991	601 380,4	19 296 121	138 961,4	38 329	142 861,2	141 120,7	5 692 118
1992	612 995,1	19 512 563	190 461,9	55 816	152 890,7	137 063,1	4 677 841
1993	618 965,1	23 239 318	182 513,3	67 923	176 167,3	153 711,0	5 188 809
1994	580 239,7	24 953 110	190 676,8	78 127	164 805,5	161 693,6	5 747 782

1/ Gold and silver sales are shown in kilograms (kg) (1 kg = 32,1507 troy ounces).

2/ Mostly exploited together with gold.

1/ Metal-in-concentrate.

2/ Metal and metal-in-concentrate.

3/ One metric carat = 200 milligrams. Mine and alluvial diamonds are included.

4/ Information terminated.

MANUFACTURING

A. CLASSIFICATION OF INDUSTRIES

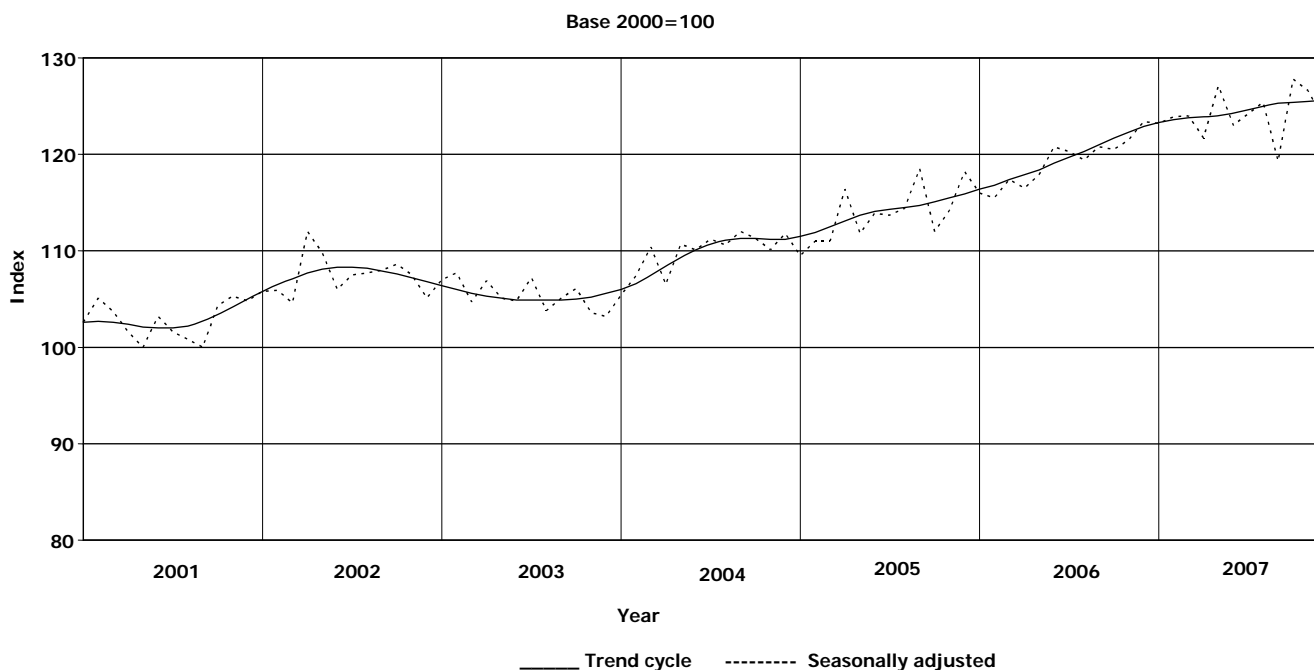

The 1993 edition of the *Standard Industrial Classification of all Economic Activities (SIC)*, Fifth Edition, Report No. 09-90-02, was used to classify the statistical units in the survey. The SIC is based on the 1990 *International Standard Industrial Classification of all Economic Activities (ISIC)* with suitable adaptations for local conditions. Statistics in this publication are presented at SIC division (two digit) and major group (three digit) level. Each enterprise is classified to an industry which reflects its predominant activity.

B. GENERAL NOTES

This survey covers manufacturing enterprises, i.e. those conducting activities in -

- the manufacturing, processing, making or packing of products;
- the slaughtering of animals, including poultry; and
- installation, assembly, completion, repair and related work.

Source: Stats SA, *Manufacturing: Production and sales* (Statistical release P3041.2)

The calculation of the manufacturing production indices is based on the value of manufactured products and articles after the effect of price changes has been eliminated by deflation by using appropriate sub-indices of the production price index (PPI) for 38 of the 44 SIC major groups in manufacturing. The volume indices for the groups tobacco products, coke and refined petroleum products, basic iron and steel products, basic precious and non-ferrous metal products, motor vehicles and parts and accessories for motor vehicles, are calculated on the basis of physical quantities produced.

The sample of manufacturing production and sales is based on an updated version of Stats SA's business register, based on the database of units registered for value-added tax (VAT) and income tax, obtained from the South African Revenue Service (SARS). The latest sample was drawn in May 2007. The weighting factors for combining of manufacturing major groups to total manufacturing were calculated on the basis of the value added data from the large sample survey of manufacturing, 2001.

According to international practice, indices are re-based every five years. The industrial classification used in this publication is based on the *Standard Industrial Classification of all Economic Activities (SIC), January 1993*.

Source: Stats SA, *Manufacturing: Production and sales* (Statistical release P3041.2)

The levels for manufacturing sales in this publication are slightly different from previously published data due to the implementation of a new sample drawn in May 2007. While in total there was very little difference between the levels of sales from the old and new samples for the overlap period, there were differences within the manufacturing major groups. The major reason for the change in the major groups' data is the improved classification of the register of Stats SA's businesses register as already alluded.

The values shown represent net sales (i.e. gross sales less returns, discounts and other deductions) of own manufactured goods, and net charges for work done.

CONSTRUCTION

A. INTRODUCTION

Statistics South Africa (Stats SA) conducts a monthly survey of metropolitan municipalities and large local municipalities on building plans passed and buildings completed for the private sector. An annual survey of the remaining municipalities is conducted regarding buildings completed. Results of the monthly survey are published in Tables 9.1.1-9.1.4. Combined data of the monthly and annual surveys are shown in Table 9.2.

The figures obtained from these surveys do not include the bulk of subsidised low-cost dwelling-houses. Data regarding low-cost dwelling-houses, supplied by the provincial governments and co-ordinated by the National Department of Housing, are shown in Table 9.3.1.

B. SCOPE OF THE SURVEY

The building statistics survey covers municipalities conducting activities regarding:

- Passing of building plans; and
- final inspection of completed buildings.

C. STATISTICAL UNIT

The statistical units for the collection of information are district municipalities, metropolitan municipalities and local municipalities. District municipalities are not in general responsible for passing of building plans or submitting of final completion certificates. These functions are primarily the responsibility of the metropolitan municipalities and the local municipalities. However, district municipalities will execute these functions in the following cases:

- For rural areas that do not fall under the jurisdiction of either a metropolitan or local municipality. These areas are referred to as District Management Areas, and are managed directly by district municipalities.
- Where local municipalities have requested the district municipality to perform this function. In such cases an agreement known as a service level agreement is reached between the local municipality and the district municipality. The local municipality will pay a fee to the district municipality for the service rendered.

D. CROSS-BORDER MUNICIPALITIES

The boundaries and the names of local government institutions have changed as described in the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), and the Local Government Municipal Demarcation Bill (B36B-98).

In some cases borders of municipalities extend over two provinces. The table below lists the cross-border municipalities, the provinces and surveys in which the municipalities are included since 2001.

Cross-border municipalities in South Africa

Municipalities overlapping provincial boundaries	Province in which municipality is included in this publication	Survey in which municipality is included
Mpumalanga/Limpopo Greater Marble Hall Municipality Greater Groblersdal Municipality Greater Tubatse Municipality Bushbuckridge Municipality Maruleng Municipality	Mpumalanga Mpumalanga Limpopo Limpopo Limpopo	Annual survey Annual survey Annual survey Annual survey Annual survey

Matatiele Local Municipality Umzimkhulu Municipality	KwaZulu-Natal Eastern Cape	Annual survey Annual survey

E. CONSTANT PRICES

- (a) The value of building plans passed and buildings completed at constant prices measure the building activities in terms of ruling prices in a specific base year, which is currently 2000. The value of building plans passed at constant prices for each month is obtained by deflating the values at current prices with a price index known as the 'lump sum domestic buildings' as published in Statistical release P0151: *JBCC contract price adjustment provisions work group indices*. In order to be applicable, these indices (base February 1991=100) are converted to the base year 2000=100.
- (b) The value of buildings completed at constant prices is obtained by deflating the values at current prices with the same price index which is used to calculate building plans passed at constant prices (see paragraph a). Since the completion of buildings may extend over a few months to a few years, the current value of buildings completed is deflated by price indices which prevailed at the time the plans were passed. Therefore, the duration of the completion of different types of buildings are taken into account in ascertaining the deflators, e.g. the value of dwelling-houses completed at constant prices at January 2007 is obtained by deflating the current value of dwelling-houses completed for January 2007 with the price index of a month six months prior to January 2007. Furthermore, the value of other residential buildings, non-residential buildings and additions and alterations at constant prices is obtained by deflating the current values with price indices of 12 months, 18 months and 12 months prior to the relevant month, respectively.

F. COMPARISON BETWEEN BUILDING PLANS PASSED AND BUILDINGS COMPLETED

No direct comparison can be made between building plans passed and buildings completed for the following reasons:

- An unknown number of building plans are passed and afterwards not executed;
- if building operations have not commenced within the first year of approval, building plans have to be resubmitted;
- the time-lag between the date of passing of a building plan and the date of completion of the building varies considerably; and
- according to municipalities, final inspections of completed buildings are not always executed.

G. NUMBER OF DWELLING-HOUSES

The number of dwelling-houses is shown and not the number of plans passed, since one plan may cover more than one dwelling-house.

H. GLOSSARY

Additions and alterations	Additions and alterations include extensions to existing buildings, as well as internal alterations of existing buildings.
Blocks of flats	Blocks of flats are regarded as high-density housing consisting of a number of self-contained dwelling-units, each with at least one living-room together with a kitchen and bathroom, conjoined to similar units in one building.
Dwelling-house	A dwelling-house refers to a free-standing, complete structure on a separate stand or a self-contained dwelling-unit, granny flat, on the same premises as an existing residence.
Municipality	Municipality is a generic term describing the 'unit' of government in the local spheres responsible for local government in a geographically demarcated area and including district, metropolitan and local municipalities. AI is an institution consisting of a municipal council (elected political representatives) and the municipal administration (appointed officials).
District municipality	Municipality that has municipal executive and legislative authority in an area that includes more than one municipality, and which is described in Section 155(1) of the Constitution as a category C municipality. (Refer to Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998)).
Metropolitan municipality	Municipality that has municipal executive and legislative authority in an area that includes more than one municipality, and which is described in Section 155(1) of the Constitution as a category A municipality. (Refer to Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998)).
Local municipality	Municipality that shares municipal executive and legislative authority in its area with a district municipality within whose area it falls, that is described in Section 155(1) of the Constitution as a category B municipality.
Non-residential buildings	Non-residential buildings include office and banking space, shopping space, industrial and warehouse space as well as other buildings used for non-residential purposes, such as churches, halls, clubs, schools and hospitals.
Other residential buildings	Other residential buildings include homes for the disabled, boarding houses, hostels, hotels, motels, guesthouses, holiday chalets, entertainment centres, bed-and-breakfast accommodation and casinos.
Residential buildings	Residential buildings comprise dwelling-houses, flats, townhouses and other residential buildings, out-buildings and garages.
Townhouses	Townhouses are multiple, medium-density dwelling-units and include cluster housing, group housing, simplexes, triplexes and other similar dwelling-units which are usually grouped together, with one level of each unit at ground level. This excludes blocks of flats.

1/ The figures as from 2001 are for wholesale energy delivered by Eskom.

The figures on consumption by province exclude the energy used by Eskom for its own consumption as from 2001, while the figures on graph 12.1 include Eskom's own consumption as from 2001. Hence the difference in the data for 2001 in Table 11.2 and on the graph in 11.1.

INTERNAL TRADE

11.1 Wholesale trade, retail trade and motor trade

Stats SA introduced new wholesale trade sales, retail trade sales and motor trade sales surveys utilising an upgraded business register commencing with the month of July 2007. The previous and the current ones were run side by side from April to June 2007, which provided a set of factors that could be applied to the old series to revise previous estimates back to January 1998. The January 1998 to March 2007 figures are thus backcasted data based on the movements of the old series and the level of the new series.

INTERNAL TRADE

11.2 Tourist accommodation statistics by type of accommodation

The results presented in this table are derived from the monthly survey of the tourist accommodation industry. This survey is based on a sample of private and public enterprises operating in the tourist accommodation industry.

The sample was drawn from Statistics South Africa's (Stats SA) business sampling frame, which contains all enterprises that are registered for income tax. Thus, enterprises that are not registered for tax, are excluded from this survey.

All figures are preliminary.

Total Industry

Note:

'Stay unit' refers to the unit of accommodation available to be charged out to guests, for example, a powered site in a caravan park or a room in a hotel. 'Other income' includes rentals and fees received for transport services, offices, shops, garages, dance floors, laundry services, telephone and fax services. Other accommodation includes lodges, bed and breakfast, self-catering enterprises.

INTERNAL TRADE

11.3 Civil cases recorded, summonses issued and civil judgements for debt

The statistics of civil cases are the results of the revised monthly sample survey which was introduced with effect from January 1994. The data are based on information collected from a sample of 152 magistrates' offices in South Africa excluding the former Transkei, Bophuthatswana, Venda and Ciskei (TBVC states).

The monthly sample particulars are raised to obtain estimated totals. The raising factor is based on information relating to all civil cases recorded during the year ended 30 June 1992.

The total number of civil cases recorded by the magistrates' offices in the sample represent 95 per cent of the civil cases recorded by all magistrates' offices during the year ended 30 June 1992.

Source: Stats SA, *Statistics of civil cases for debt* (Statistical release P0041)

1/ Civil cases recorded relate to all civil cases, in other words, debt cases as well as claims for damages, ejectment orders and other non-debt cases are included.

2/ Civil summonses for debt relate to civil debt cases only and thus exclude claims for damages, ejectment orders and other non-debt cases.

3/ Civil judgements relate to judgements given in respect of undefended civil debt cases only (default and consent judgements).

INTERNAL TRADE

11.4 Insolvencies

The figures are based on information extracted from the Masters' Notices published currently in the Government Gazette and refers to insolvencies Act No. 24 of 1936).

The statistics show the number of final sequestrations. This does not represent the number of persons involved, as a partnership is counted as one insolvency, irrespective of the number of partners.

PUBLIC FINANCE

13.3 Contribution of the different levels of general government to the total consolidated cash payments for operating activities and purchases of non-financial assets by the general government sector for the 2004/05 and 2005/06 fiscal years**¹

Levels of general government	R million		Annual percentage change ²	Percentage of total expenditure	
	2004/2005	2005/2006		2004/2005	2005/2006
	6	7	8	9	10
National government	156 911	165 523	5,5	33,2*	31,5
Provincial governments	184 968*	209 016	13,0	39,2*	39,8
Extra-budgetary accounts and funds	48 410*	55 950	15,6	10,3	10,7
Higher education institutions	19 789*	20 877	5,5	4,2	4,0
Municipalities	62 043*	73 977	19,2	13,1*	14,1
Total expenditure	472 119*	525 342	11,3	100,0	100,0

1/ The sum of the data may not necessarily add up to totals due to rounding-off of figures.

2/ The annual percentage change is the difference in the expenditure by the level of general government of the current year compared with the expenditure by the same level of general government in the previous year, expressed as a percentage.
